Other towns are Ipswich (25,703), Gympie (8,000), and Southport (7,850), in the south-east; Toowoomba (32,126), and Warwick (7,000), on the Darling Downs; Mount Morgan (5,000), near Rockhampton; and Charters Towers (8,600), and Mount Isa (3,139) inland from Townsville.

Thursday Island, the smallest of the Prince of Wales group, in long. 142° E. and lat. 11° S., has an area of 900 acres. It lies in Torres Straits, about 30 miles N.W. of Cape York and some 1,400 miles by sea from Brisbane. The island had a population of 1,047 at the 1933 census and is the headquarters of the pearlshell and beche-de-mer fisheries.

Transmission of mails from London to Brisbane, by air, 10 days; by sea (approximate), 32 days.

SOUTH AUSTRALIA.

The State of South Australia is situated between 26° and 37° S. lat. and 129° and 141° E. long., the total area being 380,070 sq. miles.

POPULATION.—In 1943 the population numbered 617,846 (308,776 males and 309,070 females). The number of full-blooded aboriginals is estimated at 2,700.

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1940	10,117	5,708	6,950
1941	10,965	6,288	6,855
1942	11,278	6,712	8,129
1943	13,145	6,482	6,263

Birth rate (1943) 21.5, death rate 10.6, marriage rate 10.23 per 1,000 of population. Infantile mortality 36.14 per 1,000 births, being one of the lowest rates in the world.

Religions.

Religion is free and receives no State aid. At the Census, 1933, the persons belonging to the

principal religious denominations were as follows:—Church of England, 164,531; Methodists, 127,978; Congregationalists, 13,836; Baptists, 19,081; Lutherans, 26,027; Roman Catholics, 62,466; Presbyterians, 25,060; and Churches of Christ, 15,262.

PHYSIOGRAPHY.

The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The north-western portion is partly desert, while the northern portion of the State, between Lake Eyre and 26° South latitude, is unpromising in comparison with the fertile land that surrounds the hill country of the east. Except for the Murray, which flows for some 250 miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

The construction of a pipe line, 235 miles long, from Morgan, on the Murray, to Whyalla, on Spencer's Gulf, was completed in 1944. This provides water for large industries at Whyalla, and will augment the supplies for farming and industrial districts *en route*. The estimated cost is £3,122,000, and total capacity 1,200,000,000 gallons annually for Whyalla, and 900,000,000 for intervening northern districts.

Climate.—The mean annual temperature at Adelaide is 63°, the winter temperature (July–August) averaging 53°, and the summer (November–March) 71°. During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight. The average annual rainfall at Adelaide, derived from 100 years' record, is 21 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas. In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches.

GOVERNMENT.

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant-Governor.

GOVERNOR.

Governor of South Australia, His Excellency Lieutenant-General Sir Charles Willoughby Norrie, K.C.M.G., C.B., D.S.O., M.C. (1944) £5,000
Private Sec., Capt. C. R. J. Duncan, A.D.C., Comm. R. C. Warden, O.B.E., R.D., R.N.R.; Capt. J. Richardson; Capt. M. Farebrother.

Lieut.-Governor, Hon. Sir John Mellis Napier, K.C.M.G., LL.B. (1942).

THE MINISTRY.

(March 29, 1941.)

(£7,750 is allotted as salaries to Ministers.)

Premier and Treasurer, and Minister of Immigration, Hon. Thomas Playford.

Attorney-General and Minister of Education, Industry and Employment, Hon. Charles Lemphriere Abbott.

Chief Secretary and Minister of Mines and of Health, Hon. Alexander L. McEwin, M.L.C.

Minister of Lands, Repatriation and Irrigation, Hon. R. J. Rudall, M.L.C.

Minister of Public Works and of Railways, Marine and Local Government, Hon. Malcolm McIntosh.
Minister of Agriculture and Forests, Hon. George Frederick Jenkins.

AGENT-GENERAL IN LONDON.

Agent-General and Trade Commissioner for South Australia, Sir Charles F. G. McCann, South Australia House, Marble Arch, W.1.....£1,600
Secretary, L. King.

THE LEGISLATURE.

Parliament consists of a *Legislative Council* of 20 members elected for 6 years, one-half retiring every 3 years; and a *House of Assembly* of 39 members, elected for a maximum duration of 3 years. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female; there is a small property qualification for electors to the Legislative Council, who numbered 122,314 in 1944, those for the Assembly numbering 401,747.

President of the Legislative Council, Hon. Sir Walter Duncan 800
Speaker of the House of Assembly, Hon. Sir Robert Dove Nicholls 800

THE JUDICATURE.

Law and Justice.—The Supreme Court is presided over by the Chief Justice and four Puisne Judges; there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates, and the usual Police Courts.

Chief Justice and Judge of Vice-Admiralty, Hon. Sir John Mellis Napier, K.C.M.G., LL.B. £2,500
Judges, Hon. F. W. Richards, LL.D.; Hon. G. S. Reed, K.C.; Hon. H. Mayo, LL.B. (and a vacancy) 2,000

EDUCATION.

Public Education (Primary, Secondary and Technical) is provided by the State, and controlled by a responsible Minister; it is secular, compulsory, and free, except that from Jan. 1, 1934, fees may be charged for secondary education of children over 14 years. In 1941 there were 1,005 State schools, with 79,011 scholars; State expenditure in 1941 was £1,145,273, including grants to University, Libraries, &c. The Government grants Exhibitions and Scholarships, carrying the holders to higher schools and the University. Private schools number 178, with 16,923 scholars. There is an endowed University at Adelaide, founded in 1874, with (1939) 1,153 undergraduates, and 1,474 other students; all classes are open to women. A State School of Mines and Industries has also been established, and there are technical schools at 9 country centres and also special trade schools for apprentices and domestic art centres. The public library, museum, art gallery and local institutes are supported or assisted by the State.

STATE FINANCE. (For years ended June 30)

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1940	12,755,648	12,918,376	110,709,323
1942	15,002,000	13,712,000	109,779,724
1943	15,192,521	14,959,553	108,430,000
1944	15,545,000	15,529,000	108,305,340

Banking.—There are 10 banking institutions in Adelaide, including the Commonwealth Government Bank and the State Bank of South Australia, with about 400 branches and agencies, having total average deposits of £50,120,000 in June quarter, 1944. The savings banks on June 30, 1944, had deposits amounting to £48,600,000. Approximately 90 per cent. of the population have Savings Bank accounts, and 65 per cent. have insurance policies averaging £140 per policy.

PRODUCTION AND INDUSTRY.

The value of production 1942-43 was crops £15,814,000, pastoral £8,460,000, mines and quarries £3,400,000, dairying £3,820,000, fisheries, game and poultry, and forestry £3,000,000.

Land Tenure.—Of the total area of the State (243 million acres) 11 million acres have been sold; 5 million have been alienated by the Crown under systems of deferred payment; 110 million acres are held under pastoral leases and 20 million under other miscellaneous leases.

Agriculture.—The total area cultivated is 7,600,000 acres—under wheat, 1943/4, 1,600,000 acres, hay 320,000, oats 225,000, barley 260,000. Wheat harvest 1943-44, 20,700,000 bushels; barley, 5,000,000 bushels. Oranges, lemons, apples, apricots, peaches, and all stone fruits and olives are successfully grown, and fruit drying is profitable. There were 61,000 acres of vines, with an average annual production of 15,000,000 gallons of wine. Considerable quantities of fruits (fresh and dried) and also wine are annually sent to overseas countries, principally the United Kingdom and the other Australian States. Brandy and other spirits are also produced. The land is also very suitable for the growing of all kinds of root crops and vegetables.

Live Stock (March 31, 1944).—There were 10,400,000 sheep, 415,000 cattle, 154,000 horses, 186,000 pigs. Wool production (1943-44), 115,000,000 lb.

Minerals.—Iron, gypsum, salt, copper, gold opals, &c., are found, the total mineral output being valued at £3,400,000 (1943).

Manufactures.—In 1943 there were 2,134 factories, employing 72,751 hands, the gross value of the output being £67,600,000, and the wages paid £19,734,000. Plant, machinery, land, and buildings were valued at £35,330,000.

Transport, &c.—There were (1944) 3,861 miles of railway in South Australia, 150 miles of electric tramways, 52,000 miles of roads and several good harbours. The railway mileage includes the Transcontinental Railway from Port Pirie (South Australia) to Kalbarrie (Western Australia) which forms a link in the system from Brisbane to Fremantle; and also part of the Commonwealth line from Port Augusta to the Northern Territory. There are 920 post offices in the State.

Wireless (1944).—Broadcasting stations 9, Listeners licences 156,000.

OVERSEAS TRADE.

Year.	Imports.	Exports.
	£stg.	£A
1938-39	5,849,190	14,822,330
1941-42	7,462,235	14,812,300
1942-43	6,858,900	9,423,400
1943-44	4,781,000	15,585,000

The principal exports are breadstuffs, pastoral and dairying products, fruits, wine and minerals.

TOWNS.

ψADFLAIDE, the chief city and capital, population (1943), 360,000, inclusive of suburbs within 10 miles radius. Other towns are Moonta (3,300), Kadina (3,650), Wallaroo (3,000), ψPort Pirie (12,500), ψWhyalla (7,700), and ψPort Augusta (3,450) at the head of Spencer Gulf, and Kapunda (2,000), Gawler (5,000), and Peterborough (3,600) on the line from Adelaide to the north. Mt. Gambier (6,600), Naracoorte (2,500) and Millicent (2,300) in the south-east, and ψPort Lincoln (3,150) on Eyre Peninsula. Murray Bridge (4,350) and Renmark (4,350), and Berri (2,150) on the River Murray.

Transmission of mails from London to Adelaide, approximate, 29 days by sea and 9 days by air.

TASMANIA.

Tasmania is an island in the South Pacific Ocean off the southern extremity of Australia, from which it is separated by Bass Straits, about 140 miles wide, in which are situated the Furneaux Group and King Island, included within the State. It lies between 40° 33'–43° 39' S. lat. and 144° 39'–148° 23' E. long., and contains an area of 26,215 square miles.

POPULATION.—On June 30, 1944, the estimated population numbered 245,434 (123,892 males and 121,542 females).

Year.	Births.	Deaths.	Marriages.
1939	5,004	2,426	2,264
1942	5,305	2,430	2,431
1943	5,597	2,527	2,202
1944	5,200	2,494	1,935

The birth rate in 1944 was 21.19, death rate 10.16, marriage rate 8.7 per 1,000. Infant mortality (1944) 38.3 per 1,000 births.

Religion.

In 1933 there were 105,228 members of the Church of England, 33,189 Roman Catholics, 26,470 Methodists, 13,194 Presbyterians, 3,963 Congregationalists and Independents, and 4,666 Bap. tists.

PHYSIOGRAPHY.

The surface of the country is generally hilly and timbered, with mountains from 1,500 to 5,000 ft. in height, and expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions; the hot winds of Australia do not reach the island. At Hobart the mean annual temperature averages 54.4°, the mean temperature for Dec., Jan., and Feb. being 61.5°, and that of June, July, and Aug. 46.9°. The western side of the island is very wet, the eastern side having a rainfall similar to that of

eastern England; the average rainfall varies from 20 inches to 100 inches in different parts.

GOVERNMENT.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was established. In 1901 Tasmania became a State of the Australian Commonwealth. The State executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of Ministers responsible to the Legislature.

GOVERNOR.

Governor of Tasmania, His Excellency Admiral Sir (Thomas) Hugh Binney, K.C.B., D.S.O., *apptd.* Aug. 5, 1945, for 5 years.
Official Sec., E. J. Stopp, M.B.E.
A.D.C. (vacant).

Lieutenant-Governor (vacant).

THE MINISTRY.

(Sworn-in Dec. 18, 1939.)

Premier and Minister of Education, Hon. R. Cosgrove.
Treasurer, Hon. E. Dwyer-Gray.

Attorney-General, Hon. James McDonald, M.L.C.

Agriculture, Hon. J. L. Madden.

Lands and Works, Hon. E. Brooker.

Chief Secretary and Minister for Transport, Hon. C. E. Culley.

Honorary Ministers, Hon. H. T. Lane (Mines); Hon. W. P. Taylor (Forests); Hon. E. R. Howroyd (Health).

AGENT-GENERAL IN LONDON.

Agent-General for Tasmania, Sir Claude James.
Address, Australia House, Aldwych, W.C.2.

THE LEGISLATURE.

Parliament consists of two Houses, a *Legislative Council* of 18 members, elected for six years (3 retiring annually, in rotation); and a *House of Assembly* of 30 members, elected by proportional representation for five years, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 6 months; the electorate for the Council is smaller, having a property or educational qualification for both sexes.

President of the Legislative Council, Hon. C. J. Eady.
Clerk of the Council, C. H. D. Chepmell.

Speaker of House of Assembly, Hon. J. J. Dwyer, *ψC.*

Clerk of the House, Charles K. Murphy.

THE JUDICATURE.

There are justices of the peace and courts of petty, general and quarter sessions, and a Supreme Court with a Chief Justice and two Puisne Judges.

Chief Justice, Hon. Sir John Morris.....£1,800
Puisne Judges, Hons. A. I. Clark; Wilfred Hutchins.....each 1,500

EDUCATION.

Primary education is compulsory, secular, and free, there being 373 State primary schools in 1942.

with 29,654 children on the registers. Secondary education is also provided by the State (7 high schools with an average attendance of 1,743), and by private endowment. The *University of Tasmania* at Hobart, established 1890, had 388 students in 1943; there are technical schools at Hobart, Launceston, Burnie, Queenstown, Rosebery, and Zeehan.

FINANCE.

Year.	Revenue.	Expenditure.	Debt.
1938-39	£3,614,764	£3,640,748	£26,366,990
1940-41	2,921,573	3,103,204	28,165,858
1941-42	3,358,707	3,357,122	28,757,388
1942-43	3,290,324	3,399,804	28,699,117
1943-44	3,498,740	3,468,595	30,083,802

Banking.—Dec. 31, 1943, the banks of issue had total deposits £14,411,207; the savings bank deposits, March 31, 1945, were £16,267,000 or £66 5s. 7d. per head of population.

PRODUCTION AND INDUSTRY.

The net value of production in 1942-43 was £18,548,000—agriculture and pastoral £6,711,000, manufactures £8,075,000, mines and quarries £2,540,000.

Agriculture and Live Stock.—Of the total area of 16,778,000 acres there were, in 1942-43, 299,448 acres under crops. The principal crops are apples and other fruit, potatoes, hay, followed by hops, peas, oats, green forage and wheat. The live stock included (March 31, 1943) 244,681 cattle, 2,227,000 sheep, 49,251 pigs, and 27,077 horses. The wool production (1942-43) was 17,256,000 lb. (£1,370,500).

Electrical Energy.—The Hydro-Electric Commission of Tasmania has effected important water-power developments at the Great Lake (Waddamana and Shannon), Lake St. Clair (Tarraleah) in the centre of the State, and at Tarraleah. The network now extends to practically all parts of the State and the advantages of cheap electric power exercise continued attraction for new establishment of manufacturing industries.

Forestry.—State forest areas 1,562,000 acres. Area held under lease or forest permits for saw-milling, logging, &c., 290,000 acres. The quantity of timber of various species cut on Crown Land forests in 1941-42 was 137,102,998 super feet, including 12,190,998 super feet for wood-pulp.

Minerals.—The chief minerals produced are copper, zinc, tin, silver, lead, gold, the value of all minerals produced in 1943 being £A2,419,733.

Manufactures.—The chief factories for export are metallurgical, fruit, preserving woollen mills, carbide, cement, and confectionery; the net value of production in 1942-43 was £8,075,000, the capital invested in the 992 establishments being £13,060,525.

CAPITAL. Ψ HOBART, which celebrated its centenary Aug. 21, 1942. Population (Dec. 31, 1943), 54,215 (with suburbs, Glenorchy and Moonah, Kingston, Brown's River Road, Bellerive and Lindisfarne), 70,838.

Other towns are Ψ Launceston (pop. 35,785), Ψ Devonport (5,300), Ulverstone (3,000), Burnie (3,700), and Queenstown (4,000).

Transmission of mails, 34 days by sea; 13 days by air.

VICTORIA.

The State of Victoria comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes; it lies between the 34th and 39th parallels of South latitude, and the 141st and 150th meridians of East longitude. Its extreme length from east to west is about 493 miles, its greatest breadth is about 290 miles, and its extent of coast-line is about 980 geographical miles, including the length around Port Phillip Bay, Western Port and Corner Inlet, the entire area being 87,884 square miles.

POPULATION.—The estimated population at June 30, 1944, was 1,997,804 (987,347 males and 1,010,457 females).

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1939	30,493	20,169	17,368
1941	34,168	20,522	20,897
1942	35,927	21,973	23,636
1943	39,117	21,327	28,356

Vital Statistics.—Annual rate per 1,000 of population in 1943:—Births, 19.75; Deaths, 10.77; Marriages, 9.27. Deaths under 1 year per 1,000 births, 35.76.

Religion.

There has been no State aid to religion since 1875. Members of the Church of England at the date of the census in 1933 numbered 626,172, "Protestants" 25,231. Presbyterians 276,699, Methodists 193,096, Baptists 31,427, Church of Christ 26,274, Independents 12,458, and Roman Catholics 325,526. The number of persons who did not state their religion was 235,556.

PHYSIOGRAPHY.

The *Australian Alps* and the *Great Dividing Range* pass through the centre of the State, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys. The length of the Murray River, which forms part of the northern boundary of Victoria, is 997 miles along the Victorian bank. Melbourne, the capital city, stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

Climate.—The mean temperature, recorded at the Melbourne Observatory, over a period of 88 years, ended in 1943, was 58.5° Fahrenheit, the thermometer rising (on the average four days during the year) above 100° in the shade, and falling (on the average for about two nights in the year) below 32° F. The average number of days on which rain fell was 141, and the average yearly rainfall was 25.62 inches.

GOVERNMENT.

Victoria was originally known as the Port Phillip District of New South Wales, and was erected into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor, appointed by the Crown, aided by an Executive Council of 12 members.

Governor of the State of Victoria, His Excellency Major-General Sir Winston Dugan, G.C.M.G., C.B., D.S.O., born 1877, assumed office July 17, 1939, for 5 years; term extended to July 16, 1946... £5,000
 Private Sec., Lt.-Col. E. J. de C. Boys, M.C.
 Official Sec., C. W. Kinsman, O.B.E., J.P.

THE MINISTRY.

(Sworn-in, Oct. 2, 1945.)

Premier, Treasurer and Attorney-General, Hon. I. Macfarlan, K.C., M.L.A.
 Chief Secretary, Hon. T. K. Maltby, M.L.A.
 Minister of Health and Housing, Hon. W. C. Haworth, M.L.A.
 Minister of Agriculture, Hon. W. R. Cumming, M.L.A.
 Minister of Water Supply and Decentralization, Hon. E. J. Mackrell, M.L.A.
 Minister of Education and of Labour, Hon. L. H. Hollins, M.L.A.
 Minister of Lands and Forests, Hon. W. H. Everard, M.L.A.
 Minister of Transport and Mines, Hon. J. H. Disney, M.L.C.
 Minister of Public Works, Hon. L. H. McBrien, M.L.A.
 Without Portfolio, Hon. A. Michaels, M.L.A.

AGENT-GENERAL IN LONDON.

Agent-General for Victoria, The Hon. N. A. Martin, Victoria House, Melbourne Place, Strand, W.C.2.

THE LEGISLATURE.

Parliament consists of two Houses—the Legislative Council of 24 members, elected for the 17 Provinces for 6 years, one-half retiring every 3 years, and the Legislative Assembly of 65 members, elected for a maximum duration of 3 years, for the 65 electoral districts, by universal adult suffrage. The electors (June 30, 1945) for the Council number 481,812, and those for the Assembly, 1,276,781.

President of the Legislative Council, Hon. Sir Clifden Eager, K.C. £750
 Speaker of the Legislative Assembly, Brigadier Hon. Sir George Knox, C.M.G., V.D. 1,200

THE JUDICATURE.

There are magistrates' courts, and general sessions and county courts; and a Supreme Court with a Chief Justice and six Puisne Judges.

Chief Justice, His Honour Lieutenant-General Sir Edmund F. Herring, K.B.E., D.S.O., M.C., E.D. (1944) £3,000
 Puisne Judges, Their Honours Sir J. R. Macfarlan, C. J. Lowe, C. J. Gavan Duffy, F. R. B. Martin, N. O'Bryan, W. K. Fullagar each 2,500
 Secretary to the Law Department, G. F. Knight, J.P. 1,180
 Chief Clerk of Supreme Court and Master-in-Equity, E. S. Vance 1,200
 Taxing Master for the Supreme Court, E. H. Trebilco 800
 Crown Prosecutors, W. St. G. Sproule, K.C., £1,220; R. M. Nolan, M. L. Cussen, L. P. Little each 920
 Crown Solicitor, F. G. Menzies 1,500

EDUCATION.

Primary Education is compulsory, secular and free between the ages of 6 and 14, there being

221,219 children on the registers of the 2,585 primary schools and 42,104 on the registers of the 154 secondary schools in 1939, the average attendance being 70 per cent. in the primary and about 84 per cent. in the secondary schools. At registered schools which are not under State control, 75,398 pupils were in attendance at the 514 schools in 1939. There is a State-aided University at Melbourne, with five affiliated colleges (Trinity, Ormond, Queen's, Newman and the University Women's College).

FINANCE.

The revenue and expenditure and State Debt for five years are given as follows:—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1938-39	28,354,711	29,141,953	179,698,118
1941-42	30,121,570	30,110,750	177,716,484
1942-43	37,244,562	36,490,231	175,934,652
1943-44	36,247,814	35,807,503	174,762,413

Banking, &c.—There were (June 30, 1943) 13 banks (including Commonwealth Bank) with total assets £380,585,000 and liabilities £283,672,000. The state savings bank deposits at June 30, 1943, amounted to £97,517,000; in addition, deposit in the Commonwealth savings bank (in the State of Victoria) amounted to £23,731,000.

PRODUCTION AND INDUSTRY.

The total value of production in 1941-42 was £188,606,000—agricultural £125,795,000, pastoral £38,498,000, dairying £15,567,000, poultry and bee keeping £5,100,000, trapping £2,200,000, forestry £2,000,000, mining and quarries £3,000,000, manufactures £111,000,000.

Agriculture.—Of the 5,500,000 acres under cultivation in 1942-43, 2,145,000 were wheat crops and 428,000 oats, and 789,000 acres were cut for hay. In 1942-43 1,400,000 gallons of wine were produced.

Live Stock.—There were in 1945 16,457,100 sheep, 1,903,110 cattle, 296,232 pigs, and 253,782 horses. The quantity of wool produced in 1941-42 was 212,920,000 lb., valued at £12,600,000. In Jan. 1944, disastrous bush fires in the western districts destroyed 750 homesteads and nearly 1,000,000 sheep. The cost of repairing the damage was estimated (Feb., 1944) at £45,000,000.

Minerals.—The gold production in Victoria, which had declined to 24,119 oz. in 1930, has steadily increased since the year 1931; the amount produced in 1942 was 102,000 oz. (£1,060,000). Other minerals raised consisted principally of coal (black and brown), kaolin, tin, gypsum and bauxite.

Trade and Industry.—Wool, wheat, flour, butter, live stock, fruits, milk and cream, meats, and poultry are the staple productions of the State; and the manufactures (9,215 factories, &c., employing 212,461 hands in 1939-40) are mainly for home consumption. The export trade (excluding inter-state trade) consists largely of agricultural and pastoral products. The principal overseas imports of the State are apparel, textiles, manufactured fibres, machines and machinery, metals and metal manufactures, tea, timber, petroleum spirit, paper, stationery, &c., and drugs and chemicals.

OVTREAS TRADE.

Year.	IMPORTS. (British Currency.)	EXPORTS. (Australian Currency.)
	£	£A

1943-44	90,252,312	36,546,893

CITIES AND TOWNS.

Ψ MELBOURNE, the capital city, which is an episcopal sec, was originally laid out in the year 1837 with wisdom and foresight; its wide streets, park lands, public gardens, university, public library, museum and large churches are the principal features of the city. Melbourne and suburbs cover an area of 125,926 acres and contained on Dec. 31, 1943, an estimated population of 1,170,000. Other cities are Ψ Geelong, 41,180; Ballarat, 39,470; Bendigo, 30,800; Ψ Warrnambool, 9,300; Mildura, 7,500. The chief towns are Wonthaggi, 6,350; Hamilton, 6,100; Shepparton, 6,250; Maryborough, 5,900; Colac, 5,600; Horsham, 5,600; Castlemaine, 5,750; Ararat, 5,050; Wangaratta, 5,400; Stawell, 4,930; Echuca, 4,480 and Sale, 5,000.

Melbourne, distant from London 11,267 miles. Transmission of mails, approximate, 30 days by sea, 10 days by air. On Oct. 17, 1945, Royal Mail SS. *Andes* (26,000 tons) tied up at Port Melbourne in 23 days, 6 hours, from Liverpool.

WESTERN AUSTRALIA.

Includes all that portion of the continent west of 120° E. long., the most westerly point being in 112° 52' E. long., and from 13° 30' to 35° 8' S. lat. Its extreme length is 1,500 miles, and 1,000 miles from east to west; total area 975,920 sq. miles.

POPULATION.—At the Census of June 30, 1933, the population was 438,852 (233,937 males, 204,915 females), and on Dec. 31, 1943, 481,479 (250,851 males and 230,622 females).

The estimated number of full-blooded aboriginals on June 30, 1941, was 21,700.

Year.	Births.	Deaths.	Marriages.
1940	9,121	4,486	5,234
1941	10,118	4,769	5,074
1942	9,901	5,076	5,441
1943	10,481	4,587	4,528

Religions.—Census of 1933—188,457 Church of England, 74,354 Roman Catholics, 44,521 Methodists, and 32,694 Presbyterians.

Physical Features.—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,044 ft.) in the north-west division or that of Bluff Knoll (3,640 ft.) in the Stirling Range in the south-west. The coastal regions are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a seaward slope to the Indian Ocean, into which flow many streams, notably the Preston, Collic, Murray, Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey.

In the north the Fitzroy flows from the King Leopold ranges into the Indian Ocean, and the Drysdale of Ord into the Timor Sea. The greater portion of the State may be described as an immense tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which varies from stretches of clayey soils to the sand dunes of the far interior. The climate is one of the most temperate in the world. The total rainfall at Perth during 1939 was 45.70 inches, the average for the past 64 years 30.90. Of the total area two-thirds is suitable for pastoral purposes.

GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Act, 1911; the Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

GOVERNOR.

Governor of Western Australia (vacant).
Lieutenant-Governor, His Excellency Hon. Sir James Mitchell, K.C.M.G. (July, 1933).
Private Sec., Comdr. B. L. Vinden, R.D., R.N.R.

EXECUTIVE COUNCIL.

(Sworn in August 3, 1945.)
Premier and Treasurer, Hon. Frank Joseph Scott Wise, M.L.A. £1,700
Minister for Works, Water Supplies and Industrial Development, Hon. Albert Redvers George Hawke, M.L.A. 1,500
Minister for Lands and Labour, Hon. Alexander Hugh Panton, M.L.A. 1,500
Chief Secretary and Minister for Police, Hon. William Henry Kitson, M.L.C. 1,500
Minister for Justice and Health, Hon. Emil Nulsen, M.L.A. 1,500
Minister for the North-West and Minister for Forests, Hon. Aubrey Augustus Michael Coverley, M.L.A. 1,500
Minister for Education, Agriculture and Social Services, Hon. John Trezise Tonkin, M.L.A. 1,500
Minister for Mines, Railways and Transport, Hon. William Mortimer Marshall, M.L.A. 1,500
Honorary Minister, Hon. Edmund Harry Gray, M.L.C.

AGENT-GENERAL IN LONDON.

Agent-General for Western Australia, Hon. Michael Francis Troy. Offices, Savoy House, 115-116, Strand, W.C.2. £2,000
Secretary, C. C. Hillary. 830

THE LEGISLATURE.

Parliament consists of a Legislative Council of 30 members elected for 6 years, and a Legislative Assembly of 50 members elected for 3 years by universal adult suffrage; the electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration.

President of the Legislative Council, Hon. Sir John Waters Kirwan. £1,000
Speaker of the Legislative Assembly, Hon. J. B. Sleeman. 1,000

THE JUDICATURE.

There is a Supreme Court presided over by a Chief Justice and two Puisne Judges, which has complete jurisdiction in all criminal and common law matters. There are courts known as local courts which have limited civil jurisdiction. There are Courts of Session, dealing with criminal matters outside Perth, and there are Magistrates' courts, Children's courts and an Arbitration court.

Chief Justice, Hon. Sir J. A. Northmore,
K.C.M.G., LL.B. £2,300
Puisne Judges, Hons. J. P. Dwyer, A. A.
Wolff. each 2,000

EDUCATION.

Education.—Education is compulsory and free, and 809 primary schools are under the control of the Minister of Education, with 54,404 pupils in 1941. In addition the Government has established a Teachers Training College, Technical Schools, Schools of Mines, a College and a School of Agriculture, and several Secondary Schools (in the capital and the more important country centres), and subsidises a University. The total amount expended on education (from Revenue), during the year ended June 30, 1942, was £918,225, including a grant of £42,962 to the University of Western Australia.

FINANCE.

Revenue and Expenditure and gross public Debt for 5 years ended June 30 :—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1941	11,432,068	11,420,957	97,791,724
1942	11,940,149	11,938,381	97,359,245
1943	12,394,502	12,428,312	96,988,206
1944	13,580,176	13,551,154	96,478,295
1945	13,584,870	13,583,200	..

Banking.—There were, including the Commonwealth Bank of Australia, 8 cheque-paying banks, formerly banks of issue, in the State on June 30, 1944, with average deposits £36,725,000. The amount due to depositors in Savings Banks on June 30, 1944, was £25,179,100.

PRODUCTION AND INDUSTRY.

The gross value of primary production in 1942-43 was: agricultural £7,687,000, pastoral £8,172,500, dairying, poultry keeping and bee-farming £3,832,000, forestry and fisheries £1,766,000, mining £19,500,000.

Crops and Live Stock.—Of the total area (624,588,800 acres) 1,567,000 acres were under wheat for grain, the 1944-45 crop being estimated at 13,000,000 bushels. On March 31, 1944, the live stock included 871,000 cattle, 1,000,000 sheep, 164,000 pigs, and 107,000 horses. In 1940-41 there were 9,000 acres of vineyards, and 21,500 acres of orchards. The wool clip in 1942 was 97,635,000 lb. in the grease.

Manufacturing Industries.—There were on June 30, 1943, a total of 1,800 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed in them was 25,813.

Forestry.—The forests contain some of the very finest hardwoods in the world. Two of these, jarrah (*Eucalyptus marginata*) and karri (*Eucalyptus diversicolor*), are largely exported. The quantity of timber cut during the 12 months ended June, 1943, is computed to have been 128,878,000 super feet.

Minerals.—The mines of the Coolgardie and adjacent goldfields, which cover a vast portion of the interior and extend to the 125th meridian, and of the northern fields, are being constantly worked. The production of gold in the State for 1943 was 546,600 fine oz. (£A5,710,670). The total amount produced from 1886 to Dec. 31, 1943, is 49,283,132 fine oz. (£A266,386,140). Magnetic iron, lead, copper, tin and manganese ores and coal, asbestos, bauxite and gypsum exist in large quantities.

Communications.—On June 30, 1944, there were 4,381 miles of government railway; 277 miles of private lines; and 450 miles of Commonwealth line (Kalgoorlie—Port Augusta). On Dec. 31, 1942, there were on the state register 347 vessels of 13,814 tons, of which 75 were steamers (6,129 tons) and 272 sailing vessels (7,685 tons).

INTER-STATE AND OVERSEAS TRADE.

Year.	Imports.	Exports.
	£Stg.	£A.
1934-35	14,226,405	16,879,168
1935-36	16,111,631	18,891,679
1936-37	18,028,359	20,991,133
1937-38	19,334,013	23,100,537
1938-39	18,048,238	22,990,333
1939-40	19,237,022	24,576,754
1940-41	18,018,476	24,839,479
1941-42	17,612,479	25,351,484

The principal exports of local products in 1941-42 were wheat (£A2,010,540), wheat flour (£A842,600), wool (£A4,823,880), gold bullion (£A10,387,000), timber (£A700,000), hides and skins (£A300,000), beef (£A163,000), mutton and lamb (£A220,000), butter (£A217,000) and fresh fruit (£A123,000).

TOWNS.

CAPITAL, ΨPERTH. Population on Dec. 31, 1941, of Metropolitan area, including the part of Fremantle, 230,000.

Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantle. King's Park (approximately 1,000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, possesses unique natural beauty. Other towns are ΨFremantle (including suburbs, 28,169), Kalgoorlie (11,000), Boulder (7,165), ΨBunbury (6,180), Northam (5,000), ΨAlbany (5,000), and ΨGeraldton (5,400).

Transmission of mails from London to Perth, approximate, 26 days (ordinary), 10 days (Air), Via America (air) 14 to 18 days.

The Dominion of New Zealand

PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 34° 30' and 47° 20' South latitude and 166° East longitude and 170° West longitude, with several groups of smaller islands lying at some distance from the principal group.

Geographical.—The two principal islands of New Zealand have a total length of 1,040 miles, and a combined area of 102,374 square miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several volcanoes, two of which are active, others being dormant or extinct. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,525 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles long by 1½ wide) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

Climate.—New Zealand has a moist-temperate marine climate, but with abundant sunshine. A very important feature is the small annual range of temperature which permits of some growth of vegetation, including pasture, all the year round. Very little snow falls on the low levels even in the South Island. The mean temperature ranges from 50° F. in the North to about 49° F. in the South. Rainfall over the more settled areas in the North Island ranges from 35 to 70 inches and in the South Island from 25 to 45 inches. The total range is from approximately 13 to over 250 inches. The number of rain days is generally in the neighbourhood of 160 in the North Island and between 110 and 140 in the South, except on the west coast. The amount of sunshine is generally over 2,000 hours per annum and ranges between 1,600 and 2,500 hours.

GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Janszoon Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited, and thoroughly explored, in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. From 1792 onwards sealers and whalers settled along the coasts, trade in timber and flax followed. Christianity was introduced in 1814, and in 1832 a British Resident was appointed. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, created a separate colony distinct from New South Wales. Organised colonisation on a large scale commenced in 1840 with the New Zealand Company's settlement at Wellington. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Imperial Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by an Executive Council, with a Legislature of two houses.

Governor-General and Staff.

Governor-General and Commander-in-Chief of New Zealand, His Excellency Marshal of the Royal Air Force Sir Cyril L. N. Newall, G.C.B., O.M., G.C.M.G., C.B.E., A.M., born 1886; assumed office Feb. 1941.
(Salary £5,000, and allowances £2,500) £7,500

Governor-General Designate (Feb. 1946-1951), Lieutenant-General Sir Bernard Cyril Freyberg, T.C., K.C.B., K.B.E., C.M.G., D.S.O., LL.D., born 1890.

§ THE EXECUTIVE COUNCIL.

His Excellency the GOVERNOR-GENERAL.

Labour Ministry.

(Sworn in, Feb. 22, 1944.)

Prime Minister, Minister of External Affairs and of Island Territories, Rt. Hon. Peter Fraser, P.C.

Minister of Finance, Customs, Stamp Duties, in Charge of Land and Income Tax, Public Service Superannuation and Census and Statistics Departments, Hon. Walter Nash.

Minister of Supply of Industry and of Commerce, and in Charge of Scientific and Industrial Research, Hon. D. G. Sullivan.

Minister of Education and of Justice, Native Minister and Attorney-General, Hon. H. G. R. Mason.

Minister of Works and of Railways, Hon. R. Semple.
Minister of Internal Affairs and of Social Security and Registrar-General, Hon. W. E. Parry.

Minister of Labour and of Mines, Postmaster-General and Minister of Telegraphs and of Immigration, Hon. P. C. Webb.

Minister of Defence, Hon. F. Jones.

Minister of Transport and Marine, Hon. James O'Brien.

Minister of Health, Hon. A. H. Nordmeyer.

Minister of Agriculture and of Marketing, Hon. B. Roberts.

Minister of National Service and Industrial Manpower, Hon. A. McLagan, M.L.C.

Minister of Rehabilitation and of Lands, Major Hon. C. F. Skinner.

Member of Executive Council representing the Native Race, Hon. E. T. Tirikatene.

§ Members of the Executive Council travelling within the Dominion on public service are entitled to an allowance not exceeding £2 per diem when so engaged, but not during attendance at a session of the General Assembly. The Prime Minister receives £1,800 per annum and is provided with residence; other Ministers, £1,170 per annum, plus £200 house allowance where no Government residence is provided.

HIGH COMMISSIONER IN LONDON.

High Commissioner for New Zealand, W. J. Jordan, New Zealand Government Offices, 415 Strand, W.C.2
Official Secretary, R. M. Campbell.....

MINISTER AT WASHINGTON, D.C.

Minister, Hon. C. A. Berendsen, C.M.G. (1944).

High Commissioner, J. G. Barclay.

HIGH COMMISSIONER IN N.Z. OF

H.M. GOVERNMENT IN U.K.

High Commissioner, Sir C. Patrick Duff, K.C.B., C.V.O.

THE LEGISLATURE.

Parliament consists of a Legislative Council appointed by the Governor-General (prior to 1891 the appointments were for life; since that date for 7 years, with eligibility for reappointment), consisting (July, 1945) of 34 members; and of a House of Representatives consisting of 80 members elected for 3 years. Four of the members are Maoris elected by the Maori electors. Women have been entitled to vote since 1893, and to be elected Members of the House of Representatives since the passing of the Women's Parliamentary Rights Act, 1919. Members of the Legislative Council receive £375 per annum, and of the House £750 per annum, in each case with travelling expenses and deduction for non-attendance.

Speaker of the Legislative Council, Hon. Mark Fagan (plus free sessional quarters) .. £800
Speaker of the House of Representatives, Hon. F. W. Schramm (plus sessional allowance of £100 per annum and free sessional quarters) .. £1,000

THE JUDICATURE.

The judicial system comprises a Supreme Court and Court of Appeal; also Magistrates' Courts, having both civil and criminal jurisdiction.

Chief Justice, Rt. Hon. Sir Michael Myers, P.C., G.C.M.G. £2,250
 Puisne Judges, Hons. A. W. Blair, D. S. Smith, R. Kennedy, H. F. Johnston, A. Fair, J. B. Callan, E. H. Northcroft, G. P. Finlay, H. H. Cornish each 2,000
Judge, Compensation Court, Hon. F. W. Ongley 2,000
Judges, Court of Arbitration, Hons. A. Tyndall, C.M.G., W. J. Hunter 2,000

In 1943, 15,027 civil cases were tried in Magistrates' Courts, and 37,768 criminal charges were dealt with. In the Supreme Court, 233 civil cases were tried, while 1653 criminal cases were dealt with, 1098 of which were committed from the lower courts for sentence. Under the Crimes Amendment Act, passed September 21, 1942, the death penalty for murder was abolished.

POLICE.

On March 31, 1944, the strength of the Police Force was 1,634 of all ranks, including 386 temporary constables, equivalent to 1 for every 2,006 of the population. Average cost of police protection per inhabitant was, in 1943-44, 9s. 5½d.

LOCAL GOVERNMENT.

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road, electric power, and harbour boards.

For boroughs, town districts, counties, and road districts any adult may enrol as an elector under a residential qualification, while any adult whose name appears on the valuation roll as the occupier of any rateable property is also entitled to enrolment. Enrolment is compulsory in boroughs and town districts. Only ratepayers may vote on financial matters, and in counties and road districts ratepayers are entitled to one, two or three votes according to the rateable value of the property.

Revenue of local bodies, 1942-43...	£21,847,499
Receipts not revenue, 1942-43.....	2,640,252
Expenditure, 1942-43.....	23,228,434
Net indebtedness, March 31, 1943...	55,328,901

PASSPORTS.

With certain exceptions, no person over 16 years of age is permitted to land unless in possession of a passport or some other document satisfactorily establishing his or her nationality and identity.

DEFENCE.

Army.

Chief of the General Staff, Lieutenant General E. Puttick, C.B., D.S.O.

The New Zealand Army Defence Forces consist of the Regular Force, the Territorial Force, and the Cadets.

Up to Jan. 31, 1945, a total of 114,940 of all ranks had embarked for overseas service with the New Zealand Expeditionary Force. Up to May 31, 1945, His Majesty the King had approved of 1,206 honours and awards, including 5 Victoria Crosses to members of the N.Z.E.F., and an additional 1,488 were mentioned in despatches.

Army expenditure in 1944-45 amounted to £50,969,177. The total gross Army expenditure during the six years ended in 1944-45 was £292,821,399.

Navy.

Chief of the Naval Staff and First Naval Member, Commodore G. H. Faulkner, D.S.C., R.N.

The Naval Defence Act, 1913, provided for the establishment of the force which has since become the Royal New Zealand Navy. The strength and establishment of the Royal New Zealand Navy has been greatly expanded since the outbreak of war and a number of small vessels have been built in New Zealand. New Zealand naval personnel totalled 10,000 of whom 4,000 were with the Royal Navy. Over 1,000 New Zealanders served with the Fleet Air Arm.

Naval expenditure in 1944-45 amounted to £6,639,081, and total expenditure 1939-40 to 1944-45 £31,172,126.

Air.

Chief of the Air Staff and Air Officer Commanding N.Z. Air Force, Air Vice-Marshal L. M. Isitt, C.B.E., N.Z.A.F.

The Royal New Zealand Air Force was mobilised in September, 1939, and since then its organization has been linked up with the Empire Training Scheme. A number of New Zealand Units, including Bomber Squadrons, Fighter Squadrons,

and Torpedo Bomber Squadrons operated with the R.A.F., and considerable numbers of New Zealand personnel served with other R.A.F. Units in many theatres. Approximately 10,000 of the R.N.Z.A.F. (mostly air crew) went to the European theatre and over 20,000 to the Pacific area.

Air Force expenditure in 1944-45 was £33,283,104. Total expenditure from 1939-40 to 1944-45 was £113,095,764.

New Zealand casualties to May 31, 1945:—

Killed and died of wounds.....	9,844
Wounded.....	19,253
Prisoners of War.....	8,485
Missing.....	2,207

FINANCE.

*CONSOLIDATED FUND.

Year ended March 31.	Revenue.	Expenditure.
1939	36,582,046	35,772,678
1941	40,438,000	38,712,000
1942	41,241,000	39,569,000
1943	42,361,000	38,206,000
1944	48,828,000	46,596,000
1945	54,248,000	53,033,000

The above figures refer to the Ordinary Revenue Account of the Consolidated Fund. Particulars of the Social Security Fund and the War Expenses Account are also given.

SOCIAL SECURITY FUND.

Year ended March 31.	Receipts.*	Payments.
	£	£
1941	13,968,000	12,624,000
1942	14,688,000	13,531,000
1943	16,014,000	15,951,000
1944	17,492,000	17,634,000
1945	18,776,000	19,332,000

* Includes transfers from Consolidated Fund: £3,200,000 in 1940-41, £3,600,000 in 1941-42, £3,800,000 in 1942-43, £4,100,000 in 1943-44, and £4,500,000 in 1944-45.

WAR EXPENSES ACCOUNT.

Year ended March 31.	Receipts.†	Payments.
	£	£
1941	34,542,000	30,867,000
1942	60,905,000	59,707,000
1943	147,953,000	143,939,000
1944	162,540,000	163,162,000
1945	138,982,000	130,009,000

† Includes transfers from Consolidated Fund: £3,226,000 in 1941-42, £3,172,000 in 1942-43, £11,700,000 in 1943-44, and £6,200,000 in 1944-45.

The gross Public Debt amounted on March 31, 1945, to £(N.Z.)603,238,412. On March 31, 1940, it was £(N.Z.)362,373,354.

* Financial year ends March 31; railway and post and telegraph revenue and expenditure are excluded throughout, although Post and Telegraph profits are included in revenue.

Banking.—There are six trading banks (with numerous branches) doing business, two of which are predominantly New Zealand banks. At March 26, 1945, total assets amounted to £144,085,434; liabilities, £125,175,246; and the value of notes in circulation at March 26, 1945, amounted to £34,185,820. The Reserve Bank of New Zealand commenced business on August 1, 1934. The note-issuing powers of other banks have since been withdrawn and the Reserve Bank notes are legal tender.

Post-office and trustee savings banks had, at the close of the year 1944-45, 1,482,258 depositors, having £136,266,000 to their credit. This amount does not include National Savings Accounts in which depositors had £21,127,124 to their credit at March 31, 1945.

EDUCATION.

The State system of education is free, secular, and compulsory. There were (Dec., 1943) 2,090 public primary schools, with 204,060 scholars; there are also 302 registered private primary schools, with 29,328 scholars, and 156 village schools for the Maoris with 10,194 scholars, of whom 9,975 were Maoris. The higher education of boys and girls in the cities and large towns is carried on in 46 colleges and grammar schools, and in 21 technical high and technical day schools. In addition there are 98 secondary depts. of district high schools, and 62 endowed and private secondary schools. The University of New Zealand has power to confer degrees and consists of Auckland University College, Victoria University College, Canterbury University College, and the University of Otago. Two Agricultural Colleges (Massey and Canterbury) are affiliated to the University. The 6 Colleges had a total of 5,953 students in 1943.

The total expenditure on Education out of public funds in 1943-44 was £5,221,389.

PRODUCTION AND INDUSTRY.

Agriculture and Forestry.—The total area of the Dominion (excluding annexed islands) is 66,390,657 acres, and, apart from boroughs and holdings under 1 acre, 42,978,309 acres of this were in occupation in 1944, this acreage representing 86,137 holdings under wheat, oats and other crops, but mainly devoted to pasture. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the North Island), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine, and wool-packs. The cultivation of linen-flax has been undertaken since the outbreak of war at the request of the government of the United Kingdom.

Live Stock.—The cattle at January, 31, 1944, numbered 4,439,258; pigs, 573,362; horses, 225,823; and sheep (April 30), 33,200,298.

Manufactures.—Statistics of factory production show (1942-43) 6,127 factories in operation, employing 114,590 persons. Value of output for year, £165,936,284.

Minerals.—Coal-mining is one of the largest industries, the output in 1943 being 2,787,868 tons. Gold-mining, both alluvial and quartz, is an important industry in some districts, the value of gold produced in 1943 being £1,528,851. Iron ore, in the form of ironsand, occurs in great abundance in Taranaki, and in the form of brown hematite at Onekaka, near Nelson.

EXTERNAL TRADE (£ N.Z.).

(Excluding specie.)

Year.	Imports.	Exports.	Total.
1939...	£49,387,183	£58,049,316	£107,436,499
1940...	42,997,669	73,741,133	122,738,802
1941...	49,167,010	67,479,413	116,646,423
1942...	53,856,012	81,284,637	135,140,649
1943...	95,148,017	71,862,598	167,010,615
1944...	86,686,531	77,786,946	164,473,477

Railways.—In March, 1944, there were 3,504 miles of Government railway lines in working order, and more under construction; together with an excellent system of road service cars. The number of passengers carried on Government lines in 1943-44, including season-ticket holders, was 38,611,267, while goods railed amounted to 9,026,626 tons. Railway operating revenue and expenditure were £3,464,979 and £11,365,917, while total revenue and expenditure were £15,325,306 and £12,757,336.

Shipping.—During 1943 the vessels entered inwards numbered 481 (tonnage 2,064,494), and those entered outwards 472 (tonnage 2,046,278), exclusive of coasting vessels.

Posts and Telegraphs.—The annual postal circulation was (1941) 285,817,000 letters and postcards, 237,321,000 newspapers, 237,321,000 packets and, 10,952,250 parcels. The telephone service is highly efficient and universal in all centres.

Civil Aviation.—In 1944-45 (internally) passengers carried numbered 52,424, mail 313,013 lb., freight 272,251 lb., and (overseas) 5,803 passengers, 142,812 lb. mail, and 84,189 lb. freight.

CAPITAL, Ψ WELLINGTON, in the North Island.

The estimated population of the principal towns as at April 1, 1941, was as follows:—Ψ Auckland, 223,700; Ψ Wellington, 160,500; Ψ Christchurch, 135,500; Ψ Dunedin, 82,200; Ψ Invercargill, 26,400; Ψ Wanganui, 26,000; Palmerston North, 25,500; Hamilton, 20,900; Ψ Napier, 19,400; Ψ New Plymouth, 19,400; Ψ Timaru, 19,200; Hastings, 19,000; Ψ Gisborne, 16,200; Ψ Nelson, 13,800.

THE ISLANDS OF NEW ZEALAND.

In addition to the islands forming part of the Dominion proper:—

The Three Kings (discovered by Tasman on the Feast of the Epiphany), in 34° 9' S. lat. and 172° 8' 8" E. long. (uninhabited). **Auckland Islands**, about 290 miles south of Bluff Harbour, in 50° 32' S. lat. and 166° 13' E. long. The islands contain several good Ψ harbours, but are uninhabited. **Campbell Island** (uninhabited). **Antipodes Group** (49° 41' 15" S. lat. and 178° 43' E. long.) uninhabited. **Bounty Islands** 47° (4° 43' S. lat. 179° 6' 30" E. long.) uninhabited. **Snares Islands** (uninhabited). **Solander Island** (uninhabited).

The following islands have been annexed:—

The Kermadec Group, between 29° 10' to 32° 30' S. lat., and 177° 45' to 179° W. long., includes

Raoul or Sunday, Macaulay, Curtis Islands, and L'Esperance, and some islets. At April 1, 1945, there were 15 persons on Sunday Islands.

Cook and other Islands, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga (5,054), Aitutaki (1,719), Mangaia (1,459), Atiu (1,086), Mauke (652), Mitiroa (265), Manuae (8), Takutea (uninhabited), Palmerston (90), Penrhyn or Tongareva (467), Manihiki (487), Rakahanga (290), Pukapuka or Danger (651), Suvarrow (uninhabited), Nassau (18), Niue or Savage (4,104). The population figures were as at the Census of 1936, the total for the Group being 16,350. The chief exports are citrus fruits, bananas, tomatoes, copra, and native handicrafts. The trade is chiefly with New Zealand. The exports (1944) were valued at £N.Z. 126,830 and the imports at £N.Z. 155,230 for Cook Islands, and at £N.Z. 23,251 and N.Z. 30,054 for Niue Island. Rarotonga is the chief island of the Cook Group, with a native population of 4,818, and a population other than native of 236. Local administration is carried out by Resident Commissioners at Rarotonga and Niue, and Resident Agents on the other inhabited islands, the latter being answerable to the Resident Commissioner at Rarotonga. In their administration, commissioners and agents are assisted by the Island Councils of Native Arikis (chiefs), but ordinances may be disallowed by the Governor-General of New Zealand.

The revenue of the Cook Islands in 1944-45, exclusive of a subsidy of £27,000 from the New Zealand Government, was £40,228, and the expenditure, £67,770. Revenue of the Niue administration, exclusive of New Zealand Government subsidy of £10,000, was £12,096, and expenditure, £18,900.

Ross Dependency (1923).

Tokelau or Union Islands.—A group of atolls (Fakaofu, Nukunono and Atafu) (population 1,297 in 1941), transferred in 1926.

The Mandated Territories are—

Western Samoa, consisting of the islands of Savai'i (703 square miles) and of Upolu, which, with its small adjacent islands, Apolima, Manono, Fanuatapu, Namua, Nuutele, Nuula and Nu'usafe'e is 430 square miles. Estimated population as at April 1, 1945, 66,761 of whom 62,803 were Samoans. The remaining islands of the Samoan group belong to the U.S.A. All the islands are mountainous, the highest peak rising to 6,094 feet. Upolu, the most fertile, contains the harbours of Ψ Apia and Ψ Saluafata, of which the former is the capital. The natives of the islands are Christians of different denominations. Coco-nuts (copra), cocoa, bananas and rubber are the chief products of the islands. Revenue 1944-45, £281,033. Expenditure £225,879. The exports were valued in 1944 at £391,317, and the imports, 1944, £460,764.

Nauru Island is administered by the U.K., Australia and New Zealand under a mandate.

The Union of South Africa

Provinces.	Area (English Sq. Miles).	Census of 1936.		Total.
		European.	Non-European.	
Cape of Good Hope	277,113*	791,574	2,738,326	3,529,900
Natal	35,284	190,549	1,755,919	1,946,468
Transvaal	110,450	820,756	2,520,714	3,341,470
Orange Free State	49,647	200,978	571,082	772,060

Total.....	790,219	2,034,534	7,873,786†	9,908,320†

The estimated population on June 30, 1944, was 11,068,000 (Europeans 2,230,000, non-Europeans 8,768,000. The increase in the European population of the Union (1931-36) was 9.6 per cent. Increases in the Provinces, Cape, Natal and Transvaal, were as follows—5.6 per cent., 7.4 per cent., and 17.9 per cent. respectively. In the Orange Free State there was a decrease of 2.2 per cent.

* Includes Walvis Bay (374 sq. miles), which is administered by the Territory of S.-W. Africa, but is an integral part of the Cape of Good Hope Province.

† Amended figures.

Births, Deaths, and Marriages.

European.				NON-EUROPEAN (a).			
Year.	Births.	Deaths.	Marriages.	Year.	Births (a).	Deaths (a).	Marriages (b)
1939	53,517	19,901	22,943	1939	69,716	52,505	26,298
1941	54,569	20,733	22,690	1941	75,856	58,333	29,262
1942	56,143	20,856	23,095	1942	74,003	62,354	29,796
1943	58,765	21,593	24,491	1943	76,729	64,230	29,755

A law (No. 17 of 1923) amending and consolidating the pre-Union Acts in force in the four Provinces was passed and came into force as from the 1st January, 1924. Under this law registration of all European, Asiatic and Coloured (as distinct from Native) births and deaths was compulsory throughout the Union. (a) Registration of Native births and deaths is compulsory only in urban areas. (b) Only marriages solemnized under the prescribed civil laws are subject to registration.

PHYSIOGRAPHY.

Boundaries.—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, i.e., from 34° 50'–22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Relief.—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwart Berg* and *Lange Berg* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggeveld* and *Nieuweveld* to the north is the Great Karroo Plateau, which is bounded on the east by the *Sneeuberg*, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the *Drakensberg* (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magalies* and *Waalberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the Hooeg Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the *Drakensberg* and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the *Drakensberg* and flowing into the Atlantic between the Protectorate of South-West Africa and the Cape of Good Hope. The *Limpopo*, or *Crocodile River*, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

HISTORICAL SKETCH.

The *Cape of Good Hope* was discovered in 1488 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. In 1497–8, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels until about 1511, and subsequently also by those of England and the Netherlands, as a place of call in going to and from the East Indies. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1824 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then

a part of the great Zulu kingdom under T'Chaka. Between 1838 and 1840 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The *Transvaal* was formed as the *South African Republic* by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The *Orange Free State* was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

Delville Wood.—The title deeds of Delville Wood, containing the graves of South African troops who fell there during the battles on the Western Front in France in the Great War 1914-1918, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal and the Orange Free State respectively.

The Union Government is seised of all State property, and the Railways, Ports and Harbours are administered by Commissioners. The former debts of the Colonies now constituting the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses,

Governor-General HIS EXCELLENCY THE RT. HON. MAJOR GIDEON BRAND VAN ZYL, P.C., born

1873, appointed Oct. 29, 1945; assumed office, Jan. 1, 1946 £10,000

Officer administering the Government (until Jan. 1, 1946), Rt. Hon. N. J. de Wet, P.C., appointed Sept. 11, 1943.

Secretary and Comptroller, J. H. Davis.

Assistant Secretary, F. Fleck.

Aide-de-Camp, Capt. K. Vorster.

EXECUTIVE COUNCIL.

The Governor General presides.

(As reformed, Nov. 9, 1945.)

Prime Minister and Minister of External Affairs and of Defence, Field Marshal the Rt. Hon. I. C. Smuts, P.C., C.H., K.C., ...	£3,500
Minister of Finance and Education, Rt. Hon. J. H. Hofmeyr, M.A., D.Sc.	2,500

Minister of the Interior, of Posts and Telegraphs, and of Public Works, Hon. C. F. Clarkson.	2,500
Minister of Labour, Hon. Colin F. Steyn, K.C.	2,500
Minister of Mines, Col. the Hon. F. C. Stallard, K.C., D.S.O., M.C.	2,500
Minister of Lands and Irrigation, Hon. A. M. Conroy.	2,500
Minister of Social Welfare and of Justice, Hon. H. G. Lawrence, K.C.	2,500
Minister of Native Affairs, Major the Hon. P. V. G. van der Byl, M.A., M.A.	2,500
Minister of Reconstruction, Hon. S. F. Waterston.	2,500
Minister of Public Health and Housing, Hon. Henry Gluckman, M.D.	2,500

On Jan. 28, 1940, the opposition Parties, led by General Hertzog and Dr. Malan, united under the title of Re-united National Party or People's Party (*Ereunigde Nasionale of Volksparty*).

DIPLOMATIC, CONSULAR AND COMMERCIAL REPRESENTATIVES

Europe.

London.—High Commissioner for the Union of South Africa (South Africa House, Trafalgar Square, W.C.2), G. Heaton Nicholls (22 xl. 44).
 Senior Trade Commissioner, A. P. van der Post.
 Stockholm.—E.E. & M.P., L. Egelund.
 Secretary of Legation, Dr. A. H. H. Mertsch.
 Lisbon.—E.E. & M.P., Lt.-Col. F. F. Pienaar, O.B.E.
 Secretary of Legation, R. Kirsten.
 Gottenburg.—Consul-General, G. Carlsson.
 To the Governments of the Netherlands and of Belgium and Greece.—(vacant).

Canada and U.S.A.

Ottawa.—High Commissioner, Dr. P. R. Viljoen.
 Washington.—E.E. & M.P., H. T. Andrews.
 New York.—Consul, R. Webster.
 Vancouver.—Trade Commissioner, Col. R. D. Williams.

South America.

Buenos Aires.—Consul-General, A. Zoutendyk.
 Rio de Janeiro.—Consul-General, F. du Plessis.
 Monte Video.—Consul, J. G. Morton.

East Africa.

Nairobi.—Commissioner, T. H. Eustace.
 Lourenço Marques.—Consul-General, E. F. Horn.

West Africa.

Leopoldville.—Consul-General, W. C. W. Par-
minter.

Elizabethville.—Consul, J. K. Uys.

India.

Bombay.—Trade Commissioner, A. H. Handford.

Madagascar.

Antananarivo.—Consul-General, P. D. G. Gain.

Egypt.

Cairo.—Consul, B. Jarvic.

HIGH COMMISSIONERS.

High Commissioner in South Africa for the Govern-
ment of the United Kingdom and High Commis-
sioner for Basutoland, Bechuanaland Protectorate and
Swaziland, Hon. Sir Evelyn Baring, K.C.M.G.
(1944).

High Commissioner for India in South Africa, Ramras
Madhavras Deshmukh (1944).

THE LEGISLATURE.

The Senate consists of 40 members. Eight are
nominated by the Governor-General in Council,
32 are elected, eight for each Province, (4 are
elected by the native population under the pro-
visions of The Representation of Natives Act No. 12,
of 1936). Election for members is carried out
according to the system of proportional repre-
sentation with the single transferable vote, by the
Members of the House of Assembly and of the
Provincial Council for each Province sitting
together and presided over by the Administrator
of such Province. Vacancies amongst elected
Senators are filled in the same manner, but only
for the period which the Senator in whose place
the new Senator is elected would have held his
seat. The first election of Senators under the
Representation of Natives Act was held in 1937
and the members so elected held their seats for
5 years. Originally, under Section 24 of the South
Africa Act, nominated Senators held their seats for
a period of ten years, but this provision was
amended by Act No. 54 of 1926, and nominated
Senators are now required to vacate their seats on
the dissolution of the Senate or upon a change of
Government. Of the eight nominated Senators,
four are elected on the ground of their thorough
acquaintance, by reason of their official experience
or otherwise, with the reasonable wants and wishes
of the coloured races.

The House of Assembly consists of 150 elected
members, 56 of whom represent the Cape of Good
Hope, 16 Natal, 64 Transvaal, and 14 the Orange
Free State. Under the Representation of Natives
Act, 1936, Cape native voters are entitled to elect
three members of the House of Assembly, who
hold their seats for 5 years notwithstanding any
dissolution of the House of Assembly. Members
of both Houses must be British subjects of Euro-
pean descent. Female franchise was introduced
under the provisions of Act No. 18 of 1930.

The General Election of July 7, 1943, returned :—
United Party (Smuts) 89, Labour 9, Dominion 7,
Independents 2. Total Pro-war Party 110.
Opposition (Nationalist Party) 43.

President of the Senate, Hon. P. A. Myburgh £1,200
Speaker of the House of Assembly (vacant)..... 2,000

LOCAL GOVERNMENT.

A Provisional Council in each Province has
power to legislate by ordinance on certain subjects
specified in the Act, and on such other subjects as
may be delegated to it. All ordinances passed by
a Provincial Council are subjected to the vote of

the Governor-General in Council. Members of
the Provincial Council are elected on the same
system as Members of Parliament, but the restric-
tion as to European descent does not apply. Pro-
vincial administration is in the case of each
Province vested in an Administrator, with an
Executive Committee of four members. The
Provincial Council in each case consists of the
same number of elected members as there are
electoral divisions of such Province for the House
of Assembly, unless that number is less than 25 (as
in the cases of Natal and the Orange Free State),
when the number is 25. Under the Representa-
tion of Natives Act, 1936, Cape native voters are
entitled to elect two members of the Provincial
Council, who hold their seats notwithstanding any
dissolution of the Council. Each Council exists
for a period of five years. Direct taxation is per-
mitted for Provincial purposes, and legislation is
authorised on certain specified subjects.

DEFENCE.

The South African Defence Act, 1912, became law on June 14, 1912. This Act, as amended in 1922 and 1932, provides that every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The personnel of the South African Fighting Forces in 1939-1945 amounted in all to over 250,000 all ranks, including 38,000 in the South African Air Force and 4,000 in the South African Naval Forces, while Women's Services and Non-European Services accounted for 15,000 and 90,000 respectively.

South African Forces played a considerable part in the East African, Abyssinian and Libyan campaigns and were well represented in the operations against the enemy on the Continent of Europe.

The total casualties from Sept. 3, 1939, to May 8, 1945, were:—

Land Forces.

Killed.....	6,656

EDUCATION.

The Provinces have been relieved of all vocational education (technical and industrial), and the Department of Education under the Minister is concerned with 5 Universities (Cape Town, Stellenbosch, Witwatersrand, Pretoria and the University of South Africa); technical colleges at Capetown, Durban, Witwatersrand, Port Elizabeth, East London, Pretoria, Pietermaritzburg, and Bloemfontein; industrial trade, housecraft and commercial schools (State and State-aided) at various centres throughout the Union.

The average number of internal students at universities and university colleges for the calendar year 1942 was 9,704. The State expenditure on higher education as above defined during the financial year 1942-43 was £1,532,600.

Primary Education and Education other than Higher Education.—The central direction of public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union. Each Department is controlled by a Director or Superintendent of Education. In the Cape Province practically all the schools are State-aided. In Natal they are partly State schools and partly State-aided. In the Transvaal and Orange Free State they are in the main State schools. In all Provinces primary education is free.

Number of State and State-aided Schools in the Union on June 4, 1941.—For European scholars, 3,622; for Non-European scholars, 5,229; total, 8,851.

Number of Scholars and Teachers on June 4, 1941.—European scholars, 388,925; Non-European scholars, 678,161; total, 1,067,086. Total number of Teachers, 33,574.

State Expenditure on Education in 1940-41, excluding expenditure on Capital Account: Cape, £4,468,753; Natal, £1,103,475; Transvaal, £3,738,532; Orange Free State, £1,076,675.

Superintendent-General of Education, Cape, W. de V. Malan, B.A., Ph.D.

Director of Education, Natal, F. D. Hugo, B.A.

Director of Education, Transvaal, H. H. G. Krefst, B.A.

Director of Education, Orange Free State, S. H. Pellissier, B.A.

1943-44*.....	99,991,000	103,471,600

* Estimates.

War Expenditure in 1943-44 was estimated at £100,000,000, of which one-half is included above and one-half is chargeable to loan account.

DEBT.

The Gross Public Debt of the Union at March 31, 1943, was £430,035,597; Net Public Debt, £429,858,263.

PROVINCIAL FINANCE.

Since their establishment in 1910 the powers and functions of the Provinces have undergone various alterations, and their powers of taxation have been limited from time to time. An Act (No. 46, 1925) to amend the laws regulating the financial relations between the Union and the several Provinces thereof was passed in the 1925 Session of Parliament, and as from April 1, 1925, the sources of revenue available to the Provinces are:—

(1) A subsidy from the Union Government based upon the average attendance of pupils receiving education within the Province, and the extent of other educational functions carried on by the Province.

(2) Certain scheduled and limited taxes.

(3) Certain taxes collected by the Union and assigned to the Provinces without power to legislate in regard thereto.

(4) As from April 1, 1935, a special grant of £125,000 per annum to the Province of Natal, and £275,000 per annum to the Orange Free State Province is being made.

The requirements of the Provinces in regard to capital expenditure are supplied by the Union Government by way of loans. Special loans repayable in 10 years have been made by the Central Government to finance the deficits on the Provincial Revenue Funds at March 31, 1924.

The ordinary Revenue and Expenditure for five years ended March 31, 1942, were as follows:—

Financial Year.	Revenue Collections.	Subsidies. (Education, etc.).	Total Ordinary Revenue.	Total Ordinary Expenditure, excluding National Roads.
	£	£	£	£
1937-38	8,232,618	6,319,157	17,187,517	15,848,311
1938-39	8,456,721	6,491,191	19,055,738	15,956,824
1939-40	8,670,353	6,774,080	19,602,218	16,539,398
1940-41	9,210,214	6,863,318	17,242,925	16,743,016
1941-42	10,374,732	6,921,418	18,660,104	17,525,091

Banking Statistics.

South African Reserve Bank, March 31, 1944:—

Capital and Reserve.....	£2,000,000
Notes Issued.....	51,169,000
Deposits and current accounts.....	142,316,000
Gold Coin and Bullion.....	88,575,000
Bills Discounted.....	22,531,000

Commercial Banks, March 31, 1943:—

Deposits.....	197,702,000
Cash Reserves.....	96,352,000
Advances and Discounts.....	36,365,000

Under the South African Currency and Banking Act, 1920, a Central Reserve Bank was set up at Pretoria, with Capital and Reserve of £2,000,000. On March 31, 1942, the Deposits and Current Accounts amounted to £74,382,000. The 8 Commercial Banks had Deposits and Current Accounts amounting to £253,460,000 at the same date.

PRODUCTION, TRADE AND INDUSTRY.

Agricultural Statistics.

Province.	Total Area of Farms.		No. of Occupied Farms & Holdings.	
	1937-38.	1938-39.	1937-38.	1938-39.

Production of Crops.

Crop.	1937-38.		1938-39.	
	lb.		lb.	
Wheat.....	625,996,000	1,017,742,000		
Barley.....	56,899,000	74,758,000		
Oats.....	187,946,000	235,326,000		
Mealies.....	2,972,668,000	4,732,070,000		

The Live Stock (1943) included 13,070,000 cattle, 37,890,000 sheep and 6,151,200 goats, and (1937) 777,600 horses, 136,640 mules, 863,120 asses, and 40,300 ostriches.

Manufactures.—The development of local industries was most marked during the three years preceding 1931, the scarcity of overseas supplies and consequent increase in prices serving as a very effective measure of protection under which new industries sprang up, and existing industries largely extended their operations. In 1941-42 there were 9,989 factories employing 413,492 hands (149,113 Europeans). The value of gross production was £272,875,860 (including £136,041,000 as added value of manufacture). The wages paid amounted to £62,896,000. The principal groups (with value of output) were:—Metals, engineering, etc. (£32,757,000); food, drink, etc. (£23,227,000); heat, light and power (£11,217,000); textiles (£9,764,000); chemicals, etc. (£9,447,000); books, printing, etc. (£6,995,000).

Mines and Minerals.—The value of the total mineral production of the Union for 1940 was £129,544,849, including gold premium. Gold mining still continues to be the chief source of the country's mineral wealth. At the outbreak of war the diamond mines closed down. The value of the output of the principal minerals of the Union in 1940 was:—

Gold.....	£117,990,619	Silver.....	£129,554
Diamonds.....	1,620,467	Asbestos.....	497,061
Coal.....	5,325,932	Osmiridium.....	75,347
Copper.....	629,296	Corundum.....	35,670
Tin.....	137,024	Platinum.....	397,081

The gold output in 1943 was valued at £103,036,180, compared with £113,670,967 in 1942.

The number of natives employed by members of the Witwatersrand Native Labour Association and contractors at Aug. 31, 1943, was 317,949 (295,397 in gold mines and 22,552 in coal mines).

EXTERNAL TRADE.

The total value of the Imports and Exports in the five years 1936-1940 (excluding all specie and gold earmarked) was as follows:—

Year.	Imports.	Exports.	Total Trade.
	£	£	£
1936*	86,304,084	114,534,116	200,838,200

COMMUNICATIONS.

Railways.—Railway history in South Africa began in the year 1859, when construction was commenced by private enterprise of a line from Cape Town to Wellington, and in the same year of a short two-mile section between Durban and Point (Durban Harbour). The Point-Durban line was opened to public traffic in 1860, and the Cape line to Stellenbosch in 1862 and to Wellington in 1863, while a track to Wynberg was completed in 1864. Little progress was, however, made in succeeding years, and it became evident that the development of the country could not be left to private enterprise. The existing Cape lines were therefore purchased by the Government on Jan. 1, 1873, and on Jan. 1, 1877, Natal followed by acquiring the railways in that colony. Increased activity at once took place, and the construction of four lines was pushed inland from Cape Town, Port Elizabeth, East London, and Durban. Bloemfontein was connected with the Cape in 1890, two years later a line to Germiston established contact with the system already in operation in the Transvaal, and in 1895 the Natal-Transvaal lines were linked up.

The total open mileage of Government owned lines at the end of March, 1944, was 13,251 miles (comprising Cape 5,251, Orange Free State 1,633, Transvaal 3,393, Natal 1,511, and South-West Africa 1,467), of which 12,400 miles were 3 ft. 6 in. gauge and 851 miles 2 ft. gauge. The capital

expenditure on Government railways up to March 31, 1944, amounted to £178,031,600. The gross earnings for the year ending March 31, 1944, were £44,053,410. Working expenditure (excluding depreciation) amounted to £28,807,800. Through communication by rail is now available from Cape Town to Port Francqui in the lower Congo, 3,300 miles, all 3' 6" gauge. The *Trans-Zambesi Railway*, from Dondo (on the Beira-Mashonaland line) to the Zambesi, was opened July 1, 1922, thus placing the Union in direct communication with Nyasaland. This railway was extended to Blantyre and subsequently to Chipoka on Lake Nyasa.

Posts and Telegraphs.—On March 31, 1944, there were 3,475 post and 3,433 telegraph offices open in the Union.

The number of depositors in the Government Savings Bank was 1,403,287 with £56,753,850 standing to their credit. The combined cash revenue from Posts, Telegraphs and Telephones was £8,799,370. The combined cash expenditure totalled £5,201,380.

Internal Air Mail Services have been temporarily suspended.

External Air Mail Services.—Normally, an air service for the carriage of mails operates twice weekly in each direction by flying-boat between London and Durban, via Mozambique, Tanganyika, Kenya, Uganda, Sudan, Egypt, Greece, Italy and France. The service north of Cairo has been temporarily suspended but a twice weekly service in each direction between Durban and Cairo is in operation, and connexion is made with the services to India and Australia. The air mail service beyond Calcutta to Australia has been suspended. In March, 1942, an air mail service to the United States was introduced and in the same year a fortnightly service from the Union to the Belgian Congo was inaugurated.

Airgraph Service.—In May, 1942, an airgraph service was introduced to the U.K. and Eire, with subsequent extensions to Canada and Newfoundland. 1,744,100 airgraphs were despatched in 1942. In Sept., 1942, the service was made reciprocal and 404,700 airgraphs reached the Union from U.K. in 1942. The service was further augmented in August, 1943, by extension to Australia and N.Z., New Hebrides, Tonga and Fiji; this service is also reciprocal.

Shipping.—In 1940, 2,921 vessels (12,909,750 tons) entered from and 2,960 vessels (12,998,860 tons) cleared for foreign countries at the ports of the Union of South Africa. The principal ports are Cape Town, Port Elizabeth, Mossel Bay and Simonstown (Cape); Durban (Natal); Walvis Bay and Luderitz Bay (S.-W. Africa).

South-West Africa.

(*Suidwes-Afrika*.)

Administered under Mandate as an integral part of the Union of South Africa.

Administrator, Colonel P. I. Hoogenhout.

Secretary, Dr. P. R. Botha.

SOUTH WEST AFRICA lies between S. lat. 17° 23' and the Orange River, with a narrow strip between 17° 30'–18° 20' S. lat. extending from 21° to 25° E. long., known as the Caprivi Zipfel, and gives access to the Zambesi. Off the coast are a number of guano islands (Hollamo, Bird, Mercury, Ichabod, Sea Dog, Penguins, Halifax, Long, Possession, Albatross, Pomona, Plumpudding, Sinclair and Roastbeef Island).

The estimated area of the country is 317,725 square miles, and the population (census of 1936)

is 357,787, of whom 30,677 are Europeans (of the European population 9,634 are German-speaking). The native population in the Territory proper is 110,556 and that beyond the Police Zone is estimated to be 142,248, of whom 119,226 are estimated to be in Ovamboland. Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it, is a broken range of mountains, from which there is a gradual slope to the sea. The country between these mountains and the coast is barren desert except towards the north, and is known as the Namib. Towards the east from these mountains the land slopes eastward and forms the western edge of the great Kalahari Plateau. The boundaries are the Okavango and Kunene Rivers, in the north, and the Orange River, in the south, all perennial streams of considerable volume. On the Orange are the *Anghrables Falls*, twice the height of Niagara; these are situated about 25 miles east of the eastern boundary, in the Cape Province.

The native races are:—In the south, Hottentots. In the centre, Hereros and Bergdarmas, with the exception of the Rehoboth district, which is occupied by a mixed race known as the Bastards; and in the north, Ovambos. To the north and east there are many small bushmen tribes, some pure bushmen, but the remainder a mixture of aboriginal native tribes and bushmen. The Kaokofeld (the north-western area) is very scantily inhabited by Hereros and Ovattimbos. It is very mountainous, and in many places well supplied with water.

The Administration of the country is exercised by the Governor-General, who has, however, delegated some of his powers to an Administrator appointed by the Union Government, but Native Affairs and any matters specially affecting natives are permanently reserved to the Union Government. The territory is divided into 19 Districts ruled over by Magistrates or Native Affairs Officials

as the representatives of the Government. The territory of *Walvis Bay*, which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South-West Africa, and its magnificent harbour will undoubtedly in the future prove of great benefit. The constitution granted under Union Act No. 42 of 1925 provides for a Legislative Assembly consisting of 12 elected and 6 nominated members, an Executive Committee of 4 members elected by the Assembly with the Administrator as Chairman.

The railway system in South-West Africa, now controlled and worked by the South African Railways and Harbours Administration and connected with Union lines (De Aar to South-West Africa Border 343 miles). South-West Territory lines 1,486 miles, of which 353 are 2' 0" gauge, the balance being 3' 6" gauge; and privately owned lines 74 miles.

The Capital of the Territory is Windhoek, which lies practically in the centre of the country at 5,500 ft. above sea-level. (Urban white population, 1936, 4,812.) Other inland towns are Keetmanshoop (Urban white population, 1936, 1,043). Aroab, Bethanie, Gibeon, Gobabis, Grootfontein, Karibib, Karasburg, Okahandja, Omaruru, Otjiwarongo, Outjo, Swakopmund, Warmbad, Maltahoche, Aus, Mariental, Tsumeb and Usakos. The ports are Ψ Walvis Bay (Urban white population, 1936, 523) and Ψ Luderitz (Urban white population, 1936, 846).

* The period of three years has expired and a resolution was passed unanimously by the Assembly on April 27, 1932, asking the Governor-General in terms of the Constitution Act to declare the full competency of the Assembly to make Ordinances in respect of these subject-matters. This has, however, not yet (October, 1944) been done.

ALL AFRICA HIGHWAY SYSTEM.

The All Africa Highway System from Cape Town to Algiers is complementary to the Cape to Cairo Railway envisaged by Cecil Rhodes and to the subsequent scheme for a Cape to Cairo Road.

On Feb. 22, 1936, the *National Road Board* of the Union of South Africa submitted a five-year scheme of works under the provisions of Sect. 15 of the National Roads Act, 1935, providing for the construction, reconstruction, or repair and maintenance at the sole cost and charge of the National Road Fund of 5,400 miles of roads recommended for declaration as national roads. Standards of construction have been adopted to ensure that all work shall be permanent and shall provide as far as possible for safe, rapid, economical and all-weather transport.

The minimum legal servitude width for national roads throughout the Union is 100 Cape feet, except in Natal, where it is 100 English feet, and all national roads are bituminous surfaced. Special attention is given to the elimination of railway crossings, provision of road patrol depots, planting of trees where advisable, and systematic and effective maintenance.

An important development of the system was announced in December, 1944, in connexion with a grant to the Nigerian Government under the Colonial Development and Welfare Act, 1940. The Colonial Office announced that 48,275 miles of road are included in the scheme, which is designed not only for local needs but for linking Nigeria with the All Africa Highway system from the Cape to Algiers.

A free grant of £1,820,000 is made by the government of the United Kingdom as an initial contribution to the cost of the scheme, which is estimated to require nearly £10,000,000, of which the Nigerian Government will contribute £4,600,000 to £5,000,000. The scheme will aid the economic development of Nigeria and will bring additional revenue from petrol and motor vehicle licences.

It is intended to construct three types of road, trunk roads A and B and feeder roads, the latter providing connexions throughout Nigeria with the All Africa Highway and with all British and Foreign territories in West Africa.

Provinces of the Union of South Africa.

CAPE OF GOOD HOPE.

The Province of the Cape of Good Hope reaches in S. lat. from 26° to 34° 50', and in E. long. from 16° 25' to 30°. The extent of the country is N.E. to S.W., 750 miles, and from N.W. to S.E. 800 miles, with a coast-line of nearly 1,300 miles.

Area of Population.*

Education.—The Province is divided into 111 school districts, each under the control of a School Board, a portion of the members being elected by the ratepayers and a portion partly nominated by the Provincial Administration and partly by the Local authorities. Aided Schools, which are mostly Non-European Church Schools, are controlled by local Committees or by Managers appointed by the Churches concerned. Education is compulsory for children of European parentage. The necessary grants are provided from Provincial Council revenues, education up to the age of 15 being free.

State and Aided Schools, June, 1942, 1,747 European and 2,927 non-European. There were 155,621 European pupils and 343,582 non-European. Total number of teachers, 15,389 (6,987 in European schools and 8,402 in non-European schools).

Higher education is under the control of the Union Government. The Provincial expenditure in 1943-4 was £3,695,276 on European and £1,728,270 on Non-European education.

Finance.—Revenue 1941-42 (including Union subsidy), £6,874,129; total expenditure, £6,679,666.

Administration.—The Province is administered by an Administrator, appointed for five years by the Governor-General, aided by a Provincial Council of 58 members (elected for five years). There is an Executive Committee of four members

in addition to the Administrator, who is Chairman of the Committee.

Local Government.—There are 138 municipalities, each governed by a Mayor and Councillors, a certain number of whom are elected annually by the ratepayers. There are 95 Divisional Councils and 89 Village Management Boards and 22 Local Boards.

Administrator (vacant) £2,500
Executive Committee, G. M. H. Barrell, J. R. Finch, B. Muller, J. J. Negen.
Prov. Sec., J. D. de Villiers.
Superintendent-General of Education, W. de V. Malan, B.A., Ph.D.

CAPE TOWN. Total population (1936), 344,223; European 173,412 and Non-European 170,811 (Census figures). European (1942), 156,728.

Cape Town, a seaport, the legislative capital of the Union of South Africa, seat of the Cape Provincial Council, and the Mother City of South Africa, consists of a central portion and a chain of suburbs on either hand. The central portion lies in an amphitheatre, which extends down to Table Bay towards the north-east and is backed on the other sides by the precipitous face of Table Mountain, which rises to a height of almost 3,582 feet, and its outlying masses, Devil's Peak on the east, and Lion's Head and Signal Hill on the west. This part of the town is built on the slopes at the foot of these mountains and extending down to the shores of Table Bay.

The City has two cathedrals (C. of E. and R.C.) and a university, which is situated on a magnificent site on the Groote Schuur estate, Rondebosch. Its educational institutions and places of interest include the South African Museum, an art gallery, a notable library containing rare MSS. first editions, &c., and the municipal botanical gardens. Several fine old buildings of the Dutch period still remain, most important being the Castle, begun in 1666, and to-day the oldest building existing in South Africa; the Koopmans de Wet Museum, an old Dutch house, dating from early in the 18th century, contains fine specimens of old Dutch furniture and antiques, whilst in the Old Town House, there is on exhibition a representative collection of valuable old Dutch and Flemish paintings.

Cape Town is 5,979 miles from Southampton; transit by mail steamship 14 days, and by air mail seven days. There is a modern and well-equipped aerodrome, Wingfield Airport, six miles from the centre of the city. Cape Town's harbour and docking facilities, existing and projected, are in keeping with its status as a world port of commercial and strategic importance.

OTHER TOWNS WITH EUROPEAN POPULATION, 1942.

Port Elizabeth, 53,013; East London, 22,928; Kimberley, 15,844 (1936); Uitenhage, 9,437; Paarl, 8,823; Grahamstown, 8,198; Mossel Bay, 7,250; Queenstown, 6,723; Oudtshoorn, 6,512; King William's Town, 5,840; Worcester, 5,631; George, 5,159.

NATAL.

The Province of Natal comprises an area of 35,284 square miles (including Zululand, 10,427 square miles), with a seaboard of 360 miles. In 1941 the European population was 218,139 (males 108,283, females 109,856).

* Including Walvis Bay.

§ Partial registration.

The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nineteenth century to supply the deficiency of local labour.

Education.—Higher education is under the control of the Union Government. Under Provincial control in 1943 there were 341 primary and 44 secondary schools for Europeans, 881 native schools, and 130 schools for Asiatics. The expenditure in 1943-4 was £936,814 for European, and £591,416 on Native, Asiatic and coloured Education.

Finance.—Revenue 1941-42 (including Union Government subsidy), £2,567,703; expenditure £2,405,720.

Administration.—The Provincial government is administered by an Administrator aided by a Provincial Council of 25 members (elected for 5 years). There is an Executive Committee of 4 members.

Administrator. Hon. Douglas Mitchell. . . . £2,000
Executive Committee. W. M. Power; H. Hosking; L. Whiteley.

Provincial Secretary. W. Austin Cooke, K.C.
Director of Education. R. A. Banks, M.A.
Sec., Education Department. C. M. Booyens, M.A.
Provincial Roads Engineer. J. McLennan.

PIETERMARITZBURG, the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal. Total population (European and coloured); 49,539 in 1936. Europeans (1941), 27,863.

ψDurban or Port Natal (pop., 1944, 285,800; Europeans, 108,099) possesses the principal harbour on the south-east coast. The entrance is safe and the average low-water depth at the entrance, L.W.O.S.T., is 371 feet.

Durban is 6,835 miles by sea from Southampton, transit (under normal conditions) by sea to Cape-town, thence by rail, 16 days; by air, 5 days.

ZULULAND.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vrijheid districts of the Transvaal) and Swaziland. In 1939, Chief Mshiyazi Zulu (son of Dinizulu and grandson of Cetewayo), Regent of the Usutu tribe, was proclaimed Paramount Chief of all the Zulu peoples. The *Amanguland Protectorate*, created by proclamation of Nov. 22, 1897, was annexed to Zululand on Dec. 27, 1897, and now forms part of the Province. The *Northern Districts territory* (consisting of the Magisterial Divisions of Vrijheid, Utrecht, Paulpietersburg, and Babanango) was annexed to Natal on January 27, 1903.

THE TRANSVAAL.

The Province of the Transvaal has a total area of 110,450 square miles, about 20,000 square miles

lying within the tropics. The Census of 1921 showed a population of 2,087,636, of whom 1,159,430 were males and 928,206 females, and the census of 1936, a total of 3,347,470 (males 1,846,576, females 1,494,894).

In 1941 the European population numbered 949,835 (males 487,727, females 462,108).

Education.—Higher education is under the control of the Union Government. On June 6, 1942, there were 760 primary and 50 secondary schools for Europeans with 159,117 pupils and 6,355 teachers; and 989 schools for natives and Indians with 161,969 pupils. The expenditure on education in 1942-43 was £4,538,700.

Finance.—Revenue 1941-42 (including Union Government subsidy), £7,432,996; expenditure, £6,672,661. The Transvaal is the principal gold producing Province of the Union, the output (1944) being 12,277,230 oz., valued at £103,128,720.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 57 members (elected for 5 years). There is an Executive Committee of 4 members.

Administrator. General The Hon. J. J. Pienaar. £2,500
Executive Committee. W. B. Barnard; J. M. van H. Brink; E. Goodman; J. Duthie.

Provincial Secretary. H. F. Pentz.
Asst. do., S. A. Lombard.
Director of Education. H. H. G. Kreft, B.A.
Sec. of the Education Dept., J. C. Pauw, M.A.

PRETORIA, pop. (1941) Europeans 112,778, and non-Europeans 51,686 (1936). This city, the Administrative Capital of the Union, is set amidst beautiful surroundings and wide, shady streets, charming residences and magnificent commercial and Government buildings, including the renowned Union Buildings in their impressive setting on Mornings Kop. Ideal for residential purposes, the city is also the centre of the country's steel industry and offers unequalled opportunity for industrial development.

Pretoria is situated 35 miles to the north of Johannesburg, the centre of the Witwatersrand Goldfields. Johannesburg had a population of 592,600 in 1940; Europeans (1941), 281,706. Other centres are Germiston (33,000), Benoni (21,100), Springs (18,500), Krugersdorp (18,000),

Brakpan (17,500), Boksburg (16,000), Potchefstroom (11,000), Roodepoort-Maraiburg (11,000).

Distance from Southampton, 6,996 miles; transit (under normal conditions) by sea and rail *via* Cape Town, 15 days; by air to Durban, 5 days; thence by rail, 1½ hours.

ORANGE FREE STATE.

The Province of the Orange Free State has a total area of 49,647 square miles, and is divided into 33 districts. The population at the last three censuses was:—

Year.	White.	Others.	Total.
1926	202,985	—	—
1931	205,375	—	—
1936	200,978	571,082	772,060

In 1941 the European population was 198,537 (males 100,145, females 98,392).

Education.—Higher education is under the control of the Union Government. On June 2, 1944, there were 460 schools for Europeans with 40,487 pupils and 1,892 teachers; and 469 schools for non-Europeans with 53,754 pupils and 1,360 teachers. The expenditure in 1943-44 was £1,022,185 for European and £176,859 for non-European education.

Finance.—Revenue 1941-42 (including Union Government subsidy), £1,785,276; expenditure, £1,767,044.

Administration.—The government is administered by an Administrator aided by a Provincial Council of 25 members (elected for 5 years). There is an Executive Committee of 4 members.

Administrator. Dr. The Hon. S. P. Barnard. £2,000
Executive Committee. W. J. Pretorius; D. W. Shoeman; S. I. Senekal; Z. A. Thuyismos.
Provincial Secretary. L. J. van Zyl.
Director of Education. S. H. Pellissier, B.A.
Secretary, Education Department. J. F. Enslin.

BLOEMFONTEIN, the Capital and seat of the Provincial Government, had a population of 64,233 persons, 30,291 Europeans and 33,942 non-Europeans in 1936; (1942) Europeans, 26,848. The city is an important railway centre, is developing rapidly, and continues to hold its place as one of the foremost cities in the Union. Many fine buildings have been erected, and a new Town Hall (costing £270,000) was completed in 1937. Bloemfontein is distant from Southampton, 6,729 miles; transit (under normal conditions) by sea and rail *via* Cape Town, 15 days.

Colonies and Protectorates

NOTE.—*The Indian Empire, Burma, The Dominion of Canada, Newfoundland, The Commonwealth of Australia, The Dominion of New Zealand, and The Union of South Africa* are shown separately in the preceding pages.

ADEN.

(*Aden Colony and Protectorate.*)

The peninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, was first occupied by the British in 1839. Aden was always an important centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance and is now a great oil bunkering and coaling station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. The total area of the Colony is 75 square miles with a population (according to the census of 1931) of 46,638. Aden is a free port. The chief industries are salt and cigarette manufacture. The traffic in arms and ammunition is subject to special regulations. The British Government has treaty engagements with, and subsidises, the neighbouring Arab tribes, both inland and along the coast, from the Straits of Bab-al-Mandeb to Muscat territory at Ras Darbhat Ali.

Aden was for many years administered by the Government of India and in 1932 it was separated from the Bombay Presidency and formed into a Province under a Chief Commissioner under the direct control of the Government of India. It ceased to be a part of British India on April 1, 1937, and is now a Crown Colony. The Governor has an Executive Council. There is a Court of unlimited civil and criminal jurisdiction called the Supreme Court, from which appeals lie to the High Court at Bombay, in certain cases.

Perim—a small unfortified island with an area of 5 square miles and a population of 1,700 was occupied in 1857 and is administratively attached to Aden. The port has been closed since November, 1936, on the withdrawal of the Perim Coal Company from the island.

The *Kuria Muria Islands*, to the east of the Aden Protectorate, have been a British possession since 1854, when they were ceded to the Crown by the Imam of Muscat.

Kamuran—The island of Kamuran in the Red Sea about 200 miles north of Perim was taken by the British from the Turks in 1925, and is administered by the Government of India through a Civil Administrator under the control of the Governor of Aden. It has an area of 22 square miles and a population of about 2,200. A quarantine station for pilgrims travelling to Mecca from the East is maintained on the island under the joint control of the Government of India and the Government of the Netherlands Indies.

Civil Administrator, Major D. Thompson, O.B.E.

THE ADEN PROTECTORATE.

The Aden Protectorate to the West of approximate longitude 46° is bounded on the East by the Qara country, which is part of the dominions of the Sultan of Muscat and Oman, and on the North and West by the Great Desert and the Kingdom of Yemen, whose Southern boundary was temporarily fixed by Article III of the Treaty of San'a (February, 1924) by which His Majesty's Government and the Yemen Government agreed to maintain the *status quo* frontier

as it was on the date of the signing of the treaty. The coastline of the Aden Protectorate, which is about 750 miles long, starts in the West from Husn Murad, opposite the island of Perim, and it runs eastward to Ras Dharbat Ali, where it meets the Sultanate of Muscat and Oman.

The total area of the Aden Protectorate is about 112,000 square miles, and the population (of which no census has ever been taken) is estimated to be about 600,000.

The Aden Protectorate is divided into two parts, the Western Aden Protectorate and the Eastern Aden Protectorate. The former consists of 19 Sultanates, the chiefs of which are all in protective treaty relations with His Majesty's Government: His Highness the Sultan of Lahaj (Sir 'Abdul Karim Fadhi, K.C.M.G., K.C.I.E.), is the premier chief of the Protectorate.

The Eastern Aden Protectorate comprises the Hadhramaut (consisting of the Quaiti State of Shihr and Mukalla and the Kathiri State of Seiyun), the Mahri Sultanate of Qishn and Soqatra, the Wahidi Sultanates of Bir 'Ali and Balhaf, and the Sheikdoms of Irqa and Haura, all of which are in protective treaty relations with His Majesty's Government. His Highness Sultan Sir Salih bin Ghalib al Qu'aiti, K.C.M.G., Sultan of Shihr and Mukalla, is the premier chief of the Eastern Aden Protectorate, and the Hadhramaut is the most important and best organised of these areas. It is bounded on the West by the Wahidi Sultanates and on the East by the Mahri Sultanate.

The Mahri Sultanate of Qishn and Soqatra is the most easterly area in the Aden Protectorate for it is bounded on the East by the Sultanate of Muscat and Oman. The Sultan of Qishn and Soqatra resides on the island of Soqatra (area 1,400 square miles) which lies 150 miles from Cape Guardafui. The island was occupied by the East India Company in 1834 and it came under British protection in 1886 when the treaty with the Mahri Sultan was concluded. It contains about 12,000 inhabitants principally engaged in livestock husbandry.

<i>Judge of the High Courts of Basutoland, the Bechuanaland Protectorate, and Swaziland, and Legal Adviser to the High Commissioner</i> , Sir Walter Hugard, K.C.	1,500

The High Commissioner in the Union of South Africa for his Majesty's Government in the United Kingdom holds office concurrently as His Majesty's High Commissioner for Basutoland, the Bechuanaland Protectorate and Swaziland.

BASUTOLAND.

(The Territory of Basutoland.)

Basutoland is an inland Native Territory of South Africa, bounded North and West by the Orange Free State, East by Natal, and South by the Cape Colony, with an area of 11,716 square miles. The Census figures (1936) showed 559,273 natives, 1,434 whites, 1,263 coloured and 341 Asiatics.

The territory is well watered, and enjoys a good climate. Excellent grain can be grown, and cattle, horses, sheep and goats thrive on the good pasturage. The Basuto pony is well known for his hardy qualities; from the goats and sheep the mohair and wool are of the finest quality. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged. Basutoland has been called "The Switzerland of South Africa" and contains amongst its natural wonders the *Maleitanyane Falls* (630 feet).

The Territory is governed by a Resident Commissioner under the direction of the High Commissioner. The chiefs adjudicate on cases between natives, with a right of appeal to the court of the Judicial Commissioner. The District Commissioners adjudicate on cases between Europeans and natives. The final court of appeal in the Territory is the High Court, appeal from which lies direct to the Privy Council. Sisoa Griffiths, great-great-grandson of Moshesh, was

installed as Paramount Chief in 1940; he died (Dec. 26, 1940), and will be succeeded by his infant son Belegu (born 1937) for whom Mantsebo, widow of Sesofo Griffiths, was appointed Regent in Jan. 1941. The revenue is derived from Customs, native tax, income tax on Europeans, post office, licences and wool export duty. There are post offices, Government stations, and numerous agencies at various trading centres. There are 600 Government and aided native schools, with a total roll of 69,000 in 1944; there are also 7 European schools and 322 unaided elementary mission schools, with a total roll of 15,000. The expenditure on education in 1943-44 was £87,970.

	1942-43.	1943-44
Revenue	£468,577	£546,992
Expenditure	385,854	419,949
Public Debt	nil.	nil.

	1942.	1943.
Total Imports	£1,033,330	£1,118,800
Total exports	460,000	465,000

The chief articles of export are wool, mohair, wheat, cattle and hides, the imports being chiefly blankets, ploughs, clothing, groceries, hardware and maize.

tories, E. C. Butler 880

Maseru is distant from London 7,668 miles;

transit, through the Cape, about 20 days.

BECHUANALAND.

(The Bechuanaland Protectorate.)

The Bechuanaland Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and north-east by Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South-West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 275,000 square miles; the *Caprivi Zipsel* was attached to the Protectorate for administrative purposes by Proclamation (1922), but was re-transferred to S.-W. Africa, Sept. 1, 1929, and is now administered by the Union government. The population at the Census of May, 1936, was 265,756, of whom 1,899 were Whites, 66 Indians, 3,727 Coloured and 260,664 Natives.

The climate is healthy during part of the year. Malarial fever is prevalent in some districts during February, March, and April, but with ordinary precautions is not seriously detrimental to health. The country is essentially pastoral, although Kafir corn, mealies, beans, pumpkins and melons are sown, and except in drought years, sufficient for the needs of the people are reaped. Cattle thrive, and numbered 896,902 on June 30, 1944. The High Commissioner has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Tshekedi, Regent during the minority of Seretse (Bamangwato), of Molefi (Bakgatla), of Kgari Sechele (Bakwena), of Bathoen (Bangwaketse), of Mokgosi (Bamatlote), and of Moremi (Batawana).

Schemes for improvements in agriculture, medical services, education and communications and schemes for combating soil erosion, improving water supplies, irrigation dams, tribal granaries, roads and for improving living conditions are being carried out.

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, via Gaborone and Francistown, to Bulawayo and Salisbury. The chief European centres are Lobatsi, Gaborone, Francistown, and Serowe, whither the late Chief (Khama) and all his people moved in 1901 from Palapye.

	1942-43.	1943-44.

The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

SWAZILAND.

(The Swaziland Protectorate.)

Swaziland (called by the natives *Kwa Ncwane*) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and Portuguese East Africa. The total area is 6,705 square miles, and the population (Census of 1936) 155,715 of whom 153,170 were native Ama-Swazi Bantus

(or Swazis), 2,740 Europeans, and 705 coloured. Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet: the Middle Veld, about 2,000 feet lower; and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. The country is well watered and healthy, the annual rainfall averaging 45 inches, the mean temperature being 64° Fahr. (50°-78°). The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching is carried on by several companies. There were about 473,900 head of cattle and about 132,000 native sheep and goats in the Territory at the end of 1944. In the winter season about 200,000 additional sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvaal.

The agricultural products are maize (the staple product), tobacco, millet, ground-nuts, tung-nuts, avocado pears, beans, pumpkins, and sweet potatoes. Cotton growing from jassid-resistant seed is becoming important. The country possesses considerable mineral wealth, including gold, tin, coal, copper and asbestos; asbestos is being produced at the Havelock mine in large quantities and the tin production of the Territory is also of considerable importance. The chief exports in 1942 were cattle, hides and skins, asbestos, tin and tobacco.

There is a daily South African Railway motor omnibus service between Breyten and Mbabane (89 miles); Mbabane and Bremersdorp (27 miles); Bremersdorp and Stegi (43 miles); Bremersdorp and Balegane (42 miles); Piet Retief and Hlatikulu (57 miles); Goedegun to Huti (33 miles) and Hluti and Gollel (26 miles). There are post offices and telegraph and telephone offices at all the chief centres.

	1944-45.	1945-46.
Revenue	£256,022	£232,108
Expenditure	196,478	256,182
Public debt	nil.	nil.

Resident Commissioner, E. K. Featherstone, C.M.G. £1,500

Financial Secretary, (vacant) 650
First Assistant Secretary, W. W. Usher. 750

District Commissioners, R. Armstrong, Esq. & B. A. Marwick 810
 Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. There are townships in the districts at Bremersdorp, Hlatikulu, Stegi and Goedegun. There are schools for Europeans at various centres.

BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15' N. lat. and 64° 51' W. long., comprising an area of about 19 square miles, with a population (1940) of 32,086 (White, 12,319, Coloured, 19,767). They derive their name from Bermudez, a Spaniard, who sighted them in 1527, but were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant.

The Government is administered by a Governor, who is also Commander-in-Chief of the military forces. He is advised by an Executive Council of 7 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members. The franchise was extended to women in 1944.

The climate is mild and healthy. There are no streams or ordinary wells, and the inhabitants are normally dependent on the rainfall stored and preserved in tanks, but a new system of horizontal wells has recently been successfully installed. Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding. The islands produce large quantities of onions, potatoes, and green vegetables, which are largely exported, together with cut flowers and lily bulbs, to Canada. Arrowroot and bananas are also grown, but meat, flour and other articles of consumption are imported from the U.S. and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians. Shipping entered and cleared 1939, 5,009,220 tons.

Facilities for the establishment and use of naval and air bases on the east coast of Bermuda and on the Great Bay, were granted in Sept., 1940, to the Government of the United States of America, and in 1944 a training base for ships of the Royal Canadian Navy was established.

BORNEO.

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4' N. to 4° 10' S. and from long. 108° 50' to 119° 20' E. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,826,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, Bajaus, Dusuns, Muruts and Bugis (the aboriginal Celébes). The island was discovered by the Portuguese in 1522. About 204,000 sq. miles are included within "Netherlands Indies." Of the remainder of the island (the North Coast) 50,000

sq. miles form the State of Sarawak and 30,000 sq. miles the State of North Borneo, both under British protection.

STATE OF NORTH BORNEO.

The territory of the State of North Borneo is governed by the British North Borneo (Chartered) Company and occupies the northern part of the island, with a total area of about 29,347 square miles, and a coast-line of about 900 miles. The population (1931) was 270,223, consisting mainly of Muhammadan settlers on the coast, aboriginal tribes inland, and a large number of Chinese traders, artisans, and agricultural labourers. The interior is mountainous (Mount Kinabalu, 13,455 feet) and is densely timbered.

BRITISH GUIANA,

which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America and has a total area of 89,480 square miles, with a seaboard of more than 300 miles. The population, Dec. 31, 1943, was estimated at 364,697, of whom 159,249 were East Indian immigrants. The colony is bounded on the south by Brazil, on the east by Dutch Guiana, on the west by Venezuela, and on the north and N.E. by the Atlantic. The coastland is very like the Netherlands, below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the British Guiana-Venezuela-Brazil boundaries is Mt. Roraima, a flat-topped mountain 9,304 feet above sea-level. There are many beautiful waterfalls in British Guiana, including *Kukenam Fall*, with a drop of 2,000 feet; on the Potaro River (a tributary of the Essequibo) is the *Kaieteur Fall*, with a clear drop of 741 feet and a total fall of 822 feet, and on the Essequibo, the *Horse Shoe Falls* (discovered in 1934); a fall, with a drop of some 500 feet, discovered in 1934 on the Ipoke River, a tributary of the Kuribong, has been named the *Marina Fall*, and other falls were discovered in 1938 on the Karanang River, 80 miles north-east of Mt. Roraima. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The climate on the coast, for the greater part of the year, is pleasant and healthy. In the Aug.-Oct. period it is hot. The mean temperature is 80° 3', its extremes during 86 years ranging between 68° and 96° , but these are very rare, the usual extremes being 70° and 90° . In the interior the mean temperature is higher— 82° 6', its extremes ranging from 66° to 103° . The yearly rainfall is subject to marked variation, its mean on the coast lands being

averaging about 90 inches with an average of 58 inches on the savannahs. The daily average sunshine is a little over 6 hours and, except when rain is falling, dull and cloudy weather is rarely experienced.

Much of the country is jungle, the cultivated portion (about 160,000 acres, of which 70,000 are under sugar-cane and 50,000 in rice) is confined to the sea coast and to a short distance from the rivers. There are extensive deposits of gold, diamonds, manganese, bauxite and mica.

There are about 8,669 aboriginal Indians living in their primitive state in the remote part of the Colony; they are occupied largely in fishing, hunting, and raising crops of cassava.

Prior to 1928 the Constitution of the Colony consisted of the Court of Policy and Combined Court, but in 1928 the Secretary of State for the Colonies appointed a Commission (consisting of Sir K. Roy Wilson, M.P., and H. Snell, M.P.—afterwards Lord Snell) with wide terms of reference, to consider the economic condition of the Colony. One of their recommendations was that the Constitution should be altered so as to provide that the Governor should have power to carry into effect all measures which he and the Secretary of State consider essential for the well-being of the Colony. The British Government accepted the Commission's recommendation and the British Guiana Order in Council passed in 1928 (Amended in 1935), provided for the constitution of a Legislative Council in place of the Court of Policy and Combined Court which had been in existence since 1831. The composition of the Legislative Council was altered by an Order in Council 1943, and it now consists of the Governor as President, 3 Official Members and 21 Unofficial Members. Executive and administrative functions are exercised by the Governor and an Executive Council. There are 5,300 miles of post-office telephone wire, 1,430 of which are contained in 13 miles of aerial cable; in addition, there are 22 miles of submarine cable and 317 of telegraph lines, with 60 post-offices and postal agencies, 1 short-wave broadcasting station, and 12 wireless stations (open to public or official correspondence), including one operated by Cable & Wireless (West Indies), Ltd., and one by Pan American Airways. There are 95 miles of railway.

Facilities for the establishment of a defensive base on the Demerara River, 25 miles from the sea and within 50 miles of Georgetown, were granted to the Government of the United States of America by the *Anglo-American Agreement*, Sept. 2, 1940.

CAPITAL, Ψ Georgetown. Population (1941), 72,000 (a disastrous fire, Feb. 23, 1945, destroyed many public and private buildings and inflicted damage estimated at £2,000,000); Ψ New Amsterdam had an estimated population (1941) of 10,000.

	1943.	1944.
Public revenue	£2,642,533	£3,315,020
Public expenditure ..	2,330,618	2,930,319
Public debt (Dec. 31)	4,038,603	4,039,290
Total imports	5,199,760	4,708,097

BRITISH HONDURAS.

British Honduras, in Central America, lies within 18° 29' 5" to 15° 53' 55" N. latitude and 89° 9' 22" to 88° 10' W. longitude. Its extreme length and breadth are approximately 174 m. and 68 m. respectively; it is bounded on the north and north-west by Mexico (Quintana Roo Province, formerly Yucatan); on the west and south by Guatemala; and on the east by the Caribbean Sea. The total area is about 8,867 sq. miles, with a population (Census 1931) of 51,347—25,524 males and 25,823 females; estimated (Dec. 31, 1944) at 63,390. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 55° to 92° F. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. In September 1931 a disastrous hurricane devastated the capital of the colony, with a loss of nearly 1,000 lives, a Mansion House Fund being raised for the sufferers.

The greater part of the country is covered by forest, of which 72 per cent. is high rain forest, 15½ pine forest and dry savannah, 5½ wet savannah and mangrove forest, the remaining 7 per cent. being existing or recently abandoned cultivation. The wire grass and sedges of the dry savannahs make very poor pasturage for cattle. The North of the Colony and the southern coastal plain (10 to 12 miles wide) is nearly

flat, and near the sea is low and swampy. The central mountain mass has a general altitude of 2,000 to 3,000 feet and 57 per cent. of the area of the colony is over 1,000 feet in elevation above mean sea-level.

The staple products are obtained from the forests, and include mahogany, cedar, and *chicle* (the basis of chewing gum). Agricultural crops that grow readily include sugar cane, coco-nuts, plantains, pineapples, mangoes, maize, rice, varieties of beans and peas. Bananas also grow well in certain localities but are subject to Panama Disease. All varieties of citrus fruits flourish, and in particular grape fruit, of which a very high grade is exported.

There are 28 elementary and 5 secondary schools aided by Government in the colony, the total enrolment being 10,858 (5,506 boys, 5,352 girls). The shipping entered and cleared at the port of Belize in 1944 was 237,508 tons. There is a radio-telegraph station at Belize.

British Honduras is governed as a Crown colony. There is an Executive Council of 3 official and 4 appointed members and a Legislative Council of 6 official and 8 unofficial members (6 elected and 2 nominated). The Governor is President of both Councils.

CAPITAL. Ψ Belize. Population (1931), 16,687; other towns Ψ Corozal (2,197), El Cayo (1,260), Ψ Stann Creek (2,844), Punta Gorda (1,119).

BRITISH WEST INDIES.

Trade Enquiry Office in London, The West India Committee, 40, Norfolk Street, Strand, W.C.2. The West Indies, so named in 1492 by Columbus who believed the islands to form the western limits of India, are a number of islands

and islets, some of them mere rocks, situated between 10° to 27° North and 59° 30' to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, Cuba (44,000 sq. miles) and Hispaniola (Haiti and the Dominican Republic) (30,000 sq. miles), Jamaica and Puerto Rico; II. BAHAMAS, which are entirely British. III. LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, the United States and Venezuela. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are *Independent*, 12,300 British, 3,890 United States, 1,350 French, 430 Netherlands, and 90 Venezuelan.

COMMITTEE ON HIGHER EDUCATION.

In 1944 a Committee was set up to review existing facilities for higher education in the British Colonies in the Caribbean and to make recommendations regarding future university development for those Colonies.

Chairman of the Committee, Sir James Irvine, C.B.E., LL.D., F.R.S.

Other Members, A. M. Carr-Saunders, M.A. (Director, London School of Economics); Margery Perham (Reader in Colonial Administration, Oxford University); R. H. Priestley, M.C., M.A., D.Sc. (Vice-Chancellor, Birmingham University); P. Sherlock (Secretary, Institute of Jamaica); and H. Springer (Member of House of Assembly, Barbados).

Secretary, T. R. Rowell, B.Sc. (Assistant Educational Adviser), Colonial Office, S.W.1.

SOCIAL WELFARE.

A Social Welfare Adviser (Dora Ibberson) to the Comptroller for Development and Welfare in the West Indies was appointed in 1945.

THE BRITISH COUNCIL.

Chief Representative in British West Indies, Sir Harry Luke, K.C.M.G. The British Council, Whitehall Port of Spain, Trinidad; Representatives: F. D. Gray (Port of Spain); H. Paget (Kingston), Jamaica; B. King (Barbados); A. W. Stewart (British Guiana).

THE ANGLO-AMERICAN AGREEMENT.

Under the Anglo-American Agreement (Sept. 2, 1940) facilities were granted to the Government of the United States of America for the establishment, use, and protection of naval and air bases on a lease for 99 years on the eastern side of the Bahamas, the southern coast of Jamaica, the west coast of St. Lucia, the west coast of Trinidad, in the Gulf of Paria, in Antigua and in British Guiana, in exchange for naval and military material. The text of the Note will be found in *The Times*, p. 3, Sept. 4, 1940.

ANGLO-AMERICAN CARIBBEAN COMMISSION.

(For co-ordinated effort in planning agricultural and other research.)

Co-Chairmen, Sir Frank Stockdale, K.C.M.G., C.B.E. (Gt. Britain); Charles W. Taussig (U.S.A.).

Secretary, Dr. E. E. Williams.

The first meeting took place at Bridgetown, Barbados, on March 22, 1944. It was attended by representatives of the Bahamas, British Guiana, British Honduras, Jamaica, the Leeward and the Windward Island, Trinidad, Barbados, Puerto Rico, and the U.S. Virgin Islands.

THE BAHAMAS

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between $21^{\circ} 42' - 27^{\circ} 34'$ N. lat. and $72^{\circ} 40' - 79^{\circ} 5'$ W. long., and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,375 square miles, and a population in 1942 of 71,474, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), Cat Island, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Harbour Island, Inagua, Andros Islands, San Salvador (at one time known as Watling's Island), Rum Cay, Long Cay, Ragged Island and Bimini. Watling's Island was the first landfall in the New World made (October 22, 1492) by *Christopher Columbus*, who gave it the name of San Salvador, which has been restored by an Act of the Bahamas legislature. A site on the island of Exuma was leased to U.S.A. in 1940 for use as a naval base. Originally settled by Englishmen, the Bahamas were, in 1782, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. - Sponge-gathering used to be the chief industry, but is at a temporary standstill owing to a disease which attacked the beds in December, 1938. Sponge to the value of £72,049 was exported during 1939, largely from stocks on hand before the occurrence of the disease. Tomatoes are cultivated in large quantities for shipment to Canada and the United States. Mahogany, lignum-vite, mastic, ironwood, ebony, logwood, and satinwood are found throughout the islands. The imports are chiefly foodstuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a nominated Legislative Council of 9 members and an elective Representative Assembly of 29 members.

BARBADOS

the most windward of the West India Islands, is situated in $13^{\circ} 4' N.$ and longitude $59^{\circ} 37' W.$ It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 66,000 acres being cultivated. The population (Census of 1921), was 156,312; estimated at 203,220 on Dec 31, 1944. The island has a healthy climate and is free from malaria. The principal exports are sugar, molasses, rum, cotton and building lime, and the imports rice, salted meat, corn, salted fish, butter, flour, and corn meal. Liberal provision is made for elementary education, and the Lodge School and Harrison College provide for higher education for boys, and Queen's College and Codrington High School for girls. Barbados alone of the W.I. Islands makes local provision for University training, Codrington College having been founded under the will of Christopher Codrington, who died in 1720. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1627. In 1885 it was constituted a distinct Government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of 9 members appointed by the Sovereign, and a House of Assembly of 24 members elected every two years on the basis of a moderate franchise.

The CAPITAL and port is Ψ Bridgetown (pop., 1921, 13,486) on the shores of an open roadstead (Carlisle Bay); Ψ Speightstown (pop. 1,200).

JAMAICA,

aboriginally *Yamayca*, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 42'—18° 32' North lat. and 76° 11'—78° 23' W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,450 square miles. The island is divided into 3 counties (Surrey, Middlesex and Cornwall) and 14 parishes. The census taken on January 4, 1943, shows a total of 1,237,063 persons resident on the island (598,267 males and 638,796 females).

The climate attracts many winter visitors, mainly from U.S.

Jamaica was discovered on May 3, 1494, by Columbus, who called it *St. Jago*. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the *Treaty of Madrid*.

The island figured largely in the history of the buccaneers before and during the time of Sir Henry Morgan. Port Royal, the old haunt of the pirates, was destroyed by an earthquake in 1692.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 213 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages; accounts open in the Govt. savings banks (1945) 228,276 (£2,117,640). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches a high price. There is an extensive trade in fruits and nuts, chiefly bananas, oranges and coco-nuts, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and there are some rare cabinet woods.

FINANCE.

	1943-44.	1944-45.
Revenue	£5,655,432	£5,490,537
Expenditure	5,949,348	6,319,116
Public debt	7,441,084	...

Under the Colonial Development and Welfare Act, 1940, the assistance approved by way of grant and loan for Jamaica to Jan. 31, 1945, totals £3,775,040. Of this amount £3,021,440 is by way of grant and £753,600 by way of loan. These schemes also involve the Colony

in expenditure of £696,735 from its revenues. The total estimated expenditure to March 31, 1945, is £1,572,619. Of this amount £1,038,538 will be by way of grant and £534,081 by way of loan.

TRADE.

The principal city is Ψ Kingston, the seat of government and the largest port and town, pop. (Census, 1943) 109,056; the next in importance are Spanish Town, pop. 12,007; Ψ Montego Bay, 11,547; and Ψ Port Antonio, 5,482. Kingston is distant from London 4,000 miles; transit, 14 days.

THE CAYMAN ISLANDS.

The Cayman Islands, forming a dependency of Jamaica, between $79^{\circ}44'$ and $81^{\circ}26'$ W. and $19^{\circ}15'$ and $19^{\circ}46'$ N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 100 square miles. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti, and called "Las Tortugas." Population (1943) 6,670. Shipbuilding and turtle-fishing are the principal industries.

The principal town is Ψ Georgetown, in Grand Cayman, population (1939) 1,500.

TURKS AND CAICOS ISLANDS.

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-east of which they are distant about 450 miles. They have an area of about 170 square miles, and a population (1942) of 6,138, of which the principal island, Grand Turk, contains 1,668 Ψ Grand Turk is an important cable station. The islands are celebrated for producing the finest salt in the world.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. The Legislature of Jamaica has the power to pass laws applying to the Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

Revenue	£16,287
Expenditure	23,016
Public debt	nil.
	1942.
Total imports	£31,148
Total exports	18,456
Commissioner, E. P. Arrowsmith	£600

THE LEEWARD ISLANDS.

The Leeward Islands of the West Indies under British authority consist of the 4 presidencies of (1) Antigua, with Barbuda and Redonda; (2) St. Christopher and Nevis, with Anguilla; (3)

Montserrat; and (4) the Virgin Islands, with Sombrero; all, except the last, having their own local Legislature. These 4 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate. There is a General Legislative Council of 10 official and 10 elective members, with the Governor as President, possessing concurrent legislative powers with the local Legislature on certain subjects. The population of the federal colony at the Census of 1921 was 122,211 (estimated Dec. 31, 1944, at 102,000), Dominica having been transferred to the Windward Islands.

(1) ANTIGUA AND BARBUDA.

Antigua is the seat of government and residence of the Governor-in-Chief of the Leeward Islands. It lies in $19^{\circ}6'$ N. lat. and $61^{\circ}45'$ W. long., and is nearly 108 square miles in area with a coast line of about 70 miles. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which two central sugar factories have been erected. Cotton is planted on a small scale and the island also exports molasses, tomatoes, pineapples, and other fruits. The Council of Government (as reconstituted 1936) consists of the Administrator, 2 official members, 3 nominated and 5 elected members. The population, with Barbuda (Census of 1921) was 29,767, estimated at 44,000 on Dec. 31, 1944.

A site near Parham Harbour, Antigua, was leased to U.S.A. in 1940 for use as a naval base.

	1942.	1943.
Revenue	£181,792	£219,559
Expenditure	173,310	200,974

Magistrate, C. Ross..... 600
Supt. of Public Works, Hon. J. P. Purnell-Edwards..... £660 to 850
Surgeon-Specialist, Dr. J. E. Wright.... 1,000
Barbuda, formerly a possession of the Codrington family, is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35' N., long. 61° 42' W. Area, 62 square miles. Population, 1,000. The island is flat and is fertile in parts, producing cotton, corn, pepper, charcoal, and vegetables. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing.

Warden, G. L. Bellot (and quarters)..... £350 to £500

Redonda is uninhabited.

(2) ST. KITTS-NEVIS WITH ANGUILLA.

The islands of St. Kitts, Nevis, and Anguilla were united in 1832 to form one Presidency, and taken together they have a population estimated at 37,954 (Dec. 31, 1944), and a total area of about 150 square miles. The climate is decidedly healthy for the tropics, the temperature being from 66° to 88°.

St. Kitts (population Dec. 31, 1944, 17,992), the principal island, was the first possession of the British West Indies to be colonised (1623); it is situated in lat. 17° 18' N. and long. 62° 48' W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,711 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital Ψ Basseterre is a port of registry.

Nevis (pop. 15,074) is separated from St. Kitts by a strait 3 miles wide and has an area of 50 sq. miles. Cotton and coco-nuts are exported, and cattle and vegetables are raised. Its greatest elevation is 3,596 feet. The chief town, Ψ Charlestown is a port of entry.

Anguilla (pop. 4,888) is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised.

Agricultural Superintendent, R. E. Kelsick..... 675

(3), MONTserrat.

Is situated in 16° 42' N. lat. and 62° W. long., 26 miles S.W. of Antigua. It is about 11 miles in

length and 7 in breadth, comprising an area of 32½ square miles, with an estimated population (Dec. 31, 1941) of 15,116. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active volcanoes and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest well cultivated. A great part of the island was devastated by hurricanes in 1924 and 1928. The chief exports are cotton-seed, cotton, cotton-seed oil, onions, limes and its products, tomatoes, and animals of all kinds. The chief town is Ψ Plymouth, with a population (1941) of 1,893. There is a wireless station in the island.

(4) THE BRITISH VIRGIN ISLANDS.

A group of islands belonging chiefly to Great Britain and the U.S.A., form a connecting link between the Greater and Lesser Antilles. Sixteen of the islands as far British became so in 1666; the principal are—Tortola (the largest), situated in 18° 27' N. lat. and 64° 40' W. long., Virgin Gorda, and Anegada. The area of the British possessions is 67 square miles, and the population in 1944 was estimated at 7,000. There is good pasture for cows, sheep, and goats. Livestock raising for export to the U.S. Virgin Isles is the principal industry. Sugar cane and coco-nuts are grown; fishing and poultry-rearing are also carried on. The capital of the group is Ψ Road Town, on the south-east of Tortola; population (1944), 1,000.

	1943.	1944.
Revenue.....	£17,755	£15,192
Expenditure.....	13,674	19,746

(+ allowance £150 and residence) £750
Medical Officer, R. H. Georges (and private practice)..... 400
Asst. Treasurer, J. E. T. Roberts.

TRINIDAD AND TOBAGO.

Trinidad, the most southerly of the West India Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between 10° 3'—10° 50' N. lat. and 60° 55'—61° 56' W. long., and is about 50 miles in length by 37 in breadth, with an area of 1,862 square miles, and a population at the Census of 1931 (including Tobago) of 412,783, estimated at 546,088 on December 31, 1944. The island was discovered by Columbus in 1498, and capitulated to the British under Abercromby in 1797, and was ceded to Britain under the Treaty of Amiens (March 25, 1802). A

remarkable phenomenon is the asphalt lake, 114 acres in extent, near the village of La Brea, from which (1944) 35,477 tons of asphalt (\$1,087,514) were exported. The soil of Trinidad is rich and productive, the most important products being sugar, cocoa, molasses, rum, copra, limes, and coco-nuts, grape-fruit and various kinds of timber and fruits. Oil is one of the principal products. Coal, iron, graphite and gypsum exist in small quantities; and traces of gold have been found in the Northern Range. On December 31, 1943, there were 291 Elementary and Intermediate Schools, 46 being Government and 245 Assisted, Trinidad having 257 and Tobago 34, in addition to 9 colleges for higher education, 8 of which also receive a grant-in-aid.

In 1945 the Government of the Colony allocated £495,000 for expenditure on medical services for malaria, venereal diseases, leprosy, nutrition and health education.

There are 118 miles of railway open, and the island is in communication with Tobago and the mainland by telegraph and wireless. The Government is vested in a Governor, an Executive Council (consisting of the Colonial Secretary, Attorney-General, Financial Secretary and 5 other members appointed by the Governor) and a Legislative Council of 3 official members (Colonial Secretary, Attorney-General and Financial Secretary) and 15 unofficial members, 6 nominated and 9 elected.

The chief town and port of entry, Port of Spain (pop. 105,195), is one of the finest towns in the West Indies, with sewerage, electric lighting, tram and telephone services. Other towns of importance are Port of San Fernando (pop. 18,989), about 30 miles south of the capital; —Princetown (pop. 6,651), and Arima (pop. 6,720).

FINANCE.

	1943.	1944.
Revenue.....	\$29,165,630	\$29,158,819
Expenditure.....	28,894,183	31,246,441

Imports.....	\$59,788,779	\$68,988,522
Imports from U.K.....	8,404,393	7,708,684
Exports.....	42,030,774	54,106,328

The chief exports (1944) were sugar, \$4,104,233, and raw cocoa, \$1,411,796.

Tobago lies between 11° 8' and 11° 21' N. lat. and between 60° 30' and 60° 50' W. long., about 75 miles south-east of Grenada, 21 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados. The island is 26 miles long, and 7½ broad, and has an area of 116 square miles, with a population estimated (1944) at 33,543. It is one of the healthiest of the West Indies; the temperature varies from 81° to 88°. There are three towns in the island, viz., Port of Scarborough (pop. 1,635), Roxborough (pop. 1,805), and Plymouth (pop. 991).

Other Islands. Carriacou Point and Icaicos Point, the N.W. and S.W. extremities of Trinidad, enclose the Gulf of Paria and west of Carriacou Point lie several islands, of which Chacachacare, Huevos Monos and Gaspar Grande are the most important. On Chacachacare is a Leper Settlement, the Resident Chaplain of which appears for Sunday and weekly editions of British newspapers.

Sites on the island of Trinidad were leased to U.S.A. in 1940 for a naval base.

CAPITAL, Port of Spain (pop. 105,195); transit, 10 to 12 days to U.K.; 5 days to U.S.A.

THE WINDWARD ISLANDS.

The Government of the Windward Islands is made up of the four colonies of Grenada (the seat of government), St. Vincent, St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent, and (since Jan. 1, 1946) of the Island of Dominica (formerly part of the Leeward Group). The total area is 813 square miles, with a population estimated at 220,000. There is one Governor for the four islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him.

<i>Governor and Commander-in-Chief, His Excellency Sir Arthur Francis Grimble, K.C.M.G. (1942).....</i>	<i>\$3,000</i>
<i>Transit to Grenada from London about 14 days.</i>	<i>.....</i>

GRENADA AND THE GRENADINES.

Grenada is situated between the parallels of $12^{\circ} 30'$ – $11^{\circ} 58'$ N. lat. and $61^{\circ} 20'$ – $61^{\circ} 35'$ W. long., and is about 21 miles in length and 12 miles in breadth; it is about 95 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres; estimated population (including some of the Grenadines), 89,415 (Dec. 31, 1938). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, sugar cane, cotton, coffee and fruit are grown. The imports chiefly comprise dry goods, breadstuffs, hardware, &c. The Legislative Council consists of 15 members, 4 of whom are officials, 4 nominated and 7 elected.

St. George's (population 5,000), on the south-west coast, is the chief town, and possesses a good harbour, where a deepwater jetty is being built to accommodate ocean-going vessels.

Chief of Police, Maj. E. J. R. Ormiston. (and quarters) £450 to 500

The Grenadines are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1921) 7,104.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in $13^{\circ} 54'$ N. lat. and $60^{\circ} 59'$ W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 238 square miles with a population (Dec. 31, 1942) of 73,772. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1943) were sugar, limes, lime-oil, coco-nuts, copra, cocoa, charcoal, bay rum, molasses, syrup, bananas and fruit.

Under the Anglo-American Agreement (1940) sites for a seaplane base at Gros Islet Bay in North and for a land aircraft base at Vieux Fort in South of the Island have been leased to U.S.A.

Castries, the capital (pop., 1943, 24,118), one of the finest ports in the W.I., is a coaling depot. In 1941, 379 steamers (tonnage 1,103,418) entered Castries.

ST. VINCENT,

an island about 95 miles west of Barbados, situated in $13^{\circ} 20'$ N. lat. and $60^{\circ} 57'$ W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population estimated (Dec. 31, 1942) at 60,402. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, copra, coco-nuts, molasses, rum, cassava, cocoa, coffee, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

DOMINICA.

Dominica, the loftiest of the Lesser Antilles, was transferred from the Leeward to the Windward Group on Jan. 1, 1940. It is situated between $15^{\circ} 20'$ – $15^{\circ} 45'$ N. lat. and $61^{\circ} 13'$ – $61^{\circ} 30'$ W. long., 55 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 305 sq. miles, or 195,200 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85° . The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. The exports consist almost entirely of agricultural produce, principally green limes, lime oil, lime juice, bananas, oranges, bay oil, cocoa and vanilla. The popula-

tion was estimated at 54,505 on Dec. 31, 1944; included in this total are 400 (1118, of whom about 100 are of pure blood. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President and 2 official and 8 non-official members, 5 of whom are elected, and 3 nominated by the Governor. The principal towns are Ψ Roseau, on the south-west coast, population 10,000, and Portsmouth, population 3,000.

CAMEROONS.

See NIGERIA.

(Cameroons under British Mandate.)

CEYLON.

CEYLON, known to the Romans as *Taprobane* (from the native name signifying "island of dusky leaves") and as *Serendip* in Horace Walpole's romance, is an island in the Indian Ocean, off the southern tip of the peninsula of Hindustan, situated between 5° 55'—9° 50' N. lat. and 79° 42'—81° 53' E. long. Its area is (with outlying islands) 25,322 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles. The climate varies with the altitude of the district, the highest points being Pedratalagala (8,292 ft.) and Adam's Peak (7,360 ft.) but, on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January; the hottest are April and May.

Estimated population (December 31, 1944), 6,384,000. At the Census of 1931 it was 5,312,548 (including military and shipping), the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about 543 B.C. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but six years later the island was ceded to Britain under the Treaty of Amiens (March. 25, 1802) and Ceylon was formed into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The religion of the majority of the inhabitants is Buddhism, introduced from India in the third century B.C.

The staple products of the island are agricultural. The most important for home consumption is rice in its two forms of paddy and husked grain.

About one-fifth of the island is under cultivation, and the approximate areas in 1943, in acres, were:—Rice, 850,000; other grain, 105,000; tea, 549,600; coconuts, 1,238,000; rubber, 637,700; cinnamon, 26,000; cacao, 34,000; citronella, 33,000; and tobacco, 14,000. The live stock in 1943 included 1,607,974 horned cattle, 59,122 sheep, 273,049 goats, 49,677 pigs, and 1,414 horses. Among the more important industries are gold, silver, brass, ivory and tortoiseshell work, weaving, pottery, and metal and lacquer work, basket and mat-making. Hydro-electric works are in course of erection. Cigarette, match and soap factories have been established for some time and the Department of Commerce and Industries has recently established others for acetic acid, ceramics, coir, glass, quinine, paper, plywood, leather, hats, shark liver oil plants and steel rolling, caffeine and strychnine plants are in course of erection, and a fair proportion of local requirements is now manufactured in the island. The manufacture of salt is a Government monopoly.

It was announced in October, 1942, that the presence of vanadium had been discovered in large quantities in the island.

Many precious stones are found in Ceylon, the more important being the ruby and sapphire. Pearl fishing is carried on periodically in the Gulf of Mannar, in the N.W. of the island.

There are 913 miles of railway open, 507 being 5 ft. 6 in. gauge and 206 miles a ft. 6 in.; there are 853 post offices, 451 money order offices, and 348 telegraph offices, with 10,377 miles of telegraph wire and 75,951 miles of telephone wire. In 1936 a Commission was appointed by the Colonial Office (at the request of the Ceylon Government) to enquire into the financial position of the Ceylon Government Railway and to make recommendations with regard to future policy.

In 1940 shipping of 6,490,000 gross tons (British, 4,232,000) entered and 6,444,000 gross tons (British, 4,233,000) cleared at the various ports.

Government.—The government is administered by a Governor, aided by a *State Council* consisting of 50 members (elected on a territorial basis) with 8 nominated unofficial members, and 3 Officers of State (Chief Secretary, Legal Secretary and Financial Secretary). The Council is divided into 7 Executive Committees in charge of various subjects; the Chairmen of the 7 Executive Committees are Ministers for the subject concerned. The Chief Secretary is in charge of External Affairs, Defence and the Public Services; the Legal Secretary and the Financial Secretary are in charge of Legal and Financial Affairs. The Officers of State and the Ministers form a Board of Ministers which prepares the Estimates of Revenue and Expenditure in consultation with the Financial Secretary.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government Agent. The larger towns have municipalities, or Urban Councils; and in the country districts the Ceylonese retain their village councils and tribunals for matters of minor importance.

In October, 1945, the Commission on Constitutional Reform in the Island (*Chairman*, Lord Soulbury) recommended self-government for

Ceylon on the British model, as a step to full Dominion status. The Commission proposes the retention of universal suffrage and the establishment of a Senate of 30 members, and a House of Representatives of 95 elected members.

Education.—In 1943 there were 2,172 Government (Sinhalese and Tamil) Schools with about 197,297 boys and 133,594 girls and 1,916 aided schools (174,676 boys, 151,455 girls) where education is free. Fees are charged in the 393 English and bi-lingual schools (63,080 boys, 29,149 girls). There is a Royal College, a Government Training College and a Technical College in Colombo. On July 21, 1942, the University College of Colombo, founded in 1922, was inaugurated as the University of Ceylon.

FINANCE.

THE MALDIVES ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the Equator. Malé, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Muslims. The islands are unhealthy, and the main exports are dried fish, cowrie shells, coconut coir, and tortoiseshell.

Sultan ("Lord of the Thousand Isles") Sir Hassan Nu'uddin Iskander II, K.C.M.G., elected March 12, 1935; assumed Sword of State, July 21, 1938.

Colombo, distant from London (overland) 5,868 miles; transit, 17 days.

THE CHANNEL ISLANDS,

situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to England, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), and the following dependencies of Guernsey—Alderney (1,962 acres), Brechou (74), Great Sark (1,025), Little Sark (239), Herm (320), Jethou (44), and Lihou (38), a total of 48,083 acres, or 75 square miles. The 1931 Census population of Jersey was 50,455, and of Guernsey, &c., 42,743 (Guernsey 40,585, Alderney 1,251, Sark 571, Herm 53, Jethou 2).

The climate is mild, and the soil exceptionally productive. The land under cultivation in 1936 was 96,175 vergées (2½ vergées = 1 acre), the principal product of the soil of Jersey being potatoes, tomatoes and turnips, and of Guernsey bulbs, potatoes and oats, fruits and roots. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the *States*, and of the Royal Court, and is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The principal imports are coal and coke, and the chief export potatoes, tomatoes, flowers, and stone and *gabbro* (road metal). The chief town of Jersey is St. Helier, on the south side; the principal town of Guernsey is St. Peter Port, on the east coast.

<i>Lieutenant-Governor of Jersey, His Excellency Lieut.-General Sir Arthur Edward Grasett, K.B.E., C.B., D.S.O., M.C.</i>	(1945) £1,700
<i>Lieutenant-Governor of Guernsey, His Excellency Major-General Philip Neame, D.C., C.B., D.S.O.</i>	(1945) £1,700

COLONIAL DEVELOPMENT.

Under the *Colonial Development and Welfare Act, 1940*, annual sums of £5,000,000 for Development and £500,000 for Research were

made available for 10 years from 1941. An Act passed in 1945 extended the grant period from 1951 to 1956, more than doubled the rate of expenditure, and abolished the practice of surrendering the unexpended portion of the annual grant to the British Treasury.

CYPRUS

is a large island in the Mediterranean Sea, between N. lat. 34° 33' and 35° 41', and E. long. 32° 20' and 34° 35'. It is about 40 miles distant from the nearest point of Asia Minor, and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad, from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,572 square miles. The population at the census of 1931 was 347,959, of whom about 18 per cent. were Muhammadans, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Orthodox Eastern Church; estimated population Dec. 31, 1940, 383,967. The principal agricultural products are wheat, barley, animals, carobs (locust beans), olives, wine, raisins, potatoes, citrus and deciduous fruit, cumins, cheese, cotton, wool, silk, pulse crops and linseed. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death rate of the whole island is nearly as low as that of any European country.

The post-war reconstruction policy of the government embraces the development of the island's resources, co-operative credit and agricultural marketing, the improvement of living conditions, encouragement of exports, etc. A 5-year plan of development was initiated in 1945, including a water supply for each of the 600 villages in the island (£800,000); irrigation (£500,000), and anti-malaria and other health schemes (£500,000).

Cyprus was annexed to the British crown by Richard Coeur de Lion in 1191 but was sold to Venice in 1487. After passing through many vicissitudes the island was formally annexed to the British Empire on Nov. 5, 1924. From March 10, 1925, until Nov. 12, 1931, the Government was administered by a Governor, aided by an Executive and a Legislative Council, the latter containing 9 official and 15 elected members, but after the disturbances which occurred in the island during the autumn of 1931, the clauses (in the Letters Patent of March, 1925) dealing with the constitution of the Legislative Council were revoked, power to legislate being vested in the Governor pending a review of the constitutional future of the island.

For administrative purposes the island is divided into six districts, in each of which the executive government is represented by a commissioner. This division also obtains for judicial purposes. The Law Courts were reconstructed in 1936 and there are now a supreme court, 6 assize courts, and 6 district courts. In the assize and district courts Cypriot judges take part. There are also 3 Mussulman religious tribunals, styled *Shari Courts*.

A battalion of Infantry was raised in Cyprus in Feb. 1940.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 23,507

in 1931; the other principal towns are ΨLarnaca (population 11,725), ΨLimassol (15,066), ΨPainagusta (8,771), Kyrenia (2,049), Paphos (4,467), and Morphou (4,335).

FINANCE.

	1942.	1943.
Revenue.....	£1,759,031	£2,280,159
Expenditure.....	1,751,184	12,156,724
Rate of Exchange (1943)		
180 Cyprus plastics = £1 sterling.		

TRADE.

	1943.	1944.
Total imports (civil) ..	£2,592,389	£4,804,803
Total exports.....	2,187,067	2,452,496
Imports from U.K.....	498,526	553,810
Exports to U.K.....	326,936	409,923

The chief imports are beans and peas, barley, wheat, flour, coffee, edible oils and fats, rice, sugar, dom nuts for the manufacture of buttons, hides and skins, crude petroleum, cotton yarns, cotton finished thread, cotton piece goods, cotton manufactures (including apparel), silk and artificial silk piece goods, silk and artificial silk manufactures (including apparel), woollen piece goods, woollen manufactures (including apparel), empty jute bags, chemicals, medicines, lubricating oils, petrol, kerosene, chemical manure, matches, cement, leather, and tyres and tubes for motor cars.

The most important exports are animals, carobs, cheese, wheat, oranges, almonds, raisins, wine, spirits, potatoes, leaf tobacco, hides and skins, ground pine bark, reeled silk, cumiseed, wool, artificial tooth, and buttons. Mining products exported include asbestos, terra umbra, chromium ore, cupreous concentrates, pyrites and gold ore. In 1944 the wine export was 704,437 gallons, and that of spirits 420,752 gallons.

The Roman supply of copper was chiefly drawn from Cyprus and was known as aes cyprium (Cyprus brass) which was shortened to cyprum, and corrupted to cuprum, whence is derived the English word copper.

WEIGHTS AND MEASURES.

Capacity.—2½ quarts = 1 Cyprus litre; 8 gallons = 1 kiló.

Liquid.—9 quarts = 1 kouza; 16 kouzas = 1 load.

Weight.—400 drams = 1 oke (2½ lb.); 1½ okes = 1 litre; 5 okes = 1 stone; 44 okes = 1 Cyprus kantar; 180 okes = 1 Aleppo kantar; 80 okes = 1 ton.

Length.—2 feet = 1 pic.

Surface.—1 donum = 1,600 sq. yards (approx. ½ acre).

EAST AND WEST AFRICAN GOVERNORS' CONFERENCE.

The East African Governors' Conference comprises the Governors of Kenya, Uganda, Tanganyika, Northern Rhodesia and Nyasaland, the British Resident at Zanzibar, and the General Officer Commanding-in-Chief, East Africa. It meets at Nairobi, where the secretariat is in permanent session, and conducts the affairs of the East African War and Civil Service Supply Boards, maintains inter-territorial economic co-ordination and exercises general control over the dispatch of East African produce to the Middle East.

The West African Governors' Conference comprises the Governors of Nigeria, Sierra Leone, the Gold Coast and Gambia, and the Cabinet Minister Resident in West Africa. It meets at Lagos, where the secretariat is in permanent session, and maintains liaison with commercial

interests through the Association of West African merchants. There is a common supply centre and a Regional Shipping Control Committee to co-ordinate West African Shipping problems.

BRITISH COUNCIL REPRESENTATIVE IN WEST AFRICA.

Chief Representative of the British Council in West Africa, Professor W. M. Macmillan, P.O. Box 771, Accra, Gold Coast.
Representatives, F. N. Lloyd-Williams, P.O. Box 153, Lagos, Nigeria; Roy McGregor, P.O. Box 124, Freetown, Sierra Leone.

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15'–53° S. lat. and 57° 40'–62° W. long. They consist of East Falkland (area 2,580 sq. miles), West Falkland (2,038 sq. miles, and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 4,618 sq. miles, and a population in 1942 of 2,435. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently handed over to Spain, but the latter country recognised Great Britain's title to a part at least of the group in 1771. In 1820 the Argentine Republic established a settlement, which was destroyed by the Americans in 1831. In 1833 the islands were again taken possession of by the British for the protection of the seal-fisheries, and colonised, being the most southerly organised colony of the British Empire. On Dec. 8, 1914, a British squadron under Adm. Sir Doveton Sturdee defeated a German squadron (von Spee) off the Falkland Islands. A memorial erected in the harbour of Port Stanley in commemoration of this victory was unveiled on Feb. 26, 1927. The climate is cold, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65° Fahrenheit. The islands are chiefly moorland. The population is mainly British, and is principally engaged in sheep-farming, to which practically all the land in the colony is devoted, 624,000 sheep being carried in 1941. The chief exports are wool, tallow, hides and sheepskins. The only important settlement is Stanley, on the coast of East Falkland.

The government of the Falkland Islands is vested in a Governor, aided by an Executive Council and a Legislative Council.

CHIEF TOWN, Ψ Stanley. Population (1939), 1,200.

* Colony only.

DEPENDENCIES.—*South Georgia*, an island 800 miles east-south-east of the Falkland Group, with an area of 1,450 square miles, is the only part of the dependencies which is permanently habitable, there being a Resident Magistrate, and other officials, and a permanent population of about 700 (engaged in the whaling industry) at Grytviken Harbour. In the *South Shetlands*, Deception Island contains a harbour at Port Foster, ice-free for about five months in the year, with a land station which arrives and departs with the whaling fleet. The *South Orkneys* also have a seasonal land station, and the Argentine Government have, with the permission of H.M. Government, established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina 3½ years later. The other dependencies (of which the principal units are the *South Sandwich Islands* and *Graham's Land*, a peninsula of the Antarctic Continent) are even more inhospitable than those already named, being nearly covered with snow and ice and almost completely destitute of plant life. In spite, however, of the climatic and other disadvantages, the revenue derived from all the dependencies in 1939 amounted to £13,738, the surplus (after meeting administrative expenses at Stanley) being devoted to local research and development. This fund amounted in 1943 to £196,455. Arrangements to resume research in the Antarctic have been made under the auspices of the Colonial Office, and a British expedition arrived at Hope Bay, Grahamsland, on April 23, 1944. The trade is considerable. The whaling industry carried out from these dependencies is greater than that of the rest of the world combined, accounting for six-sevenths of the total catch in 1932-33. The total catch (1937-38) was 45,000, and (1938-39) 38,000, representing (1938-39) 500,000 tons of whale oil. The post-war catch is to be limited to about half the pre-war average but the season is extended from Nov. 24 to March 24 (vice Dec. 8 to March 7) to enable fewer vessels to catch more whales, there being a prospect of shortage of vessels for some time. In South Georgia 1 British and 1 Argentine company operated during 1940-41 season, 78,000 barrels of whale oil being exported, sealing operations yielding 12,000 barrels of seal oil.

Ψ Stanley, the Capital of the Falkland Islands, is distant from England about 8,103 miles; transit, 26 days from Liverpool. Telegrams by cable and wireless *via* Monte Video and *via* Bergen and U.K. direct.

FEDERATED MALAY STATES

(See MALAYA).

FIJI.

This is a group of 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 1,100 miles north of New Zealand. The gross area of the group, which extends 300 miles from east to west, and 300 north to south, between 15° 45'–21° 10' S. lat. and 176° E.–178° W. long, is 7,083 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji), Vanua Levu (Great Land) and Rotuma. The climate is equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 96°. Vegetation is remarkably luxuriant, the chief

products being bread-fruit, bananas, plantains, yams, and dalo or taro (coco-casla), coco-nuts, sugar-cane, rice, maize, and cotton. The Governor is appointed by the Crown, and is assisted by an Executive Council. Laws are passed by a Legislative Council (of which the Governor is president) containing 16 official members, 5 European members (3 elected, 2 nominated), 5 Native members (nominated) and 5 Indian members (3 elected, 2 nominated). Native administration is carried on through the chiefs under the Governor's supervision. The population (Dec. 31, 1943) was 240,641 (111,346 Fijians, 109,488 Indians, 5,245 Europeans, 5,605 of European and native descent, 2,351 Chinese, 3,320 Rotumans, and some Polynesians and others).

Suva is 11,000 miles from London; transit from London, *via* Vancouver or San Francisco, about 30 days; *via* Panama, by direct cargo steamer service, with limited passenger accommodation, about 34 days; *via* Sydney, about 60 days.

GAMBIA.

See also pp. 814-5.

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named, Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,132 sq. miles. The population of the Island of St. Mary, at the Census of April 11, 1931, was 14,370, and that of the Protectorate 185,150. The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is less unhealthy. Internal communication is by steamers and launches; there are no railways. There are 4 Government wireless stations.

Government.—The Government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 5 official members (besides the Governor) and by a Legislative Council of 6 official members and 4 unofficial members, nominated by the Crown.

Education.—Government grants for education in 1944 amounted to £7,002. There were (December, 1944) 7 elementary schools with 2,108 pupils enrolled and 4 secondary schools with 311 pupils.

Imports from U.K. . .	70,223	519,381
Exports to U.K. . . .	166,014	335,857

The chief export is ground nuts, which form over ninety six per cent. of the total exports; practically all of this crop is sent to Europe, where the oil is extracted and used for the same purpose as olive oil. Palm kernels, hides and skins, and beeswax are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are apparel, cotton goods, flour, kola nuts, oil, rice,

soap, spirits, metals of all kinds, sugar, tobacco, aircraft parts and accessories and motor vehicles.

Total tonnage of vessels entered and cleared, 1944, 212,468.

CHIEF TOWN, Ψ Bathurst. Population (1931), 14,370.

Bathurst is distant from London 2,600 miles; transit about 10 days.

GIBRALTAR,

a rocky promontory, $\frac{3}{4}$ miles in length, $\frac{3}{4}$ of a mile in breadth and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa.

Ψ Gibraltar is a naval base of vital strategic importance to Great Britain and her allies. It was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and was ceded to Great Britain by the Treaty of Utrecht, 1713. Several attempts have been made to retake it, the most celebrated being the great siege in 1779-83, when General Elliot, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. During tunnelling operations for war purposes in 1943 a cavern of great beauty with stalactite columns, apparently sealed for many years, was rediscovered. It seems now to be known as "Lower Mickey's Cavern." The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. In peace time it is a popular tourist centre. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit and perfumery.

In Peace time education is compulsory from 5 to 14 years, and there were 13 aided elementary schools with 2,700 pupils (1939) and 4 secondary schools. Government expenditure on education (1939) was £20,500.

The Governor is aided by an Executive

Council of 7 members; there is no Legislative Council. On Dec. 29, 1944, the Government announced the establishment of an advisory council of 6 elected and 6 official members, the chairman being chosen from the elected members. The electorate comprises all males over 21.

GOLD COAST.

See also pp. 814-5.

The Gold Coast Colony, with Ashanti, the Northern Territories and Togoland under British Mandate, is situated on the Gulf of Guinea, between 3° 25' W. long. and 1° 12' E. long., and is bounded on W. by the French Ivory Coast, on E. by Togoland under French Mandate, on N. by the French Sudan, on S. by the sea. It extends about 324 miles along the Coast line and inland to an average distance of 440 miles or to 11° N. lat. The area of the Colony is 23,937 sq. miles, of Ashanti 24,379 sq. miles; of the Northern Territories 30,466 sq. miles, and of Togoland under British Mandate 13,041—a total of 57,843 sq. miles.

The climate of the Gold Coast is on the whole hot and damp, although rather cooler than that of most tropical countries within similar latitudes. By the aid of medical science and sanitation it is becoming less unhealthy. The population (March (1942) was: Gold Coast Colony, 1,940,789; Ashanti, 737,072; Northern Territories, 890,170; Togoland, 391,473. Total, 3,959,510, excluding 3,182 Non-Africans. The natives are almost all Pagans, but there are many Muhammadans, and the number of

Christians is steadily increasing. The great majority of the schools (616 of approved standard and over 1,000 sub-standard) are managed by Churches and Missions, liberally grant-aided by Government. Post-secondary education is provided at Achimota College, built and endowed by Government. In 1943 a grant of £127,000 was made by the Imperial Government to establish a West African Institute of Arts, Industries and Social Science, in the neighbourhood of Achimota College. Great efforts are being made to improve the sanitary condition of the coast towns. There are 20 hospitals and 15 dispensaries in the Colony. Accra, Kumasi, Sekondi (including Takoradi), Koforidua, Winneba, Cape Coast and Tamale are lighted by electricity, and there are pipe-borne water supplies at Accra, Sekondi (including Takoradi), Cape Coast, Winneba, Kumasi, Tamale, Koforidua, Saltpond and Elmina; 5,089 miles of telegraph land wire and 11,218 miles of telephone trunks have been established. Exchanges have been opened in the principal towns and are served by 6,217 miles of underground and overhead line wire. There are wireless posts for inland communication at Accra, Bawku, Eucli, Kumasi, Lawra, Wiawso and Yendi. A Government railway runs from Takoradi through Tarkwa, the centre of the gold-mining industry, to Kumasi and thence to Accra (366 miles), with branches (490 miles in all). The Awaso line (46 miles), owned and constructed by the Ministry of Aircraft Production for the carriage of bauxite, is also operated. The mileage of motor roads maintained by the Public Works Department is 2,396 miles, and the mileage of metal and tarred roads now amounts to 592. There are some 3,900 miles of motorable roads which have been constructed and are maintained by the Chiefs. These roads are all motorable during the dry season and have opened up the country in all directions to motor traffic, and ferries have been installed and bridges built whenever necessary. In 1928 a harbour was opened at Takoradi.

The government of the Colony is administered by a Governor, aided by a nominated Executive Council, with an unofficial member (Nana Tsibu Darku, O.B.E.) was appointed in 1942. There is a Legislative Council of 15 official and 14 unofficial members, for the Colony, excluding Ashanti and the Northern Territories.

In pursuance of the decision to open the Administrative Service to West Africans, K. A. Busia (Ashanti) and A. L. Adu (Twi) were appointed Assistant District Commissioners in July, 1942, and N. F. Ribeiro Ayeh to an administrative post in 1944.

The seat of government is Ψ Accra (population 74,937). The other principal towns are: Ψ Cape Coast (19,689), Ψ Sekondi (22,356), Kumasi (44,627), Tamale (19,495), Koforidua (14,274), Ψ Saltpond (6,368), Ψ Winnebah (13,787), Ψ Axim (5,000), Ψ Elmina (5,000), and Ψ Takoradi (6,000).

Accra, distant from Liverpool, 3,920 miles; transit, 14 to 30 days, is governed by a Town Council of 13 members (7 elected and 6 nominated).

ASHANTI.

Ashanti was placed under British protection on Aug. 27, 1866, and is now administered, under the Governor of the Gold Coast, by a Chief Commissioner (who is a Member of the Executive Council of the Gold Coast), with an Assistant Chief Commissioner as relieving Officer, and a staff of 18 District and Assistant District Commissioners.

In January 1935 the *Confederation of Ashanti*, which was broken up and had remained inoperative for 35 years, was re-established with Otumfuo Sir Osei Agyeman Prempeh II., K.B.E. (a nephew of the late Nana Prempeh) at its head.

The area is 24,379 square miles, with a population (Census of 1931) of 578,702 (including non-Africans, 624). In 1943-44 there were 1,542 children in the Government schools, and 23,917 in the assisted and non-assisted mission schools. There are 5 hospitals, 6 dispensaries and 2 Native Authority dispensaries; 1,980 miles of motor roads afford access to all parts of the country. Agriculture is the staple industry; 65,529 tons of cocoa were exported in 1939-40; gold output (1943-44) 254,980 fine oz.; average number employed in mining industry 131 Europeans and 7,868 Africans in 1943-44. In the western parts of the Dependency are rich forests of mahogany, cedar, &c., and trees yielding fruits, oil, rubber and gum copal; this area has been opened up by a trunk motor road from Kumasi to Pamu (130 miles) on the W. frontier *via* Sunyani (80 miles from Kumasi) with branch feeder roads from small villages. On the eastern side the forests are sparser, though timber and oil trees are common and game fairly plentiful; the products there are chiefly maize, yams, cocoyams, bananas, plantains, groundnuts and (in the south) cocoa.

CHIEF TOWN, Kumasi, population, 44,627.
 Chief Commissioner, E. G. Hawkesworth,
 C.M.G., M.O. £1,800
 Assistant Chief Commissioner, L. W.
 Judd. 1,400

NORTHERN TERRITORIES.

The Northern Territories lie to the north of the parallel of 8° N. lat. and are bounded on the west and north by the French possessions, on the east by Togoland and on the south by Ashanti. They came under British Protection in 1901 and are administered, under the Governor, by a Chief Commissioner with his headquarters at Tamale, an Assistant Chief Commissioner and 25 District and Assistant District Commissioners. The total area is 30,600 sq. miles (including the Northern Section of the Mandated Territory of Togoland, 41,063 sq. miles), varying in type from the forests in the south of the Krachi district to the rolling open country on the northern frontier. By the Census taken in 1931 the population was 717,275 (including part of

Togoland, as above, 885,400). The principal occupations of the people are agriculture and animal husbandry. Maize, millet and guinea-corn are largely grown, but principally for local consumption, and with yams form the staple food of the people. Shea-butter and groundnuts are exported to Ashanti, and tobacco and indigo are grown. The live stock industry is the principal source of wealth. There are said to be extensive auriferous areas and gold mining is carried on in the south-western part. There are 2,158 miles of motor roads. Of the indigenous population the majority is pagan, but Muhammadanism is spreading. There are four missions established in the Territory, the White Fathers operating in the North, a Roman Catholic mission in the Mandated Territory and two American Protestant Missions. The two first named manage schools which are assisted by Government grants. At Tamale there is a Government senior-primary boys' boarding school fed by selected pupils from Native Authority schools. There is also a Government training college for teachers for Native Authority village day schools. There is also a small school managed by the Methodist and Presbyterian mission for the children of non-natives of the Protectorate. At Pong-Tamale the Department of Animal Health has a training centre for veterinary pupils. There are 8 hospitals and 16 dispensaries.

CHIEF TOWN, Tamale, population 19,495.
 Chief Commissioner, Lt.-Col. G. H.
 Gibbs, C.M.G., M.C. £1,700
 Assistant Chief Commissioner, Maj. C. O.
 Butler, E.D. (acting). 1,400

TOGOLAND.

(Under Mandate to France and Great Britain.)

The total area of the former German colony of Togoland is about 43,040 square miles, with an estimated population of 920,000. The French Mandated (Eastern) zone has an area of about 30,000 sq. miles and the western, or British, sphere adjoins the eastern frontier of the Gold Coast and is administered as part thereof; there are 4 districts, the administrative centre being Ho (pop. about 4,000). It consists of an area of about 13,041 sq. miles with a population estimated (1942) at 391,473; including 43 Non-Africans.

HONG KONG.

The Crown Colony of Hong Kong consists of a number of islands and of a portion of the mainland, situated off the south-eastern coast in China, at the mouth of the Canton River, between 22° 9' and 22° 37' N. lat. and 113° 52'—114° 30' E. long., and bounded on the N. by the Shun Chun River.

Hong Kong was invested by Japanese air, sea and land forces, after the attack on Hawaii, and capitulated Dec. 26, 1941; it was re-occupied Aug. 30, 1945.

Hong Kong is an island about 11 miles long and from 2 to 5 miles broad, with a total area of 32 square miles; it lies close to the mainland, being separated at one point by a narrow strait (Lycemou) not more than a quarter-mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842; British Kowloon was subsequently acquired by the Peking Convention of 1860; and the New Territories, being a peninsula

in the southern part of the Kwangtung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 392 square miles, with a population for 1940 of 1,071,893 (exclusive of refugees from China, estimated at 750,000). The non-Chinese residents, excluding naval and military, numbered 24,125.

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 17 square miles. It possesses excellent docks, capable of holding the largest vessels. Shipping entered (1938), 15,478,016 tons; (1939), 15,434,934 tons. A railway, 22½ miles in length owned by the Government, runs between Kowloon and the frontier. In normal times it forms an important link in communications between the Colony and Canton and Hankow, but owing to the Sino-Japanese War all through services between Kowloon and China were suspended. Good roads connect the principal districts with the railway.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,809 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The New Territories contain peaks from 1,800 to 3,000 feet. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 85° in July to 63° in February, and the average daily minimum temperature from 78° in July to 55° in February. The average annual rainfall is 85 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

In 1939 there were 1,289 schools subject to Government supervision, attended by 117,575 pupils. The University (opened in 1912) included faculties of medicine, engineering, and arts.

Hong Kong is administered as a Crown colony, with a Governor, aided by an Executive Council of 10 members, together with a Legislative Council of 18 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also an Urban Council in which are vested, *inter alia*, powers of making bye-laws in respect of certain matters of public health and sanitation.

FINANCE.

	1938.	1939.

JAMAICA.

(See BRITISH WEST INDIES.)

KENYA.

See also p. 814.

Kenya Colony and the Kenya Protectorate are situated in Eastern Equatorial Africa. Kenya (Colony and Protectorate) is bounded on the North by the Anglo-Egyptian Sudan and Abyssinia, on the South by Tanganyika Territory, on the East by the Indian Ocean, and "Italian Somaliland" and on the West by Lake Victoria and Uganda Protectorate. The total area is 224,960 sq. miles, and the population is estimated (1944) at 3,866,522 (Europeans 32,000, Asiatics 61,000, Arabs 19,000, Africans 3,825,533).

Arabs predominate on the coasts, the majority of the Africans (Bantu and other tribes) living inland. Recent discoveries in the Great Rift Valley, near Mount Olorgesalie, mark the site of one of the most important prehistoric areas in the world; fossils and remains of the Middle Pleistocene age have already been found and excavations were being continued in 1945.

Production, etc.—The northern portion is barren; the eastern portion, between Nairobi and the coast is infertile, but there are not lacking extensive districts of great natural fertility in the interior (particularly in the highlands) and also on the coast. The crops include coffee, wheat, maize, sisal, coco-nuts, sugar, cotton, tea and pyrethrum. Kenya is the world's principal source of supply of pyrethrum seed. In September, 1943, the Pyrethrum Board of Kenya was asked by the British Minister of Supply to send 20,000 lb. of pyrethrum seed to the U.S. Board of Economic Warfare for plantation in Brazil. In November, 1943, 20,000 lb. of seed was collected for export to U.S.S.R. to replant devastated areas in the Caucasus, and consignments have been sent to many parts of the British Empire. There are extensive forests, mainly in the highland, including conifers and hardwoods. Cedars suitable for the pencil industry increase the value of exports. The White (or European) area in the highlands consists of about 7,000,000 acres in strips and blocks of land, convenient both for the railway and the native reserves. Land under European cultivation (1943-44) included 146,000 acres under wheat, 207,686 maize, 188,800 sisal, 80,000 coffee, 15,600 tea and 46,128 pyrethrum. In 1944 there were 330,000 cattle and 297,400 sheep on European holdings. The mineral production includes gold, sodium carbonate and many non-metallic minerals.

Post-war Development.—A comprehensive five-year plan for the development of the natural resources of Kenya is being put into operation by the Kenya Development and Reconstruction Authority. The proposals include soil conservation and agricultural development, the establishment of agricultural training schools for Africans, housing schemes for government employees, hydrographic surveys and the development of water supplies.

Communications.—The postal service handled 23,949,700 postal packets in 1944. The telegraph and telephone system has 3,125 miles of line. A cable connects Mombasa with

Zanzibar, and a wireless station at Nairobi works direct with England. There is a coast wireless station at Mombasa and communications with South Africa are also available by a Government landline. Telephone communication exists in the majority of the settled areas of the Colony. The Kenya and Uganda railways and harbours are State-owned; the railway, which is metre gauge, has a total route mileage of open lines of 1,625 miles, made up as follows:—*Main Line* (Mombasa—Kampala) 879 miles; *Principal lines*—Nakuru Junction—Kisumu 134 miles, Tororo—Soroti (100 miles), Voi—Kahe Junction (92 miles); *Minor and Branch Lines*, Rongai—Lake Solai (27), Kisumu—Butero (43), Leseru—Kitale (42), Mbulamuti—Namasakali (19), Kampala—Port Bell (6), Gilgil—Thomson's Falls (48), Nairobi—Nanyuki (145). The Konza—Lake Magadi Line (91 miles) is worked but not owned by Government. In addition, the Administration operates a marine service on Lakes Victoria, Kioga and Albert, and on the River Nile, with a route mileage of 3,763 miles.

The *Great North Road* runs from Northern Rhodesia to Kenya and was reconstructed in 1941-42. The total length is 928 miles, of which 810 miles are in Tanganyika and 118 miles run from the South Kenya border to Nairobi.

Kenya and Uganda are one administrative unit for purposes of Customs, and the principal imports are cotton piece goods and manufactures, textiles and textile manufactures, cigarettes, cigars and tobacco, cutlery, hardware, instruments and implements; china and glass ware; motor lorries, parts and accessories, industrial machinery, and wearing apparel. The principal exports from Kenya are coffee, gold, tea, maize, sugar, sisal, pyrethrum, wattle-bark, and pencil slate (cedarwood).

Government.—Kenya is a Crown Colony, under a Governor and Commander-in-Chief, who is assisted by an Executive Council of 5 official and 3 unofficial members, and by a Legislative Council of 11 *ex officio* members, 9 nominated official members, 11 European elected members, 5 Indian elected members, 1 Arab elected member, 2 nominated unofficial members representing the African community; a total of 40 members, inclusive of the Governor as President.

Eluid Wambu Mathu, the first African to become a member of the Legislature, took his seat as M.L.C. on Oct. 11, 1944.

Kenya Protectorate is under the same government. It consists of the mainland dominion of the Sultan of Zanzibar (a strip extending 10 miles inland along the coast from the Tanganyika mandated territory frontier to Kipini and the island of the Lamu Archipelago), for which Kenya Colony pays the Sultan a rent of £10,000 per annum. The Protectorate also includes the *Witu Protectorate*, a small tract of country at the mouth of the Tana River.

The Colony and Protectorate is divided into 4 Provinces and 3 extra-provincial districts. The 4 Provinces are:—

- (1) *Nyanza* (North, South and Central Kavirondo, Kericho, and Kisumu-Londiani).
- (2) *Rift Valley* (Nakuru, Ravine, Baringo, Naivasha, Laikipia, Nandi, Uasin Gishu, Elgeyo, Trans-Uzoia and West Suk).
- (3) *Central* (Nairobi, Kyambu, Fort Hall, South and North Nyeri, Embu, Meru, Machakos, and Kitui).
- (4) *Coast* (Digo, Mombasa, Kilifi, Tana River, Lamu and Voi).

The 3 extra-provincial districts are:—

- (1) *Northern Frontier* (Isiolo, Marsabit, Moyale, Mandera, Wajir, and Tlemugger).

- (2) *Turkana*.

- (3) *Masan* (Ngong and Kajiado).

The Supreme Court is situated at Nairobi and meets also at Mombasa, Nakuru, Eldoret, Kisumu, and at other places when necessary. In all cases to which natives are parties local ideas and customs are considered. The Legal status of slavery has been abolished throughout the Colony and Protectorate.

Kenya Government Agency, 25 Grand Buildings, Trafalgar Square, W.C.2.

NAIROBI, the capital of the Colony, possesses a Cathedral (All Saints) and is the central station of the Kenya and Uganda railways and harbours. There are about 2,000 European farmers throughout the Colony, the most closely settled part being the good coffee soil near Nairobi. ΨMombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa; other centres are Eldoret, Kisumu, Nakuru, ΨMalindi, and ΨLamu.

Nairobi; transit (*Peace Time*), about 20 days by sea; by air, 3 days.

LEEWARD ISLANDS.

(See *BRITISH WEST INDIES*.)

MALAYA.

On Oct. 10, 1945, it was stated in the House of Commons that it was the intention of H.M. Government to enable Malaya to achieve in due course self-government within the British Empire. The following steps are proposed:—

(1) The creation of a Malayan Union consisting of the 9 Malay States of Johore, Kelantan, Kedah, Negri Sembilan, Pahang, Perak, Perlis, Selangor and Trengganu; and of the British territories of Penang (with Province Wellesley) and Malacca.

(2) The constitution of Singapore as a separate Colony (the question of eventual union to be a matter of ultimate decision by the governments of the Malayan Union and Singapore).

(3) The appointment of a special British representative to arrange agreements with the Malayan rulers for the establishment of the Malayan Union.

[*British Representative*, Sir Harold MacMichael, G.C.M.G., D.S.O. (formerly *High Commissioner for Palestine*)].

(4) The creation of a Malayan Union, citizenship for which the qualification would be birth in Malaya or a suitable period of residence, with equal citizenship rights for all.

(5) The peoples of the British territory of Penang (including Province Wellesley), and of Malacca to retain their rights as British citizens—the Territories entering the Union as British Settlements.

SINGAPORE AND THE STRAITS SETTLEMENTS.

There are 4 Settlements—Singapore (including the Cocos or Keeling Islands and Christmas Island); Penang (including Province Wellesley); Malacca; and Labuan (off the coast of Borneo). These Settlements have an entire area of about 1,356 square miles, with an estimated population (Dec. 31, 1938) of 1,357,854.

Straits Settlements lie between 1° and 5° north of the Equator and there is little variation in the temperature. There are no well-marked dry and wet seasons, rain falling throughout the year. The climate of the colony is healthy.

	1941.	1942.
Public revenue . . .	\$41,263,425	\$52,331,000
Public expenditure . . .	\$2,955,475	51,934,500
Public Debt (Dec. 31, 1940):—		
3% S.S. Local Loan (1962-72).		\$30,000,000
3% Local War Loan (1952-59)		25,000,000
\$=Straits Settlement Dollar. Exchange Rate (1939) \$8.514 to \$8.629=1s.		

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, to which it is joined by a causeway across the Straits of Johore, which are about three-quarters of a mile in width; its length is about 26 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 220 square miles, and a population (1938) of 720,200. Singapore was in the 13th and 14th centuries a Malay city of importance till it was destroyed by the Javanese about 1365. It then remained waste till the present Settlement was founded on January 30, 1819, by Sir Stamford Raffles, then Lieut.-Governor of Bencoolen, Sumatra. The original lease by the Sultan of Johore and the Dato Temenggong, Chief of Singapore, of the site of a factory, in 1819, was followed in 1824 by the cession of the Island in perpetuity, this being accepted by the Dutch in the Treaty of Holland of the same year. The town of Singapore, situated on the south side of the island in lat. 1° 17' N. and long. 103° 50' E., had 520,164 inhabitants in 1937. The island surrendered to the Japanese Feb. 15, 1942; it was restored to British rule on Sept. 9, 1945.

The Cocos-Keeling Islands were declared a British possession in 1857, and in 1878 were placed under the control of the Governor of Ceylon. On Feb. 1, 1886, they were placed under the Governor of the Straits Settlements, and in 1902 they were annexed to the Straits Settlements and incorporated with the Settlement of Singapore. The 20 islands lie between lat. 11° 50' to 12° 45' S., long. 96° 50' E., 700 miles S.W. of Batavia. The largest is 5 miles by ½ mile. There are large coconut plantations, and copra, oil and nuts are exported. In 1902 a station on the Cape-Australia cable route was established on Direction Island, in the north-eastern part of the group. The population numbers (1931), 1,142.

Christmas Island, in the Indian Ocean, 223 miles S. of Java, and 529 miles E. of the Cocos-Keeling Islands, has an area of about 60 square miles and a population of 1,129 (1938). A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1938 was 159,899 tons.

Penang is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (pop. 1938, 236,955), on the eastern side of which is George Town, the port and capital, and the strip of mainland opposite, known as Province Wellesley (pop. 1938, 164,502). Penang Island, about 15 miles long and 11 broad, with an area of 110 square miles, is situated off the west coast of the Malay Peninsula, in lat. $5^{\circ}28'N.$, long. $100^{\circ}21'E.$, and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kedah.

Province Wellesley is a strip of coast about 31 miles in length with an area of 290 square miles, ceded by the Raja of Kedah in 1800, with some land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapioca, rubber, and coconut plantations.

Malacca, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N.W. of Singapore, comprises an area of about 640 square miles. It is one of the oldest European settlements in the East, having been captured by the Portuguese in 1511, and held by them till 1641, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with the Netherlands, March 17, 1824, being exchanged for the British settlement of Bencoolen in Sumatra. The population in 1938 was 225,282.

Labuan is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo (and 725 miles from Singapore) in $5^{\circ}23'N.$ lat. and $115^{\circ}15'E.$ long. Its area is about 35 square miles and its population is 8,644 (1938). It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited and was incorporated in the Straits Settlements in 1907, becoming a separate Settlement in 1912. The trade of the island is mainly in camphor, sugar, wax, rubber and hides. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage. The island was recovered from the Japanese by Allied Forces under General MacArthur the supreme allied commander, in June, 1945.

THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and consist of the States of Perak, Selangor, Negri Sembilan, and Pahang. The total area of the Federation is 27,540 square miles, with a population in 1940 of 2,169,313. The principal towns are Kuala Lumpur (Sel.), pop. 141,662; Ipoh (Perak), 66,758; Taiping (Perak), 39,412; Seremban (N.S.), 28,267 and Klang (Sel.), 28,141.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast.

There are 1,068 route miles of railway, practically all of which have been constructed from revenue. This mileage includes the Johore State Railway (121 miles), which is leased from the Johore Government. The line is of metre gauge throughout, and extends from Singapore (in the South) to Padang Besar (on the Perlis-Siamese frontier), where it is connected with the Siam State Railways communicating with Bangkok. The railway runs direct between Singapore Island and the mainland, crossing the Straits of Johore by a cause-

way. At Gemas there is a branch from the main Singapore-Penang line running northwards through Negri Sembilan, Pahang and Kelantan, terminating at Tumpat. At Sungai Golok (Thailand Territory) this line is connected with the Siam State Railways. There are 3,067 miles of metalled roads, 227 miles of unmetalled roads, and 1,542 miles of bridle-paths, while the principal rivers are navigable for small boats.

Climate.—Temperature shows little variation throughout the year. The days are sometimes oppressive, owing to the high humidity, but the nights are generally cool. The mean maximum shade temperature is about $90^{\circ}F.$ inland, and rather lower on the coasts, while the mean minimum is about $72^{\circ}F.$ inland, and a little higher on the coasts. The average yearly rainfall varies from about 65 inches in the driest parts to 165 inches in the wettest. There are no clearly defined wet and dry seasons, but there are well-marked seasonal variations in the rainfall. On the West Coast and inland the equinoctial seasons have higher rainfalls than are experienced during the S.W. and S.E. monsoons. The full force of the S.W. monsoon is not felt so far south, but violent squalls of short duration (known as "Sumatras") are not infrequent between April and September; they occur almost invariably at night or in the early morning. On the East coast, during the N.E. monsoon which prevails from November to March, heavy rains and strong winds are experienced, the remainder of the year being comparatively dry. Apart from the rainfall associated with the N.E. monsoon, the greater part of the rainfall in Malaya occurs in the form of torrential showers which are generally quite local and are frequently associated with thunder and lightning.

Kuala Lumpur is distant 8,500 miles from London; transit, 21 days (*via* Penang).

OTHER STATES.

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan, Trengganu and Brunei:—

JOHORE lies at the extreme S. of the Malay Peninsula. It is bounded N. by Pahang, N.W. by Negri Sembilan and Malacca, W. by the Straits of Malacca, S. by the Straits of Tebran and E. by the China Sea. The area is about 7,500 square miles (about the size of Wales) and the population (1939) was estimated at 778,990. The Johore State Railway runs for 120 miles through the middle of the State. There are 914 miles of metalled road. The capital, Johore Bahru, has a population of 27,000.

KEDAH, between $5^{\circ}05' - 5^{\circ}40'N.$, lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1939 was 484,933, and the approximate area 3,660 sq. miles. The capital is Alor Star, 8 miles inland on the Kedah River, with a population of about 25,354.

PERLIS, the most northerly State, is on the west coast of the Malay Peninsula. The area is about 316 sq. miles, and the population is about 55,446, of whom 44,360 are Malays. The capital is Kangar, a few miles up the Perlis River.

KELANTAN lies between $4^{\circ}32' - 6^{\circ}25'N.$ and $101^{\circ}19' - 102^{\circ}37'E.$ on the east coast of the peninsula, with a total length of about 118 miles and a breadth of 88 miles. The total area is 5,750 square miles; population (1931 Census) 362,517, estimated (1939) at 393,583.

The capital, Kota Bharu, 6 miles from the mouth of the Kelantan River, has a population of 14,843 (1931).

TRINGCANU, between $3^{\circ} 53'$ and $5^{\circ} 51'$ N. and $102^{\circ} 23' - 103^{\circ} 30'$ E., lies south of Kelantan on the east coast of the peninsula. Area, about 5,052 square miles. Population (1931), 179,789. The capital, Tringganu, on the river of that name, contains 14,000 inhabitants.

BRUNEI is a native State on the north-west coast of the island of Borneo. The total area is about 2,225 square miles, the population being 30,135 (April, 1931) of whom 26,972 are Malays and Bornean races; estimated population (Dec. 31, 1939) 39,387. The chief town, Brunei, has a population of about 12,000. Brunei was recovered from the Japanese by Allied forces in June, 1945.

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of $91\frac{1}{2}$ square miles. The colony includes also the adjoining island of GOZO, with an area of $24\frac{1}{2}$ square miles; COMINO—the site of the *Sultan* disaster in 1889 and several islets. The civil population of the whole group, on April 26, 1931, was 241,621.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in A.D. 58. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Normandy. For 44 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Valette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then, at their own wish, admitted into the British Empire, the act being confirmed by the Treaty of Paris of 1814.

Malta was again besieged in the late war and again withstood the attacks of all its enemies, the *George Cross* being awarded to the island in April, 1942. From June, 1940, when Italy entered the War on the side of Germany, there were 3,339 alerts and the losses inflicted on the island were:—

Civilians.	Houses
Killed 1,493	Destroyed 5,316
Seriously injured 1,843	Uninhabitable 9,610
Injured 1,921	Damaged 13,052
Total 5,257	Total 27,978

Casualties in the garrison from 1940-43 were 432 killed and 190 wounded.

Parliament of the United Kingdom made a free grant of £20,000,000 for restoring war damage and for rebuilding after the war.

The King visited Malta on Trinity Sunday (June 20), 1943, and expressed his appreciation of the fortitude of the Islanders.

The climate, although not tropical, is hot in summer. The maximum mean temperature for the summer months in 1938 (June, July, August and September) was $81^{\circ} 9'$. In winter the maximum mean temperature was $58^{\circ} 2'$. The islands are intensively cultivated. The chief export crops are potatoes, onions and cummin seed. Wheat, barley, clover, maize and tomatoes are extensively grown on dry land, while on irrigated land all the usual temperate climate and sub-tropical vegetables are grown. Prior to the outbreak of hostilities considerable progress had been made with the local livestock industry. The principal occupations of the people are in connexion with agriculture and fishing.

Mdina (Notabile), the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to 682, but its suburb, Rabat, has 9,050 inhabitants. Notabile has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Malta possesses a University (250 students) and a Lyceum (705 students); 91 Government elementary schools, 7 secondary schools; in addition there are garrison schools, a Dockyard school, and 61 private schools, of which 8 receive grants-in-aid from the Government. English and Maltese are the only languages taught in the primary schools. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese language is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phœnician tongues. There is a Maltese order of nobility, recognised by the Crown, consisting of 29 families.

The English language is the official language of administration and the Maltese language is the official language in all the Courts of Law and the language of general intercourse in the islands. Provision has been made by Ordinance for the use of the English language in any proceedings before any Court where any party or any accused person is a person who does not speak Maltese as the principal language to which he is accustomed. Where the proceedings are in a language not known to the party or parties or to the accused they are translated. In 1934, Maltese was substituted for Italian as the principal language of the Courts of Law.

The Letters Patent of February 4, 1939, re-established representative government in Malta. They provide for an Executive Council consisting of 5 *ex-officio* members and such other nominated members as the Governor may appoint; and of a Council of Government consisting of 5 *ex-officio* members, 3 official members, 10 elected members, and 2 members nominated by the Governor.

	1943 44.	1944-45.
Public revenue... (a)	£4,026,373	(a) £3,379,903
Expenditure....	3,731,831	3,693,034

(a) Includes Imperial Grants-in-Aid of Administration Deficit, £2,250,000 in 1942-43.

£1,350,000 in 1943-44, and £154,500 in 1944-45.

British coins and notes, Bank of England notes of £1 and 10s. and local currency notes are legal tender.

	1938.	1939.
Imports	£3,866,138	£4,140,049
Exports	687,387	659,642
Exports to U.K.	116,841	142,254
	1942.	1943.
Imports from U.K.	808,000	2,094,000

The principal imports for home consumption are textiles, cattle foods, wheat and wheat flour, metals and manufactures thereof, coal, motor spirit, sugar and wines. Chief exports of local origin are potatoes, onions and hides and skins.

CAPITAL, Ψ Valletta. Population, (1931) 22,779. On Sept. 13, 1942, in the bomb-scarred city of Valletta, amid the ruins of Palace Square, Viscount Gort, the Governor and Commander-in-Chief, handed to the Chief Justice the George Cross conferred upon the people of the Island by the King-Emperor in April, 1942.

MALTA'S NATIONAL DAY is September 8, commemorating the raising of the siege by the Turks in 1565.

Governor and Commander-in-Chief, Lieutenant-General Sir Edmond C. A. Schreiber, K.C.B., D.S.O. (Sept. 1944) £5,000
Vice-Admiral, Malta, and Flag Officer, Central Mediterranean, Vice-Admiral Sir Frederick Dalrymple-Hamilton, K.C.B.

Commanding Troops, Maj.-Gen. W. Robb, C.B.E., D.S.O., M.C.

Air Officer, Commanding R.A.F., Air Vice-Marshal K. B. Lloyd, C.B.E., A.F.C.

EXECUTIVE COUNCIL.

His Excellency the Governor.

Ex-Officio Members—The Lieutenant-Governor; The Legal Secretary; The Attorney-General; The Treasurer; and The Secretary to Government.

Nominated Members—D. G. Maurice; M. H. Dorman; C. Cassar Torreggiani; E. Staines.

Clerk to the Council.—P. P. de Cesare, I.S.O. (acting).

COUNCIL OF GOVERNMENT.

His Excellency the Governor.

Ex-Officio Members—The Lieutenant-Governor; The Legal Secretary; The Attorney-General; The Treasurer; and The Secretary to Government.

Official Members—(3).

Elected Members—(10).

Nominated Members—(2).

Lieutenant-Governor, Sir David Callendar Campbell, C.M.G. (1943)..... £2,000

Legal Secretary, E. F. Bell..... 1,200

Attorney-General, L. Galea, LL.D..... 950

Treasurer and Director of Contracts, E. Cuschieri..... 620

Secretary to Government, E. Camilleri, O.B.E..... 700

Assistants to the Lieut.-Governor, D. G. Maurice; M. H. Dorman..... 1,000

Chief Govt. Med. Officer, (vacant)..... 700

Director of Education, J. Brennan..... 600

Collector of Customs and Supt. of Ports, F. Agius..... 600

Director of Public Works, C. Micallef, A. & C.E..... 600

Director of Agriculture, R. Biasini..... 500

Manager, Water, Electrical and Telephones Dept., A. S. Mortimer, M.B.E.... 700

Commissioner of Police, J. E. Axisa, O.B.E. 600

Rector of the University, Prof. Hon. R. V. Galea, O.B.E., A. & C.E..... 550

Auditor, Major S. Samut Tagliarferro.... 550

Postmaster-General, J. M. Borg Cardona. 500

Chief Justice and Pres. of Court of Appeal, His Honour Sir George Borg, M.B.E., LL.D..... 1,400

Judges, Dr. E. Ganado; Dr. L. A. Camilleri; Dr. A. J. Montanaro Gauci; Dr. W. Harding, B.Litt.; Dr. S. Schembri; Dr. T. Goudier..... each 800

Town Planning Consultants, Austen St. B. Harrison, F.R.I.B.A.; R. P. S. Hubbard, A.R.I.B.A.

Trade Commissioner in London, Lt.-Col. A. V. Agius, M.C., T.D., 39 St. James's Street, S.W.x.

Commissioner for Malta in Australia, Capt. H. C. Curmi, O.B.E., 108 Queen Street, Melbourne.

Representative of the British Council, Maj. A. Cathcart Bruce, The British Institute in Malta, Auberge d'Aragon, Valetta.

Malta is 2,280 miles by sea, and 241 Marseilles about 2,600; transit overland, 3½ days.

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17'-57° 46' E. long. and S. lat. 19° 58' -20° 33', and comprising an area of 720 square miles. The permanent population at the Census of 1944 was 425,777, made up of Indians, Europeans (mainly French), and natives of mixed descent.

Mauritius was discovered between the years 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1638 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France, but did not settle it until 1721. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored.

Of the total cultivated area of 184,953 acres, 121,857 are under sugar, about 20,000 under fibre, 23,000 under maize and 20,016 under other crops.

Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1882 was particularly severe; a cyclone lasted from March 5 to 7, 1931, and did considerable damage to sugar plantations and buildings. On Jan. 16, 1945, the island was laid waste by another cyclone, as violent as that of 1892.

There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands,

and the annual trade of the island passes entirely through Port Louis. The shipping entered and cleared, in 1939, amounted to 1,553,691 tons. In 1941 there were 147 miles of railway (134 miles of 4 ft. 8½ in. gauge and 13 of 2 ft. 6 in.), 59 post-offices, 43 telegraph offices and 9 telephone exchange offices in the island, with 492 miles of telegraph, including block telegraph for the railway, and 3,144 miles telephone wires (Government).

The inhabitants of European descent are mostly Roman Catholic. Education has two branches:—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The estimated expenditure on education for 1945-46 is Rs. 2,193,571.

The Government is administered by a Governor, aided by an Executive Council of four official members, and of such other persons as the Governor, through instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, eight being *ex-officio*, nine nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has two members, and each of the country districts one.

CAPITAL. Port Louis. Population (1944), 57,466; other centres are Curepipe (27,468), Beau Bassin and Rose Hill (26,612), Phoenix Vacoas (12,927), Quatre Bouines (12,100) and Port Mahebourg (9,919).

FINANCE.

	1942-43	1943-44.
Public revenue . . .	Rs. 32,585,072	Rs. 37,578,893
Public expenditure . .	31,051,511	29,876,532
Net public debt . . .	31,055,778	34,224,990
Rs. = Indian Rupees. £1 = Rs. 13.33.		

TRADE.

	1943.	1944.
Total imports . . .	Rs. 32,006,000	Rs. 65,707,000
Total exports . . .	54,715,000	50,677,000
Imports from U.K. . .	£632,000	£1,096,000
Exports to U.K. . .	Rs. 14,995,216	Rs. 3,268,697

The necessities of life have all to be imported from abroad. Rice and grain are obtained from India, flour from Australia and India, oxen from Madagascar, and minor imports from South Africa and elsewhere; 78 per cent. trade of the island was with Great Britain and British Dominions in 1944.

<i>Governor and Commander-in-Chief,</i> His Excellency Sir Henry (Charles) Donald Cleveland Mackenzie- Kennedy, K.C.M.G. (1942)	Rs. 60,000

<i>Postmaster-General,</i> M. E. Perombelon, I.S.O.	10,000
<i>Poll Tax Commissioner,</i> T. R. Robertson	13,500
<i>Government Printer,</i> J. H. Bowkett . .	7,500
<i>Chief Judge,</i> His Hon. Sir Charlton A. G. Lane	24,000
<i>Puisne Judges,</i> His Hon. J. G. Espitalier-Noel; His Hon. F. Herchenroder, K.C.; His Hon. W. E. Howard-Flinders each	15,000

DEPENDENCIES OF MAURITIUS.

Rodrigues, 350 miles north-east of Mauritius. Area, 40 square miles. Population (Census 1944), 11,885. Cattle, beans, salt fish, and goats are the principal exports. The island is under the administration of a magistrate from Mauritius, who takes his orders from the Governor of Mauritius.

Magistrate, G. Lalouette Rs. 6,000

Other Dependencies—Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coco-nut oil. The most important are the Oil Islands Group, the largest of which *Diego Garcia* (pop. 1937, 445), lies on the direct route from the Red Sea to Australia, and possesses a good harbour; other islands are Six Islands, Peros Banhos, Agalega, St. Brandon and Trois Frères. The total area of the "Other Dependencies" is about 47 square miles, with a population (1944) of 1,578.

Transit from London to Mauritius, 30 to 35 days.

NIGERIA.

See also pp. 814-5.

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benue, between Dahomey on the west and the Cameroons on the east. The Colony is a small strip of land running along the coast on either side of and including Lagos. The Protectorate (Headquarters, Lagos) is in three main divisions, the Northern Provinces, coinciding with the former Protectorate of Northern Nigeria and the Eastern and Western Provinces coinciding with the former Protectorate of Southern Nigeria. The area of the whole territory (including the portion of the Cameroons under British Mandate) is about 372,674 sq. miles, and the population is 20,588,840.

There is an Executive Council, to which 3 unofficial members (Sir Adeyemo Alakija, C.B.E., S. B. Rhodes, C.B.E., and G. H. Aveazhat, C.M.G.) were added in 1942, and a Legislative Council for the Colony and the Eastern and Western Provinces of the Protectorate with control over Protectorate Government expenditure in the Northern Provinces. The Legislative Council consists of the Governor as President, 28 official members, not more than 3 nominated official members, 6 elected

members, and not more than 15 nominated unofficial members. The Legislative Council was engaged in considering the Governor's proposals for reform of the constitution in 1945. The Governor continues to legislate for the Northern Provinces. The Provinces are each administered by a Chief Commissioner, with Headquarters at Kaduna, Enugu and Ibadan; the Colony is administered by a Commissioner. The Protectorate is divided into 23 Provinces, each under a Resident.

The climate is marked by a dry season from about October to April, characterised by the *harmattan*, a dry north-easterly wind accompanied by a thick haze composed chiefly of dust; the rainy season fills the remainder of the year. The conditions of living have been greatly improved during recent years, affording possibilities of good health during temporary residence. Medical and sanitary efforts have effected many changes and considerable areas of swamp have been reclaimed. A grant under the Colonial Development and Welfare Act of £258,000 was authorised in August, 1944, to finance a scheme to improve leprosy control over a period of five years. A 10-year plan of development, to cost £40,000,000, towards which the Colonial Development Fund had already granted £6,945,000, was approved in 1945.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, kola-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The Udi coalfields are of great extent and the coal is of excellent quality. A railway is in operation comprising (1) a Western line from Lagos to Kano (700 miles), and extension to Nguru (143 miles), crossing the Niger by bridge at Jebba, with branches from Minna to Baro (111 miles), from Zaria to the tin fields (Jos) (133 miles, light railway); from Zaria to Kaura Namoda (137 miles), and from Ifo to Idogo (27 miles); (2) an Eastern line (569 miles) from Port Harcourt to Kaduna on the Western Railway, crossing the Benue at Makurdi with a branch line connecting from Kafanchan junction (mile 458) with the tinfields (Jos), 62½ miles. Centres of trade are Lagos (pop. 1939, 167,000), Abeokuta, Ibadan (320,000), Oshogbo (31,000), Ilorin (45,000), Zaria (30,000), Kano (81,000), Onitsha, Lokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

Thirty aerodromes, accommodating the largest aircraft, have been constructed in Nigeria since the outbreak of war in 1939.

CAMEROONS.

(Cameroons under British Mandate.)

The German Protectorate of *Kamerun* on the west coast of Africa between (British) Nigeria and French Congo was obtained by conquest by Franco-British forces during the War of 1914-18.

The approximate geographical limits of the German territory were 2° - 12° $30'$ N. lat. and 8° $30'$ - 16° E. long. and the area was about 177,496 square miles. By the Milner-Simon Agreement of July 10, 1919, the whole area was divided into a British sphere (about 34,081 square miles) and a French sphere (about 143,415 square miles) and in 1922 the territories were placed by the League of Nations under British and French Mandates. The Cameroons under British Mandate marches the whole distance of the Nigerian Eastern boundary, save for one short break. The population of the British sphere is 831,103.

The two narrow strips of territory reach from the Atlantic Ocean to Lake Chad, a distance of 700 miles, and lie diagonally between 2° - 12° $30'$ N. lat. and 8° $30'$ - 14° $45'$ E. long. The nature of the country varies to a remarkable extent, from the coastal mangrove swamps and thick forest regions to the grasslands at heights of 4,000 ft. to 7,000 ft. and more, and again to sandy and swampy areas in the region of Dikwa and Lake Chad. The highest point is the peak of the Cameroon Mountain, which rises to a height of 13,350 ft. It is volcanic, but has not been active since 1922.

Cameroons under British mandate is administered as part of Nigeria. The Northern areas are administered by the Residents of the adjoining Provinces of Adamawa, Bornu and Benue; the Southern section forms a separate Province, known as the *Cameroons Province*, with headquarters at Buea on the slopes of the Cameroon Mountain. Cattle breeding and the production of guinea corn are the chief occupations of the population of Dikwa, which consists mainly of Arabs and Kanuri. The inhabitants of the areas which for administrative purposes form part of the Adamawa Province, are mostly primitive hillmen whose chief occupation is agriculture.

Cameroons Province is rich in timber, and the volcanic soil of the lower slopes of the Cameroon Mountain is particularly fertile.

The sea ports Ψ Victoria and Ψ Tiko are connected with Buea by motor road.

Buea, population (estimated) 3,000.

The chief exports are cocoa, palm kernels, rubber, and bananas (fresh and dried), and mahogany; the chief imports are textiles, motor spirit, provisions, tobacco, ironware and salt.

NYASALAND PROTECTORATE.

See also p. 814.

The Nyasaland Protectorate comprises the western shore of Lake Nyasa, with the high tablelands separating it from the basin of the Loangwa River, and the region lying between the watershed of the Zambesi and Shiré Rivers on the west, and the Lakes Chiluta and Chilwa and the River Ruw (a tributary of the Shiré) on the east, including the mountain systems of the Shiré Highlands and Mlanje.

The Protectorate is bounded on the North by Tanganyika Territory, on the West by Northern Rhodesia and on the South and East by Portuguese East Africa (Mozambique).

Nyasaland has a total area of 47,950 sq. miles (land area, 37,374) with a population (July, 1945) of 2,283,357, including 1,948 Europeans and 2,940 Asiatics.

The chief products of the Protectorate are coffee, tobacco, cotton, tea, chillies, rubber, rice, maize and ground nuts.

A Joint Development Adviser has been appointed for Northern Rhodesia and Nyasaland, to deal with plans for social and economic development. A free grant has been made under the Colonial Development and Welfare Act of a maximum amount of £345,000 to enable the Protectorate government to carry out proposals recommended by the Nyasaland Post War Development Committee for a comprehensive 5 year plan of educational extension.

In 1944 and 1945 African Provincial Councils were established in each of the three provinces. Those councils, which are advisory, are composed of chiefs and other responsible African members under the presidency of the provincial commissioner. It is also intended at a later stage to establish an African council for the whole Protectorate.

For internal communications there are on Lake Nyasa four steamers and a sea-going motor launch. There is a 3' 6" gauge railway system extending from the port of Beira, in Portuguese E. Africa, to Chipoka on Lake Nyasa (496 miles), crossing the Zambesi River at Sena (199 miles) by the Lower Zambesi Bridge and passing through Blantyre (353 miles). Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,856. A road from Salisbury to Blantyre *via* Tete (Portuguese E. Africa) is open and is freely used. The Protectorate is connected by telegraph overland with the Cape *via* Salisbury. The telegraph lines extend northwards as far as Tukuyu, in Tanganyika. *Rhodesian and Nyasaland Airways* operate regular services between Blantyre and Fort Jameson *via* Lilongwe (connecting with the services at Salisbury) and between Blantyre and Beira. There are full-sized aerodromes at Chilika (11 miles from Blantyre), Zomba and Lilongwe, and landing-grounds have been prepared at most district headquarters.

The seat of Government is Zomba (pop. 1937, 3,000), other centres being, Blantyre; in the Shiré highlands, where the Protectorate partly bisects Portuguese East Africa (6,000), Limbe, Ψ Fort Johnston and Ψ Lilongwe (on Lake Nyasa) and Mlanje.

PACIFIC ISLANDS.

(Western Pacific High Commission.)

<i>High Commissioner</i> , His Excellency Sir Alexander William George Herder Grantham, K.C.M.G., born 1899, apptd. 1944.....	£1,400
(In addition to £3,250 as Governor of Fiji, and allowance of £150 as Consul-General for Western Pacific.)	
<i>Secretary to High Commission</i> , H. H. Vassell, O.B.E. (House Allowance £75).....	£700 to 800
<i>Chief Judicial Commissioner</i> , His Honour Sir C. R. W. Seton, M.C. (In addition to £1,350 as C.J. of Fiji).....	£400

<i>Asst. Sec. to High Commission</i> , P. D. Macdonald (House Allowance £75).....	£450
<i>Chief Clerk and Accountant</i> , L. E. Ambler.....	£450 to 600

The principal groups under the High Commissioner in, over, and for the Western Pacific Islands are (1) The Gilbert and Ellice Islands Colony; (2) The British Solomon Islands Protectorate; (3) Tonga; (4) The New Hebrides; (5) Pitcairn Island.

(1) *The Gilbert and Ellice Islands Colony*, which includes Ocean, Christmas, Fanning and Washington Islands, besides the Gilbert, Ellice and Phoenix Groups, was formerly a Protectorate, and was formally annexed to the Empire in November, 1915. *The Gilbert Group*, situated between 4° N. and 3° S. latitude and 172° and 177° E. longitude, consists of 26 islands, Makin, Butaritari, Marakei and Abalag (Northern Gilberts), Tarawa, Malana, Abemama, Kuria and Aranuka (Central) and Nonouti, Tabiteuea, Beri, Nikunau, Onotoa, Tamana and Arorae (Southern Gilberts), with several small islands or islets depending upon them; and the *Ellice Group* of 9 islands (Nanumea, Nanumaga, Niutua, Nui, Vaitupu, Nukufetau, Funafuti, Nukulaelae and Nuna-

kita) between 5° S. and 10½° S. latitude and 176° E. and 179-58° E. longitude. *Ocean Island* (or Banaba), in lat. 0° 52' S. and long. 169° 35' E., which is the seat of government, was proclaimed British in 1900. Total area, 180 square miles; population (1938) 233 Europeans, 722 Asiatics (684 on Ocean Island), and 33,748 Pacific Islanders. Revenue (1942-43), £51,600; expenditure, £70,500; imports (1938-39), £178,770; exports, £279,450.

Fanning Island, in lat. 3° 30' N., long. 159° 13' W., and *Washington Island*, 66 miles N.W. by W. of Fanning Island. Pop. (1938), 32 Europeans, chiefly in connexion with Pacific cable station, 305 Pacific Islanders in copra industry and 25 Asiatics. The islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan. 27, 1916. *Christmas Island* (1° 59' N. lat. 157° 30' W. long.), 164 miles S.E. by E. of Fanning Island, was included in 1910. The boundaries of the Colony were extended (March 18, 1937) to include the *Phoenix Islands* (Birnie, Canton, Enderbury, Gardner, Hull, McKean, Phoenix and Sydney Islands), between 2° 30' and 4° 30' S., and 171° and 174° W. Enderbury and Canton Islands are for common use of Gt. Britain and U.S.A. for aviation and communications, under Anglo-American Pact, Aug. 10, 1938.

Resident Commissioner, Gilbert and Ellice

Islands, Lt.-Col. V. Fox-Strangways (and £400 allowances) £800 to £1,000

(2) *The British Solomon Islands Protectorate*, established in 1893, includes the Southern Solomon Islands, the Santa Cruz Group, and since 1900 the Northern Islands (Ysabel, Choiseul, the islands of the Bougainville Straits, S. and S.E. of the main island of Bougainville, and the atoll group of Ontong Java, which were transferred by treaty from Germany. The Protectorate is situated between 5°-12° 30' S. lat. and 155°-170° E. long., and extends from Bougainville Straits to Mitre Island (Santa Cruz Group) for a distance of 900 miles and N. and S. from the Ontong Java Group to Rennell Island (430 miles) in an ocean area of 250,000 square miles. It has a total land area of about 11,000 square miles, and a population (1931) of 478 Europeans, 173 Asiatics, and 93,415 natives. *The Southern Solomon Islands* include Guadalcanal, Savo, Malaita, San Cristoval, the New Georgia Group and its dependencies. *The Santa Cruz Group* includes Utupua, Tucopia, Vanikoro, Cherry, Mitre, Sikaiana, Rennell and Bellona. The revenue in 1940-41 was £51,320, and the expenditure £65,850; exports 1940-41 £132,000 imports, (1939-40) £189,772. The seat of government is Tulagi.

Guadalcanal was invaded in 1942 by Japan. Aggressive action by U.S. troops checked the advance, and a fierce struggle, including the naval victory of the U.S. fleet (Nov. 13-15, 1942) restored the islands to their former owners.

Resident Commissioner, British Solomon Islands,

Lt.-Col. Owen C. Noel, O.B.E. (July 20, 1943).

(3) *The Tongan or Friendly Islands*.—A Protectorate over the Tongan Islands Kingdom was proclaimed May 18, 1900. These islands are situated, in the Southern Pacific to the E.S.E. of Fiji, and 300 miles therefrom, with an area of 250 square miles, and population (1942) of 300 Europeans, 85 other races, 460

§ The two Northernmost Solomon Islands and certain dependencies are part of the mandated New Guinea administration (see p. 769.)

half-castes. 37,996 Tongans, a total of 39,191 were discovered by Tasman in 1643. Most of the islands are of coral formation, but some are volcanic (Tofua, Kao, and Niuafoou or Good Hope Island). The limits of the group are between 15° and 23° 30' S. and 173° and 177° W. Nukualofa, on the Island of Tongatapu, is the seat of government. The present Queen Salote Tubou, G.B.E., succeeded her father the late King George Tubou II on April 12, 1918 (Hon. consort, Hon. Uiliami Tugo, Premier since 1923, died July 20, 1941). There is a legislative assembly of 22 members, elected triennially. Soil generally is fertile; the principal export is copra. Two of the smaller islands disappeared, owing to a tidal wave, in June, 1919. Revenue 1942-43 £A116,180; expenditure £A99,375. There is no debt. Total imports (1942) £A144,110; total exports £A119,850. The total shipping entered and cleared in 1939 was 154,760 tons.

Agent and Consul, C. W. T. Johnson, O.B.E.

(and duty allowance £200) £800 to £1,000
(4) *The New Hebrides Condominium* (see pp. 845-6).

(5) *Pitcairn Island*, situate in lat. 25° 3' 30" S., long. 130° 8' 30" W., is nearly equidistant from Australia and America. It was discovered by Carteret in 1767 but remained uninhabited until 1790 when it was occupied by the mutineers of H.M.S. *Bounty* with some women from Otahite. In 1856 the inhabitants numbering 192 were removed at their own request to Norfolk Island, but 40 of them returned to Pitcairn. The islands of Henderson, Ducie and Oeno were annexed to Pitcairn in 1902. Area, 2 sq. miles. *Chief Magistrate*, R. E. Christian.

(6) There are also a large number of scattered groups and isolated islands, including Caroline, Flint, Malden, Starbuck and Vostock Islands, which are not attached to any group.

PALESTINE.

Eretz Yisrael (Hebrew), Falastin (Arabic).

Palestine lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. 20° 30' - 33° 15' N. and long. 34° 15' - 35° 40' E. Its political neighbours are Lebanon on the North, Trans-Jordan on the East and the Egyptian province of Sinai on the South.

Palestine comprises four zones of country: (a) the hill country of Galilee and Judaea; (b) the five plains (Acre, Esdraelon, Huleh, Coastal and Jordan) including that lying in the rift of the Jordan Valley which, from the N. of Lake Tiberias to the Dead Sea is below the level of the Mediterranean; (c) the Beersheba area; and (d) the desert area. The principal river is the Jordan, which rises near Banyas at a height of 3,000 feet above sea-level and enters Lake Huleh (Waters of Merom) 229 feet above sea-level. Between Lake Huleh and Lake Tiberias (Sea of Galilee) the river drops 915 feet in a distance of 11 miles and becomes a turbulent stream. Lake Tiberias is 666 feet below sea-level and is liable to sudden storms. Between Lake Tiberias and the Dead Sea the Jordan falls 591 feet. The largest lake is the *Dead Sea* (only half of which is in Palestine); area 405 sq. miles, 1,286 feet below sea-level, 51.5 miles long with a maximum width of 11 miles; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. The water contains an extraordinarily high con-

centration of mineral substances. The other principal rivers are the Yarmuk, Ajlun and Qishon. The highest mountain peak is *Jebel Jarmak*, 3,963 feet above sea-level, in the Safad sub-district.

Palestine, situated between Mediterranean and desert, has a transitory climate similar to that of Lower Egypt, but modified by the hills and valleys of the country. The summer is hot but is made comfortable in most parts by daily refreshing westerly winds from the Mediterranean. The winter is the rainy season lasting from October to April, the period of maximum rainfall being from December to February.

The area of Palestine west of the Jordan is 10,429 square miles (70,157 land and 272 water), with a population estimated (Dec. 31, 1944, at 1,739,624, an increase since the 1922 Census of 987,576.

CENSUS FIGURES.

	1922.	1944.
Moslems.....	589,277	1,061,277
Jews.....	83,790	528,702
Christians.....	71,464	135,547
Others.....	7,617	14,098

Total..... 752,048 1,739,624

The increase in the Arab population is mainly due to excess of births over deaths and the increase of the Jewish population is mainly due to immigration. Jewish immigrants in 1944 numbered 14,464.

Birth and death rates per 1,000 inhabitants and infant mortality rates per 1,000 live births were, in 1944:—

Race.	Birth Rate.	Death Rate.	Inf. Mortality Rate.
Moslem.....	54	17	103
Jews.....	30	7	35
Christians.....	31	10	74
Others.....	5	17	113
Average....	44	14	87

Palestine, formerly a part of the Turkish Empire, has been under British administration since the conquest of the country by the forces of General Allenby in 1917. Jerusalem, which had been in Moslem hands since A.D. 637 (with a short interval during the Crusades) and under Turkish rule since 1517, was surrendered on Dec. 9, 1917. The Administration is conducted under a Mandate which entered officially into force on Sept. 29, 1923.

Under the *Religious Communities Ordinance* 1926 the Jewish Community enjoys autonomy for the internal affairs, cultural and communal, and may levy taxes under certain restrictions. The principal Jewish religious authority is the Rabbinical Council vested with jurisdiction in matters of personal status. The lay organs are an Elected Assembly, to consider the budget presented by Council and impose rates and fees on the community. The General Council (Va'ad Leumi) administers the affairs of the community according to the resolution of the Assembly and represents the Jewish community in its relations with Government. It maintains a Hebrew education system and controls certain Jewish health services. There are also local committees set up where not less than 30 Jews live.

The Jewish Agency for Palestine, consisting of Zionists and non-Zionists, is recognized by the British and Palestine Governments as an

agency for the Jewish people in all matters pertaining to the upbuilding of the Jewish National Home. It also supervises Jewish immigration.

Moslem religious affairs are controlled by the Moslem Supreme Council, which is also responsible for the Moslem *Waqfs* (Religious Endowments) and for the Sharia Courts.

Palestine is divided into 6 administrative districts—Jerusalem District, Lydda District, Haifa District, Galilee and Acre District, Samaria District and Gaza District, under District Commissioners. In 1944 there were 24 municipalities with elective councils, responsible for carrying out the general requirements and with wide powers. Much has been done in town-planning, construction and maintenance of streets, drainage, etc. They are responsible for their own finances, the annual budget being subject to approval by the District Commissioners. In rural areas local affairs are administered by local councils. Taxes cannot be levied or loans raised without the approval of the High Commissioner. Grants-in-aid are set aside by Government towards the cost of major schemes. English, Arabic and Hebrew are the official languages of the country, and it is interesting to note that 60 languages were recorded as being the habitual language in use in the Census of 1931. The capital, *Jerusalem*, had a population on Dec. 31, 1944, of 155,314 (94,942 Jews). Other centres are Ψ Tel Aviv (all Jews) 155,277; Ψ Haifa 125,498 (63,392 Jews); Ψ Jaffa 93,443; Ψ Gaza 30,327; Hebron 23,133; Nablus 23,487; Petah Tiqva 19,188; Lydda 17,616; Ramlé 14,930; Nazareth 12,609; Tiberias 12,104; Ψ Acre 10,695 and Bethlehem 8,889.

Jerusalem, being a Holy City for the three great Monotheist Faiths, is the seat of a number of Prelates and religious bodies.

The office of President of the Moslem Supreme Council, previously held by the Mufti of Jerusalem, is at present vacant.

The Jews have two joint Chief Rabbis, one for the Sephardim, the other for the Ashkenazim. These dignitaries have the style of "Eminence." In Nablus there is a Samaritan High Priest.

The various Christian bodies are represented as follows:—(1) The Orthodox, Latin and Armenian Communities are headed by Patriarchs having the style of "Beatitude." The Vatican is represented by an Apostolic Delegate. (2) The Syrian Orthodox and Coptic Communities are headed by Bishops having the style of "Right Reverend." (3) The Uniate Communities namely, the Greek Catholic (Melkite) the Armenian Catholic, the Syrian Catholic and the Maronite are represented in Jerusalem by Patriarchal Vicars having the style of "Right Reverend." (4) The Abyssinian Community is headed by an Abbot. (5) The Anglican Community is headed by a Bishop having the style of "Right Reverend." (6) The Presbyterian Community has churches in Jerusalem, Tiberias, Haifa and Jaffa and a mission in Safad. The principal historic sites in Palestine are the Church of the Holy Sepulchre at Jerusalem, which is visited annually by large bands of Christian pilgrims, principally of the Roman, Orthodox and Coptic churches; the Mosques, called the Domo of the Rock and al Aqsa, built on the site of Solomon's Temple; the Wailing Wall, which is part of the outer wall of the Temple, now the Mosque Court; the Church of Nativity at Bethlehem, reputed to be the oldest Christian church in existence; and

Nazareth, where Christ spent his childhood. The Government of Palestine, on land provided by the Government and in accordance with plans prepared by the Government, has constructed for the Department of Antiquities at Jerusalem, a museum (the Palestine Archaeological Museum). Toward the cost of this museum, Mr. John D. Rockefeller, Jr., made a contribution of \$2,000,000. Four expeditions conducted excavations, under licences issued by the Government, during 1939. In recognition of the serious damage done by soil erosion, a Department of Forests was set up in 1936 to deal with this problem and to effect improvement of deteriorated lands.

Justice is administered by civil and religious courts, the former having jurisdiction over all matters save those of personal status and *Waqfs*, subject to certain provisions. There is a Magistrate's Court in each sub-district, five District Courts (each composed of a British President or Relieving President and two Palestinian Judges, and a Supreme Court which is a High Court of Justice, and a Court of Civil and Criminal Appeal. The Ottoman Code was superseded by the new Criminal Code, based on English Law, on Jan. 1, 1937.

The *Railway System* of Palestine comprises three main sections: (1) The standard gauge Palestinian section of 228 miles, running from Haifah to the frontier of Egypt, with branches from Lydda to Jerusalem and Jaffa, Haifa to Ezzeeb (Lebanon frontier) and short branches to Petah Tiqva and Tel Litvinsky. (2) The Sinai Railway, 127 miles, from Rafah on the S. boundary, across the Egyptian province of Sinai to Kantara on the Suez Canal. (3) The narrow gauge Hejaz Railway (including Haifa Acre, Haifa-Samakh and Tulkarm-Nablus sections in Palestine and the Nassib-Amman-Ma'an section in Transjordan) of which 90 miles are in Palestine and 202 miles in Transjordan. In 1944-45 the freight handled amounted to 2,231,001 tons, and the passengers carried numbered 2,212,757. The gross revenue was £P2,658,122 and the working expenses £P2,474,128 (excluding debt charges).

Motor transport is of considerable importance. In 1944 there were 2,640 miles of all-weather roads (mostly asphalted) and 1,565 miles of seasonal tracks.

Under war conditions the only civil airports in use in Palestine were at Lydda (near Jaffa), Haifa and Kallia (for marine aircraft).

The chief ports are Ψ Haifa, a modern harbour, with a depth of 30 ft. alongside the main quay; Ψ Jaffa, including a small craft harbour at Jaffa and a lighter harbour at Ψ Tel Aviv; Ψ Gaza, open roadstead; and Ψ Acre, where anchorage for small vessels is provided within reef. At Jaffa and Tel Aviv large vessels anchor at open roadstead. In 1939, 2,910 vessels (4,411,631 tons) engaged in foreign trade entered the ports.

Production and Industry. (a) *Agriculture.*—The country is generally fertile and climatic conditions vary so widely that a large variety of crops can be grown, ranging from temperate crops such as wheat and cherries to sub-tropical crops such as sorgham millet and mangoes. The famous "Jaffa" orange is produced in large quantities in the coastal plain for export; other kinds of citrus fruits are also grown and exported. Olives are extensively cultivated mainly for the production of oil used for edible purposes and for the manufacture of soap. The main winter crops are wheat and barley and various kinds of pulses, while in summer sorgham, millet,

sesame and summer pulses are grown. Large areas of seasonal vegetables are planted; the warmer conditions found in the Jordan Valley enable farmers to produce vegetables there which are out of season elsewhere. Potatoes can be grown in the autumn and in the winter. All kinds of summer fruits such as figs, grapes, plums and apples are produced in ever increasing quantities for local consumption. Every year the type of farming becomes more intensive with a consequent increase in production. Supplies of water for irrigation is the principal limiting factor to still greater production. Nevertheless it has been possible to increase the number of dairy cattle by some 80 per cent. in the last six years; a large part of the dairy industry is dependent on the production of fodder crops under irrigation; areas under fodder crops have doubled. The Palestinian land measure is the *dunam*, equivalent to 1,000 square metres (approximately a quarter of an acre).

(b) *Industry.*—Summaries of the results of two official censuses of industry recently published are given below:—

	1939.	1942.
Number of establishments enumerated.....	1,217	3,470
Gross output....	£P8,841,797	£P36,830,368
Net output....	£P3,874,503	£P14,844,110
Number of persons engaged in December....	20,414	49,977

The following are among the main industries as measured by the gross output:—

	1939.	1942.
Food industry....	£P3,232,750	£P10,371,691
Metal works....	670,313	4,607,738
Chemical works....	586,782	2,488,189
Oils and fats....	575,276	2,834,500
Wearing apparel....	494,082	4,063,812
Wood and cork....	443,003	994,653
Textiles.....	318,349	2,642,966
Jewellery—mainly diamond cutting and polishing....	25,058	1,256,859

Education.—Education is not compulsory and is by no means universal, but schools and teachers are required by law to be registered. In 1943-44 there were 1,624 schools, with 8,684 teachers and 203,359 pupils. A dual system, Arab and Hebrew, has developed since 1920. The public system comprises Government schools on the Arab side and schools administered by the Council of the Jewish Community on the Hebrew side. There are also private Moslem and Jewish schools, training colleges for teachers, technical trade, law and agricultural schools, and a Hebrew University (with facilities of Humanities and Science). The Jewish National and University Library on Mount Scopus contains 450,000 volumes and valuable collections of incunabula and manuscripts.

	FINANCE.	
	1943-44.	1944-45.
Revenue.....	£P11,513,748	*£P17,426,488
Expenditure.....	14,819,250	*18,345,986
Public Debt (March 31, 1944)	3,600,000	...
	£P= Palestine Pound=£1 sterling.	

There are 5 foreign banks operating in the country, including branches of Barclays Bank (D.C. & O.), Anglo-Palestine and Ottoman

Bank. There were also 20 local banks on June, 30, 1945.

	TRADE.	
	1943.	1944.
Total imports....	£P27,202,900	£P36,223,716
Total exports....	12,752,351	14,638,464
Imports from U.K....	1,830,769	2,949,875
Exports to U.K....	1,022,255	2,182,445

The principal imports are wheat, flour, rice, sugar, coffee, cottons and woollens, motor cars and tyres; the principal exports are citrus fruits, olive oil, chocolate and polished diamonds.

GOVERNMENT OFFICERS.	
<i>High Commissioner</i> , His Excellency Lieut.-General Sir Alan Gordon Cunningham, K.C.B., D.S.O., M.C. (Nov., 1945) (and £1,500 <i>Duty Allowance</i>)	£4,500
<i>Chief Justice</i> , Sir William James Fitzgerald, M.C., K.C.	1,800
<i>Chief Secretary</i> , J. V. W. Shaw, C.M.G.	1,600
<i>Attorney-General</i> , L. B. Gibson, K.C.	1,500
<i>Financial Secretary</i> , R. Scott, C.M.G.	1,400
<i>British Puisse Judges</i> , D. Edwards, B. V. Shaw	1,200
<i>Presidents of District Courts</i> , W. Clive Curry, M.C.; P. C. Hubbard; P. J. Bourke	£900 to £1,150
<i>Officer Commanding Transjordan Frontier Force</i> , Col. G. W. C. Montgomery, O.B.E.	
<i>Accountant-General</i> , A. L. Peters	1,200
<i>Administrator-General</i> , H. Kantrowich	1,250
<i>Director of Agriculture & Fisheries</i> , F. R. Mason	1,200
<i>Director of Antiquities</i> , R. W. Hamilton	1,100
<i>Auditor</i> , R. F. Pinder, O.B.E.	1,100
<i>Registrar, Co-operative Societies</i> , W. L. Ricketts	1,100
<i>Director of Customs, Excise & Trade</i> , R. W. B. Bell	1,100
<i>Director of Education</i> , W. J. Farrell, O.B.E., M.C.	1,200
<i>Conservator of Forests</i> , G. N. Sale, £800 to	1,000
<i>Director of Medical Services</i> , J. Macquenn	1,200
<i>Commissioner of Income Tax</i> , G. D. Paton	1,100
<i>Director, Department of Labour</i> , R. M. Graves, C.B.E.	1,100
<i>Director of Land Settlement</i> , M. C. Bennett	1,100
<i>Director of Land Registration</i> , J. N. Stubbs, M.C.	1,100
<i>Water Commissioner</i> , R. F. Jaidna, C.M.G., O.B.E.	1,100
<i>Commissioner for Migration & Statistics</i> , E. Mills, C.B.F.	1,000
<i>Inspector-General of Police</i> , Captain J. M. Rymer-Jones, O.B.E., M.C.	1,600
<i>Commissioner of Prisons</i> , F. M. Scott, M.C.	1,100
<i>Postmaster-General</i> , G. D. Kennedy, O.B.E. (acting)	1,000
<i>Director of Public Works</i> , V. Keeniff (acting)	1,000
<i>General Manager, Palestine Railways</i> , A. F. Kirby, C.M.G.	2,000
<i>Director of Social Welfare</i> , W. H. Chinn	1,100
<i>Public Information Officer</i> , H. C. Holme	1,100
<i>Director of Civil Aviation</i> , D. W. Gumbly, C.B.F., I.S.O.	1,200
<i>Government Statistician</i> , G. E. F. Wood	£800 to 1,000
<i>Director of Surveys</i> , A. P. Mitchell	1,100
<i>Town Planning Adviser</i> , H. Kendall	1,100
<i>Director of Broadening</i> , Hon. E. H. Samuel	1,100

* Members of the Executive Council.

* Provisional figures.

District Commissioners.

<i>Jerusalem</i> , J. H. H. Pollock, O.B.E.	£1,400
<i>Haifa (Haifa)</i> , A. N. Law, M.C.	1,200
<i>Galilee (Nazareth)</i> , C. T. Evans	1,200
<i>Gaza (Gaza)</i> , W. R. McGeagh	1,200
<i>Lydda (Jaffa)</i> , R. H. R. Church	1,200
<i>Sania (Nablus)</i> , D. C. MacGillivray, M.B.E.	1,200

British Council.

Representative, J. S. Morrison, 61 Princess Mary Avenue, Jerusalem.

There are British Institutes at Haifa, Jaffa and Tel Aviv and Arab-British Clubs at Jaffa, Nablus, Hebron, Jenin, Beisan, Gaza, Tulkarm, Nazareth and Acre.

TRANSJORDAN.

Emir, H. H. Abdullah ibn Hussein, G.O.M.G., G.B.E., born 1882; second son of King Hussein of Hejaz, appointed April, 1921.

Her Apartment, Emir Talal, born at Mecca 1911; married Nov. 27, 1934, Sherifa Zeine, daughter of Sheriff Jamil.

Transjordan consists of the 4 Districts of *Maan*, *Karak*, *Butja*, and *Ajlun*, and is under the same Mandate as Palestine. It is bounded on the west by Palestine, on the north by Syria, on the east by Iraq, and on the south by Saudi Arabia, boundaries are not definitely determined, but the total area may be estimated at about 30,000 square miles. No Census has yet been taken, but it is estimated that the total population is 400,000, of whom 230,000 are settled, 120,000 semi-nomads, and 50,000 nomads; the great majority are Moslems.

The extreme west of the country is fertile, and agricultural and pastoral industries are carried on, but the rest of the country is almost entirely desert. The Hejaz Railway runs (with the exception of the first few miles) through Transjordan territory from Deraa to Kalaat el Mudawwana, where it enters Saudi Arabia and continues to Medina; there are good roads to all the chief towns in the country.

There is a Legislative Council of 6 official and 16 elected members, constituted in 1929.

	1939-40.	1940-41.
Revenue	£P402,971	£P388,455

(Dec. 31, 1939) .. — 155,107

CAPITAL, Amman. Estimated population, 35,000.

High Commissioner, see Palestine.

British Resident, A. S. Kirkbride, C.M.G., O.B.E. M.C.

Commanding Arab Legion, Brigadier G. B. Glubb, D.S.O., O.B.E., M.C.

SOUTHERN RHODESIA.

Southern Rhodesia, comprising Matabeleland and Mashonaland, is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, its political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S. and W.; and Portuguese East Africa on the E. The total area is 150,333 square miles, and the population, as estimated at June 30, 1944, number 82,680 Europeans, 6,970 Asiatic and Coloured Persons and 1,556,000 Natives; a total of 1,645,650.

§ Member of the Executive Council.

European births (1944) 2,026, deaths 735, marriages 705.

The Natives of Southern Rhodesia (members of the Bantu race) are *Amandebele* (known more usually as *Matabele*) and *Kalanga*, who occupy *Matabeleland*, the western portion of the Colony; and *Wazembu*, *Wankaranga* and a number of other tribes which group together are broadly described as the *Mashona*, who are settled (for the most part) in *Mashonaland*, the eastern part of the territory.

There are in Rhodesia many ruins of former native centres, the most extensive being near Victoria, Mashonaland, known as *Zimbabwe* ("Houses of Stones").

Government.—Responsible Government was instituted in Southern Rhodesia on Oct. 1, 1923. The Government is administered by a Governor appointed by the Crown, with an Executive responsible to Parliament. The Constitution provides for the establishment, under certain conditions, of a Legislative Council.

Municipal self-government has been established in Salisbury, Bulawayo, Umtali, Gwelo, Gatooma and Que Que.

On Jan. 24, 1936, the Convention of Representatives of Southern and Northern Rhodesia at Victoria Falls adopted a resolution that the early amalgamation of Southern and Northern Rhodesia, under a constitution conferring the right of complete self-government, was in the best interests of all the inhabitants of both Colonies.

On March 6, 1938, a Royal Commission was appointed by the Imperial Government, the terms of reference being "to enquire and report whether any form of closer co-operation or association between Southern Rhodesia, Northern Rhodesia and Nyasaland is desirable and feasible, with due regard to the interests of all the inhabitants, irrespective of race, of the territories concerned." The Commission visited the territories mentioned shortly after, collecting evidence and sounding public opinion on the question of amalgamation. As a result of their findings the Commission reported that immediate amalgamation was not in the best interests of the territories concerned.

Communications.—The Beira and Rhodesia Railway system begins at Vryburg and in conjunction with the railways of the Union of South Africa provides communication from Cape Town through Bechuanaland, Southern and Northern Rhodesia to the Belgian Congo and to Portuguese East Africa (port of Beira). The total mileage of the system is 2,711 miles, of which 1,361 miles are operated within the boundaries of Southern Rhodesia. In the Colony there are several branch lines tapping the chief mining areas. Road motor services with a route mileage of 1,637 miles (Sept. 30, 1944) supplement the railways in outlying areas. At the end of December, 1944, there were 22,232 motor vehicles in Southern Rhodesia. The *Otto Beit Bridge* (opened May 24, 1939) over the Zambesi River at Chirundu, provides a link on the road between Salisbury and Lusaka (Northern Rhodesia).

On Dec. 31, 1944, there were 164 Post Offices in the Colony, including 62 Savings Bank Offices. For 1944, postal revenue was £346,264 and expenditure £321,898. The total wire mileage of the telegraph and telephone system is 59,770 miles. Deposits in the Post Office Savings Bank at the end of 1944 amounted to £4,493,540.

Social Services.—The Colony possesses 15 well-equipped and well-staffed Government Hospitals, 1 Mental Hospital, 1 Nervous

Diseases Hospital, and 2 Leprosy Hospitals. A staff is maintained for the control of preventable disease and a school has been established under the Royal Sanitary Institute for training Health Inspectors. There are 7 Government Maternity homes, 6 Government Hospitals having maternity blocks, and 4 registered private maternity homes in the Colony. In the Government bacteriological laboratories extensive facilities exist for the investigation of disease. Medical facilities for the benefit of natives exist in the form of native sections attached to Government European Hospitals and small native hospitals on mines and at other outlying centres. In addition the Government has established 69 native clinics in the Colony and their numbers are increasing yearly. These clinics are to all intents and purposes native hospitals built on a plan adapted to the needs of the native population. There are also a number of missions which supply medical aid to the natives in the reserves and in other parts of the Colony where clinics do not at present exist.

The Government continues to investigate the possible methods of eradication and control of *bilharziasis* in the Colony. Experiments are being carried out with a view to determining the most suitable means of destroying water snails carrying the parasites which give rise to the disease.

Production.—The rights to the rich mineral deposits originally acquired by the British South African Company, were purchased by the Government in 1933 for £2,000,000. The value of the gold production since occupation (1890) to Dec. 31, 1944, was £148,745,180. The output for 1944 was valued at £4,978,922. Silver, coal, chrome ore, asbestos, mica, iron, pyrites, limestone, tin and tungsten concentrates have also been produced in considerable quantities, while various other metals and minerals have been produced in small quantities. Though the climate is sub-tropical, the average altitude makes it well suited for European occupation, and it possesses all the essential characteristics and facilities necessary for successful agriculture and cattle raising, and for the cultivation of European fruit trees, cereals, and vegetables, in addition to tobacco, cotton, and the indigenous products of the country. The staple crops are maize and tobacco; the tobacco crop 1943-44 was 32,120,880 lb. (Virginian) and 2,343,569 lb. (Turkish), total 34,464,449 lb. In 1944-45 the Virginian crop was estimated at 41,750,000 lb. The total area under cultivation (European only) in 1944 was 540,490 acres (maize 244,406, tobacco 69,214, and legumes and fodders 167,595 acres). Cattle (2,871,751 on Dec. 31, 1944) thrive well; an export trade in chilled beef is being built up; sheep numbered 333,621 and pigs 145,962. Dairy products sold include milk 3,801,083 gallons, and eggs 1,190,313 dozen. Butter available for sale amounted to 1,299,038 lb., and cheese to 531,712 lb. In addition to the main industries of mining and farming there are creameries, cotton ginneries, bacon factories, oil, soap and candle factories, cement and lime works, iron and steel works, a sugar refinery, and many other undertakings, including a blanket factory, established in 1943.

The British South Africa Company has relinquished all rights and interests in the land in Southern Rhodesia except in the estates which it was already developing and working on July 30, 1923. Considerable efforts have been made

by the Government during recent years to increase the number of new European settlers on the land, which is cheap, and may be had on very favourable terms. A Land and Agricultural Bank makes loans to settlers on easy terms of repayment. Land has been set apart for tribal settlement (Native reserves).

Education.—On Dec. 31, 1944, there were, for European children, 77 Government and Government aided schools, and 1 Internment Camp school. In addition, there were 13 private schools. For children in rural areas, where the population is too scanty for a school, very successful correspondence classes have been inaugurated to supplement the aided government schools. The total number of European children in all types of schools at the end of 1944 was 13,103. There are 16 schools for Asiatics and children of mixed race, with 2,001 pupils. For Africans there are 2 Government schools with 527 pupils and 1,689 schools with 139,732 pupils conducted by mission agencies with Government aid. Grants in aid of native education in 1943-44 were £101,575, the total educational (other than native) expenditure being £453,654.

FINANCE.

	1943-44.	1944-45.†
Revenue.....	£10,422,944	£10,515,950

 lowances £1,200*)..... £2,000
Official Secretary, T. G. Gisborne.

SALISBURY, the capital, is situated on the
 Mashonaland plateau, altitude 4,880 ft., popula-
 tion as at Census, (1942) 51,761, including
 18,779 Europeans. BULAWAYO, the largest
 town in Matabeleland, altitude 4,460 ft. popula-
 tion 39,817, including 16,603 whites. Other
 centres are Umtali, Gwelo, Gatooma, Que Que,
 Eiffel Flat, Wankie, Fort Victoria, Selukwe,
 Shabani and Bindura.

NORTHERN RHODESIA.

See also p. 824

Northern Rhodesia lies to the North of the
 Zambezi, its neighbour, being Tanganyika Territory
 and the Belgian Congo on the north, Nyasa-
 land and Portuguese East Africa on the east,
 Southern Rhodesia and South-West Africa on the
 south, and Portuguese West Africa on the west.
 The country comprises an area of 290,323 square
 miles, and with the exception of the Luangwa,
 Zambezi and Kafue Valleys, consists of a table-
 land varying from 3,000 to 4,500 feet, with
 greater altitudes in N.E., and especially in the
 vicinity of Lake Tanganyika. The estimated
 European population on December 31, 1943,
 was 18,745; the native population was
 estimated (Dec. 31, 1940) at 1,366,641.

Agriculture, production, etc.—Over 3,000,000
 acres of land are under settlement by white
 farmers. The chief crop grown is maize. Other
 crops are tobacco, coffee, wheat, oil seeds, and
 citrus. Stock raising is carried on by many
 farmers. The native-owned cattle in the terri-
 tory is estimated at 502,050, and European-owned
 cattle 126,500. The vast copper deposits in the
 northern part of the Territory have attracted
 much capital, the three large producing mines,
 the Roan Antelope, Nkana and Mufulira, being
 responsible for the annual production of some
 250,000 tons of copper, a portion of which is
 now refined at Nkana; Nkana copper contains
 cobalt, silver and gold. Zinc is also produced

on a considerable scale at Broken Hill, which
 mine also carries large reserves of lead and
 vanadium ore. The total value of mineral
 production in 1943 was £13,732,840. Many
 species of game are to be found and good sport
 at a moderate cost is available for the big-game
 hunter.

A Joint Development Adviser (Northern
 Rhodesia and Nyasaland Protectorate) has
 been appointed to deal with plans for social and
 economic development.

Communications.—The trunk line of the
 Rhodesian Railway system traverses the colony
 from Livingstone to the Congo border. The
 Zambezi, Kafue, Chambezi and other rivers are
 navigable for a considerable portion of their
 courses. There are 44 post offices, 16 of which
 are money order offices. The main telegraph
 and telephone route lies alongside the railway
 from Victoria Falls Bridge to the Congo border,
 with branches from Ndola to Luanshya, Ndola
 to Nkana, and from Nkana to Mufulira and
 Chingola; Fort Jameson is connected with the
 Nyasaland, and Abercorn with the Tanganyika,
 system. Aero-nautical wireless stations at
 Lusaka, Livingstone, Kasomo, Mpika and Ndola
 are equipped for communication with aircraft
 in flight (900 metres wave-length). For point-
 to-point communication on short-wave, equip-
 ment has been installed at Abercorn, Fort
 Jameson, Broken Hill, Kasama, Mpika, Mongu,
 Balovale, Kasempa, and Mwinilunga. All
 short-wave wireless stations maintain a public
 service. *Southern Rhodesian Airways* operate
 regular services between Lusaka-Salisbury,
 Lusaka-Mongu and Lusaka-Fort Jameson, and
 between Lusaka-Kisumu and South African
 Airways from Johannesburg to Nairobi via
 Lusaka.

Government.—The administration is in the
 hands of a Governor appointed by the Crown,
 assisted by an Executive Council of 5 official
 and 3 nominated unofficial members. There
 is a Legislative Council, which consists of 9
 official members, 8 elected members, and 1 un-
 official member who is appointed to represent
 Native interests. The seat of Government is
 at Lusaka (opened May 28, 1935). The
 country is divided into 7 Provinces for fiscal
 and administrative purposes. The most im-
 portant centres are Lusaka, Livingstone,
 Broken Hill, Fort Jameson, Mazabuka, Aber-
 corn, Kasama, Ndola, Luanshya, Nkana,
 Mufulira and Mongu.

Education.—On December 31, 1944, there
 were 24 European Schools with an enrolment
 of 2,500, and 1,500 recognized and Government
 schools for natives with an enrolment of
 180,000.

FINANCE.

	1943.	1944.
Revenue.....	£3,274,177	£3,106,740
Expenditure.....	2,657,933	3,543,800

TRADE.

	1942.	1943.
Total imports.....	£5,582,857	£5,965,470
Total exports.....	10,938,386	13,946,100
Imports from U.K....	598,000	...

The chief imports for home consumption are
 similar to those enumerated for Southern
 Rhodesia. The chief exports of local origin
 are copper, cobalt alloy, vanadic oxide, wood
 and tobacco.

The Rhodes-Livingstone Institute of Central
 African Studies, founded in 1937, is situated at
 Livingstone, the former Capital.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55' S. lat. and 5° 42' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population (est. 1940) of 4,710. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, João de Nova Castella, in 1502 (probably on St. Helena's Day), and remained unknown to other European nations until 1588.

It was used as a port of call for vessels of all nations trading to the East until it was annexed by the Dutch in 1633, but it was never occupied by them, and the English East India Company seized it in 1659. It was retaken by the Dutch on New Year's Day, 1673, and on May 5, 1673, it was again captured and was held by the Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, when it was lent to the British Government as a place of exile for the Emperor Napoleon until his death on May 5, 1821), when it was ceded by them to the Crown. It was formerly an important station on the route to India, but its prosperity decreased after the cutting of the Suez Canal. A phormium (flax fibre) and lace-making industry has been established. St. James's Bay, on the north-west of the island, possesses a good anchorage.

Ascension (Govt. Representative, Col. J. N. Tomlinson), an isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55' 55" S. lat. and 14° 25' 55" W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and, being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it; on Dec. 31, 1940, the population was 169. Ascension was administered by the Board of Admiralty until 1922, when by Royal Letters Patent it became a Dependency of St. Helena and was transferred to the Colonial Office. St. George's, the capital, is situated in a small bay on the N.W. coast. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month.

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of 5 official members. The Governor is also assisted by an Advisory Council of 6 unofficial members chosen to represent, as far as possible, all unofficial sections of the community, the Governor alone making all ordinances.

TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. $37^{\circ} 6' S.$ and long. $12^{\circ} 2' W.$, discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. The main island is about 2,000 miles W. of the Cape of Good Hope, 4,000 miles N.E. of Cape Horn, and about 1,500 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 14, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn in 1817. William Glass, a corporal of artillery (died 1853), remaining at his own request, with his wife and two children. This party, with two ex-Navy men, Alexander Cotton and John Mooney, and three masons imported for the purpose of housing the garrison, formed the present settlement. In 1827 five coloured women from St. Helena, and afterwards others from Cape Colony, joined the party. The inhabitants are of mixed blood, but the British strain is predominant. In 1885 many of the able-bodied men were drowned through the upsetting of a boat, and in 1886 a grant of stores and provisions was made by Parliament. In 1921 the inhabitants numbered 127 and in 1945 the number was 224; they are stated to be very long-lived. The principal settlement (Edinburgh) is in a fertile tract in the north-west of the island, its name being in honour of a visit from the Duke of Edinburgh in 1867. The inhabitants raise crops and possess cattle, sheep and pigs.

From the death of Corporal Glass until 1933 the oldest inhabitant acted as Governor; in 1933, a council of four was set up (with one of its members as Chairman), the chairman, or chief, acting as island spokesman and conducting marriages in the absence of a chaplain. There is also a women's council for matters affecting women and children. Until the outbreak of war in 1939 communication with the outside world was infrequent, but the setting up of a meteorological station manned by R.A.F. and South African A.F. (which will probably be retained) should entail periodical visits of supply ships, etc., and wireless communication will remove the sense of isolation.

CAPITAL, Ψ Edinburgh.

Resident Chaplain, *Tristan da Cunha*, Rev. E. A. Handley, B.A. (1945).

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-towls. Cultivation was started in 1937.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and $\frac{1}{4}$ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, St. John's and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

GOVERN ISLAND (or Diego Alvarez), in $40^{\circ} 20' S.$ and $9^{\circ} 44' W.$, lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

By Letters Patent dated January 12, 1938, the Islands of *Tristan da Cunha*, *Gough*,

Nightingale and *Inaccessible* Islands in the South Atlantic were made Dependencies of the Island of St. Helena.

SARAWAK.

Rajah, H. H. Sir Charles Vyner Brooke, G.C.M.G., born Sept. 26, 1874; suc. his father, *Rajah* Sir Charles Johnson Brooke, May 17, 1917; m. 1921, Hon. Sylvia Leonora, daughter of and Viscount Esher, b. 1885, (H. H. the Ranees).

Heir Presumptive, Bertram Willes Brooke (H. H. the *Raja Muda*, Anthony Brooke), b. Aug. 8, 1876.

Sarawak Government Agent in England, J. A. Smith (acting), *Sarawak Government Offices*, Millbank House, Westminster, S.W.1.

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of about 50,000 square miles, and a population of about 49,585, composed of various races. The government of Sarawak was obtained in 1842 from the Sultan of Brunei by the late Sir James Brooke, who became well known as *Rajah* Brooke of Sarawak. Other concessions have been made in 1861, 1882, 1884, and 1890, when the Limbang River was obtained. The Lawas River was added in 1905. In 1864 Great Britain recognized Sarawak as an independent State, and under an agreement of 1888 the State has been placed under British protection. The territory of the *Rajah* of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is, except for a few short stretches, formed by outstanding ridges of hills; the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 200 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (23 miles).

Sarawak was occupied by the Japanese Dec. 17, 1941. Allied troops landed at Lutong, the important refinery centre for the Seria and Miri oilfields, June 20, 1945. After the unconditional surrender of Japan, the government of H. H. the *Rajah* was re-instated.

CHIEF TOWN, Ψ Kuching. Population (estd.), 25,000. Distance from London, 8,700 miles.

SEYCHELLES.

The Seychelles Islands, in the Indian Ocean, which number altogether 92, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By letters patent of Sept., 1903, they were erected into a separate colony. The principal islands of the group are Mahé (56 sq. miles), Praslin (9,700 acres), Silhouette (4,900 acres), La Digue (2,500 acres), Curieuse (500 acres), Félicité (689 acres), North Island (525 acres), St. Anne (500 acres), Providence (500 acres), Frigate (700 acres), Denis (340 acres), Cerf (290 acres), and Bird, or Sea Cow, Island (160 acres), and the total area of the Colony, with dependencies, is estimated at 156½ square miles; the dependencies are the Amirantes, Alphonse, Bijoutier, St. François, St. Pierre, the Cosmoledo Group, Astove, Assumption, Coëtivy, Aldabra and Farquhar Island. The population was estimated (Dec. 31, 1940) at

32,150. At the census of 1931 the population of Mahé was 21,977. Praslin 2,476, La Digue, 1,225, other islands 1,736. Although only 4° S. of the Equator, the islands are healthy, the death-rate in 1938 being 12·61 per 1,000. There are 26 Roman Catholic and 1 church of England primary schools; there are also 2 secondary schools. Aldabra, one of the dependencies of the Seychelles, and about 650 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 4 members (2 *ex-officio* and 2 nominated official and 2 unofficial), and by a Legislative Council of 6 official and 6 unofficial members.

SIERRA LEONE.

See also pp. 814-5.

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1807 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony, including those portions administered as Protectorate, lies along the coast, extending from the boundary of French Guinea—north of the mouth of the Scarries River—to the boundary

of Liberia at the mouth of the Mano River, a distance of approximately 210 miles. Those portions of the Colony which are strictly administered as Colony (viz., the Sierra Leone Peninsula, Tasso Island, Banana Islands, the township of Bonthe on Sherbro Island and York Island) cover areas totalling approximately 271 square miles. The area of the Colony is estimated to be 2,500 square miles, with a population (1941) of approximately 222,000, of whom 420 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes; a babel of tongues is thus to be heard in the streets of Freetown. The total area of the Colony and Protectorate is about 28,000 sq. miles, and the total population about 1,770,000. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 210 miles, lying between 6° 55', and 10° N. lat., and the extreme breadth from east to west is 208 miles, between 10° 15' and 13° 16' of W. long. Its estimated area is 25,500 sq. miles, and its population about 1,672,636. For administrative purposes the Protectorate is divided into 4 Divisions, each administered by a Commissioner.

The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles, and a branch line 83 miles in length extends in a north-easterly direction from Baiya to Maknfi. Motor roads are now being opened up in the Colony and Protectorate, in the Colony connecting the various towns and villages with the port, and in the Protectorate as feeder roads to the railway. There are (1944) 2,194 miles of combined telegraph and telephone service.

FINANCE.

	1943.	1944.
Public Revenue.....	£1,747,838	£1,885,091
Public expenditure ..	1,588,008	1,684,310

(Dec. 31).....	1,369,684	1,369,684

TRADE.

	1941.	1944.
Total imports.....	£3,814,400	£5,484,203
Total exports.....	1,592,610	1,446,003
Exports to U.K.....	...	1,305,532
Imports from U.K. ...	2,830,000	3,010,536

The principal exports are iron ore, palm kernels, diamonds, gold, kola nuts, palm oil, piasava, ginger, platinum, banniseed, hides, rice, pepper, raw cocoa and chromite. Some of the largest diamonds known have been found in the Colony; in 1943 one of 530 carats and in 1945 one of 770 carats. The chief imports are cotton goods, coal, apparel, hardware, provisions, petroleum and tobacco.

GOVERNMENT.

Sierra Leone is a Crown Colony, possessing a Legislative Council partly elected and partly nominated by the Crown, with full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

CAPITAL, Ψ Freetown (population, 1931, 55,359). Freetown, which possesses the finest and most important harbour in West Africa, is 3,078 miles from Liverpool; transit, 10 days by sea; 3 days by air.

SOMALILAND.

British Somaliland occupies the north-east horn of the African Continent along the south of the Gulf of Aden, although the point of the horn formed part of pre-war Italian Somaliland. It is bordered to the west by French Somaliland (Djibouti) and Abyssinia, and to the south and east by Somalia (Italian Somaliland &c.). The territory covers an area of approximately 58,000 square miles, and lies between $11^{\circ} 27'$ north latitude and $42^{\circ} 35'$ and 49° east longitude. The interior of the Protectorate is characterised by an elevated plateau rising towards the north to an altitude of from 2,000 to 7,000 feet, and descending in scarps and broken hills to the coastal plain which varies in width from 30 to 60 miles. Vegetation consists largely of coarse grass and stunted thorn and acacia trees, which furnish good grazing for camels and goats.

The nomadic population is estimated at from 500,000 to 700,000, and consists entirely of Somali tribes who are Mohammedans of the Qadrayeh and Saleyeh sects. The life and wealth of the people is centred round their stock (camels, sheep and goats). Agriculture is confined to small areas with sufficient rainfall. Frankincense and myrrh are found in the east. The coastline abounds in fish, and the presence of coal, oil and minerals is reported in the interior. The chief exports are meat, hides and ghee. Game in the Protectorate includes lion, kudu, ostrich and all types of gazelle.

Climatic conditions on the coast are governed by the south-west monsoon (Kharif) which blows from May to September, and the north-east monsoon which lasts from November to March. Much of the interior is generally cool and healthy owing to its elevation.

The Protectorate owes its foundation to the

capture of Aden by the Bombay Government in 1839, when Turkey claimed the Somali Coast from Zeilah to Cape Gardafui. The Egyptians bought the port of Massawa in Eritrea in 1864 and subsequently spread their jurisdiction south to Zeilah and Berbera at a time when this Coast provided the chief source of supplies for Aden. As they were pre-occupied by events in the Sudan and the rise of the Mahdi, the Egyptians withdrew from the Somali coast in 1884. Troops were sent from Aden to Zeilah to preserve order and safeguard British interests, and from 1884 to 1886 treaties were made with Somali tribes from Zeilah eastwards, placing them under British protection, and guaranteeing to them their independence. On July 20, 1887, the Powers were notified that a British Protectorate had been established on the Somali Coast from Ras Jibuti to Bender Zaida. Its boundaries were later defined by treaties with France, Italy and Abyssinia; but they are still artificial and partly undemarcated.

In 1901 a local Mahdi, later known as the Mad Mullah, appeared in the interior preaching a Holy War against the British. Indecisive fighting with regular British troops took place intermittently for the next 9 years, and in 1910 the constant expense of the operations and difficulties of transport caused the British Government to withdraw from the interior to the coast. A period of great inter-tribal unrest resulted, until the final defeat of the Mullah in 1920.

The Protectorate was invaded by Italian forces on August 4, 1940; and after resistance against greatly superior numbers the British forces were evacuated on August 18, leaving the Italians temporarily in occupation. British Sovereignty was restored in 1941 in the course of the East African campaign.

Under an Order of the King in Council (December 17, 1920) the Protectorate is administered by a Military Governor who is the sole Executive and Legislative Authority. It is divided into five districts which bear the names of 5 principal towns (see below). Since the re-occupation in 1941 the War Office has assumed responsibility in place of the Colonial Office; but the constitution of the Protectorate continues substantially the same as it was before the evacuation.

PRE-WAR STATISTICS.

	1938.
Revenue	£236,074
Expenditure	227,340
Imports	728,050
Exports	207,548

Principal towns, Ψ Berbera (pop. in hot season, about 15,000; in cold season, about 30,000), Hargeisa (15,000 to 20,000), Ψ Burao (10,000), Borama and Erigavo.

Military Governor, Brigadier G. T. Fisher, C.S.I., C.I.E. (1943).

Secretary to the Government, Lt.-Col. S. J. Olivier.

Commissioner for Native Affairs, Lt.-Col. R. H. Smith, O.B.E.

Legal Secretary, Lt.-Col. D. J. Jackson.

Commissioner of Police, Lt.-Col. J. G. Leslie, M.B.E.

Deputy-Controller of Finance and Accounts, Lt.-Col. J. M. Ward.

Director of Education, Major C. R. V. Bell.

Survey Officer, Major J. A. Hunt.

Agricultural Officer, Major H. L. G. Milne.

TANGANYIKA TERRITORY.

See also p 814

TANGANYIKA TERRITORY (formerly German East Africa, 1884-1918) occupies the east central portion of the African continent, between 1°-11° 45' S. lat. and 28° 50'-40° 38' E. long. The Territory is bounded on the N. by Kenya and Uganda; on S.W. by Lake Nyasa, Nyasaland and N. Rhodesia; on S. by Portuguese E. Africa; on the W. it is bounded by the Belgian mandated territory of Ruanda-Urundi and the centre line of lake Tanganyika; on the E. the boundary is the Indian Ocean. Tanganyika ("Great Meeting of the Waters") has a coastline of about 500 miles and an estimated area of 360,000 square miles. The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River.

The greater part of the Territory is occupied by the Central African Plateau from which rise many mighty mountains, including *Mt. Kilimanjaro*, the highest point in the Continent of Africa (19,321 ft.), and *Mt. Meru* (14,960 ft.). The Rovuma, Rufiji, Pangani, Wami and Kigani rivers flow into the Indian Ocean; the Maia and Kagera into Victoria Nyanza; the Malagarasi into Lake Tanganyika; the Songwe into Nyasa; and the Sasi and Lupa-Songwe into Lake Rukwa.

The native population consists mostly of tribes of mixed Bantu race. In 1943 the European population was estimated at 16,709, Asiatics at 45,099 and the native population at 5,355,786. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule. Legislation for the abolition of the status of slavery was enacted on June 9, 1922.

Education.—Expenditure on education in 1943 was £155,200, other sums being contributed by native administrations. In 1943 there were 164 Government and Native Administration African schools, with a total of 17,000 pupils, and 312 mission assisted schools with average attendance of 36,000 pupils. There were 3 Government Indian schools (av. 1,000) and 80 Indian assisted schools (av. 5,200). There are also European schools maintained by or in receipt of financial assistance from the Government. The Government publishes a monthly journal printed in Swahili to disseminate news and useful information among the vernacular-speaking population.

Production, etc.—The total area under forests is 5,654 square miles, of which 4,468 are included in the Government Forest Reserves; 800 square miles await reservation, about 279 square miles are privately owned and 107 square miles are native communal forest reserves. The principal export crops are sisal-hemp, cotton, coffee, ground-nuts, rice, sesame, copra, beeswax, ghee, hides and skins and cattle; sugar, tea, tobacco and pyrethrum are produced in increasing quantity. Sisal, kapok, tea and pyrethrum are produced entirely by non-natives; coffee, maize, and tobacco by both natives and non-natives. Over 90 per cent. of the cotton is grown by natives. Cassava, sweet potatoes, millets, sorghums, peas, beans, bananas and other tropical fruits are grown mainly for native consumption.

Live Stock.—In 1943 there were 5,944,436 cattle, 2,208,239 sheep and 2,851,851 goats in the Territory.

Minerals.—Gold (about £1,000,000 annually), tin, wolfram, diamonds, salt, mica, phosphates and red ochre are among the minerals produced and others are known to exist. A diamond of 220 carats, the largest yet found in East Africa, was unearthed in Feb., 1945, and another of 67 carats in May of the same year.

Communications.—There are two railways of metric gauge. The Tanga Railway from Tanga to Arusha via Moshi (272 miles). The Kenya and Uganda Railways connect with this railway at Kahia Junction. The Central Railway from Dar-es-Salaam to Kigoma (775 miles), with a branch line from Manyoni (365½ miles) to Singida (71½ miles), and a branch line from Tabora (524 miles) to Mwanza (236 miles) on Lake Victoria. Steamers run on Lakes Victoria, Nyasa and Tanganyika. Dar-es-Salaam is in telegraphic communication with many inland centres, and with the adjoining territories Nyasaland, Kenya, Uganda and Northern Rhodesia. Dar-es-Salaam and Lindi are ports of call for the Empire Mail Service. There are 128 post offices and postal agencies, and 101 telegraph offices. Telephone exchanges are established and trunk telephone communication is in operation between various centres in the Territory, and also with Mombasa and Nairobi.

The *Great North Road*, from Northern Rhodesia to Nairobi (Kenya), runs for 810 miles of its total length of 928 miles through Tanganyika.

The chief seaports are Dar-es-Salaam, Tanga, Lindi, Mikindani, and Kilwa, all of which are accessible to ocean-going vessels; and Bagamoyo and Pangani. In 1943 759 steamers (exclusive of coastal boats) of 633,390 tons entered, and 259 steamers of 633,065 tons cleared at the various ports from places beyond the Territory. 1,334 dhows (24,563 tons) entered and 1,340 (24,986 tons) cleared at the various coast ports.

Government.—Under an Order in Council (1920) the Territory is administered by a Governor, who is assisted by an Executive Council of 6 nominated members and by a Legislative Council of 13 official and 10 non-official nominated members. There is a Police force of 1,840 all ranks.

THE UGANDA PROTECTORATE.

See also p. 814.

The territories now comprised within this Protectorate came under British influence in 1890. The present limits are approximately as follows:—On the north, the Anglo-Egyptian Sudan; on the east, the western boundary of Kenya Colony; on the south, Tanganyika Territory and Belgian Ruanda-Urundi; and on the west, the eastern boundary of the Belgian Congo. Within these boundaries lie Lake Victoria (part), Lake Edward (part), Lake George, Lake Albert (half), Lake Kyoga, Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to the Sudan frontier post at Nimule. Total area, 93,981 square miles, including 13,680 square miles of water.

For administrative purposes, the Protectorate is divided into 3 Provinces:—

- (1) *Buganda* (Mengo, Masaka and Mubende).
- (2) *Eastern*, comprising the districts of Busoga, Mlale, Teso, and Karamoja district.
- (3) *Western* (Bunyoro, Acholi, Lango, West Nile, Toro, Ankole, and Kigezi).

The whole Protectorate is under administration, but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of Buganda is recognised as a native kingdom under a *Kabaka* (H. H. Mutesa, son of the late King and great-grandson of the celebrated Mutesa). He is assisted in the government by three native ministers and a *Lukiko*, or native Council, and each county chief also has his *Lukiko* to assist him in local government and in the administration of justice. In Buganda (and in Bunyoro, Ankole and Toro, also ruled over by paramount chiefs, as well as in most of the other parts of the Protectorate more directly administered), purely native matters are dealt with by the various native Councils, but in serious cases there is an appeal to British officers or courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor, who (with the assistance of the Executive and Legislative (Councils) makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local British courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Nyasaland, Zanzibar, and Tanganyika Territory. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a Battalion of the King's African Rifles with headquarters in the Protectorate.

The total population of Uganda (Dec. 31, 1943) is given as 3,930,724, composed as follows: Africans, 3,901,440; Asiatics, 26,537; Europeans, 2,747. About 2,400,000 Africans speak Bantu languages, the most important of which is Luganda, the language of the Buganda tribe, after whom the Protectorate is named. Swahili is also widely spoken. There are a few pygmies in the Kigezi district; the rest of the Africans belong to the Nilotic, Half-Hamite and Hamite groups.

Post-war Development.—A comprehensive 6-year development plan is contained in a joint report of the Standing Finance Committee and the Development and Welfare Committee. The programme is set out under six main headings—Education, Health, Conservation and Development of Natural Resources, Social Welfare, Communications and Research—and is expected to cost about £5,000,000, towards which it is hoped to receive £2,250,000 from the Colonial Development and Welfare Fund, the balance being met from local resources.

Education.—At first this was entirely in the hands of the various Missionary Societies, who still receive grants from the Protectorate government. Their efforts have for some years been supplemented by Government. Total Protectorate Government grants to African education in 1944 were £184,624, the total Government expenditure on education being (1944) £242,664. Total number attending schools in 1944, 379,284, of whom roughly 200,000 are within the aided system; Makerere

College, Kampala, is an East African institution for higher vocational education, moving towards University status. It is an inter-territorial foundation in whose support and direction all the East African governments take part.

Communications.—The main line of the Railways extends from Mombasa and Nairobi, *via* Tororo and Jinja, to Kampala. There are branches from Tororo to Soroti, from Mbuluni to Namagajali on Lake Kyoga, and from Kampala to Port Bell on Lake Victoria. The Railway Administration maintains a regular steamer service on Lake Kyoga between Namagajali and Masindi Port; and on Lake Victoria between Jinja, Port Bell, Entebbe, Kisumu and Tanganyika Ports. A fortnightly service is maintained on Lake Albert and the Nile between Butiaba and Nínule (connected by motor road with Juba in the Sudan) and between Butiaba and the Belgian port of Kaseuni. A through service is thus provided by the Railway Administration from Mombasa to the Sudan and the Belgian Congo. 2,349 miles of all-weather main roads radiating from Kampala to the principal administrative centres are maintained by the Public Works Department, and about 5,327 miles of excellent roads are kept up by the Native Administrations. The Post and Telegraph system is amalgamated with those of Kenya and Tanganyika. Aerodromes exist at Entebbe, Tororo, Mbarara, Masindi, Gulu, Soroti, Arua and Lira, and seaplane alighting areas at Entebbe, Jinja, Port Bell, Laropi and Butiaba. There are hotels at Kampala, Jinja, Tororo, Masindi, Port Portal, Kabale, Mbarara, Kichwamba and Masaka.

Production.—Agricultural production is almost entirely in the hands of Africans, the most important crops being cotton and coffee. Coffee, rubber, sugar and sisal are the main crops on non-native estates. The mineral wealth is considerable, high grade tin ore being won in the Western Province.

The headquarters of the British administration is at ENTebbe; the chief commercial centres are Kampala (Buganda) and Jinja (Eastern Province). There is an Executive Council of 6 ex-officio members and 1 Official Member, and a Legislative Council of 6 ex-officio and 4 unofficial members. The Governor presides over both Councils.

FINANCE.

	1943.	1944.
Revenue.....	£2,428,658	£2,658,242

ZANZIBAR.

See also p. 84.

(The Zanzibar Protectorate.)

Sultan, H. H. Seyyid Sir Khalifa bin Harub, G.C.M.G., G.B.E., born Aug. 26, 1879; succeeded Dec. 9, 1911. The bicentenary of the Al Busaid dynasty, to which the Sultan of Zanzibar and the ruler of Muscat belong, was celebrated on Nov. 20, 1944.

* Member of Executive Council.

Heir-Apparent, Seyyid Abdullah bin Khalifa, C.M.G., born Feb. 12, 1910.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tughli Bay and north as War-sheikh; but since the cession of the coast-line from Ruwma to Vanga, including the island of Mafia, to Germany in 1890, and of the Benadir and Kismayu coasts to Italy in 1904 and 1924 respectively, they are confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kiambont (Dick's Head), the islands of Lamu, Mauda, Patla, and Siu. The Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the Kenya Colony and Protectorate (*q.v.*). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

Zanzibar has an area of 640 square miles with a population (Census of 1931) of 137,741; Pemba (380 square miles) population, 97,687; total area, 1,020 square miles; total population, 235,428.

The population of Zanzibar and Pemba (Census of 1931) was 235,428, the area of the former being 640 square miles, and of the latter 380 square miles. As the centre of the Arab power, Zanzibar, from the beginning of the 19th century until recently, dominated the trade of East Africa. The great African slave mart was closed in 1873 under the terms of a treaty with Great Britain and slavery was abolished in the Sultan's dominions in 1890. The islands produce a large percentage of the world's supply of cloves (the export of which was valued, in 1944, at £444,364) and produce quantities of copra.

The importance of Zanzibar as a port of trans-shipment and distribution has decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, however, tend to indicate that the island will continue, from the very fact of its geographical position, to retain control of the local traffic—of that portion of the trade which goes to small towns up and down the adjacent mainland coast.

Education.—There are free Government schools, mainly for Moslems, and 4 mission schools, the total number of pupils being 14,256 in 1944.

Communications.—There are 176 miles of road, suitable for motor traffic in Zanzibar and 76 miles in Pemba. There are 4 post offices in the two islands and Government wireless and telephone systems. The city of Zanzibar, on the island of the same name, is the largest in East Africa, population (1931) 45,276. It possesses a magnificent harbour, which presents great facilities for shipping and trade generally.

Net tonnage of ocean-going steamers which entered the port in 1944, 281,023 (1940, 1,294,940). Zanzibar provides the best water supply on the East Coast of Africa, and it is much in demand for shipping supplies.

Zanzibar is distant 6,850 miles; transit, 20 days by sea; 4 days by air.

CONDOMINIUMS.

THE ANGLO-EGYPTIAN SUDAN.

The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36' N. lat., and reaches from French Equatorial Africa about 2° 49' E. (at 22° 45' N.) to the north-west boundary of Eritrea in 38° 35' E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 950 miles.

The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Abyssinia; on the south lie Kenya Colony, the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa and Libya.

The estimated area is about 567,500 sq. miles, with a population of about 6,500,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 5,543 Europeans. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans.

The Nile enters from Uganda at the Sudan frontier post of Nimule in Equatoria Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. From the Atbara confluence to the Mediterranean the river has a course of close on 1,716 miles, and from its sources to the confluence its length may be reckoned at 1,810 miles, giving a total waterway of 3,526 miles.

Between Khartoum and Wadi Halfa occur five of the six *Cufar* *clbs*.

Government.—By virtue of the Condominium Agreement of 1899 between His Majesty's Government and the Egyptian Government and Article 11 of the Anglo-Egyptian Treaty of 1936 the Sudan is administered by a Governor-General on the joint behalf of Great Britain and of Egypt. Since 1920 the Governor-General's Council has been associated with the Governor-General in the discharge of his executive and legislative powers. All ordinances are made and the annual budget is passed by the Governor-General in Council. In 1943 an Advisory Council was set up for the Northern Sudan (the two Southern Provinces of Equatoria and Upper Nile being excluded) composed of eighteen Sudanese members chosen by the Province Councils of the six Northern Provinces, three by each Province Council of two members (one Sudanese) chosen from the members nominated by the Governor-General to represent social and economic interests. No duties may be levied on imports from Egypt, and (with certain exceptions) duties on imports, *via* the Red Sea ports may not exceed those levied in Egypt. The Sudan is divided into eight Provinces (*Mudiriyyas*) under governors (*Mudiris*). Each province is sub-divided into districts with one (or more) District Commissioners in charge of each. Sudanese administrative officials are employed under the District Commissioners. Most districts contain one or more Local Administrations under the control of Native Local Government Authorities. Urban local administration in a number of the principal towns is now largely in the hands of Municipal or Town Councils, which either have or are in process of achieving executive powers, and these councils contain a majority of Sudanese and a proportion of elected members.

Justice.—Civil Justice is administered by the Chief Justice and Judges of the High Court, who are also members of the Court of Appeal, and by subordinate District Judges. The system of law administered is "justice, equity and good conscience" in all cases in which there is no special enactment. There is a substantial body of legislation covering various branches of civil law. Procedure is governed by a Civil Justice Ordinance. The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce and family relations generally amongst the Moslem population. There are District and Province Courts, and a High Court (Mahkama) at Khartoum presided over by the Grand Kadi. **Criminal Justice.**—There is a Sudan Penal Code. Serious crimes are tried by Major Courts constituted under the Code of Criminal Procedure and composed of a President and two members. In the five provinces in which circuits of the High Court exist, Major Courts are, as a rule, presided over by a Judge of the High Court. In the other three Provinces a senior Magistrate presides, usually a District Commissioner. Decisions of Major Courts require confirmation by the Governor-General, to whom also there is a right of appeal. Save in the case of capital sentences, the Governor-General's powers of confirmation and his appellate jurisdiction are exercised on his behalf by the Legal Secretary, recommendations being made in all cases by the Chief Justice. Lesser crimes are tried by Minor Courts of three Magistrates and Magistrates

Courts. In the five Provinces in which circuits of the High Court exist the High Court Judge, and in the other Provinces the Governor, exercises general supervision over these Courts and appellate jurisdiction. In addition to the Courts aforementioned, staffed by Magistrates, there exist also throughout the country Courts of Sheikhs or Chiefs with varying powers of limited jurisdiction. These administer civil and criminal justice in accordance with Native Custom under the general supervision of the Sudan Government Authorities, and dispose of most of the minor disputes and less serious crimes occurring in rural areas. The Police are locally enlisted and are under Provincial administration, but subject to control by the Commissioner of Police under the general direction of the Civil Secretary.

Education.—The education system of the country falls into two spheres, the Northern and the Southern. The former comprises the Provinces of Blue Nile, Darfur, Kassala, Khartoum, Kordofan and Northern, while the latter consists of the Equatoria and Upper Nile Provinces. Education in the Northern sphere is, for the most part, directly in the hands of the Government. Higher Education is represented by the Gordon Memorial College, formerly a secondary school, but now in process of transition to university status. Its faculties include Science, Arts (including Law, Teacher-Training and Administration), Medicine, Engineering, Agriculture and Veterinary Science. The Secondary School, housed during the War in Omdurman, contains over 500 pupils, and will be replaced during 1946 by two schools both sited in rural surroundings. Its aims are to provide secondary education up to the School Certificate standard, to natives of the Sudan. Two Junior Secondary Schools (86 pupils) were established in 1942, and are designed to give vocational training in commerce and agriculture respectively. Eleven Intermediate Schools prepare boys for entry to the Secondary School, or for direct entry to minor government posts. Pupils attending these schools (August, 1945) number 2,847. Some 19,400 boys attended the 117 Elementary Schools, from which a few boys pass to the Intermediate Schools; their main object is to provide an education which will fit boys to become useful and progressive members of their community. There are 62 Girls' Elementary Schools, attended by over 6,700 girls, and a Training College for schoolmistresses containing 23 students. At Bahri or Ruda in the Blue Nile Province is the Institute of Education where 250 elementary schoolmasters are in training, and where the planning of elementary and intermediate education is carried on by a staff of British and Sudanese experts. There are Technical Schools at Omdurman and Atbara, the latter catering exclusively for the needs of the Sudan Railways. In 1944, 221 boys were under instruction at these two schools. Certain non-government schools managed by the various communities cater for the education of children of Sudanese-Egyptian extraction, and other nationalities. Eight independent intermediate schools and a number of elementary schools are managed by and for natives of the Sudan. The number of non-government schools of all grades is 52 with an attendance of 6,900 boys and 3,300 girls. Finally 265 sub-grade schools and some 280 state-aided *Khatwas* (indigenous Koranic schools) provide a varying standard

of education to over 23,000 boys. In the Southern Sphere the Missions, Roman Catholic and Protestant, are the main agents of Government in the spread of Education. The mission schools are subsidised and inspected regularly by Government. Some 10,000 boys and girls attend the various mission schools which go up to intermediate level. Outstanding boys are sent to Uganda for the intermediate schools for further education. Two Government schools have recently been opened in the nilotic area, an intermediate school near Malakal and an elementary school at Tonj. There are also small government training schools at Juba and Kagelu for the training of future clerical and agricultural employees.

Production.—The principal grain crop is *dura* (great millet), which is the staple food of the people in the Sudan, and is also used as cattle and poultry food elsewhere. Both Egyptian and American-type cotton have been successfully established, and increasing quantities are being produced annually. The *Gazira Irrigation Scheme* at present (1944) enables an area of nearly 850,000 acres to be cultivated between the Blue and White Niles, and one-quarter is under cotton. The necessary water is stored by the Sennar Dam on the Blue Nile, about 160 miles south of Khartoum. Cotton cultivation in the irrigated area is managed by a syndicate, and is one of the largest cotton-growing schemes in the world (206,571 faddans in 1943-44). The Sudan is the chief source of the world's supply of gum arabic, the finest gum forests being in Kordofan, Blue Nile and Kassala. A large supply of papyrus is obtained from the sudd area in the upper reaches of the White Nile. Other products include sesame, sonna leaves and pods, gaid (tanning pods), ground-nuts, dates, chillies, lulu nuts, timber, melon seed, dom-nuts (vegetable ivory), wheat, maize, beans and peas, ghee (clarified butter), hides and skins, trochus and mother-of-pearl shell, bees-wax and honey. Minerals won include gold (at Gabait in the Red Sea Hills) and salt at Port Sudan.

The live stock in 1944 included 3,200,000 cattle, 5,000,000 sheep, 4,000,000 goats, 1,000,000 camels, 75,000 asses, and 23,000 horses.

FINANCE.

	1943.	1944.
Revenue.....	£E5,861,944	£E6,578,769
Expenditure.....	5,601,790	6,529,662

£E = Egyptian Pound of 100 *Piastres*.
Exchange Rate 97·50 *Piastres* = £1 sterling.

TRADE.

	1940.	1941.
Total Imports....	£E5,633,889	£E8,060,849
Total Exports....	5,022,978	5,547,327

The principal export is cotton, the value of which, together with cotton-seed, amounted in 1940 to £E3,208,344 and in 1941 to £E6,494,122; gum arabic figures were £E711,560 (1939) and £E681,000 (1940). The chief imports are cotton and silk piece goods, iron and steel ware, machinery, tea, wheat flour, coffee, bags and sacks and tobacco.

Governor-General, H. E. Major-General Sir Hubert Huddleston, K.C.M.G., C.B., D.S.O., M.C. (1941).

Private Sec., W. H. T. Luce.

GOVERNOR-GENERAL'S COUNCIL.

Ex-Officio Members, the Legal Secretary; the Financial Secretary; the Civil Secretary; and the Major-General Commanding Troops in the Sudan (*El Kaid*).

Additional Members, C. R. Williams, C.B.E.; Maj. G. F. Foley, O.B.E., M.C.; C. W. Williams, M.B.E.; G. F. March, M.C.; G. R. F. Bredin.

SUDAN AGENCY.

Sudan Agent (Cairo), E. C. Haselden.

DEPARTMENTS.

Advocate-General, C. C. G. Cumings.
Director of Agriculture and Forests, G. F. Maich, M.C.
Auditor-General, D. Furze.
Chief Justice, C. H. A. Bennett.
Civil Secretary, J. W. Robertson, O.P.E., D.C.M.
Comptroller-General of War Supplies, Major G. F. Foley, M.C.
Director of Customs, H. L. Roper.
Director of Education, C. W. Williams, M.B.E.
Financial Secretary, J. W. E. Miller, C.M.G.
Game Warden, Maj. W. R. Barler, O.B.E.
Grand Kadi, Sheikh Hassan Mamoun.
Registrar-General, S. R. Simpson.
Legal Secretary, T. P. Creel, C.B.E., M.C.
Mufti, Sheikh Ahmed El Tahir.
Director of Posts and Telegraphs, Capt. G. W. Ogden.
Director of Works, E. C. Jones.
General Manager of Railways, C. R. Williams, C.B.E.
Director of Stores and Ordnance, Lt.-Col. G. A. V. Keays.
Do., Medical Service, A. E. Lorenzen, M.R.C.S., L.R.C.P., D.P.H.
Do., Surveys, E. K. G. Sweeting.
Do., Veterinary Service, W. H. Glanville, M.R.C.V.S.

GOVERNORS OF PROVINCES.

Northern.

Darfur (El Fasher), G. D. Lampen.
Blue Nile (Wad Medani), G. R. F. Bredin.
Kassala (Kassala), J. M. Humphry, M.C.
Khartoum (Khartoum), E. J. N. Wallis.
Kordofan (El Obeid), C. Campbell, M.B.E., M.C.
Northern (Ed Damer), G. B. Tracey.

Southern.

Equatoria (Juba), B. V. Marwood.
Upper Nile (Malakal), F. D. Kingdon, M.C.

SUDAN DEFENCE FORCE.

General Commanding Troops in the Sudan and Commandant Sudan Defence Force (El Kaid), Major-General W. D. Stamer, C.B.N., D.S.O., M.C.

London Office.

(Wellington House, Buckingham Gate, S.W. 1.)
Controller, R. O. Mayall, C.M.G., D.S.O., M.C.

CAPITAL, KHARTOUM. The town contains a large mosque for Mohammedans, a cathedral, and the Gordon Memorial College, with extensive Government buildings. Population 46,676. Omdurman had a population (1944) exceeding 120,000.

THE NEW HEBRIDES.

The New Hebrides Group, in the South Pacific Ocean, situated between the 13th and 21st degrees of South latitude and the 166th and 170th degrees of East longitude, of an area of

roughly 5,700 square miles, are administered by a British-French Condominium Government.

The principal islands are Espiritu Santo, Malekula, Epi, Ambrim, Efate or Sandwich, Erromanga, Tanna, Anietyum, Lopevi and Pentecost. The executive consists of a British and a French Resident Commissioner assisted by a staff of officers. The population is estimated at 43,000 (British Nationals 207, French Nationals 710, Asiatics and Tonkinese 2,282, Natives estimated at 40,000). Principal products, copra, coffee, cotton, cocoa, maize, wool, sandalwood and shell. The imports are principally from Australia (68 per cent.) and France (18 per cent.); the bulk of the exports

are shipped to France. Joint revenue, 1943, £59,573; expenditure, £31,872. Total imports, 1941, £88,800; total exports, £107,688.

Attached to the New Hebrides are the Banks (399 sq. miles) and Tonic (40 sq. miles) Islands.

Seat of New Hebrides Administration—Ψ Vila (Franceville), pop. about 1,200.

British High Commissioner, Major-General Sir Philip Euen Mitchell, K.C.M.G., M.C. (1942).

French High Commissioner, M. J. Tallec.

British Resident Commissioner, R. D. Blandy, O.B.E. (*Allowances* £1250) £11,200 to £11,400.

French Resident Commissioner, M. R. Kuter.

THE FIVE FREEDOMS.

Early in November, 1945, representatives of 43 Nations sitting in London agreed to establish a new organisation of the United Nations to be known as UNESCO (United Nations Educational, Scientific and Cultural Organisation) which will have its permanent office in Paris.

The main objects of the new body, laid down

in the preamble, are to establish freedom of movement and of sojourn; freedom of worship of Almighty God; freedom of criticism of man's developed faculties; freedom from molestation; and freedom from denial of his right to work wherever he may be, that he may not be in want.

THE INTER-PARLIAMENTARY UNION.

The Inter-Parliamentary Union has been in existence since 1889; originally started to popularise the idea of International Arbitration, it achieved its object very substantially in helping to create the Permanent Court of Arbitration by the First Hague Conference and the convocation of the Second Conference of the Hague. It was arranging for the Third Congress when the 1914-18 War broke out. During the War, the Union endeavoured to preserve the Inter-Parliamentary organisation in neutral and belligerent countries. After the War it was clear that concentration was the essential on work of peace reconstruction

and it took up all the appropriate subjects for study. Some of them were as follows:—

1. The development of international law.
2. Reduction of armaments and international security.
3. Economic and financial problems.
4. The protection of national minorities.
5. The institution of colonial mandates.
6. The fight against dangerous drugs.
7. Social problems and particularly the regulation of hours of work.
8. The improvement of the representative system.

WORLD PARLIAMENT OF YOUTH.

On Nov. 10, 1945, the World Youth Conference set up a new organisation for a *World Parliament of Youth*. Guy de Boysson (France) was elected chairman of the executive committee. Four vice-chairmen were appointed, representing Britain, China, the United States, and U.S.S.R. On the executive committee

are representatives of Czecho-slovakia, Yugoslavia, India, Spain, China, Poland, and Mexico. The secretaries are Bert Williams, Australia; S. B. Pederson, Denmark; and Mrs. Kitty Hookham, Great Britain. The headquarters of the new organisation will be in Paris.

* In 1930 a separate classification was provided for Mexicans who, up to that date, had been counted with the white population. The number of Mexicans reported in 1930 (1,422,533) is included for that year in the figure for "Other races" and its inclusion accounts for most of the increase between 1920 and 1930. It is estimated that the 1920 figure for the white population included 700,541 persons who would have been counted as Mexicans in 1930. If these are deducted from the 1920 total, there is obtained what might be termed an adjusted figure, 94,123,374, which is more closely comparable with the 1930 figure for the white population.

BIRTHS AND DEATHS.

The annual compilation of mortality statistics for that part of the Continental United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40.5 per cent. of the total population. The birth registration area was established in 1915; it included at that time 31.1 per cent. of the total population. In 1933, for the first time, each area included the total population of Continental United States.

Cal- endar Year.	Births.*		Deaths.*	
	Number.	Rate per 1,000.	Number.	Rate per 1,000.
1925	1,878,880	21.5	1,219,019	11.8
1935	2,155,105	16.9	1,392,572	10.9

* Exclusive of still-births.

Oldest man in U.S.A.—Mark Thrash, born Dec. 25, 1820; died Dec. 17, 1943, aged 122.

IMMIGRATION AND EMIGRATION.

From 1820 to 1944, 38,423,276 alien immigrants landed in the United States. Of the inward total in 1944 1,389 were British and Irish, 238 Germans and Austrians, 246 Scandinavians, 120 Italians, 292 Poles and 387 French. The total number of alien immigrants admitted in 1943-44 was 28,551.

MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In general, adultery, cruelty, abandonment (desertion), habitual drunkenness, and imprisonment on conviction of felony, are legal causes of divorce.

Year.	Marriages.	Per 1,000 Pop.	Divorces.	Per 1,000 Pop.
1930	1,126,856	9.2	191,591	1.6

The total number, including countries not specified, was 11,419,138 in 1940 and 13,983,405 in 1930.

PHYSIOGRAPHY.

The Republic occupies nearly all that portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25°–40° North and longitude 67°–124° 30' West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line has an estimated length of about 5,565 miles on the Atlantic, 2,730 miles on the Pacific, 3,641 miles on the Gulf of Mexico, and 1,050 miles on the Great Lakes. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 1,700 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium; the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver). The highest point is Mount Whitney at 14,496 feet above sea-level, and the lowest point of dry land is in Death Valley, 276 feet below sea-level; these two points are in California, only 86 miles apart. The main elevation of the 48 States is approximately 2,500 feet.

GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organization as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to twenty-first Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, Aug. 26, 1920, Feb. 6, 1933, and Dec. 5, 1933), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE.

The Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the first Monday after the second Wednesday in December following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the sixth day of January by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State

having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. Under the XXth Article of the Constitution the terms of the President and Vice-President end at noon on the 20th day of January of the years in which such terms would have ended if the Article had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice-President, a statute provides for the succession, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of \$75,000, with a travelling allowance of not exceeding \$25,000. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the advice and consent of the Senate, to make Treaties, provided two-thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.

President of the United States (April 12, 1945—Jan. 20, 1945), HARRY SHIPPE TRUMAN, of Missouri, born 1884, elected as Vice-President, Nov. 7, 1944, sworn in as President (in succession to Franklin Delano Roosevelt, deceased) April 12, 1945. Democrat.

THE CABINET.

(In order of succession to the Presidency—each \$15,000.)

1. *Secretary of State*, James F. Byrnes, of North Carolina (born 1879), appointed July 1, 1945.
2. *Secretary of the Treasury*, Fred M. Vinson, appointed July 6, 1945.
3. *Secretary of War*, Robert Porter Patterson, of New York (born 1891), appointed Oct. 25, 1945.
4. *Attorney-General*, Tom C. Clark, of Texas, appointed June 30, 1945.
5. *Postmaster-General*, Robert E. Hannegan, of New York, appointed June 30, 1945.
6. *Secretary of the Navy*, James Forrestal, of District of Columbia, (born 1899), appointed July 1, 1945.
7. *Secretary of Interior*, Harold L. Ickes, of Illinois (born 1874), appointed June 30, 1945.
8. *Secretary of Agriculture*, Clinton P. Anderson, of New Mexico, appointed June 30, 1945.
9. *Secretary of Commerce*, Henry Wallace, of Iowa, appointed June 30, 1945.
10. *Secretary of Labour*, Lewis B. Schwellenback, of Washington, appointed June 30, 1945.

THE CONGRESS.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a veto power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 281,000. The Senate consists of 96 members. The salary of a Senator is \$20,000 per annum, with mileage at 20 cents per mile each session. The House of Representatives consists of 435 Representatives besides a delegate from Alaska, a delegate from Hawaii, one resident commissioner from the Philippines, and a resident commissioner from Porto Rico. The salary of a Representative is \$20,000 per annum, with mileage as for Senators. By the XIXth Amendment, sex is no disqualification for the franchise. On Jan. 1, 1944, there were 44,042,669 men and 44,622,886 women of voting age. 7,860,000 men over 21 were in the armed forces.

THE SEVENTY-NINTH CONGRESS.

(Noon of Jan. 3, 1945, to Noon of Jan. 3, 1947.)

<i>President of the Senate, (pro tempore)</i>	
Kenneth McKellar, Dem., Tenn.,	\$25,000
<i>Speaker of the House of Representatives,</i>	
Sam Rayburn, Dem., Texas,	25,000

Clerk of the House of Representatives, South

Trimble, Dem., Kentucky,

Members of the 79th Congress were elected on Nov. 7, 1944.

The 79th Congress was constituted as under:

Senate.—Democrats 57, Republicans 38, Progressive 1, —Total 96.

House of Representatives.—Democrats 243, Republicans 191, Minor Parties 2.—Total 435.

The 80th Congress will be elected on Nov. 5, 1946.

LIBRARY OF CONGRESS.

(National Library),

Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1824. In 1825, purchase of Thomas Jefferson's library formed basis for a new collection. Partially destroyed by fire, 1851, and replenished in 1851-2. Since that date increased (1) by regular annual appropriations by Congress; (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which was (in 1866 40,000 volumes, now over 600,000 volumes) deposited in the Library of Congress, with the stipulation that future accessions should follow it. The collection is the largest in the Western Hemisphere, but statistics of the four largest libraries in the world are not sufficiently uniform to tell their order in respect to numbers.

The Library of Congress now contains 7,281,681 printed books and pamphlets, 1,664,730 volumes and pieces of music, 1,537,168 maps and views, 572,461 prints, 259,631 photographs, 32,219 reels of microfilm, and approximately 7,790,616 manuscripts. The building was first occupied in 1897. Considerable additions, including an Annex completed in 1938, have brought the total cost to approximately \$18,880,000, and the floor space to 1,563,189 square feet (nearly 36 acres). The bookstacks including the new construction and Annex, contain a little over 414 miles of shelving. The Library is maintained by Congress, the appropriations for 1943-44 being \$4,464,268 '86. An auditorium for chamber music (the gift of Mrs. E. S. Coolidge) was opened in 1925, and in the same year the Library of Congress Trust Fund Board was created under an Act of Congress. This Board is permitted to serve as the trustee of funds received in the nature of endowments. Under the same Act, the authority of the Librarian is recognized to accept, in the name of the United States, gifts or bequests of money for immediate disbursement.

Librarian of Congress, Archibald MacLeish.
Librarian of Congress Emeritus, Herbert Putnam.
Chief Assistant Librarian, Luther H. Evans.
Director, Acquisitions Department, Verner W. Clapp.
Director, Processing Department, Herman H. Henkle.
Director, Reference Department, David C. Mearns.
The Law Librarian, Eldon R. James.
The Register of Copyrights, Richard C. DeWolf (acting).

THE SMITHSONIAN INSTITUTION

The Mall, Washington, 25 D.C.

Acting Secretary, A. Wetmore.
Administrative Assistant, H. W. Dorsey.
Treasurer, Nicholas W. Dorsey.
Editor, Webster P. True.

Board of Regents.

Chancellor, The Chief Justice of the U.S.
Chairman, Executive Committee, F. A. Delano.

Bureaux of the Smithsonian Institution.

National Museum.

Director, Alexander Wetmore.
Associate Director, J. E. Graf.
Head Curators, R. S. Bassler, C. W. Mitman,
 W. L. Schmitt, Frank M. Setzler.

National Gallery of Art.

Director, David E. Finley.
Administrator, Harry A. McBride.
Secretary-Treasurer and General Counsel, Huntington Cairns.
Chief Curator, John Walker.

National Collection of Fine Arts.

Director, R. P. Tolman (acting).

Freer Gallery of Art.

Director, A. G. Wenley.

Bureau of American Ethnology.

Chief, M. W. Stirling.

International Exchanges.

Chief, H. W. Dorsey (acting).

National Zoological Park.

Director, William M. Mann.
Asst. Director, E. P. Walker.

Astrophysical Observatory.

Acting Director, Loyal B. Aldrich.

Division Radiation and Organisms.

Director, Loyal B. Aldrich.
Asst. Director, Earl S. Johnston.

NATIONAL COMMISSION OF FINE ARTS

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Congress May 27, 1910, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings, public parks, within the D.C. An expenditure not exceeding \$100,000 in any one year is authorized by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, Gilmore D. Clarke, N.Y.
Members, Eugene F. Savage; William F. Lamb;
 Paul Manship; Edward Bruce; Paul P. Cret;
 John A. Holabird.
Secretary and Administrative Officer, H. P. Caemmerer.

THE JUDICATURE.

The Federal Judiciary consists of three sets of Federal Courts: (1) *The Supreme Court* at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from the decisions of the highest Courts of the States. (2) *The Circuit Courts of Appeals*, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) *The 93 District Courts*, served by 197 District Court Judges.

THE SUPREME COURT.

(U.S. Supreme Court Building, Washington, D.C.)

Chief Justice, Harlan Fiske Stone, N.Y.,
 born 1872, apptd. 1941..... \$20,500

Associate Justices (each \$20,000).

Name.	Born.	Apptd.
Hugo L. Black, Ala.	1886	1937
Stanley Forman Reed, Ky.	1884	1938
Felix Frankfurter, Mass.	1882	1939

Deputy Clerks, Reginald C. Dilli, D.C.;
 Hugh W. Barr, Penna.
Marshal, Thomas E. Waggaman, D.C. 5,500
Reporter, Ernest Knaebel, Colo. 8,500

DEFENCE.

The President is Commander-in-Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War.

On Dec. 15, 1944, President Roosevelt signed an Act of Congress creating "5 star" Generals and Admirals (the ranks being "General of the Army," and "Admiral of the Navy") to give the holders equal rank with foreign military and naval leaders. The ranks are temporary and were intended to expire at the end of the war unless Congress should otherwise determine.

The total expenditure for the armed forces for the year 1944-45 was estimated at \$61,250,000,000, of which \$28,603,000,000 was for the Army and \$32,647,000,000 for the Navy.

THE ARMY OF THE U.S.

The Army of the U.S. had a total strength of 658,075 officers and 6,960,388 enlisted men on March 31, 1944. Approximately 400,000 all ranks, comprising the XV army, have been left in Europe to occupy the zone allotted to U.S.A. About 2,000,000 all ranks were due for discharge after VE Day (May 8, 1945) leaving an army of 6,000,000 all ranks to complete the overthrow of Japan. General of the Army Dwight D. Eisenhower, Commander of the Allied Forces in Europe, remained in Germany, after accepting the unconditional surrender of the Nazi forces, to represent the United Nations in the administration of the conquered territories.

The Commanding General in the Pacific Theatre of Operations was General Douglas MacArthur, G.C.B., the "hero of Batan," holding the title of Supreme Commander of the land, naval, and air forces of the United Nations in the S.W. Pacific with headquarters in Melbourne, Australia.

U.S. AND JAPAN AT WAR.

Japan attacked Pearl Harbour, the U.S. Naval base in Hawaii Dec. 7-8, 1941, and followed the attack by a Declaration of War against U.S. and Gt. Britain. Germany and Italy declared war on U.S. (Dec. 11, 1941), and the U.S. replied the same day with a declaration of war against the Axis Powers. On VI Day (Aug. 15, 1945) Japan surrendered unconditionally to the Allies.

PRINCIPAL WARS OF THE U.S.

Name of War.	Troops Engaged.
War of Independence, 1775-1784	est. 250,000 to 396,000

Second World War, 1942-1945	7,618,463

THE NAVY OF THE U.S.

The Navy of the United States consisted of the following seagoing vessels on Sept. 30, 1940 and Dec. 31, 1944.

	1940.	1944.
Capital Ships	15	23
Battle Cruisers	11	2
Fleet Aircraft Carriers	4	26
Escort Aircraft Carriers	8	98
Heavy Cruisers	18	17
Light Cruisers	19	44
Destroyers	220	484
Submarines	94	241

The strength of the U.S. Navy (personnel) on Dec. 31, 1944, was 3,799,125 all ranks—Navy 3,215,283; Marine Corps, 401,322; Coastguards, 182,520.

AIR FORCES OF THE U.S.

The U.S. Air Arm consists of the Army Air Force (A.A.F.), the Navy Air Force, the Marine Corps Aviation and the Coastguard Air Units. The strength was reduced after VE Day (May 8, 1945) from 228 groups to 192. At its peak the strength was 2,400,000 all ranks, of whom 2,130,000 were available in July, 1945, for the completion of the victory over Japan. Between July 1, 1940, and Sept. 30, 1944, U.S. factories turned out 232,403 aircraft, including 74,953 bombers and 70,627 fighters.

WOMEN'S CORPS.

The War Department announced (May 16, 1942), the formation of W.A.C. (Women's Army Corps), equivalent to the British A.T.S. This was the first women's corps formed in U.S. Mrs. Oveta C. Hobby was sworn in as Director on May 16. Three-fifths of W.A.C. served in the aircraft warning service. The W.A.C. were increased to 150,000 in November 1942.

A Bill signed by the President on Aug. 1, 1943, set up WAVES (Women Appointed Voluntary Emergency Services) as part of the U.S. Navy, with Mildred McAfee (President of Wellesley College) as Director, with the rank of Lieutenant-Commander. SPARS (Semper Paratus), a women's branch of the Coastguard service, was set up on Nov. 24, 1942 with Dorothy Stratton (Professor at Purdue) as Director. There was also a Marine Corps Women's Reserve (Director, Major Ruth Streeter); a Women's Unit of the Air Transport Command, formed Sept. 10, 1942, with Mrs. Nancy Love an Executive Officer on the staff of the Ferrying Division. The Director of Women Pilots in the Army Air Force was Jacqueline Cochrane, Director of Women's Flying since Sept. 1942.

LOSSES IN WAR OF 1941-45.

(To June 9, 1945.)

	Army.	Navy.	Total.
Killed	185,670	44,503	230,173

Illiteracy.

Illiteracy is practically unknown in the United States. The rate for the whole population, White and Coloured, was only 4.3 per cent. of those over 10 years of age, the figures in 1930 being:—

Native-born Whites	1.5 per cent.
Foreign-born Whites	9.9 " "
Negroes.....	16.3 " "
Other Races.....	25.0 " "

The number of books published in 1940 was 11,328; in 1943, 8,325 and in 1944, 6,970. In 1943 there were 1,800 daily newspapers (345 morning, 1,455 evening) with total circulations exceeding 44,000,000 and 475 Sunday newspapers with circulations exceeding 36,000,000.

Educational Attainment of the Population.

The 1940 Census schedule omitted the usual question on illiteracy (inability of a person 10 years old and over to read and write in any language) and substituted an enquiry into the educational attainment of the population by number of school years completed, the resulting figures being shown below:

Persons 20 years old and over in U.S.

School years completed.	Per cent. of population 20 years and over.
None.....	3.4
1 to 4.....	9.2
5 to 7.....	17.7
8.....	26.4
4 years of High School.....	16.7
1 to 3 yrs. of College.....	6.0
4 or more yrs. of College.....	4.3

The mean number of school years completed by the population 20 years old and over was 8.8 per cent.; for the white population only, 8.8 per cent.; for the non-white population 6.0 per cent.

State School Systems.

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 16 years of age, and those from 14 to 16 must attend school or be lawfully employed. The required attendance each year varies, with possibly a few exceptions, from 120 to 180 days. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

In 1941-42 the total number of children in the United States 5 to 17 years of age was 29,183,560, of whom 24,562,473 (12,425,501 boys and 12,136,972 girls) were enrolled in public elementary and secondary schools, and 2,616,529 were enrolled in private elementary and secondary schools, and 488,112 in private commercial and business schools. The average daily attendance in the public schools was 21,031,322, the average length of school term was 174.7 days, and the average number of days attended by each pupil enrolled was 149.6 days. In 1941-42, 858,888 teachers (183,194 men and 675,694 women) were employed. The average annual salary of all teachers was \$1,507. The total number of buildings used as school houses was 222,660, and the estimated value of all public school property was \$7,801,417,262.

The total revenue receipts for school purposes, excluding balances on hand, was \$2,416,579,569. Of this amount, \$27,146,338 was received from permanent school funds and from the rent of school lands, \$742,275,913 from State taxes or State appropriation, \$1,562,947,223 from local tax or appropriation, and \$84,210,095 from all other sources, State and local. The total payments, excluding payments of bonds, were \$2,322,697,688. This amount includes expenditures for sites, buildings, furniture, libraries and apparatus, \$137,552,326; for salaries of superintendents, supervisors, principals and teachers, \$1,435,407,195; and for all other purposes, \$749,738,167.

Private Schools and Colleges.

In 1942 there were 2,150,896 pupils in private kindergarten and elementary schools, 486,883 pupils in private high schools and academies, 25,838 pupils in private preparatory departments of universities and colleges, 664,843 students in private universities and colleges and 7,036 students in private teachers' colleges and normal schools.

Institutions of Higher Education.

Institutions of higher education include universities, colleges, professional schools, teachers' colleges, normal schools, and junior colleges. For the school year 1941-42, 1,720 of these institutions, 616 publicly controlled and 1,104 privately controlled, reported to the United States Office of Education. The staff members (reduced to a full-time basis) numbered 134,137, of whom 96,251 are men and 37,886 are women. Publicly controlled institutions reported 65,477 staff members (46,278 men and 19,199 women) and privately controlled institutions, 68,660 (49,973 men and 18,687 women). Publicly controlled institutions enrolled 732,111 students (418,876 men and 313,235 women) in the regular session only, and privately controlled institutions, 671,879 (399,683 men and 272,196 women).

There were 185,346 bachelor's degrees conferred, 97,707 (50,820 to men and 46,887 to women) by publicly controlled institutions and 87,639 (53,069 to men and 34,570 to women) by privately controlled institutions. Master's degrees totalled 24,648, 11,063 by publicly controlled institutions (7,149 to men and 3,914 to women) and 13,585 by privately controlled institutions (7,030 to men and 6,555 to women). There were 3,497 doctor's degrees conferred, 1,401 by publicly controlled institutions (1,273 to men and 128 to women) and 2,096 by privately controlled institutions (1,763 to men and 333 to women). There were conferred 1,619 honorary degrees, 189 by publicly controlled institutions and 1,430 by privately controlled institutions.

Particulars of some of the Universities are Harvard (8,379 students and 2,000 professors,

etc., in 1941), founded at Cambridge, Mass., on Oct. 28, 1636, and named after John Harvard, of Emmanuel College, Cambridge, England, who bequeathed to it his library and a sum of money in 1638; Yale (5,300 students and 850 professors, etc., in 1941), founded at New Haven, Connecticut, in 1701; Bowdoin, Brunswick, Me. (founded 1794; 650 students, 60 professors, etc.); Brown, Providence, R.I. (founded 1764; 1,762 students, 262 professors, etc.); Charleston, So. Car. (founded 1785); Columbia, New York, N.Y. (founded 1754; 16,511 students, 2,377 professors, etc., in 1941); Dartmouth, Hanover, N.H. (founded 1769; 2,431 students, 264 professors, etc.); Georgetown, Washington, D.C. (founded 1789; 2,500 students, 514 professors, etc.); North Carolina, Chapel Hill, N.C. (founded 1789; 3,842 students, 316 professors); Pennsylvania, Philadelphia, Pa. (founded 1740; 8,440 students, 1,625 professors); Pittsburgh, Pittsburgh, Pa. (founded 1787; 11,385 students, 1,027 professors); Princeton, Princeton, N.J. (founded 1746; 2,714 students, 366 professors); Tennessee, Knoxville, Tenn. (founded

1794; 3,728 students, 228 professors); William and Mary, Williamsburg, Va. (founded 1693; 1,489 students, 93 professors). New York University, founded in 1831 at New York, had 36,126 students and 2,204 professors and teachers in 1941.

PRODUCTION AND INDUSTRY.

Agriculture.—The total land surface, excluding Island possessions and Alaska, is 1,903,216,640 acres, of which, in 1940, 1,060,852,374 acres were farms. The total number of farms in 1940 was 6,096,799. The cash income from crops in 1941 was \$4,717,556,000; in 1942 \$6,387,180,000; and in 1943 \$7,903,480,000. Cash income from livestock in 1941 \$6,439,000,000; in 1942 \$8,987,175,000; and in 1943 \$11,348,700,000.

A production of more than 1,146,283,000 bushels of wheat is predicted for the 1945 harvest. This approaches the highest yield on record. The chief wheat growing States in 1943 were:—North Dakota (150,660,000 bushels), Kansas (150,658,000), Montana (72,000,000), Nebraska (63,000,000), Washington (51,000,000), Texas (36,000,000), S. Dakota (34,000,000), Oklahoma (32,000,000), Colorado (30,000,000), Ohio (25,000,000), Idaho (21,000,000).

The cane sugar output in 1943 was 5,345,000 long tons and beet sugar output was 6,000,000 long tons.

The chief cotton producing States are Texas, Mississippi, Arkansas, Alabama, Georgia, South Carolina, North Carolina, Louisiana and Tennessee.

LIVE STOCK ON FARMS.

	1943.	1944.
All cattle.....	78,170,000	82,192,000
Milch cows.....	26,940,000	27,607,000
Hogs.....	73,660,000	73,756,000
Sheep.....	55,089,000	51,718,000
Horses and mules.....	13,390,000	12,869,000

MINERALS.

The total value of all mineral products of the United States in 1942 was \$7,569,500,000; the value of metallic minerals produced in 1942 was \$2,361,800,000 (pig iron, \$1,227,390,000). In 1943 the production of crude petroleum was 1,503,200 barrels of 42 gallons, out of a world production of 2,222,200 barrels.

MANUFACTURES.

The manufacturing establishments enumerated at the biennial Census of 1939 numbered 184,244, the value of their products being \$56,828,807,000, as compared with a value in 1937 of \$60,712,871,737 (adjusted). The leading manufacturing States, ranked according to value of products, are New York, Pennsylvania, Michigan, Ohio, and New Jersey.

Principal groups of manufactures and value of products:—

Group.	1937.	1939.
Food, etc.	\$11,295,000,000	\$10,604,000,000
Tobacco.....	1,273,000,000	1,322,000,000
Textiles.....	4,066,000,000	3,897,000,000
Apparel, etc. ..	3,167,000,000	3,358,000,000
Lumber and timber.....	1,146,000,000	1,122,000,000
Furniture ...	1,318,000,000	1,268,000,000
Paper, etc.	2,076,000,000	2,020,000,000
Printing and Publishing ..	2,577,000,000	2,578,000,000
Chemicals	3,719,000,000	3,734,000,000
Petroleum and coal.....	3,038,000,000	2,954,000,000
Rubber.....	883,000,000	902,000,000
Leather.....	1,475,000,000	1,390,000,000
Stone, clay, glass, etc.	1,428,000,000	1,440,000,000
Iron and steel (excl. machin- ery).....	7,445,000,000	6,591,000,000
Other Metals ..	2,780,000,000	2,573,000,000
Electrical Ma- chinery	1,900,000,000	1,727,000,000
Other machin- ery.....	3,903,000,000	3,254,000,000
Automobile spirit.....	5,293,000,000	4,048,000,000

Leading Areas ranked by the Value of their Manufactured Products for 1937 and 1939

Industrial Area *	1937	1939
New York City— Newark—Jersey City Area	\$5,764,287,881	\$6,948,444,631

Minneapolis—St. Paul	533,734,000	480,271,715

Leading Industries (According to Value of Products) in Principal Industrial Areas for 1935.

New York—Newark—Jersey City Area.—Printing and publishing newspaper and periodical; Dresses, except house dresses—regular factories; Coats, suits, and separate skirts, women's, misses' and juniors—regular factories; Bread and other bakery products; Electrical machinery, apparatus and supplies; Meat packing, wholesale; Petroleum refining; Printing and publishing, book, music, and job; Clothing, men's, youths', and boys'—regular factories. The "smelting and refining, copper" industry is among the leading industries, but its rank cannot be given without the possibility of disclosing (by comparison with census reports) approximations of the data reported by individual establishments.

Chicago Area.—Steel-works and rolling-mill products; Meat packing, wholesale; Petroleum refining; Electrical machinery, apparatus and supplies; Printing and publishing, book, music and job; Blast-furnace products; Printing and publishing, newspaper and periodical; Bread and other bakery products; Machinery not elsewhere classified; Cars, electric and steam railroad, not built in railroad repair shops; Confectionery.

Detroit Area.—Motor vehicles, not including motor cycles; Motor-vehicle bodies and motor-vehicle parts; Steel-works and rolling-mill products.

Philadelphia—Camden Area.—Petroleum refining; Printing and publishing, newspaper and periodical; Steel-works and rolling-mill products; Clothing, men's, youths' and boys', not elsewhere classified—regular factories; Sugar refining, cane; Bread and other bakery products; Hosiery; Electrical machinery, apparatus and supplies. The industries "Motor vehicles, not including motor cycles" and "Radios, radio tubes and phonographs" are among the leading

industries, but their ranks cannot be given without the possibility of disclosing (by comparison with census reports) approximations of the data reported by individual establishments.

Pittsburgh Area.—Steel-works and rolling-mill products; Blast-furnace products; Electrical machinery, apparatus and supplies; Coke-oven products; Machine-shop products; Glass; Structural and ornamental metal-work, made in plants not operated in connexion with rolling mills; Bread and other bakery products; Meat packing, wholesale. The "Aluminum products" industry is also one of the leading industries, but its rank cannot be given without the possibility of disclosing (by comparison with census reports) approximations of data reported by individual establishments.

Boston Area.—Worsted woven goods; Boots and shoes, other than rubber; Electrical machinery, apparatus and supplies; Leather—tanned, curried and finished—regular factories; Bread and other bakery products; Meat packing, wholesale; Printing and publishing, newspaper and periodical; Printing and publishing, book, music and job; Boot and shoe cut stock and findings; Machinery not elsewhere classified. The "Soap" industry is among the leading industries but its rank cannot be given without the possibility of disclosing (by comparison with census reports) approximations of data reported by individual establishments.

Cleveland Area.—Steel-works and rolling-mill products; Motor-vehicle bodies and motor-vehicle parts; Electrical machinery, apparatus and supplies; Blast-furnace products; Non-ferrous metal-alloys and non-ferrous metal products, except aluminium, not elsewhere classified; Meat packing, wholesale; Clothing, men's, youths' and boys', not elsewhere classified; Heating and cooking apparatus, except electric; Paints, pigments and varnishes; Machine tools.

Los Angeles Area.—Petroleum refining; Meat packing, wholesale; Bread and other bakery products; Printing and publishing, newspaper and periodical; Machinery not elsewhere classified; Furniture including store and office fixtures; Canned and cured fish, crabs, shrimps, oysters, and clams. The industries "Aircraft and parts," "Motor vehicles, not including motor-cycles," "Rubber tyres and inner tubes," "Shortenings (other than lard), vegetable cooking oils, and salad oils" are also among the leading industries, but their ranks cannot be given without the possibility of disclosing (by comparison with census reports) approximations of the data reported by individual establishments.

St. Louis Area.—Meat packing, wholesale; Steel-works and rolling-mill products; Electrical machinery, apparatus, and supplies; Chemicals not elsewhere classified; Liquors, malt; Bread and other bakery products; Cars, electric and steam railroad; not built in railroad repair shops. The industries "Motor vehicles, not including motor cycles," and "Motor-vehicle bodies and motor vehicle parts," and "Petroleum refining" are among the leading industries, but their ranks cannot be given without the possibility of disclosing (by comparison with census reports) approximations of the data reported by individual establishments.

Buffalo Area.—Steel-works and rolling-mill products; Chemicals not elsewhere classified; Flour and other grain-mill products; Motor-vehicle bodies and motor vehicle parts; Feeds prepared for animals and fowls; Meat packing, wholesale; Bread and other bakery products;

* Industrial Area: one or more important industrial counties. Each such area takes its name from the principal city or cities located therein.

EXTERNAL TRADE OF THE UNITED STATES.

MERCHANDISE.

Year.	Total Imports.	Total Exports.	Excess of Exports.
1937...	\$3,083,700,000	\$3,349,100,000	+ 265,400,000

1943.....	101,793,000	32,888,000	27,903,000	30,689,000

Machinery not elsewhere classified. The industries "Coke-oven products" and "Motor vehicles, not including motor cycles," are also among the leading industries, but their ranks cannot be shown without the possibility of disclosing (by comparison with census reports) approximations of the data reported by individual establishments.

San Francisco—Oakland Area.—Petroleum refining; Canned and dried fruits and vegetable, canned and bottled juices, preserves, jellies, fruit cutters, pickles, and sauces; Meat packing, wholesale; Bread and other bakery products; Printing and publishing, newspaper and periodical; Tin cans and other tinware not elsewhere classified; Paints, pigments, and varnishes. The industries "Motor vehicles, not including motor cycles," "Smelting and refining, lead," "Sugar refining, cane" are among the leading industries, but their ranks cannot be given without the possibility of disclosing (by comparison with census reports) approximations of the data for individual establishments.

Baltimore Area.—Meat packing, wholesale; Clothing, men's, youths', and boys', not elsewhere classified—regular factories. The following industries are among the leading industries, but their ranks cannot be given without the possibility of disclosing (by comparison with census reports) approximations of the data reported by individual establishments; Electrical machinery, apparatus, and supplies; Liquors, rectified and blended; Motor vehicles, not including motor cycles; Petroleum refining; Smelting and refining, copper; Steel-works and rolling-mill products; Sugar refining, cane; Tin cans and other tinware, not elsewhere classified.

Milwaukee Area.—Agricultural implements (including tractors); Motor-vehicle bodies and motor-vehicle parts; Meat packing, wholesale; Liquors, malt; Electrical machinery, apparatus and supplies; Machinery not elsewhere classified; Malt; Steel-works and rolling-mill products; Cranes, and dredging, excavating and road-building machinery. The industries "Leather: Tanned, curried and finished" and "Motor vehicles, not including motor cycles" are among the leading industries, but their ranks cannot be

given without the possibility of disclosing (by comparison with census reports) approximations of data reported by individual establishments.

Cincinnati Area.—Machine tools; Paper; Meat packing, wholesale; Motor-vehicle bodies and motor-vehicle parts; Clothing, men's, youths' and boys'—regular factories; Machinery, not elsewhere classified. The industries "Motor vehicles, not including motor cycles," "Petroleum refining," "Soap" and "Steel-works and rolling-mill products" are among the leading industries, but their ranks cannot be given without the possibility of disclosing (by comparison with census reports) approximations of data reported by individual establishments.

Bridgeport—New Haven—Waterbury Area.—Non-ferrous metal alloys, non-ferrous metal products, except aluminium, not elsewhere classified; Electrical machinery, apparatus and supplies; Hats, fur-felt; Machine-shop products; Hardware not elsewhere classified; Silverware and plated ware; Printing and publishing, newspaper and periodical; The industries "Ammunition and related products," "Boots and shoes, rubber" and "Gold, silver and platinum, refining and alloying" are also among the leading industries, but their ranks cannot be given without a possibility of disclosing (by comparison with census reports) approximations of data reported by individual establishments.

Youngstown Area.—Steel-works and rolling-mill products; Blast-furnace products; Electrical machinery, apparatus and supplies; Machinery not elsewhere classified; Cars, electric and steam railroad, not built in railroad repair shops; Machine-shop products; Stamped and pressed metal products and enamelling, japanning and lacquering. The industries "Coke-oven products," "Structural and ornamental metal work, made in plants not operated in connexion with rolling mills" and "Wrought pipe, welded and heavy riveted, made in plants not operated in connexion with rolling mills" are also among the leading industries, but their ranks cannot be given without the possibility of disclosing (by comparison with census reports) approximations of data reported by individual establishments.

MOTOR VEHICLE INDUSTRIES.

Motor Vehicle Industries.—The number of complete passenger cars produced in 1941 was 3,744,300 valued at \$2,615,697,000, and of motor trucks 1,094,261 value \$1,086,926,000, a total of 4,838,561 motor vehicles valued at \$3,702,623,000.

The number of motor vehicles registered in 1941 in the U.S.A. was 32,557,954 out of a total for the World of 45,376,891.

MOTOR FUEL.

Thousands of Barrels of 42 gallons.	1938.	1939.
Production	569,162	611,043
Apparent consumption ..	523,003	555,509

MOTOR TAXES.

The taxes, including gasoline taxes, levied on motor vehicles by the Federal, State, and Municipal Governments in 1939 amounted to \$1,636,549,000 (1938 figure, \$1,509,224,045). The number of motor vehicles exported in 1939 was 152,842, exclusive of shipments to Alaska, Hawaii and Porto Rico—(6,826).

OIL PIPE LINE.

An oil pipe-line, 24 inches in diameter, from Long View, Texas, to Phoenixville, Pa. (1,388 miles—the distance from London, England, to Petrograd, U.S.S.R.), constructed in 350 days (1942-43) was opened at Phoenixville, Pa., July 19, 1943. There it divides into two branches, one to refineries at Philadelphia, Pa., and the other to refineries at Bayonne, N.Y. It is built across nine States and carries 12,600,000 gallons daily.

An oil pipe line to a port in the Eastern Mediterranean is under survey.

SOCIAL SECURITY BOARD.

Bureau of Employment Security.

The Social Security Act (Aug. 14, 1935) established a system of Old Age Insurance, Unemployment Compensation, and Public Assistance to the Needy Aged, Needy Blind, and Dependent Children. It also made Federal aid available to the various States for Health and Welfare Services and

for Vocational Rehabilitation. The benefits were considerably enlarged under a subsequent Act of 1939.

Summary for the year ending June 30 :—

Unemployment Compensation Activities.

PUBLIC ROADS.—On Jan. 1, 1941, there were approximately 3,000,000 miles of rural roads, including State highway systems, of which 1,330,000 miles were surfaced. The mileage of primary State highways was 329,472 (302,481 surfaced) and of secondary roads 195,245 (120,094 surfaced). In 1939 the expenditures for State highway purposes were \$811,656,000.

The last link in the *Alaska Highway* from the North-Western tip of the American Continent to the Panama Canal is now under construction by U.S. Government from the Southern frontier of Mexico to Panama. The section is 625 miles in length. The *Alaska Highway* forms part of the *Inter-American Highway* extending for 16,800 miles from Alaska to the Argentine. Sixteen countries are involved in the road which runs from Fairbanks (Alaska) through British Columbia to Seattle, Wash., and leaves the U.S. at Laredo, Tex. The North American section of 1,671 miles was opened for truck traffic on Oct. 29, 1942.

The *Alaska Highway* also formed a "North-West Passage" along which flowed succour to U.S.S.R. via the narrow strip of the Bering Straits.

SHIPPING.—On Jan. 1, 1942, the mercantile marine of the U.S. consisted of 517 sailing vessels of 181,710 gross tons; 3,796 steam vessels of 9,813,538 gross tons, and 15,586 vessels of 1,233,284 gross tons—with 7,176 unrigged vessels of 2,493,082 gross tons; the total was 27,075 vessels of 13,721,614 gross tons. In the year ended June 30, 1941, steam, motor and sailing vessels of 116,467,843 tons entered at the various ports of the U.S.; of this total 39,926,690 tons were American and 76,541,153 tons foreign.

Shipbuilding yards under the control of the Maritime Commission made good the losses due to submarine attacks by providing "Liberty Ships" of 10,800 tons in 83 days, less than one third of the normal time required. At the rate achieved in the third quarter of 1942 the annual output was 700 Liberty Ships, an addition of over 7,000,000 tons to the U.S. Mercantile Marine in 12 months.

POSTS, TELEGRAPHS AND TELEPHONES.—On June 30, 1943, there were 42,680 post offices in the U.S. handling 32,818,000,000 "pieces" of mail matter. The postal revenue was \$966,227,000 and the expenditure \$952,529,000. The telegraphs and telephones are not operated by the U.S. Government.

On June 30, 1943, the postal savings deposits amounted to \$1,577,525,610; an increase of \$262,002,305 since June 30, 1942.

INDIAN POPULATION.

On June 30, 1943, the enumerated and estimated Indian population of the United States, exclusive of Alaska, was 376,580. The leading Indian States are as follows: Oklahoma, containing 109,177; Arizona 51,476; New Mexico 39,144; South Dakota 30,012; California 23,423; Montana 18,018; Minnesota 17,708; Wisconsin 13,443; Washington 14,002; North Dakota 12,434. Total disbursements authorized for the fiscal year ended June 30, 1943, for Indian Service from regular and trust funds are \$48,019,270.

RECLAMATION.

Bureau of Reclamation, Interior Department, Interior Building, 18th and 19th Streets (between C and E streets), N.W., Washington, D.C.

Employees: Commissioner's office, 98; Branch offices (Denver, Colo.), 820; legal office (Denver), 13; Region 1, 1733; Region 2, 833; Region 3, 1050; Region 4, 312; Region 5, 1109; Region 6, 545. Expenditures for fiscal year ending June 30, 1944, were more than \$53,000,000.

The Bureau of Reclamation constructs and operates irrigation, power and other multiple-purpose projects in the area west of the 97th meridian and is the principal Federal agency assigned the responsibility for water conservation in this region. More than 4,000,000 acres of lands in the arid and semi-arid regions which originally were deserts are served. At the close of 1944, the Bureau had in operation, under construction, or authorized 78 irrigation and multiple-purpose projects of which 52 are producing food supplies, electric energy, and furnishing municipal-industrial water. Because of the war, important features remain to be completed on many operating projects. The War Production Board has issued clearances permitting wartime construction to bring under irrigation for war food purposes, 243,657 acres of new land and to provide supplemental water to 1,022,125 acres now irrigated but handicapped by shortages in moisture, and to meet war food demands, farmers on Bureau of Reclamation projects in 1943 produced 10,660,000 tons of food and forage crops which were valued at \$388,670,969, a 143 per cent. increase in values as compared with that of the season before Pearl Harbour.

The power output in 1944 from 31 power plants located on Reclamation projects approximated 14½ billion kilowatt hours of energy—a 52 per cent. increase over the preceding year. The war industries in the Pacific Southwest were dependent for 50 per cent. of their power on Boulder Dam, Parker Dam, and other Reclamation installations. The world's largest magnesium plant used a fourth of Boulder's 6½ million kilowatt hour output, and aluminum plants took a major portion of the output of Grand Coulee Dam in the Pacific Northwest. The Bureau's installed power capacity increased from 975,000 kilowatts in 1941 to 2,360,000 kilowatts at the close of the fiscal year 1944.

The Bureau has built, since 1902, one hundred and seventy-nine dams. Five of them are the largest concrete structures in the world. They are, in order of volume: Grand Coulee (Washington), Shasta (California), Boulder (Arizona-Nevada), Friant (California), and Marshall Ford (Texas). It has also constructed the following existing facilities: 31 power plants, 5,937 miles of transmission lines, 212,549 canal structures, 14,421 bridges, 385 tunnels having a combined length of 110 miles, 5,121 miles of ditches and drains, 23,683 culverts, 6,555 flumes, 2,322 miles of pipe, and 4,344 miles of roads.

Grand Coulee Dam, on the Columbia River in the State of Washington, the largest and third highest (550 feet) concrete dam in the world, cost \$130,000,000 and began operating in March, 1941, capacity 828,000 kilowatts. The dam will provide storage for the ultimate irrigation of 1,000,000 acres in the Columbia Basin project, scheduled for construction in the postwar period.

Boulder Dam (Arizona and Nevada), on the Colorado River, is the highest dam in the world (726 ft.), with the largest power plant in the world, capacity 1,034,800 kilowatts.

Shasta Dam (602 ft.), on the Sacramento River, was completed in 1944, has an initial power capacity of 150,000 kilowatts.

Repayments to the government for the costs of Bureau of Reclamation facilities come primarily from the water users on irrigation projects and power consumers. Construction costs to June 30, 1944, were about \$23,000,000.

Nearly 5,000,000 persons live in areas which receive power and water from Bureau of Reclamation systems. About 3½ million benefit from power and domestic water, and 1,257,395 live on the 91,120 farms or cities and towns on Federal irrigation projects. These irrigation developments support 338 towns, 1,207 schools, 1,514 churches, and 137 banks with deposits totalling half a million dollars. When the construction programme now authorized is completed, the various services of the Bureau of Reclamation will be extended to areas in which reside more than 10,000,000 persons.

Near the end of the fiscal year the Bureau of Reclamation submitted to the Senate Committee on Postwar Economic Policy and Planning an inventory of 236 irrigation and multiple-purpose projects in the West which could be included in a postwar public works programme to provide employment for returning veterans and war workers, and make available to those qualified, livelihoods on irrigated farms.

Public land farm units on Bureau of Reclamation projects are opened for settlement from time to time as irrigation water is made available. Land openings will be resumed at the close of the war, when a settlement programme for veterans, now under study, will be proposed.

Information in regard to farms available for settlement may be obtained by addressing the Commissioner, Bureau of Reclamation, Washington 25, D.C.

The Bureau of Reclamation issues settlement and other information booklets. An annual report is also issued and other publications from time to time, relating to various phases of the work.

An engineering library of about 7,000 manuscripts and printed volumes on the subject of irrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation of the projects with numerous photographs and maps, plans, specifications, cost data, and results of original experimental investigations.

The museum of the Department of the Interior contains many murals and diorama depicting the work of the Bureau.

GOVERNMENT PRINTING OFFICE,

North Capitol and G. Streets, Washington, D.C.

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The buildings have a floor space of 33 acres, and, together with the machinery and equipment which they contain, represent an expenditure of approximately \$16,063,770. The annual cost of operation

and maintenance is, about \$21,000,000, including the Public Documents Division. There were (1944) 7,086 persons employed in the various divisions of the printing office, with a payroll of \$20,243,700. In addition to doing all of the printing and binding ordered for Congress, the office executes all the printing and binding required by the various executive departments, emergency relief activities, and independent establishments of the U.S. Government. The office has the largest battery of type-setting machines in the world, including 129 linotypes and intertype machines, 2 Ludlows, 2 material casters, 100 monotype key-boards and 130 monotype casting machines, which produced about 2,400,000,000 ems of type in the fiscal year 1940. The 195 presses of the office are credited with 1,200,000,000 impressions, not including 268,000,000 on money order forms and 2,300,000,000 on postal cards. During the year the office handled approximately 100,000 separate jobs. In addition to the execution of all kinds of printing and binding, this office produced 15,700,000 square inches of electrotypes and stereotypes, and 800,000 square inches of half-tones and line-cuts, supplied blank paper to other Government establishments at a cost of \$1,700,000, and manufactured its own printing and writing inks, rollers, glue, type and type metal, some of these supplies being furnished to various branches of the Government. It also has one of the largest industrial cafeterias and recreational rooms in the United States.

Public Printer, A. E. Giegengack, N.Y. \$10,000.

WEIGHTS, MEASURES AND CURRENCY.

The *Weights and Measures* in common use are the same as those employed in Great Britain, except that there is a short ton of 2,000 lb. (20 cents) in addition to the long ton of 2,240 lb. The old "Winchester" bushel and gallon are also used; the bushel = 0.9690 British; the gallon = 0.83268 British. The Metric System of Weights and Measures is permissive, but is little used. The unit

of currency is the dollar of 100 cents. The rate of exchange with sterling will be found on p. 853.

CAPITAL OF THE U.S.

In 1790 an area of 100 square miles was ceded to the Federal Government by the States of Maryland and Virginia as a site for a Federal City to be the national capital of the United States. In 1791 it was decided to name the capital *Washington* and in 1793 the foundation-stone of the capitol building was laid. In 1800 the seat of government was removed to Washington, which was chartered as a city in 1802. In 1846 the Virginia portion was retroceded and the present area of the *District of Columbia* (with which the City of Washington is co-extensive) is 69,245 square miles, with population as shown below:—

Census Year.	Population.	Per sq. mile (a).	Per sq. mile (b).
1910	331,069	4.8	5.5
1920	437,571	6.2	7.3
1930	486,869	7.0	7.9
1940	663,091	9.5	10.9
1942 (est.)	750,000	10.8	12.2

(a) Total area. (b) Land area only.

In 1940 the Male population was 377,522, Female 345,569; White population 474,326 (Male 227,748, Female 246,578); Negro population 187,266 (Male 88,672, Female 98,594). The District of Columbia is ruled directly by the President and Congress through a Board of Commissioners appointed by the President, one being chosen from the Engineer Corps of the United States Army.

The *City of Washington*, the Capital of the United States, is co-extensive with the District of Columbia. It is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia, 156 miles from Chesapeake Bay and 185 from the Atlantic Ocean.

The population of the largest Cities of U.S. is shown on p. 209.

Territories and Principal Island Possessions of the United States.

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: the Territory of Alaska (which includes all of the Aleutian Islands east of longitude 169° east of Greenwich); the Territory of Hawaii (including Ocean or Kure Island, and Palmyra Island); Kingman Reef (about 1 sq. mile); Johnston (or Cornwallis) Island and Sand Island (about 1 sq. mile in all); Midway Islands; Wake Island; Guam; the Philippine Islands; Howland, Baker and Jarvis Islands (about 3 sq. miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other Islands of the Samoan group east of longitude 171° west of Greenwich together with Swains Island); Puerto Rico; the Virgin Islands of the United States, and Navassa Island (2 sq. miles).

On Aug. 20, 1938, the U.S. and Great Britain agreed to set up a joint régime for the use in common of Canton and Enderbury Island in the Phoenix Group (see p. 827). Provision for the joint control of these islands was made by exchange of notes between the two Governments on April 6, 1939.

Under the provisions of an Act of Congress approved March 24, 1934 (48 Stat. 456), and the

Proclamation of the President (No. 2148) of November 14, 1935, the status of the Philippine Islands as a Commonwealth dates from November 25, 1935. During the period of the Commonwealth (see Section 20 (a) of the above Act), sovereignty over the Philippine Islands rests with the United States.

The Canal Zone is under the jurisdiction of the United States.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570-5578 of the Revised Statutes, are considered as appertaining to the United States.

HAWAII.

The Hawaiian (or Sandwich) Islands form a Territory of the U.S. and consist of a chain of 20 islands in the N. Pacific Ocean between 18° 55'—22° 16' N. lat. and 154° 4'—160° 30' W. long. Of the 20 islands 9 are inhabited.

The total area is 6,435 sq. miles and the population (1940) was 423,330, of whom 77,707 were aliens.

For Administrative purposes the Territory of Hawaii is divided into four counties. The island

of Oahu is known as the city and county of Honolulu. The other counties are Hawaii, including the island of that name; Maui, including the islands of Maui, Kahoolawe, Lanai and all of Molokai except the leper settlement; and Kauai, including the islands of Kauai and Niihau. The leper settlement on Molokai (where Father Damien worked from 1873-1889) constitutes a fifth county, Kalawao, which is under the control of the Board of Hospitals and Settlement. The estimated population of the Territory of Hawaii on June 30, 1941, was:—

County.	Pop.
City and County of Honolulu ..	310,533
County of Hawaii	68,393
County of Maui	52,495
County of Kauai	33,479
County of Kalawao	404

465,339

The islands were discovered by Capt. James Cook, R.N., in 1778 (he was killed there in 1779) and formed a kingdom under native rulers until Queen Liliuokalani was driven from the throne in 1893, a republic being proclaimed in 1894. In 1898 the group was annexed by the U.S., being organized as a Territory on June 14, 1900. The Governor is appointed by the President of the U.S. There is a Senate of 15 and House of Representatives of 30 members, the Territory sending a Delegate to Congress at Washington, D.C.

The majority of native Hawaiians are Christians. Primary education is compulsory and free. The Territorial University at Honolulu was founded in 1907.

The group is of volcanic origin and contains many craters, Haleakala on Maui being the largest in the world. Kilauea and Mauna Loa, on Hawaii, are active volcanoes, with Mauna Kea (13,823 ft. above mean sea level) extinct. The islands are very fertile, and rice, cane sugar, pineapples, coffee, bananas and other tropical and sub-tropical products are abundantly grown.

Revenue, General Fund	1939-40.

The U.S. Government maintains a large military post on the island and an important naval base at Pearl Harbour. On Dec. 7-8, 1941, Japan attacked Pearl Harbour from the air and afterwards declared war on the U.S. Since the attack the base has been reconstructed and the garrison strengthened.

Governor, Ingram M. Stainbank (March 1, 1942-46 \$10,000

Territorial Secretary, Charles M. Hite.

CAPITAL, Ψ Honolulu, on the island of Oahu, population (1941) 200,158. Ψ Hilo, on the island of Hawaii, has a population of 22,667.

CANTON AND ENDERBURY.

Under the Anglo-American Pact of Aug. 10, 1938, Canton and Enderbury (of the Phoenix Island Group in the Central Pacific) were declared to be for the common use of Gt. Britain and U.S.A. for aviation and communications. The islands are about midway between Hawaii and Australia.

Ψ Seaport.

THE PHILIPPINES.

President of the Commonwealth of the Philippines, Don Sergio Osmena, succeeded as President on death of Don Manuel Quezon, Aug. 1, 1944; installed Oct. 10, 1944, at Tacloban, the temporary seat of government.

Japanese forces landed in the Philippines on Dec. 13, 1941, and after a fiercely fought series of battles, in which the invaders greatly outnumbered the garrison, occupied the greater part of the Commonwealth by April, 1942, the island-fortress of Corregidor holding out until May 6. The Japanese set up a Quisling government in the islands, but the Filipinos were opposed to the puppet government and remained loyal to the Commonwealth and to the United States.

The re-conquest of the Philippines was begun on October 20, 1944, when the Japanese forces were split in two by a major amphibious operation under the direction of General Douglas MacArthur. The expedition seized the eastern coast of Leyte Island (between Luzon and Mindanao) and pushed inland with very light losses.

The Philippines are situated between 21° 25' 4" 23' N. lat. and 126° 00' 127° 00' E. long., and are distant about 500 miles from the south-east coast of the continent of Asia.

The total land area of the country is 114,400 square miles, of which total 103,288 square miles are contained in the eight largest islands, the 7,075 other islands having a combined area of 11,112 square miles.

The principal islands are:—

Name.	sq. miles.	Name.	sq. miles.
Luzon	40,814	Mindoro	3,794
Mindanao	36,906	Leyte	2,799
Samar	5,124	Cebu	1,692
Negros	4,903	Bohol	1,534
Palawan	4,500	Masbate	1,255
Panay	4,448		

Other groups in the Commonwealth are the Sulu Islands (Capital, Jolo), Babuyan and Batanes; the Catanduanes; and Culion Islands.

The native population at the Census of January 23, 1940, was 15,833,649, almost all of Malayan stock. Of the foreign-born residents 117,487 are Chinese, 29,057 are Japanese, 8,709 Americans (exclusive of the American personnel of the U.S. Army), 4,627 Spaniards and 1,054 British, 197 French, 237 Russians, 1,151 Germans, 162 Dutch, and 3,970 from other countries. The native population is predominantly Christian, 70 per cent. being Roman Catholic.

The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan, a small island near Cebu. In 1565 Spain undertook the conquest of the country which was named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. After the Spanish fleet had been destroyed in Manila Bay (May 1, 1898), Manila was captured by the American troops under General Wesley Merritt, with the help of Filipino troops, on Aug. 13, 1898, and the islands were

ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898. However, the Filipinos, under Aguinaldo, rose up in arms on Feb. 4, 1899, against the U.S. Government, maintaining a desultory rebellion until it was finally quelled in 1902.

Following this, the form of government was a Commission consisting of a Governor-General and Commissioner appointed by the President of the United States, who exercised a large measure of both executive and legislative authority.

On Aug. 29, 1916, Congress of the United States approved the Jones Act, which provided for an elective bicameral native legislature and considerably increased autonomy in general, but retained general powers of supervision and control under a Governor-General appointed by the President of the United States. This Act was superseded on March 24, 1934, by an Act of Congress known as the Tydings-McDuffie Law, which gave the Philippines a commonwealth status, making provision for a United States High Commissioner to be sole representative of the President of the United States, and for an elective Commonwealth President. Full local autonomy was granted to the Philippine Government, but legislation affecting currency, coinage, imports, exports and immigration still requires the approval of the President of the United States. General supervisory control by the United States Government over the finances of the Commonwealth is also a feature of the Act. A constitution, which was adopted pursuant to this legislation, provides for a President elected for a term of six years, who shall be ineligible to succeed himself, and for a unicameral assembly not to exceed 120 members chosen every three years.

In a message to Congress, Oct. 6, 1943, President Roosevelt asked for authority to advance (after consultation with the President of the Philippines) the date of Philippine independence, at present fixed by statute for July 4, 1946. The message was sent in recognition of the heroic conduct of the Filipino people in the war.

Language and Literature.—English and Spanish are the official languages, the teaching of English being compulsory. Since the break from Spain illiteracy has decreased from 90 per cent. for those over 10 years of age to less than 50 per cent. About one-quarter of the people read or understand English. There is a National library at the capital with branches in other urban centres, and a flourishing press, both English and Spanish. The expenditure on education in 1941-42 was \$32,500,000. Secondary and higher education are well organized. There are 9 universities including the Dominican University of Santo Tomás (founded in 1611), the oldest university under the American flag; the State supported University at Manila (1911) and a Women's University, also at Manila. At Dumaguete there is Silliman University (Presbyterian).

In 1938 there were 11,894 miles of highways and 2,847 of well kept trails. There were (1938) 835 miles of railway in operation and the registered motor vehicles numbered 51,751. The ports of entry are Manila, Iloilo, Cebu, Jolo, Zamboanga, Davao, Legaspi, Aparri and Jose Panganiban. In 1938 1,764 vessels of 6,751,765 tons, engaged in the foreign trade, entered the ports.

FINANCE. 1941-42.

Receipts.....	\$102,982,100
Expenditures.....	111,675,500
Debt (Dec. 31, 1938).....	81,319,850

\$ = Philippine Peso = 50 cents U.S.

TRADE.

	1939.	1940.
Total Imports.....	\$245,535,000	\$269,720,000
Total Exports.....	242,450,000	231,830,000
Imports from U.S.....	..	93,335,000
Exports to U.S.....	..	89,671,000

The principal exports are sugar, abaca (Manila hemp), desiccated coco-nut, coco-nut oil, copra, tobacco, embroideries, lumber and timber, gold bullion and maguay; the imports being cotton and its manufactures, iron and steel and their manufactures, mineral oils, meat and dairy products, automobiles and accessories, wheat flour, silk and its manufactures, paper and its manufactures, coal, and cigarettes of American tobacco.

Towns.—Capital, Ψ Manila, in the island of Luzon; population (1940), 623,492. Manila was demilitarised after the Japanese landing in the Philippines but was subjected to bombing raids. The city was captured by the Japanese on Jan. 3, 1942. The next largest towns are Ψ Cebu (which had a population of 147,000 in 1940; the town was destroyed by the Japanese, as a reprisal for guerrilla activity, in 1942), Ψ Zamboanga (131,455), Ψ Iloilo (90,480), Davao (95,546), Ψ Batangas (50,000), Ψ Loag (43,000), Ψ Bauan (36,000), Ψ Legaspi (36,000), Ψ Cavite (30,000), Baguio (24,117) and Ψ Vigan (20,000).

GUAM.

Guam, the largest of the Ladrone or Marianas Islands in the North Pacific Ocean, lies in 13° 26' N. lat. and 144° 39' E. long., at a distance of about 1,506 miles east of Manila. The area of the island is estimated at 225 square miles, with a population of 22,290, of whom 21,199 are classed as native, 866 of the naval station, and 778 other than native. The natives are of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island.

Guam was occupied by Japanese in Dec., 1941, but was recaptured and occupied throughout by U.S. forces before the end of August, 1944.

CAPITAL, Agaña (pop. 1937, 12,000). Port of entry, Ψ Apra.

WAKE AND MIDWAY ISLANDS.

Wake Island, annexed in 1898, has an area of about 1 sq. mile and lies in the N. Pacific about 2,000 miles from Hawaii on the direct route to Hong Kong. Wake Island was occupied by Japanese Dec. 27, 1941; it was re-occupied by U.S. on Sept. 15, 1945.

Midway Islands, with a total area of 28 sq. miles and a population (1930) of 35, lie in the N. Pacific about 1,200 miles from Hawaii. The group is administered by the U.S. Navy Dept.

PUERTO RICO.

Puerto Rico (Rich Port) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50'–18° 30' N. lat. and 65° 30'–67° 15' W. long., with a total area of 3,401 square miles and a population of 1,871,344 at the census of 1940. Three-fourths of the population are of Spanish descent and about one-fourth coloured. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,399 miles distant from New York, and 963 miles from Key West. Puerto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508, and he was made Governor of the island in 1509. It continued a

Ψ Seaport.

Spanish possession until Oct. 12, 1898, when the United States took formal possession as a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified April 11, 1899. Sugar is grown along the coastal plain and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, and yams are also grown. The trade is principally with the U.S. About 320 miles of railroad were in operation in June, 1940, and there are good harbours at San Juan and Ponce. The legislative functions are vested in a legislature which consists of 2 elective houses; the Senate, composed of 19 members (2 from each of the 7 senatorial districts and 3 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). The term of the Legislature is 4 years. The Governor is appointed by the President of the U.S. and holds office at the pleasure of the President. A Supreme Court of 5 members is also appointed by the President. There is a Cabinet composed of 7 heads of Departments, two appointed by the President and five by the Governor. The Governor also appoints all inferior judges. Puerto Rico is represented in Congress by a resident Commissioner, elected for a term of 4 years, who has a seat in the House of Representatives, but he does not have a vote. Great improvement has been made in the progress and welfare of the Island during the present century—the Island is self-supporting, free public schools are established throughout, a system of good roads reaches every important city and town, public buildings are attractive and well built, health and sanitary measures are completely modern. The capital, Ψ San Juan, had 169,764 inhabitants in 1940, other towns being Ψ Ponce (105,120), Ψ Mayaguez (76,482), Ψ Arecibo (69,189), Río Piedras (68,369), Ψ Caguas (53,357), Bayamon (37,191).

TUTUILA, AMERICAN SAMOA.

American Samoa consists of the island of Tutuila, Aunu'u, Ofu, Olosega, Ta'u, and Rose Islands, with a total area of about 26 square miles and a population of 12,785 in 1939, distributed as follows:—Tutuila and Aunu'u, 9,836; Rose Island, uninhabited; Manu'a Group (Ofu and Ta'u islands) 2,572; and Swain's Island (annexed May 13, 1925), 154.

Tutuila, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at Ψ Pago Pago (pop. 1929, 1,000), the capital and seat of government. The remaining islands have an area of about 16 square miles. Copra is the only export of importance.

Ψ Pago Pago is a naval station and the commandant is also Governor of American Samoa. He appoints the native District Governors, and the county and village chiefs. Public health is under the supervision of the Medical Department of the U.S. Navy.

 Ψ Seaport.

VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population in 1940 of 24,889. St. Thomas (28 sq. miles) has a population of 11,265; St. Croix (84 sq. miles) has a population of 12,902, the capital being Ψ Christianstad (or Basin); St. John (20 sq. miles) has a population of 722, the capital being Cruz Bay. St. Croix exports sugar and rum; St. Thomas is famous for its bay rum.

CAPITAL, Ψ Charlotte Amalie (pop. 7,000), contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months.

Governor, Charles Harwood (Feb. 3, 1941).

Government Sec., Robert Moss Lovett.

THE PANAMA CANAL.

The administrative organisation for the canal is known as "The Panama Canal," its headquarters are at Balboa Heights, Canal Zone, with the Governor of the Panama Canal (Colonel Glen E. Edgerton, U.S.A.) at its head. Maj.-Gen. Daniel Van Voorhis is Commander of the U.S. forces in the Panama Canal Zone.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation which conducted surveys during a period of two years and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Inter-oceanic Panama Canal Company, of which de Lesseps was nominal head. The amount of work to be accomplished proved to be greater than was estimated, and resulted in the failure of the company, a receiver being appointed in 1889. A new company was formed to carry on the work, and excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

Congress authorised the President in 1902 to purchase the effects of the French company for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1923 a treaty between Colombia and the U.S. provided for the payment to Colombia of \$25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognised by this treaty.

Including only ocean-going vessels, 300 Panama Canal net tons measurement or over against which

tolls were collected, the volume of traffic passing through the Canal during each of the fiscal years since the Canal was opened:—

Fiscal Year.	No. of Transits.	Canal. *Net Tons.	Cargo Tons.
1915	1,058	3,507,000	4,888,400
1916	721	2,522,000	3,093,335

1938	5,584	25,950,000	27,385,924
1939	5,003	27,170,007	27,866,627
1940	5,370	24,144,366	27,299,016

From 1903 up to June 30, 1939, the United States Government had spent \$821,309,104 on construction, maintenance and operation of the canal; \$47,076,539 on fortifications, making a total of \$868,385,643 (this includes \$40,000,000 paid to the New Panama Canal Co. of France for acquisition of property, and \$10,000,000 paid to the Republic of Panama in connexion with the Canal Zone under Article 14 of the Treaty of November 18, 1903). Interest paid on Canal loans for the same period totalled \$84,613,244. Receipts recovered by the United States Treasury were \$505,991,609. These figures do not include payments to the Government of Colombia (as provided for under the Treaty of April 6, 1914), or \$5,000,000 per annum in fiscal years of 1923 to 1927, inclusive. Net balance expended out of the general fund of the United States Treasury and proceeds of bonds to June 30, 1939, \$247,007,278.

The canal is fifty statute miles long (44.08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks, and transit from sea to sea occupies about 8 hours (passage through locks 4 hours). The least width is in Gaillard Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 41 feet in the Atlantic entrance. The depth through Gaillard Cut is 45 feet.

AFGHANISTAN.

(Pustunsha—Land of the Pushtus.)

King of Afghanistan, H.M. Mohamed Zahir Shah, born Oct. 25, 1914, acceded Nov. 8, 1933 (on the assassination of his father, King Nadir Shah); married Nov. 7, 1931, a daughter of Sardar Ahmad Shah Khan, and has surviving issue a son and two daughters: H.R.H. Prince Ahmed Shah Khan, b. Sept. 23, 1934; H.R.H. Princess Bilqis, b. 1932; and H.R.H. Princess Maryam, b. 1936.

LEGATION IN LONDON.

31 Princes Gate, S.W.7.

Minister in London, His Excellency Sardar Ahmed Ali Khan (1939).

and Sec., Abdul Sattar Khan.

Afghanistan lies on the N.W. frontier of India. The estimated area is 250,000 sq. miles, and the population is estimated (1937) at about 10,000,000. The population is very mixed. The Duranis have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashs, who belong to the Shia sect.

Afghanistan is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus to the Oxus (or Amu Darya, "Mother of Rivers"), which forms the boundary from Khamlab to Lake

Victoria, whence the line to the Chinese frontier on the branch line from Merv, and thence N.E. was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into five major provinces, Kabul, Mazar, Kandahar, Herat, and Qataghan-Badakshan (including Nuristan—formerly Kafiristan—and Wakhan), and five minor provinces, the Eastern, Southern, Farah, Chak-hansur, and Maimana. Each province is under a Governor (called in major provinces *Najib-ul-Hakumiah*, and in minor provinces *Hakim-i-Ala*).

Amir Abdurrahman (1880-1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. The War Minister (Sirdar Shah Mahmud Khan, brother of the late King) has reorganised the Army, which is recruited by annual calls; service is for two years with the colours and eight with the reserve. The peace strength is about 60,000. A small Air Force is maintained. Factories for munitions, and for various commercial products, have been erected in Kabul.

Under the Constitution of Oct. 31, 1931, there is a Senate of 43 nominated members and a National Assembly of 110 elected members, with a Grand Assembly (*Loe Jirgeh*) which is summoned on important occasions. The administration is entrusted to a Council of Ministers.

The laws of Afghanistan are based on the "Shariat," or Islamic law, and tribal custom. The religion is mainly Sunni Muhammadism, with about ten per cent. of Shia Moslems.

Agriculture and sheep raising are the principal industries. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep, including the Karkuli, and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, and gold are found.

The following roads are fit for motor traffic, except after snow or heavy rain, but are mostly unmetalled—Kabul-Khyber (175 miles); Kabul-Gardez (80 miles); Kabul-Kandahar-Chaman (380 miles); Kandahar-Farah-Herat (400 miles); Kabul-Bamian (140 miles); Kabul-Mazar-i-Sharif-Khanabad (500 miles); Mazar-i-Sharif-Maimana-Herat (500 miles) and Khanabad-Faizabad (90 miles).

Goods are still conveyed by pack animals, but motor transport is rapidly taking the place of pack transport as the chief means of conveyance. The chief trade routes to India are the Khyber Pass route, from Kabul to Peshawar (210 miles), and the road from Kandahar to Chaman (70 miles).

As the result of a British mission to Kabul in 1904-5 the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence. The Amir Habibullah Khan was assassinated on February 20, 1919; his brother,

Nasrulla Khan, seized the throne by a *coup d'état* and temporarily held the reins of government at Kabul, but the Amir's third son, Ananulla Khan, soon after declared himself, and was recognised as king. Afghan troops crossed the Indian frontier on May 2, 1919, on which the Indian Government took immediate steps to expel them; fighting followed and Dacca was occupied by British troops, but overtures were made by King Amanulla and a treaty of peace was signed in August. By this treaty Afghanistan is left officially free and independent. By treaty of Nov. 22, 1921, Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognise boundaries then existent, subject to a slight re-adjustment near the Khyber; and to establish Legations and consular officers. The Afghan Government import free of customs duty such material as is required for the strengthening of their country. A Trade Convention was concluded and Afghanistan adhered to the International Postal and Telegraphic Union.

The languages of the country are Persian and Pushtu. Education is free and nominally compulsory, elementary schools having been established in most centres; there are secondary schools in large urban areas and a university (established in 1932) at the capital.

FINANCE. *Afghanis.*

National Income 250,000,000
The annual revenue consists largely of payments in kind. There are taxes on land and animals, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories and mining royalties.

Afghani (of 100 *Puls* = about 4½d.).

4 *Afghani* = 1 Rupee.

TRADE. *Afghanis.*

Total Imports (1938) 172,000,000
Total Exports (1938) 140,000,000

The exports to India are mainly Persian lamb-skins (Karakul), fruits, cotton, raw wool, carpets and spices, while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, paper and cement. There is a large export of wool to Russia, cotton and silk goods, petrol, sugar, &c., being taken in exchange.

CAPITAL, Kabul (about 80,000). Dar-ul-Aman was designated as the future capital in 1923, but little progress is made in development. The chief commercial centres are Kabul and Kandahar (60,000). Other provincial capitals are Herat (50,000), Mazar-i-Sharif (30,000), and Khanabad (20,000).

FLAG: Green, red and black, with white device in centre.

BRITISH LEGATION. (Kabul.)

British Envoy Extraordinary and Minister Plenipotentiary, G. F. Squire, C.I.E. (1943).
Counsellor, Major G. C. L. Crichton.
Military Attaché, Lt.-Col. A. S. Lancaster, O.B.E., I.M.S.

Surgeon, Lt.-Col. R. F. D. MacGregor, C.I.E.
and Secretary, Capt. G. I. Pettigrew.
Oriental Secretary, Khan Bahadur Sher Zama.
Commercial Attaché, Khan Bahadur M. M. Hasan Kizilbach.

Attaché, Capt. E. J. F. Scott.
British Consul at Jalalabad, Abdur Rahman Khan.
British Consul at Kandahar, Khan Bahadur Ziauddin Ahmad.

ALBANIA.

On Nov. 20, 1945, the British, U.S.A. and U.S.S.R. governments decided to reorganize the Albanian administration under Colonel-General Enver Hoxha as the provisional government of Albania, on the understanding that free elections will be held at an early date, in order that a truly representative government may be formed.

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars (*viguers*) appointed by France and the Spanish Bishop of Urgel. The franchise was enlarged after a bloodless revolution in April, 1933. The language of the country is Catalan. French francs and Spanish pesetas are the accepted currency. Andorra, the capital, has about 700 inhabitants.

FLAG: Three horizontal bands, azure, yellow, red; crown on yellow band.

THE ARAB LEAGUE.

A pact of Union of the Arab States was signed at Cairo on March 22, 1945, by representatives of Egypt, Iraq, Transjordan, Saudi Arabia, Syria, the Lebanon and Yemen, provision being made for the admission of Palestine when she achieves independence.

ARABIA.

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long. and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, Dahana, and Rub' Al Khali deserts), and the total population is believed to be about 10,000,000.

Language and Literature.—Arabic is spoken not only in Arabia, but in many other countries, either as the principal or auxiliary tongue, notably in Egypt and the Anglo-Egyptian Sudan, Lybia, Morocco, Algeria, Iraq, Palestine, Transjordan, Syria and Lebanon, and Malta; and to some extent also in Nigeria, Madagascar and Zanzibar. Owing to Moorish incursions it was formerly spoken in Spain, the Balearic Islands and Sicily. There are anthologies of pre- and post-Islamic poetry and a considerable prose literature, including popular romances and story cycles (such as "The Thousand Nights and a Night"), historical and biographical studies and, resulting from the westernising movement, there is a general revival of learning among Arabic speaking peoples. Many daily newspapers are published in Arabic and there is a native Arabic drama.

THE KINGDOM OF SAUDI ARABIA.

(al Mamlaka al Arabiyya as-Saudiyya.)

King of Saudi Arabia, H. M. Abdul Aziz Ibn Abdul Rahman al Faisal Al Saud, G.C.B., G.C.I.E., born 1880. Sultan of N. 1, 1917; King of the Hejaz, Jan. 8, 1926; King of N. 1, 1927; King of Saudi Arabia, Sept. 17, 1932.
His Apparitor, H. R. H. the Amir Saud Ibn Abdul Aziz Al Saud, G.B.E., born 1905.

LEGATION IN LONDON.

6 Eaton Gate, S.W. 1 (Sloane 3898).

Minister in London, His Excellency Sheikh Hafiz Wahba.

1st Secretary, M. Youssef Sa'ama.

Attaché, M. Ahmed Safer el Din.

The Kingdom of Saudi Arabia, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd being also King of the Hejaz.

The total area of the Kingdom is about 913,000 sq. miles, with an estimated population of 6 to 7 millions.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabi sect. It subsequently fell under the Turkish yoke, but in 1913, the present King threw off Turkish rule and captured from the Turks the Province of Hasa. In 1927 he added to his dominions the territories of the Rashid family of Shammar, which he captured by force of arms; in 1925 he completed the conquest of the Hejaz, and in 1926 accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

Nejd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahana Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at close on 3,000,000, the majority being Muhammadans of the Wahhabi movement. There is little agriculture, but wheat and barley are grown; the principal industry is camel and sheep raising. Oil has recently been found in commercial quantities at Dammam (Dahran), in Hasa. The exports are woven cloaks, dates, live stock, hides and skins. The capital is Riyadh (30,000), and the principal trading centres are Hufuf (the chief town of the Hasa province), on the Persian Gulf littoral (30,000), Shaqra, Anaiza, Buraida (20,000), Hail (20,000), and Haura (Central). The only ports (Persian Gulf) are Qatif and Uqair, which are suitable only for sailing craft, but the American California-Arabian Standard Oil Company, which is exploiting the Hasa oil under a 60 years' lease, has built a deep-water port for its own purposes at Ras Tamura. Riyadh is a station on the trans-Arabian caravan route from Hasa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahhabis.

The *Hejaz* ("The Boundary")—between Nejd and Tihamah—extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 122,500 sq. miles, with a population of from 1,000,000 to 1,500,000, including many nomad tribes. On the coast are the small ports of El Wedj, Yambu', Rabigh and Jeddah (the chief port of the country and the pilgrims' port), which contains the reputed "tomb of Eve, the mother of mankind", and inland are many settlements through which runs the course of the Hejaz Railway. The *Oasis of Khaibar*, east of the railway,

contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. The Saudi Arabian government have reduced all taxes and dues payable by pilgrims by 25 per cent. since the outbreak of war in 1939, and the governments of Gt. Britain and India have made shipping available, with a guarantee to shipowners against loss. In 1939 the pilgrims to Mecca numbered 59,588. *Medina* (Al Medina, "The City"), 820 miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about 20,000, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabi'a, A.H. 12). The Mosque of the Prophet (500 feet in length and over 300 in breadth), contains the sacred tomb of Muhammad. *Mecca*, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 60,000. The city contains the great mosque surrounding the Kaaba, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. *Jeddah*, the principal port, exports hides and imports manufactured goods. The course of the *Hejaz Railway* runs from Medina in S. through the Syrian Desert to Damascus and Beirut; the portion of the railway south of Maan, in Transjordan, is not at present in commission.

A British company is working the ancient gold mines located in the hills of the Hejaz.

Asir ("The Inaccessible") extends, geographically, from a line drawn inland from Birk on the southern limit of Hejaz to the northern boundary of Al Yemen, some 12 miles N. of the port of Meidi. Its breadth extends about 180 miles eastwards to Bisha in the north and to the boundary of the Beni Yam in the south. According to ancient Arab geographers, Asir used to be considered as a part of Al Yemen. The territory includes the Farsan Islands, where prospectors have been searching for oil, but without success. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. Capital, Abu Arish (pop. 7,500).

The total of the subsidies paid to King Ibn Saud during the years 1917 to 1923 is approximately £542,000 subject to the following conditions:—

(1) That Ibn Saud refrained and restrained his adherents from aggressive action against the Hejaz, Kuwait, and Iraq.

(2) That he afforded co-operation in the matter of the Hajj (pilgrimage to Mecca) by maintaining the safety of pilgrim routes to his territory.

(3) That he consented to be guided generally by the wishes of His Majesty's Government in regard to his foreign policy, and to co-operate with them in promoting their own policy, which had for its object the maintenance of peaceful conditions in Arab countries and the promotion of the economic interests of both parties.

By the *Treaty of Jeddah* (May 20, 1927) Great Britain recognized Ibn Saud as an independent ruler, King of the Hejaz and of Nejd and its Dependencies.

SAUDI ARABIAN FLAG: Green oblong, white device in centre: "There is no God but God, Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

CAPITAL, Riyadh, population about 30,000.

„ *Indian Medical Officer*, Dr. Abdul Hamid.

THE PRINCIPALITY OF KUWAIT.

Ruler, Sheikh Sir Ahmad al-Jabir as-Subah, K.C.S.I., K.C.I.E., born 1885, acceded March, 1921.

Kuwait (or Kowait) has been semi-independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Saudi Arabia (El Hasa). The important harbour and gulf port of ΨKuwait, the capital (pop. 60,000), is an entrepôt for goods for the interior, and for the export of horses, pearls, wool, &c. There are numerous shipyards where carrying dhows are built for other Arabian ports. From the carrying trade in the Indian Ocean and along the East African coast Kuwaiti dhows brought back an estimated sum of 10 lakhs of rupees in the season 1935-36. The port was designated as the terminus of the Berlin-Constantinople-Bagdad railway as originally projected in 1903. The trade of Kuwait (1937-38) was valued at Rs. 5,477,488 for imports, and Rs. 2,320,075 for exports. The Principality has suffered considerably during the last decade by the Trade Blockade imposed against her by Saudi Arabia, which, in order to encourage her own ports, has forbidden all imports into her territories from Kuwait. The Kuwait Oil Company has begun boring and struck oil, south of Kuwait town, in 1938.

FLAG: Red, with white lettering.

British Political Agent, C. J. Pelly, O.B.E.

THE SULTANATE OF MUSCAT AND OMAN

Sultan, H. H. Saiyid Said bin Taimur, K.C.I.E., born, Aug. 13, 1910, succeeded his father (as 3rd of his dynasty to be Sultan of Muscat and Oman), Feb. 10, 1932. The bicentenary of the Al-Busacid dynasty, to which the Sultan of Muscat and the Sultan of Zanzibar belong, was celebrated on Nov. 20, 1944.

The independent Sultanate of Muscat and Oman, situated at the easterly corner of Arabia, has a seaboard nearly 1,000 miles long and extends from near Tibba on the west side of the Musandam Peninsula round to Ras Darbat Ali. Ras Darbat Ali marks the boundary between the Sultanate and the territory of the Sultan of Qishin and Soqatra, a Sultanate within the Aden Protectorate. A small strip of the coast on the east side of the Musandam Peninsula from Dibbah to Khor Kalba is administered by minor chiefs of Trucial Oman, independent of the Sultan. The Sultanate extends inland to the borders of the Ruba al Khali or Great Desert. Physically, Muscat and Oman consists of 3 divisions, a coastal plain, a range of hills and a plateau. The coastal plain,

varies in width from 10 miles in the neighbourhood of Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns, where the hills descend abruptly into the sea. The mountain range runs generally from north-west to south-east, reaching its greatest height in the Jebel Akhdar region where heights of over 9,000 feet occur. The hills are for the most part barren, but in the high area round Jebel Akhdar they are green and there is considerable cultivation. The plateau has an average height of 1,000 feet. With the exception of oases there is little or no cultivation. North-west of Muscat the coastal plain is known as the Batinah. It is fertile and prosperous, the date gardens extending for over 150 miles, Batinah dates (which ripen in the first half of July, well before the Basra dates) being famous for their flavour. The coast-line between Muscat and the province of Dhofar is barren and forbidding. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Its principal town is Salalah on the coast, while ΨMurbat is the port. The last remaining possession on the north coast of the Gulf of Oman is the port of ΨGwadar and a small tract of country surrounding the town.

The town of Muscat is the capital and seat of Government of the Sultanate of Muscat and Oman. At one time a town of some commercial importance it has of recent years lost most of its trade, which has been transferred to the adjacent town of Matrah. Matrah is the starting point for the trade routes into the interior.

The area of the Sultanate has been estimated as about 82,000 square miles and the population as 500,000. The inhabitants are for the most part Arab, but there is a strong infusion of negro blood, especially along the coast. The towns of Muscat (pop. 4,200) and Matrah (pop. 8,500) are composed of one third Indian, one third Baluch and one third Negro. There are few Arab residents in these two towns. In the valleys of the interior, as well as on the Batinah, date cultivation has reached a high level, and there are possibilities of agricultural development were the water supply more certain. The inland tribes breed large numbers of camel. There are no industries of importance.

The only port of call for steamers is ΨMuscat (one of the ports on the mail route between Bombay and Bzra) where in 1942-43, 57 steamships of 160,600 tons entered and cleared. The mail service is a weekly one in both directions. The Indian Government maintains a post office and Cable and Wireless Limited a telegraph office at Muscat.

Inland transport is by pack animals. The motor road connecting Muscat with Matrah has now been extended to Kalba at the far end of the Batinah, a distance of 212 miles. Hagar, Basher and Qariyat are also connected by motorable roads with Matrah. Cars run daily between Muscat and the towns in the Batinah.

FINANCE.

Annual Revenue (estimated)Rs. 7,00,000

The common medium of exchange is the Maria Theresa dollar. On the coast the Indian rupee circulates, but not in the interior. There is one Omani coin, a small copper coin called a "Baiza." The rate of exchange varies from 160 to 200 baizas = 1 M.T. dollar. The weights in use are one kiyas = the weight of six dollars or 5'9375 oz.; 24 kiyas = one Muscat maund; 10 maunds = one Farasala; 200 maunds = 1 Bahar. Rice is sold by the bag, other cereals by the following measurement; 40 Palis = one Farrah; 20 Farrahs = one Khandi.

TRADE.

	1942-43.
Total imports	Rs. 63,40,800
Total exports	81,09,000
Imports from U.K. (1939)	£50,550
Exports to U.K. (1939)	7,407

Trade is mainly in the hands of the Indians, some of whom are British subjects, and is mainly to and from India. The chief imports in 1942-43 were rice, coffee, sugar, cotton piece goods, wheat and wheat flour. The chief exports were dates, pomegranates, limes and dried fish.

CAPITAL, Muscat, population (estimated) 22,000.
Muscat—Political Agent and British Consul, Capt. R. D. Metcalfe.

THE KINGDOM OF YEMEN.

King of the Yemen, Yahya Muhammad Hamid Ud Din, born 1869.

Heir Apparent, Prince Seif al Islam Ahmed, *Amir of Hajja*, son of the King.

Yemen, "the land on the right hand" (of Syria) and the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 3½ millions. Under Turkish rule, it was divided into the vilayet of Sana, Taiz, and Hodeida, and it extends inland to the borders of the Hadramut. The highlands and central plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, where wheat, barley, millet, coffee and oats, are extensively grown. The chief port of Yemen is ψHodeida which is noted for the export of coffee, shipped from Hodeida to Masawa and Aden, and thence to Europe. The trade from Yemen perhaps exceeds that of the remainder of Arabia. The Imam is the head of the Zeidi sect of the Shiah Division of the Muhammadan religion. On the withdrawal of the Turks from Yemen, the Imam took over occupation of the territory bordering on the Aden Protectorate populated by the Shafai sect of Sunni Muhammadans, and also the Tibama, or coast lands, from S. of Hodeida to Sheikh Said. From 1920 to 1928 the Imam of Yemen made several encroachments on the Aden Protectorate, to which he laid an historical claim, but in the latter year he was ejected from the district of Dhala by air action from Aden in support of the Protectorate tribes, and in 1934 he withdrew from the remaining portion of the Protectorate held by him as a preliminary condition to the signature of a Treaty of Friendship with the British Government (Feb. 11, 1934) whereby he was recognised as King of the Yemen.

FLAG: Red, with white inscription.

CAPITAL, San'a; population, about 40,000; the seaport of Hodeida has about 30,000 inhabitants.

BAHRAIN.

Ruler, H. H. Shai Sir Salman bin Hamad, K.C.L.E., born 1895; *accessed* February 3, 1942.

The Bahrain Islands form an archipelago in the Persian Gulf 20 miles from al Hasa on the Arabian coast. *Bahrain* ("Two Seas"), the largest island, is 27 miles long and 10 miles wide. *Muharraq*, to the north east, 4 miles long and 1 mile wide, is connected with Bahrain by a wide causeway nearly two miles in length carrying a motor road, to the south of which is the seaplane alighting area of British Overseas Airways. The deepwater channel between the two islands is spanned by a swing bridge completed in 1941. Other islands are *Sitra*, to the east (3 miles long and 1 mile wide); *Nebi Saleh* (about 2 miles in circumference) and several un-

inhabited islets. The islands are low-lying, the highest ground being a hill in the centre of Bahrain 400 ft. high.

The total area is about 213 square miles with a population estimated at 95,000, of whom about 75 per cent. are the original inhabitants belonging to the Shia sect, the remainder, including the ruling family, being Sunnis. The Sunnis live mainly in the towns of Manama and Muharraq. There is a wealthy Indian community and a number of well-to-do Persian merchants. There is a community of about 300 Europeans and Americans, including the staff of the Petroleum Company.

The ruling family (the Al Khalifa) came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782.

About a twentieth part of Bahrain is cultivated, dates, citrus fruits and lucerne being the chief crops. Bahrain is the centre of the famous pearl fishing industry of the Persian Gulf, over 250 boats being engaged during six months of the year, and during the season the island is visited by numerous Arab and continental pearl buyers. Oil was discovered in the island in 1932, operations being conducted by a British company, registered in Canada, under a concession granted by the Sheikh. Other island industries are boat-building, manufacture of sail-cloth and reed mats, date cultivation and the breeding of particularly fine white donkeys.

The revenue of the State (Rs. 39,81,000 in 1943) is derived in part from a duty of 5 per cent. *ad valorem* on all imports. The greater part of the trade of Nejd and Hasa passes through Bahrain. The chief imports in 1943 were rice, wheat, wheat flour, coffee, dates, sugar, spices, cotton piece goods and cement. The chief exports were cotton piece goods, rice, sugar, tea, pearls and wheat flour.

ψManamah, the capital and commercial centre, extends for 2½ miles along the shore. Steamships make periodical calls and Bahrain is a port of call on the Empire air route to India and Australia. Electricity from the Government station in Manamah supplies light and power in Manamah and Muharraq. Water is supplied by artesian wells.

The principal coin in use is the Indian rupee. The *dhara* (19 inches), *roba* (4 lb.), *maumil* (56 lb.) and *rufa* (560 lb.) are the principal weights and measures.

FLAG: Red, with vertical white bar next to staff.

CAPITAL, ψManamah; population, about 28,000.

British Political Agent, Major T. Hickinbotham, C.I.E., O.B.E.

Assistant Political Agent, R. M. Hadow.

Indian Assistant, Dr. S. M. Siddiq.

Adviser to the Bahrain Government, C. Dalrymple Belgrave, C.B.E.

QATAR.

Sheikh of Qatar, Abdulla bin Jasim al Thani, C.I.E., *accessed* 1913.

El Qatar, a Sheikdom in the Persian Gulf covering the peninsula of Qatar from Khor el Odaid to Hasa, has been in alliance with Great Britain since 1882. The area is about 8,000 sq. miles, with a population of 20,000 to 30,000.

CAPITAL, Doha. Population (std.) 5,000.

TRUCIAL COAST.

Six principalities on the *Pirate Coast*, which partly encloses the Persian Gulf from Ras-al-Khaimah to Odaid, are bound under treaties with the Government of British India for the prevention of piracy and slavery, and for the

cessation of hostilities at sea. The six *Trucial Chiefs* are the Sheikhs of Shargah, Abu Dhabi, Ras el-Khaimah, Dabai, Ummel-Qawein and Ajman, and their territories have a combined area of about 6,023 sq. miles with a population of 75,000 to 85,000. The ports are Ψ Abu Dhabi and Ψ Dibba, other centres being Shargah, Baraimi and Ras el Khaimah. The British Political Resident in the Persian Gulf at Bushire is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. The trade of the coast ports largely consists in exports of pearls to India *via* Bahrain.

ARGENTINE REPUBLIC.

(República Argentina.)

President (March 12, 1944), General Edelmiro J. Farrell.

CABINET.

(Oct. 20, 1945.)

Vice-President and Minister of Public Works, General Juan Pistarini.

Interior, Brig.-General Felipe Urdapilleta.

Foreign Affairs, Señor Dr. Don Juan Cooke.

Finance, Colonel Amaro Avados.

Justice and Education, Señor Dr. Jose Astigueta.

War, General Humberto Sosa Molina.

Marine, Rear-Admiral Abelardo Patin.

Agriculture, Señor Dr. Don Pedro Marotta.

Labour and Welfare, Lt.-Col. Domingo Mercante.

Industry and Commerce, Lt.-Col. Mariano Abarca.

Air, Commodore, Edmundo Sustaita.

EMBASSY IN LONDON.

9 Wilton Crescent, S.W. 1.

Ambassador in London, His Excellency Señor Dr. Don Miguel Angel Carcano, K.C.B. (March, 1942).

Counsellor, Señor Dr. Don Ricardo J. Siri.

1st Sec., Señor Dr. Don Rodolfo Muñoz.

2nd Sec., Señor Don Alejandro Cullen.

3rd Sec., Señor Don Luis Castells.

Military Attaché, Colonel Pablo Berretta.

Naval Attaché, Captain Ricardo Lopez Campo.

Commercial Counsellor, Señor Don Anselmo M. Viacava.

Financial Counsellor, Señor Dr. Don Ricardo Q. Blamey Lafone.

Commercial Attaché, Señor Don A. M. Flores Piran.

Economic Attaché, Señor Dr. Don Diego Lezica-Alvear.

Agricultural Attachés, Señor Don Pascual Russo; Señor Dr. Don Domingo Derisi.

Consul-General, Señor Don Bernardo S. Vilela.

Consulate-General, River Plate House, 12 South Place, Moorgate, E.C.2.

There are also Consulates at Liverpool, Southampton, Cardiff, Newcastle upon Tyne, Newport, and Glasgow; and Vice-Consulates at Aberdeen, Belfast, Bristol, Hull, Manchester, Middlesbrough, and Swansea.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. (For the statue of Christ the Redeemer, *see* Chile.) On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those

in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahia Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 10 territories, comprising in all 1,112,743 square miles, with a population of 13,009,948 (estimate of Jan. 1, 1944), an increase of 197,598 for the year. The natural increase was 180,621, the highest since 1932, immigration accounting for 16,977.

In 1943 births numbered 318,901, and deaths 137,805, the marriages numbering 103,352.

Immigration is encouraged, but applications are examined by an advisory committee composed of representatives of the Ministries of the Interior, Foreign Affairs and Agriculture, and permission is granted or withheld according to the suitability of the applicants. The climate is moderate.

Government.—The estuary of La Plata was discovered in 1515 by Juan Diaz de Solis, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9) the Independence of Argentina was declared by the Congress of Tucumán. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members, and of a House of Deputies of 138 members. Members of Congress receive \$18,000 (paper) *per annum*. It is intended to hold elections for Congress on Feb. 24, 1946.

Agriculture.—Of the total area about one-third is suitable for agriculture and cattle raising. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, horses, goats and pigs. The result of the harvest of 1943-44 and of the estimated harvest of 1944-45 are shown below:—

Crop.	1943-44.	1944-45.
Wheat.....Or.	31,280,000	29,545,000
Oats.....Or.	6,376,000	7,329,000
Barley.....Or.	3,955,000	3,214,400
Rye.....Or.	2,562,000	1,106,600
Linseed.....Tons	1,573,000	767,000
Canary seed.....Tons	31,000	35,000

Mineral Production.—Oil has been found in various parts of the Republic and is worked to a considerable extent in the neighbourhood of Comodoro Rivadavia, and other districts. The oil output in 1942 was 23,700,000 million barrels of 42 gallons and in 1943 24,700,000 million barrels. Tin, gold, silver, copper, tungsten, lead and zinc are mined and coal is found in the mountainous regions.

Industries.—Meat-packing houses have been established on a large scale and meat refrigeration is the chief industry of the country. The largest refrigeration plant in the world is in Buenos Aires. Flour milling is next in importance, other industries being sugar, wine, cotton and fruit.

Communications.—There were (1939) 26,840 miles of railroad open, of which 15,490 miles are owned by British Companies. At the end of 1938 the total length of the State telegraph system was 29,550 miles. There are 50 broadcasting stations in operation (1939). There are aeroplane services between Argentine centres, neighbouring Republics and Europe and North America. In 1941, 1,534 vessels (4,638,262 net tons) entered at all ports.

Defence.—The Army is organised in 6 divisions, and numbers about 3,000 officers, 5,000 N.C.O.s and 34,000 men on a peace footing.

In 1940 the military air force consisted of 3 regiments (heavy bomber, light bomber and fighter) and one reconnaissance group; there is an aircraft factory at Córdoba. The Navy consists of 2 battleships, *Moreno* and *Rivadavia* (reconstructed in 1925), 3 cruisers, 7 destroyers (completed in 1939) and 9 of older types, 4 coast defence ships and auxiliary vessels, 10 minesweeping sloops, and 3 submarines; 3 squadrons Naval Air Arm. Strength about 900 officers and 15,000 men.

Argentina declared war against the Axis Powers on March 27, 1945.

Education.—Primary Education is secular, free and compulsory from the ages of 7 to 14. The scattered population of the country districts constitute a problem in attendance which is being gradually solved. Illiteracy of adult males has fallen in the last 20 years from about 36 per cent. to 20 per cent. Secondary Education is controlled by the National Government in National Colleges, in Normal Schools, and in Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are National Universities at Córdoba, Buenos Aires, La Plata, Tucumán, and Sanata Fe, and Faculties at Rosario and Paraná.

Language and Literature.—Spanish is the language of the Republic and the literature of Spain is accepted as an inheritance by the people. There is little indigenous literature prior to the break from Spain but all branches have flourished since the latter half of the nineteenth century, particularly journalism, and Argentina is distinguished among South American countries for the excellence of its newspapers, 28 daily papers being published in Buenos Aires. Modern literature is vigorous and flourishing.

FINANCE.

	1943. Budget.	1944. Budget.
Revenue	\$1,040,000,000	\$1,107,260,000
Expenditure	1,204,000,000	1,551,500,000

The Argentine Debt.

According to figures published by the Corporation of Bond and Shareholders of Buenos Aires the Public Debt at June 30, 1943 stood as follows:—
Federal (*Paper Pesos*) \$8,260,301,220
Provincial and Municipal (*Paper Pesos*) 2,653,779,812

2 E*

\$ = *Paper Peso*: London Rate of Exchange (Jan. 1—Sept. 30, 1943). \$17.4 = £1.

Foreign Capital.—Out of £533,000,000 foreign capital invested in the Argentine in 1942 Gt. Britain's share was £320,000,000 (60 per cent.), the U.S. following with £10,400,000 (19.5 per cent.).

TRADE.

	1943. <i>Paper Pesos</i> .	1944. <i>Paper Pesos</i> .
Total Imports	\$942,240,000	\$1,007,154,000
Total Exports	2,184,705,000	2,352,881,000
Balance outward, 1944		\$1,345,727,000

External Trade, 1943.

Country	To Argentine. <i>Paper Pesos</i> .	From Argentine <i>Paper Pesos</i> .
U.K.	\$194,486,000	\$702,636,000
U.S.A.	179,269,000	498,841,000
Brazil	201,317,000	143,165,000
Sweden	95,887,000	62,619,000
British India	50,285,000	
Spain		51,243,000
Chile	34,833,000	—
Switzerland	34,318,000	—

The exports in 1942 were principally meat, wheat, wool, hides and skins and maize. The chief imports in 1942 were textiles, fuel and lubricants, chemicals and colours, timber and wood, paper, machinery and vehicles, iron and steel manufactures, and foodstuffs.

CAPITAL. Ψ Buenos Aires. Pop. (1944), 2,457,494. Other large towns are Ψ Rosario (522,403), Ψ La Plata (200,000), Tucumán (157,926), Santa Fé (154,173), Mendoza (104,000), San Juan, centre of the earthquake area, Jan. 15, 1944 (80,000), and Paraná (78,284).

Ψ Rosario, the second largest port, reverted to the Argentine Government (after 40 years concession to a French Company) on Oct. 16, 1942.

NATIONAL COLOURS: Blue and White (War Flag: 3 horizontal bands, blue, white, blue, with rising sun on white band).

Trelew—Vice-Consul, G. T. Racc.

Rosario—Consul, F. S. Gibbs, O.B.E.

Vice-Consul, Alexander S. Nolan, M.B.E.

Cordoba—Vice-Consul, H. J. Davis.

Santa Fe—Vice-Consul, I. N. Macintosh.

Tucuman—Vice-Consul, W. F. Galbraith.

Villa Constitución—Vice-Consul, (vacant).

BRITISH COUNCIL.

Chief Representative in Spanish-speaking America, Sir Eugen Millington-Drake, K.C.M.G., The British Council, Lavalie 190, Buenos Aires.

There are Anglophil Societies at Buenos Aires, Córdoba, Rosario, Tucumán, Villa Mercedes, Bahía Blanca, Punta Alta, Mar del Plata, Santa Fe, Mendoza, Corrientes and La Plata.

BRITISH CHAMBER OF COMMERCE.

Calle Bartolome Mitre 447, (6 Piso), Buenos Aires; and (affiliated) British Chamber of Commerce in Rosario.

Buenos Aires is 7,160 miles from Southampton; transit, 17 days by steamship. 4 days by Air Mail service by-weekly to Frankfurt and Toulouse.

AUSTRIA.

PROVISIONAL GOVERNMENT.

(Set up in Vienna. April 29, 1945.)

Chancellor and Foreign Minister, Dr. Karl Renner (Social Democrat).

Defence, Colonel Franz Winterer (Non-Party).

Interior, Franz Horner (Communist).

Justice, Dr. Josef Gerö (Non-Party).

Finance, Dr. Georg Zimmermann (Non-Party).

Agriculture, Rudolf Buchinger (Christian Socialist).

Industry, Commerce and Communications, Eduard Heisl (Christian Socialist).

Education, Ernst Fischer (Communist).

Food, Andreas Korp (Social Democrat).

Social Welfare, Johann Böhm (Social Democrat).

Public Works and Post-War Reconstruction, Rudolf Raab (Christian Socialist).

Ministers without Portfolio, Dr. Adolf Scherf (Social Democrat); Leopold Kunschak (Christian Socialist); Johann Koplenik (Communist).

Austria is a country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary and on the west by Germany.

Prior to the war of 1914-18 the area of Austria was 175,533 square miles with a population of nearly 30,000,000. The Austrian Empire was then joined to Hungary to form "The Dual Monarchy" which sided with Germany in the First World War, at the close of which the Austrian Empire was dismembered and the area was reduced to 34,064 square miles with a population (1939) of 7,009,014.

The Austrian Emperor Francis Joseph, head of the Dual Monarchy since 1848, died on Nov. 21,

1916, and his successor abdicated in November, 1918, dying in exile in 1922.

After the disasters of the war of 1914-18, Austro-German relations underwent many vicissitudes and a closer association was mutually advocated, but a Customs Union negotiated during the Brüning administration in Germany lapsed owing to opposition by the Allied Powers as a breach of treaty obligations. With the growth of the Nazi party in Germany the agitation for union was renewed, Adolf Hitler, himself Austrian born, regarding the German-speaking races as destined for amalgamation. In 1934 Dr. Dollfuss, the Austrian Premier was assassinated by Nazi partisans and German agitation against his successor, Dr. von Schuschnigg, was continued. Meanwhile, an Austro-German agreement had recognized Austria's independence, but a new treaty in February, 1938, installed Dr. von Seiss-Inquart, a Nazi enthusiast, as Minister of the Interior, thus establishing a "Fifth Column" in the centre of the country.

On March 13, 1938, Austria (*Oesterreich*) was annexed by Germany and incorporated into the Reich under the name *Ostmark*.

Under the Constitution of November, 1920, Austria had become a Republican Federation of eight Provinces, and after the annexation *Ostmark* was divided into *Gaue*, each *Gau* corresponding approximately with the former Provinces—Vienna, Lower and Upper Danube, Styria, Tirol, Salzburg and Carinthia. The armed forces were incorporated with those of Germany and were employed in the attack on U.S.S.R. from June 22, 1941, until the unconditional surrender of Germany on May 8, 1945, prior to which Soviet forces had captured Vienna (April 13, 1945).

At the Moscow Conference (Oct. 19-30, 1943) Great Britain, the United States and the Soviet Union pledged themselves to restore the Independence of Austria, and on April 29, 1945, it was announced in Moscow that a Provisional Government had been set up in Vienna, with the object of restoring an independent Austrian Republic.

Austria within its 1937 frontiers is, for purposes of occupation, divided into four zones, one allotted to each Power as follows:—

North-eastern (Soviet) zone—Province of Lower Austria with the exception of the city of Vienna, that part of the province of Upper Austria situated on the left bank of the Danube, and the province of Burgenland. *North-western (U.S.A.) zone*—Province of Salzburg and that part of the province of Upper Austria situated on the right bank of the Danube. *Western (French) zone*—Provinces of Tirol and Vorarlberg. *Southern (U.K.) zone*—Province of Carinthia, including Ost-Tirol, and the province of Styria, except the area of the Burgenland. The city of Vienna within its 1937 boundaries is jointly occupied by the armed forces of the four Powers, and its administration is directed by an inter-allied governing authority consisting of four commandants appointed by their respective commanders-in-chief.

Religion and Education.—The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of 6 and 14, and there are good facilities for secondary, technical and professional education. There are Universities at Vienna, Graz and Innsbruck.

Language and Literature.—The language of Austria within the boundaries at the date of annexation by Germany (1938) was principally German, the non-German portions of the Austro-Hungarian dual monarchy having been severed at the close of the war of 1914-18. Before the annexation there was a vigorous press with 17 daily papers in Vienna, but under Nazi rule the press came under control and some of the papers were suppressed.

Production and Industry.—Agriculture is the most important industry, the arable land producing wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and sheep, normally in great quantities, but the country was denuded during the late war by German requisitions. Oak, pine, beech, ash and elm form a valuable source of wealth and forestry is conducted on scientific lines. Austrian rivers offer power and transport for various industries.

Minerals.—There are rich deposits of coal, and the salt mines of the Carpathians are among the most productive in the world. Gold and silver are found and iron, copper, lead and tin ores are obtained in large quantities.

Communications.—In 1933 there were 4,200 miles of railway (exclusive of narrow gauge lines). The waterways are fully employed for transport of goods in normal times.

CAPITAL. Vienna, on the Danube, population (1934) 1,860,308. Other towns are Graz (253,000), Linz (220,000) and Innsbruck (56,000).

BELGIUM.

(Royaume de Belgique.)

King of the Belgians.* H.M. King Leopold III, K.G., born Nov. 3, 1901, succeeded his father Albert, Feb. 17, 1934; married, Nov. 10, 1926, Princess Astrid of Sweden (who was killed in a motor accident, Aug. 29, 1935) and has issue two sons, the heir apparent (b. Sept. 7, 1930) and Prince Albert (b. June 6, 1934) and a daughter, Princess Josephine Charlotte (b. Oct. 11, 1927). **Heir Apparent.** H.R.H. Prince Baudouin, Duke of Brabant, born Sept. 7, 1930.

Regent. H.R.H. Prince Charles, Count of Flanders (born Oct. 10, 1903), brother of King Leopold III.

CABINET.

(August 1, 1945.)

Prime Minister. M. Achille van Acker (Socialist). **Foreign Affairs.** M. Paul Henri Spaak (Socialist). **Finance.** M. Frans de Voghel (Non-party). **Interior.** M. Adolphe van Glabbeke (Liberal). **Labour and Social Welfare.** M. Léon Emile (Trotskyist) (Socialist). **Education.** M. Auguste Buisseret (Liberal). **Colonies.** M. Robert Godding (Liberal). **War Victims.** Baron Adrian van den Branden de Reeth (Catholic). **Justice.** M. Marcel Grégoire (Catholic). **Food.** M. Edgar Lahmand (Communist). **Health.** Dr. Albert Marteaux (Communist). **Transport.** M. Ernest Rongvaux (Socialist). **Economic Affairs.** M. Albert de Smael (Non-party). **Public Works.** M. Herman Vos, Socialist. **Agriculture.** M. René Lefèvre (Liberal). **National Defence.** M. Léon Mundeeler (Liberal). **Imports and Supplies.** M. Paul Kronacker (Liberal). **War Damage.** M. Jacques Basyin (Liberal).

EMBASSY IN LONDON.

Chancery. 203 Eaton Sq., S.W.1.

Passport Office. 10 Belgrave Place, S.W.1.

Ambassador in London. His Excellency Baron de Cartier de Marchienne, G.C.V.O., G.B.E.

* On Sept. 11, 1941, King Leopold III married Mlle Mary Lillian Baels, daughter of a former Minister of Agriculture. The King stated that his wife renounced the title of Queen and was to be known as Princesse de Réthy. Children of the marriage have no claim to the throne. (A son, Alexander Emmanuel Henri Albert Marie Leopold, was born July 28, 1942.)

Counsellor of Embassy. Baron Beyens.

Military Attaché. Major Kronscher.

Assistants etc., Major C. P. Cumont, O.B.E.;

Capitaine-Commandant Lechat.

Commercial Secretary and Consul-General. M. Antoine de Clercq.

Agricultural Attaché. M. Louis L. Borremans.

Chancellor. M. René Debacker.

A Kingdom of Western Europe, with a total area of 11,750 square miles and a population, Dec. 31, 1938 (including Eupen and Malmédy) of 8,385,553 (4,142,064 males, 4,244,489 females). The foreign population (June 1938) was 282,526 (French 71,322, Netherlands 68,014, Poles 61,809, Italians 37,132, Germans 14,472, British 9,161). Owing to the war and to seizure of foodstuffs by the invaders the Belgian birthrate for 1940 and 1941 (12.4) was 20 per cent. below that of 1938-39. The subsistence of the town population was reduced to about one-third of the minimum scale of diet prescribed by the International Labour Office of the League of Nations. Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxembourg, and on the W. by the North Sea. The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the Treaty of London (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium, in violation of the terms of the treaty.

The Kingdom was again invaded by Germany on May 10, 1940. The Belgian forces, aided by British and French troops of all arms, resisted the invasion until May 28, 1940, when King Leopold capitulated to the Germans. The whole Kingdom thus fell into enemy hands and was occupied by Nazi troops until the victorious advance of the Allies in September, 1944. In co-operation with the Belgian Forces of the Interior, under Maj.-Gen. Yvon Gérard, the Allies drove the invaders from the country, Brussels being freed on Sept. 3, 1944. Belgium is inhabited by two distinct races, the Flemish, of Germanic stock, and the Walloons, of Latin stock. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 50° F. (summer 65°, winter 37°).

PRODUCTION.—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, barley and sugar-beet. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, Brabant, and

Limbours), glass, textiles (Ghent and Verviers), lace (Brussels, Mechlin, Liège, &c.), flour and starch mill, sugar, distilleries, breweries, &c.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 189 State high schools, including 56 for girls, and numerous private institutions. Special schools abound. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are free institutions. After considerable opposition, Ghent University was in 1930 turned into a purely Flemish institution.

LANGUAGE AND LITERATURE.—Flemish is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainaut, Namur, Luxembourg, Liège, and the southern half of Brabant. The town of Brussels is bilingual, and the upper classes everywhere speak French. The official languages are both Flemish and French, and also German in the districts acquired after the war.

The literature of France and of the Netherlands is supplemented by a current of indigenous Belgian literary activity, mainly in the French tongue. Maurice Maeterlinck (born 1862) was awarded the Nobel Prize for Literature in 1911. Louvain library, which ranked among the great libraries of the world, was destroyed by German invaders in the war of 1914-18; reconstructed, mainly by American funds, after peace was declared, it was again destroyed in May, 1940, by German invaders. In 1940 there were 70 daily newspapers (French and Flemish) in Belgium.

FINANCE.

Francs

Revenue (1941 Budget)	*12,173,000,000
Expenditure (1941 Budget)	\$12,230,000,000
Debt (Dec. 31, 1941)	92,600,000,000

* Actual revenue in 1941 was 15,500,000,000 francs and actual expenditure 36,600,000,000 francs, leaving a deficit of 21,100,000,000 francs.

§ Exclusive of German occupation costs, estimated at 15,000,000,000 francs, and loss on exchange of "occupation marks" into Belgian bank notes.

At par, the Belgian Franc = 1.372d. or 35 Belgas (5 Francs each) = £1. In 1940 (Jan.-May) the Exchange was 23 7/8 to 23 9/8 Belgas = £1. In July, 1940, the German rate was fixed at Fr. 1 = 8 pfennigs; Fr. 12 = 1 Reichsmark.

On Oct. 6, 1944, the reinstated Belgian government issued monetary decrees (a) to counteract inflation caused by German milking of the country during their occupation, and (b) to put a stop to the "Black Market" operations and profiteering prevalent during the occupation by forcing disclosure of all notes, deposits and securities, so that undue war profits could be traced and subjected to an appropriate tax.

TRADE.

1939.

	Francs.
Total Imports	19,690,000,000
Total Exports	21,670,000,000

The imports in 1938 were: manufactured articles (5,394,750,000 francs), raw materials (2,661,700,000), foodstuffs and beverages (4,660,172,000), and live animals (28,156,000); the exports were: raw materials (9,789,801,000 francs), manufactured articles (10,501,563,000), foodstuffs and beverages (1,134,095,000) and live animals (67,424,000).

COMMUNICATIONS.—In 1938 there were 4,839 kilometres of normal gauge railways operated by the National Railway Company; the length of light railways (narrow gauge) at the end of 1938 was 4,808 kilometres (of which 1,454 are electrified). In 1938 there were 9,975 kilometres of telegraph line, and 2,637,272 kilometres of underground telephone wires. The navigable rivers and canals have a length of 1,610 kilometres (1938). Ship canals include *Ghent-Terneuzen* (18 miles, of which half is in Belgium and half in the Netherlands; constructed 1825-1827), *Roupe* (20 miles, by which ships drawing 18 ft. reach Brussels from the sea; opened in 1922), and *Bruges* (from Zeebrugge on the North Sea to Bruges, 6½ miles; opened in 1922). The *Albert Canal* (79 miles), which figured prominently in the fighting (Sept. 1944) for the relief of Belgium and the Netherlands and for the invasion of Germany, links Liège with Antwerp; it was completed in 1939 at the cost of £13,500,000, and accommodates barges up to 1,350 tons. There are 10,580 kilometres of State and provincial roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (1938) of 96 vessels (252,191 tons), in addition to which there were (1,938) 475 fishing boats. In 1938, 17,815 vessels entered at Belgian ports (tonnage 39,963,052).

The Capital, BRUSSELS, had a population (Dec. 31, 1938) of 1,281,293 (with suburbs). Other towns are *Antwerp*, the chief port (786,161 with suburbs); *Ghent* (432,351 with suburbs), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; *Liège* (565,154 with suburbs) the centre of the iron industry and *Charleroi* (436,059 with suburbs) the important coal-mining and metallurgical centre; *Mechlin* or *Malines* (75,000); *Bruges* (60,000); *Ostend* (55,000). Brussels is 224 miles from London; transit, 8 hrs.

NATIONAL FLAG: 3 vertical bands, black, yellow, red.

THE BELGIAN CONGO.

Governor-General, His Excellency Pierre Ryckmans, appointed Sept. 1934.

The Independent State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908. Situated between long. 12°-31° E. and lat. 5° N.-13° S., the colony comprises an area of 909,654 sq. miles, with a native population (1942) of 10,350,000. The European population (Jan., 1942) was 30,000, of whom 21,320 were Belgians, 1,940 Portuguese, 1,460 Italians, 1,205 British, 1,025 Greeks, 630 Americans, 390 Dutch, 420 French and 230 Swiss.

Until the capitulation of Belgium the Congo State was administered by the Minister of the Colonies at Brussels, assisted by a Colonial Council of 14 members, of whom 8 were nominated by the King, 3 by the Senate and 3 by the Chamber. After the capitulation the Government in Leopoldville threw in its lot with Great Britain and the French Colonies which had declared for General de Gaulle and Fighting France. U.S. troops were landed in the Congo State during 1942. The Governor-General in Leopoldville is assisted by a Government Council of nominated members.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids, and falls which have been avoided by a railroad 227 miles in length. A narrow-gauge line runs from Boma to Tchela in the Mayumbe (87 miles). Above Leopoldville the river and its numerous affluents are navigable by steamer for about 7,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (78 miles). Another line from Kindu to Albertville on Lake Tanganyika (444 miles) connects the West Coast of Africa with British East Africa and the East Coast. The Katanga-Bukama Railway (443 miles) links up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. The Bukama-Port Franqui Railway (902 miles) commenced in 1923 and opened in 1928 makes it possible to travel by train direct from Cape Town to Port Franqui, a distance of 3,400 miles. This new route plays an important part in the export of copper from the Katanga mines, its possibilities being limited only by the capacity of the Port of Matadi. Other railways are Aketi-Komba-Mungbwere (447 miles), Komba-Bondo (75 miles); Tenke-Dilolo (324 miles), which joins the Benguela Railway in Portuguese Angola; Charlesville-Makumbi (56 miles) and Manono-Mayumba (32 miles), making a total for the Colony of 3,427 miles. Regular air services are established from Boma to Leopoldville, Leopoldville to Stanleyville, Lusambo and Elisabethville, and Stanleyville to Usumbura and Elisabethville. In Peace Time there is an Air Service each week to Europe run alternately by Sabena (Belgian) and a French Company.

Motor roads total (1939), 47,510 miles, of which 2,000 miles are under construction. The most important motor road is the *Route Royale Congo-Nil* (563 miles) from Djamba, on the Rubi, to Redjaf, on the Nile. Another runs from Bukama (*via* Kanda-Kanda and Luebo) to Port Franqui, on the Kasai (1,000 miles). A complete system of telegraphic communication has been established throughout the Colony and is connected with the international system.

The West Coast District has rather scanty rain (40 inches), but on the Mayumbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Nyamtagvia, an active volcano with a two-mile wide crater, pours lava into Lake Kivu, 15 miles distant. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts; oil palms are plentiful everywhere, and supply an ever-increasing trade in palm-oil and palm-kernels. Cotton, cocoa, rubber and coffee are successfully planted. The Colony is rich in minerals. The metallic mineral output in 1941 was: copper, 172,000 tons; manganese, 28,000 tons; zinc concentrates, 30,000; tin, 20,000; iron, 24,000 tons. The output of copper in 1943 was expected

to exceed that of 1941. Extensive radium deposits exist in the Elisabethville Province, where there are enormous deposits of copper. Bakuma is the centre of an extensive tin-belt, and alluvial and reef gold are found in the North-eastern Congo. Diamond-bearing gravel is worked in the south.

Language, Religion and Education. The people are mainly of Bantu-Negro stock, divided into semi-autonomous tribes, each speaking a Bantu tongue. Swahili, a Bantu dialect with an admixture of Arabic, is the nearest approach to a common language. Idol worship and propitiation of evil spirits by human and other sacrifices take the place of a common religion. Missionaries, predominantly Roman Catholic, co-operate with the Government in educational matters, and more than half the total expenditure on native education consists of grants to schools established by the various missions. It is claimed that over 2,000,000 of the natives have been converted to Christianity and determined efforts are being made to lower the illiteracy figure. There are public libraries in urban centres for the white population and for such of the natives as can read French, English, or other European languages.

CAPITAL. Leopoldville (pop. 40,000; 2,841 whites). Principal towns, Ψ Matadi (374 whites); Elisabethville (pop. 3,121 whites); Jadotville (1,853 whites); Stanleyville (832 whites); Coquilhatville (339 whites); Ψ Banana and Ψ Boma.

FINANCE.

	1943. Francs.	1944. Francs.

Expenditure.....	1,303,000,000	1,601,400,000
Debt, consolidated (Dec. 31, 1939)		3,992,980,029
" floating		480,004,400
" indirect		1,368,057,250

In January, 1941, the rate of exchange was fixed at Francs 176-6 = £1.

TRADE.

Total Imports (1943)	Fcs. 2,905,600,000
Total Exports (1943)	2,289,476,000
Imports from U.K. (1943)	335,000,000
Exports to U.K. (1943)	1,535,400,000
Imports from U.S. (1943)	980,650,000
Exports to U.S. (1943)	1,564,500,000

The chief exports are palm-kernels and palm oil, cotton, cocoa, gum-copal, rubber, ivory, copper, gold, tin, radium, wolfram, rubber and jute substitutes, and diamonds.

Ruanda and Urundi (Mandated July, 1919) formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live-stock and hides. The administrative capitals are Nianza (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi).

BOKHARA. See U.S.S.R.

BOLIVIA.

(República Boliviana.)

President (1944-48), Señor Don Gualberto Villaroel; assumed office, August 6, 1944.

LEGATION IN LONDON.

1A Grosvenor Gardens, S.W.1.

Chargé d'Affaires (ad interim) in London, Señor Don Juan Peñaranda.

1st Secretary, Señor Don Guillermo Scott-Murga. Consul, Señor Don Luis Romero.

The Republic of Bolivia extends between lat. 8° and 23° S. and long. 57° 30' and 73° W., and its area is officially estimated at 514,400 square miles (other estimates giving an area of 708,195 square miles), with an estimated population (1932) of 3,066,815. The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830).

The executive power is vested in a President elected for 4 years by direct popular vote. A President is ineligible for re-election for a further term until 8 years have elapsed after a former term has ended. A military coup d'état (Dec. 20, 1943) overthrew the government of General Enrique Peñaranda (President since April 15, 1940). The movement was backed by the younger army officers and by the Right Wing, in opposition to the suspension of the municipal elections and of all constitutional guarantees.

The National Congress consists of a Senate of 16 members elected for 6 years, and a Chamber of Deputies of 73 members elected for 4 years.

The chief topographical feature is the great central plateau (6,500 square miles) over 500 miles in length, at an average altitude of 12,000 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Sorata (1 Lampa), and Illimani, two of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamoré, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosí are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes: the tin output is, after that of the Straits Settlements, the largest in the world, 42,834 tons being exported in 1941; copper, antimony, wolfram, bismuth, salt, and sulphur are also found, and petroleum is being produced in growing quantities. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, indiarubber, cacao, potatoes, cinchona bark, medicinal herbs, &c. Manufactures are in a very undeveloped state, but are being fostered by protection and the present exchange control restrictions. There are (1939) 1,311 miles of railways in operation; the construction of a line from Cochabamba to Santa Cruz (400 miles), is held up in the preliminary stages for lack of funds, 75 miles only being completed. The Government also contemplates the construction of other lines linking up Santa Cruz with the central plateau, with Brazil, and with the Argentine, with a total length of over 2,500 miles. There are 8,000 miles of telegraph wire, and wireless services between Riberalta, La Paz, Cobija, Capitani (Chaco). There is direct

railway communication to the sea at Antofagasta (2 days), Arica (1 day), and Mollendo (2 days), and also to Buenos Aires (31 days); branch lines run from Oruro to Cochabamba, and from Río Mulato to Potosí. Construction on the railway between La Quiaca (on the Argentine frontier) and Atocha (in Bolivia) is now completed. There is through railway communication with Buenos Aires from La Paz. Communication with Peru is effected by rail to Guaquí and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Antofagasta and Bolivia railroad (744 miles), which is British owned. A line from Potosí to Sucre, the legal capital, is now completed.

Commercial Aviation in Bolivia is cared for by Pan American-Grace Airways (American) and Lloyd Aéreo Boliviano (Bolivian), the former providing international connexions with U.S.A., West coast South American countries, Canal Zone and Argentina; Lloyd Aéreo Boliviano attending to local flights, linking La Paz with Oruro, Cochabamba, Santa Cruz and Trinidad, &c., and connecting with Condor Syndicate aeroplanes for transport of mails to Brazil for delivery (in normal times) to Europe via Air France.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879-1882. The Peace Army amounts to about 5,000 all ranks, the War Effective being about 105,000.

Bolivia declared war against the Axis, April 7, 1943.

Language and Literature.—The language of the country is Spanish, with admixtures of Quichuan and Aymaran Indian words.

The Roman Catholic religion is established and subsidised. Elementary education is compulsory and free and there are secondary schools in urban centres. The high percentage of illiterates is yielding to modern methods; all illiterates under 21 are nominally compelled to attend school, and the franchise is denied to those who cannot read and write. Provision is also made for higher education; in addition to St. Xavier's University at Sucre, founded in 1624, there are many other institutions offering university instruction. Bolivian literature has not yet produced authors of world-wide renown. There are 35 daily newspapers in Bolivia.

FINANCE.

Estimated revenue (1943).....	Bs.1,227,000,000
Estimated expenditure (1943)....	Bs.1,227,000,000
Public debt (June 30, 1940).....	Bs.5,003,965,939

In 1939, Bolivianos 141:4=£1. On May 10 1940, the exchange rate was fixed at Bol. 40= \$1 U.S., and on June 21, 1941, at Bol. 46= \$1 U.S.

TRADE.

Exports (1941).....	Bs.105,250,000
Imports (1941).....	Bs.205,660,000
Imports from U.K. (1943).....	£557,000
Exports to U.K. (1939).....	£3,771,885

The principal exports are tin and silver ores, copper ores, bismuth, lead ores, wolfram, coca, hides, and antimony; the chief imports are iron and steel products, textiles, machinery, sugar, wheat, coal and petrol.

SEAT OF GOVERNMENT, La Paz. Population (1939) 200,000. Other large centres are Cochabamba (49,000), Potosí (36,000), Santa Cruz (31,000), Sucre, the legal capital and seat of the judiciary (34,600), Tarija (12,000), and Oruro (40,000).

FLAG: Three horizontal bands; Red, yellow, green.

Air Attaché, Colonel Alvaro Hecksher.

Chancellor, Senhor M. C. Ribeiro dos Santos.

Consul-General in London, Senhor Idefonso
Falcão, Aldwych House, Aldwych, W.C.2.

Deputy-Consul, Senhor Francisco Eulalio do
Nascimento e Silva.

Vice-Consul, Senhor George Alvares Maciel.

Brazil, the most extensive State of South
America, discovered in 1500 by Pedro Alvares
Cabral, Portuguese navigator, is bounded on the
north by the Atlantic Ocean, the Guianas, Colombia
and Venezuela; on the west by Peru, Bolivia,
Paraguay, and Argentina; on the south by
Uruguay; and on the east by the Atlantic Ocean.
Brazil extends between lat. 5° 10' N. and 33° 45' S.
and long. 34° 45' and 73° 59' 22" W., being 2,327
miles from north to south, and 2,321 from west to
east, with a coast-line on the Atlantic of 3,577 miles.
The Republic comprises an area of 3,268,670 square
miles, with a population (Census of 1940) of
41,356,605.

The estimated population (1943) was approxi-
mately 44,000,000.

The northern States of Amazonas and Pará are
mainly wide, low-lying, forest-clad plains. The
central state of the Mato Grosso is principally
plateau land and the eastern and southern States are
traversed by successive mountain ranges inter-
spersed with fertile valleys. In the extreme south,
towards the interior, the land rises by gentle gradations
to the height of 2,000 to 5,000 feet above sea
level. The principal ranges are *Serra do Mar* in
São Paulo; the *Serra Geral* (Caparaó 9,393 feet)
between Minas Geraes and Espírito Santo, the *Serra*
do Mantiqueira (Itatiaia, 9,163 feet), and the *Serra*
do Espinhaço (Itacolúmi, 5,748 feet), in the south-
east of Minas Geraes; the *Serra do Paranin*, between
Goyaz and Minas Geraes, the *Serra dos Aymores*,
which divide Espírito Santo from Minas Geraes;
and the *Serra da Guariacá, Branca and Araripe*, which
envelop Piauí.

Brazil is unequalled for its rivers. The River
Amazon has tributaries which are themselves great
rivers, and flows from the Peruvian Andes to the
Atlantic, with a total length of some 4,000 miles.
Its principal northern tributaries are the *Napo* and
Marañon, the *Putumayo* or *Ica*, *Rio Branco*, *Rio Negro*,
and *Japurá*; its southern tributaries are the *Juruá*,
Purus, *Madeira* and *Tapajós*, while the *Xingu* meets
it within 200 miles of its outflow into the Atlantic.
The *Tocantins* and *Araguaya* flow northwards from
the Plateau of Mato Grosso and the mountains of
Goyaz to the Gulf of Pará. The *Parnaíba* flows
from the encircling mountains of Piauí into the
Atlantic. The *São Francisco* rises in the South of
Minas Geraes and traverses Bahia on its way to the
Eastern coast, between Alagoas and Sergipe. The
Paraguay, rising in the south-west of Mato Grosso,
forms a boundary with Bolivia on its way through
Paraguay to its confluence with the *Paraná*, which
rises in the mountains of that name and divides
Brazil from Paraguay. On the Iguassu, which
unites with the Upper Paraná at the Brazil-Argen-
tine-Paraguay boundary, are the majestic *Falls of the*
Iguassu (200 ft.), and on the São Francisco are the
no less famous falls of *Paulo Afonso* (260 ft.).

GOVERNMENT.—Brazil was colonised by Portugal
in the early part of the sixteenth century, and in
1822 became an independent empire under Dom
Pedro, son of the refugee King João VI. of Portugal,
the centenary of Brazilian independence being cele-
brated by an International Exhibition at the capital
(Sept. 7, 1922, to July 2, 1923). On Nov. 15,
1889, Dom Pedro II., second of the line, was de-
throned and a republic was proclaimed. Constitu-
tional Government, under the Constitution of
1891, was suspended after the revolution of 1930.
Elections for a Constituent Assembly were held in
May, 1933, and the Assembly promulgated a new
Constitution (July 16, 1934). Dr. Getúlio Vargas,
who had been Chief of the Provisional Govern-
ment since 1930, was elected President and assumed
office on July 20, 1934. By a *coup d'état* of Nov. 20,
1937, he closed Congress, consisting of a Senate and
Chamber of Deputies, abolished the old political
parties and issued a new Constitution, pending the
approval of which, by a popular plebiscite, he
became virtual dictator of the country until
October 1945. After a Congressional election on
Dec. 2, 1945, a new Constitution will be framed.

PRODUCTION.—The minerals are very consider-
able and valuable, comprising gold, silver, iron,
diamonds, topazes, and other precious stones. The
immense iron deposits have been scarcely touched.
Manganese is exported, and there are important
deposits of monazite sand. Low-grade coal de-
posits are in the south. Its agricultural produce is
abundant and its forests are immense. Cattle-
raising is an important industry. The chief pro-

ducts of the country are coffee, maize, sugar, raw cotton, hides and skins, cocoa, oleaginous fruits, *herumiade* rubber and tobacco: rubber (28,000 tons in 1944 and 40,000 tons in 1945) comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manaus, coffee coming chiefly from São Paulo. The export of coffee is government controlled in order to stabilize its value. Tobacco and cocoa are grown largely, especially in Bahia. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone.

DEFENCE.—The peace effective of the Army is about 89,590 all ranks. The Navy consists of 2 battleships, 2 cruisers, 1 training ship, 16 destroyers (9 new), 6 minelayers, 4 submarines, 1 submarine depot ship, 3 river monitors, 20 submarine chasers and 4 surveying vessels.

The wanton and indiscriminate attacks by U-boats on Brazilian shipping caused nation-wide anger, and on Aug. 22, 1942, after failure to obtain guarantees against further attacks, Brazil declared war on Germany and the aggressor nations.

On July 16, 1944, a Brazilian force landed in Italy to take part with the Allied Armies in joint operations against the enemy.

EDUCATION.—Primary education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy; there were 2,862,655 pupils in 1935. Secondary and Technical education is carried out by Federal and State governments at the State University of Brazil (founded in 1937) and at private colleges. All private schools are slowly passing under the control of the Board of Education. In 1931 a Ministry for Education and Health was created; it has commenced an extensive scheme of reorganization of the teaching system throughout the country. In 1940 there were over 3,000,000 pupils enrolled at elementary schools, 250,000 at secondary and special schools and 28,000 students at the Universities. Higher education is carried out by Federal and State governments at the State University of Rio de Janeiro, and at the University colleges at Manaus (Amazonas) and Curitiba (Paraná) and other private colleges.

LANGUAGE AND LITERATURE.—Portuguese, with dialectal varieties, is the language of the country, foreign languages being read and spoken in the following order: French, Italian, English, German and Spanish. Until the second quarter of the nineteenth century Brazilian literature was dominated by Portugal. French influence is traceable for the next half century, since when a national school has come into existence and there are many modern authors of high standing. Public libraries have been established in urban centres and there is a flourishing national press with widely circulated daily and weekly newspapers; 15 daily newspapers are published at Rio de Janeiro.

COMMUNICATIONS.—On December 31, 1938, there were 21,380 miles of railway open. In August, 1941, the President approved expenditure of 30,000 contos on a line 435 miles in length from Corumbá, Brazil, to Santa Cruz, Bolivia, a link in the Trans-Continental Line from Rio and Santos to Arica (Chile) on the Atlantic coast. Length of telegraph 38,080 miles. In 1938 35,882 steam and sailing vessels of 51,258,000 tons entered Brazilian ports.

Two Foreign Air Lines (Pan-American and Air France) touch Brazil, and the (German) Zeppelin Line formerly ran a summer service from Europe.

There are also 5 National Air Lines which maintain regular services within the country.

FINANCE. 1945.

Revenue (Budget)	Paper Milreis	8,232,400,000
Expenditure (Budget)	"	8,205,300,000
External Debt (Dec. 31, 1942)	"	£98,263,000

The Kingdom of Bulgaria is bounded on the north by Roumania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is stated at 42,807 square miles (including Southern Dobrudja, 2,983 square miles, restored to Bulgaria by Roumania, Sept. 7, 1940), with a population (Dec. 7, 1940) of 6,700,000. The prevailing religion of the Bulgarians is the Eastern Orthodox Church (83 per cent.); Muhammadans (Pomaks) (14 per cent.) and various others (3 per cent.). For secular purposes, the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the Treaty of Berlin (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the Balkan League against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobrudja to Roumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the Treaty of Neuilly, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

Nazi troops entered the country on March 3, 1941, and occupied Black Sea ports, but Bulgaria was not officially at war with the Soviet Union. In April, 1941, it was announced that Dedagatch, an Aegean port of Grecian Thrace, had been "assigned" to Bulgaria by the Nazi Government. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and delegates to Cairo sought terms of peace from Great Britain and the United States. The Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. 10. Armistice with United Nations signed in Moscow, Oct. 28.

GOVERNMENT.—The executive power is vested in the Council of Regency on behalf of the Tsar, and is exercised by a Council of Ministers. The legislature is a single chamber National Assembly.

or *Sobranie* of 160 Deputies (1 per 20,000 inhabitants), elected for a maximum term of four years by adult manhood suffrage and married women. (The *Sobranie* was in suspense from May, 1934, to March, 1938, elections taking place for the 160 constituencies, March 6-27, 1938). Members receive 12,000 *leva* a month and free railway travel.

PRODUCTION.—Bulgaria is essentially agricultural, the principal crops being beet, rye, barley, oats, maize, tobacco, oleaginous seeds, soya beans, fodder, fruits, vegetables and cotton. The livestock includes sheep, goats, cattle, pigs, horses, asses and mules. Rich and extensive brown and black coal deposits, certain of which (mainly State-owned mines) produced (1937) 1,853,000 metric tons. There is a large variety of thermal and mineral springs, several of which have been modernised. Certain areas are well mineralised with copper, lead, zinc, iron, manganese, &c., but only copper and lead are mined and treated on a commercial scale. There are large deposits of bituminous shale and indications of petroleum. Alluvial gold is found in many places. Local industry is encouraged by tariff protection and other inducements, and includes foodstuffs and beverages, cotton and woollen textiles, electrical goods, ceramics, metal-working, chemicals, leathers, paper and woodwork.

DEFENCE.—Before the War of 1914-1918 service in the Army was universal and compulsory, and on a peace footing it numbered about 58,000, all ranks. During the War (Oct. 1915-Sept. 1918) about 560,000 passed into the ranks of the Army. By the *Treaty of Neuilly* the Bulgarian Army was limited to 30,000 all ranks, but these clauses were abolished by the Salonika agreement of July 31, 1938.

EDUCATION.—Elementary education is obligatory up to 4th Standard, and free up to 7th Standard. In 1938 there were over 5,000 elementary (Government and private) schools; 1,940 Pro-gymnasias; 128 Gymnasias and 372 technical and commercial schools and colleges. Illiteracy is decreasing among the male population but still exceeds 40 per cent. of the female population. Sofia has a State University, a Free University, and Art, Music and Military Academies.

LANGUAGE AND LITERATURE.—Bulgarian is a Southern Slavonic tongue, closely allied to Russian (see U.S.S.R.) with local admixtures of modern Greek, Albanian and Turkish words. There is a modern literature, chiefly educational and popular. The alphabet is Cyrillic, as in Russia. In 1940 there were 11 daily newspapers in Bulgaria.

COMMUNICATIONS.—On Jan. 1, 1939, there were 11,940 miles of road open, 4694 miles under construction. There were 1,870 miles of normal and 274 miles of narrow-gauge railway open. There are not more than 6,000 motor cars and lorries in the country (excluding military vehicles). On Dec. 31, 1938, there were 723 post offices, 584 telephone exchanges and 749 telegraph offices. In 1938 vessels cleared at Black Sea ports numbered 9,327 (2,036,637 tons), and 13,103 vessels (2,188,260 tons) cleared at Danube ports.

FINANCE. 1941.

Budget revenue (estimated)... *leva* 10,160,000,000
Budget expenditure (estimated)... 10,095,000,000

Debt (Dec. 31, 1939):—

External..... *leva* 13,137,930,000
Internal Consolidated..... „ 5,942,940,000
„ Non-Consolidated..... „ 2,816,680,000
Leva: 315 = £1 (1941).

TRADE. 1941.

Total Imports *leva* 10,239,000,000
Total Exports 9,215,000,000
Imports from U.K. (1939) £153,672
Exports to U.K. (1939) £410,143

The principal imports are raw, semi-manufactured and finished textiles, metals and manufactures, industrial and agricultural machinery, implements and tools, chemicals, tanning materials, mineral and vegetable oils, greases, fats, gums, wax, paper, hides, leather, glassware, china and porcelain, drugs and medicines, colonial goods, sawn timber, rubber. The principal exports are cereals and flour, bran, tobacco, eggs, beans, poultry and dairy produce, sunflower seed and cake, vetches, goat, sheep and lamb skins, attar of roses, live-stock, nuts, fruits, silk cocoons, charcoal, hardwoods, copper matte and lead ore.

CAPITAL. Sofia. Pop. (1942) 400,000, at the foot of the Vitosha Range, on the River Isker, the capital and commercial centre, is on the main railway line to Istanbul, 338 miles from the Black Sea port of Varna (78,000) and 125 miles from Lom-Palanka (15,000), on the Danube; V Bourgas (41,000) is also a Black Sea port, those on the Danube being V Rusechuk (52,000), V Svislov (13,000), V Vidin (20,000) and V Lom (16,000). Other important trading and industrial centres are Plovdiv (113,000) and Pleven (35,000).

FLAG: 3 horizontal bands, white, green, red.

EMBASSY IN LONDON.

3 Hamilton Place, W.1.

Ambassador in London, Señor Don Manuel Bianchi
(June, 1942).

Counsellor of Embassy, Señor Don Leon Subercaseaux.

1st Secretaries, Señor Don Alfonso Somavia; Señor Don Gastón Wilson.

2nd Secretary, Señor Don Víctor Riosoco.

Naval Attaché, Capt. Alejandro Gallegos.

Air Attaché, Group-Captain Don Marcos Vega.

Financial Adviser, Señor Don Julio Bittencourt.

Secretary, Señor Don Antonio Gandarillas.

Attaché, Dr. Don Alberto Gallinatto.

* Reported (Oct. 1945) to have resigned.

Consulate-General, 76 Victoria Street, S.W.1.
 Consul, Señor Don Santiago Rogers.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. $17^{\circ} 15'$ and $55^{\circ} 59' S.$, and long. $66^{\circ} 30'$ and $75^{\circ} 48' W.$ Extreme length of coast-line about 2,800 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 47° , of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a great height—the highest in the Chilean sector and in the whole range being *Aconcagua* (22,976 feet). The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of a trail leading from Chile to Argentina has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 16 provinces and 2 territories (Aysen and Magallanes) and the aggregate area is estimated at 285,200 square miles. In 1929 Chile signed a treaty ceding the province of Tacna to Peru but retained the province of Arica in return for a payment to Peru of £1,200,000.

Among the island possessions of Chile are the *Juan Fernandez group* (2 islands) about 500 miles distant, where a wireless station has been erected. One of these islands is the reputed scene of Alexander Selkirk's (Robinson Crusoe) shipwreck. *Easter Island* ($27^{\circ} 8' S.$ and $109^{\circ} 28' W.$) about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been determined. The area is about 45 sq. miles.

The population of Chile at the census of 1940 was 5,023,539, and on May 31, 1943, was estimated at 5,191,030. Included in the total are four racial divisions: (a) Spanish settlers and their descendants; (b) indigenous Araucanian Indians, Fuegians, and Changos; (c) mixed Spanish Indians; and (d) European immigrants, who were represented in 1935 by 23,439 Spaniards, 11,070 Italians, 5,292 British, 10,861 Germans, 5,007 French, 1,345 Syrians, 1,374 Swiss, 4,064 Yugoslavs, 272 Danes and 1,343 Russians. In 1943, the births numbered 170,222; marriages 43,559; and deaths 104,122.

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maipu* (April 5, 1818) achieved the independence of the nation. Under the present Constitution (Aug. 30, 1925), which superseded that of May 25, 1833, the President is elected by direct vote of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of 143 Deputies. There is universal suffrage for persons who have attained the age of 21, can read and write, and are on the electoral roll.

PRODUCTION, &c.—Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, hemp, Chile pepper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish; the exportation of fruit to the United States is increasing yearly. Excellent wines are produced, and the Government is taking steps to develop their exportation. The live stock includes (1942) 2,350,000 cattle, 5,750,000 sheep, 580,000 swine, 530,000 horses, 43,000 mules and

54,000 donkeys. The mineral wealth is considerable, the country being extremely rich in copper-ore, iron-ore and manganese ore. The production of copper in 1943 was 488,500 metric tons, Chile being the second greatest copper producing country in the world. The rainless north yields more, especially nitrate of soda, iodine, borate of soda, copper, gold and silver, a large number of mines yielding both being in actual work in Tarapaca, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper, iron, manganese and silver; and the south, iron and coal (2,275,000 metric tons of coal mined in 1943). In 1936 the production figure of nitrate was not published, but the exports of this fertilizer were 1,270,480 tons in 1941. Early in 1930 a law was passed constituting a national nitrate company, to be called *Compania de Salitre de Chile (Cosach)*, with a capital of £75,000,000 with State participation, to take over the whole of the nitrate industry, the export tax being abolished, and its place in the budget taken by a fixed payment to the Government during the first three years, and after that by the Government's share in the company's profits. By decree of Jan. 1, 1933, the dissolution of *Cosach* was enacted, and on June 15, 1934, a new company came into existence, the *Nitrate Company of Tarapaca and Antofagasta*. This concern consists of 34 companies comprised in *Cosach*, and with the Anglo-Chilean Nitrate Corporation and the Lautaro Nitrate Company, Ltd., constitutes the new organization of the Chilean industry. The sales of all these companies are effected through a central body known as the *Nitrate and Iodine Sales Corporation*. There are smelting-works for copper and silver, tanneries, corn and saw-mills, starch, soap, biscuit, rope, glassware, paints, mineral waters, boot and shoe, hosiery, hat, cloth, cheese, furniture, candle, match, brush, cordage, paper and cigarette factories, breweries and distilleries; and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and 13 lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 30 days.

COMMUNICATIONS.—There were (1939) 5,220 miles of railway working, of which 1,097 miles are British controlled. With the completion of a section of 435 miles from Corumba, Brazil, to Santa Cruz, Bolivia, the Trans-Continental Line will link Arica, Chile (Atlantic), with Rio de Janeiro, Brazil (Pacific). Another line from Salta (Argentina) to Antofagasta (560 miles) is under construction. In 1940 there were 11,000 miles of telegraph, 1,110 post offices, and 4,802 miles of telephone, with 14 public wireless stations. The mercantile marine (1940) numbers 106 vessels (170,000 tons). In 1940 768 vessels (2,450,000 tons) entered Chilean ports from abroad; coasting traffic is restricted to vessels of the Chilean mercantile marine.

DEFENCE.—All able-bodied male citizens from 19th to 45th year must serve in the army for a training period. The effective of the active army in 1943 was 2,000 officers and 725,000 other ranks. The Air Force has a peace strength of 70 machines with 249 officers and 2,250 other ranks. The navy consists of 1 battleship of 28,000 tons carrying ten 14-inch guns, 1 ironclad, used as a training ship, 3 cruisers, 8 destroyers and 10 submarines, with a complement of 632 officers and 71,217 other ranks.

EDUCATION is free, elementary education being compulsory since 1920; there were (in 1939) 4,757 elementary schools, attended by 612,500 children. There are 4 Universities (2 in Santiago, 1 in Valparaiso, and 1 in Concepción). The religion is Roman Catholic.

LANGUAGE AND LITERATURE.—Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Salvador Garmela Mistral, for Chilean verse and prose. The National Library in Santiago contained (1939) over 500,000 volumes. There are over 200 newspapers and a large number of periodicals, including many devoted to professional, scientific and social subjects; 30 daily newspapers were published in 1940.

FINANCE.		1944.
Revenue (Budget)	\$3,470,000,000	
Expenditure (Fiscal)	3,707,200,000	
Internal Debt (Dec. 31, 1941)	1,752,000,000

There are Anglophil Societies at Santiago, Valparaíso and Concepción.

BRITISH CHAMBER OF COMMERCE IN THE REPUBLIC OF CHILE, Augustinas 1066 P.O. Box 4087, Santiago and Calle Blanco 689, P.O. Box 1676, Valparaíso (Branches at Concepción, Talcahuano and Punta Arenas).

Valparaíso is distant 9,000 miles *via* Panama, and 11,000 *via* the Strait; transit 30 to 35 days. *Via* Buenos Aires and Andes, transit 19 to 25 days.

CHINA.

(Ta Chung-Hua Min-Kuo—The Great Chinese Republic.)

NATIONAL GOVERNMENT—KUO MIN CHENG FU.

President, Generalissimo Chiang Kai-shek, G.C.B.,

D.C.L., assumed office Aug. 11, 1943.

The State Council of the National Government consists of from 24 to 36 State Councillors, among whom are the presidents and vice-presidents of the five Yuan (Councils). The President is *ipso facto* Chairman of the State Council.

President, Executive Yuan, T. V. Soong.

Vice-President, Wong Wen-hao.

President, Legislative Yuan, Sun Fo.

Do., Judicial Yuan, Chu Cheng.

Do., Examination Yuan, Tai Chuan-hsien (Tai Chiao).

Do., Control Yuan, Yu Yu-jen.

EXECUTIVE YUAN—CABINET.

(Hsing Cheng Yuan.)

(July, 1945.)

Under the President and Vice-President of the Executive Yuan are the following Ministers:—

Minister of Interior, Chang Li-sheng.

Foreign Affairs, Wang Shih-chieh.

War, General Chen Cheng.

Finance, O. K. Yui.

Economic Affairs, Wong Wen-hao.

Education, Chu Chia-hua.

Communications, Yu Fei-peng.

Agriculture and Forestry, Ku Cheng-kang.

Food, Hsu Kan.

Justice, Hsiao Hwan-shang.

Conscription, Lu Chung-lin.

Information, Wu Kuo-cheng.

Also included in the Executive Yuan are the Mongolian and Tibetan Affairs Commission (Chairman, Lo Liang-chuen), the Overseas Affairs Commission (Chairman, Chen Shu-jen), the National Relief Commission (Chairman, Hsu Shih-ying), the National Conscription Commission (Chairman, Hsueh Tu-pi), the War Production Board (Chairman, Wong Wen-hao), and the National Relief and Rehabilitation Administration (Director, T. F. Tsien).

The following officials exercise functions outside the Cabinet:—

President of National Military Council, Generalissimo Chiang Kai-shek.

Secretary-general of Supreme National Defence Council, Wang Chung-hui.

Minister of Audit (under the Control Yuan), Lin Yun-kai.

Minister of Personnel Administration (under the Examination Yuan), Chia Ching-teh.

Commander-in-Chief of the Navy (under the National Military Council), Admiral Chen Shao-kwan.

EMBASSY IN LONDON.

49 Portland Place, W.2.

Ambassador Extraordinary and Plenipotentiary in London, His Excellency Dr. Vi Kyuin Wellington Koo (July 1, 1947).

Counsellors, Dr. Chen Wei-Cheng; Sze Chao-Kuei.

1st Secretaries, Tan Pao-shen; Dr. Liang Yuen-li; Tsien Tsuen-dien; Fu Kuan-hsiung; Chen Yao-sheng.

2nd Secretaries, Chai Feng-Yang; Dao Ying.

3rd Secretary, Li En-Kuo.

Attaches, Wou K'uan; Lin Chih-Chi; Chao Chin-yung; Kwok Tsch-ching; Wang Yung-Yuan; Ho Sze-ko; Miss Tsoh Yen-yah; Tai Erching.

Asst. Naval Attaché, Lt.-Comdr. Chen Hsun-yin. Military Attaché and Head of the Chinese Military Mission, Lieut.-General Kwei Yung-chin.

Asst. Military Attachés, Lt.-Col. Fan Sung-niao; Lt.-Col. Tien Hsi-chen.

Air Attaché, Lieut.-Col. Huang Pun-yung (acting).

Asst. Air Attaché, Capt. Wang Chih-shang.

Asst. Financial Counsellor, Lee Tuh-yueh.

Commercial Counsellor, Dr. Wang Ching-chun. Counsellor (specially attached), Dr. K. C. George Yeh.

Chancellors, Chen Chi-Teh; Ma Yuen Cheung.

Consulate-General, 25 Weymouth Street, W.1.

Consul-General, Tan Pao-Shen.

ESTIMATED AREA AND POPULATION.

Territory.	Square miles.	Population.
China	2,083,000	482,000,000
Dependencies:—		
Manchuria	500,000	43,000,000
Mongolia	1,360,000	3,000,000
Sinkiang (Turkestan) ..	551,000	3,000,000
Tibet	463,000	3,000,000
Total	4,957,000	534,000,000

Estimates of the area and population of China vary considerably. The League of Nations Statistical Year Book, 1942-4, gives a total area for China of 11,103,000 sq. kilometres (approx. 4,300,000 sq. miles) and a total population for China, including Manchuria, Outer Mongolia and Tibet, of

450,000,000. The Chinese Ministry of the Interior issued an estimate in 1936 showing a population of 422,700,000 for the 24 Provinces "China Proper," and of 5,800,000 for Mongolia and Tibet, a total (exclusive of Chinese Turkestan) of 428,500,000.

Province.	Pop. 1936.	Province.	Pop. 1936.
* Anhwei ..	23,285,000	Kwantung ..	13,285,000

* Kiangsi ..	15,820,000	Szechuan ..	52,063,000
* Kiangsu ..	36,469,000	Yunnan ..	11,995,000

* In Feb. 1944 the Japanese created a new province of Kwaihai comprising portions of Anhwei, Kiangsi, Kiangsu and Shantung. The province of Kiangsu, in which Shanghai is situated, is the most densely populated area in the world (36,500,000 persons in 42,000 square miles).

The estimated foreign population of China was as follows in 1931: British, 13,344; Japanese, 260,621; Russian, 66,479; American, 8,637; Portuguese, 3,368; German, 3,444; French, 8,651; the total being 370,303. Out of a total of 7,921 foreign firms in China, 725 were British, 124 Russian, 3,940 Japanese, 184 German, 377 American, and 229 French (in 1923). The total number of Chinese abroad was estimated (1936) at 7,839,000.

Chinese civilisation is the oldest in the world, and its government, based upon that of the family, remained unchanged in its root idea until the revolution of 1911-12, by which the autocracy of the Emperor and the power of the bureaucracy were merged into a Republican form of government. For more than 2,000 years the Emperor was the supreme head of the State, legislating by edict in matters great and small. In the seventeenth century the Ming Dynasty was overcome by the Manchus from the north, who have now become almost entirely absorbed by the conquered race. The conditions and practices of the autocracy were preserved by the Manchus, but for many years the civil service had become the power in the Empire and the central authority was but loosely exercised over the provincial and district administration. Many reforms were initiated or promised in the last few years of the Imperial rule and an executive body was actually created, while a legislature was promised. On October 10, 1911, the party of reform forced the Imperial dynasty to a "voluntary" abdication; a Republic was proclaimed at Wuchang, and the tenth day of the tenth month is Double Tenth Day in China, the National Day in celebration of the revolution.

There is a bi-cameral Legislature of a Senate (Tsai Yi Yuan) of 264 members and a House of Representatives (Chung Yi Yuan) of 596 members. The Central Executive Committee of the Kuomintang decided (Sept. 14, 1943) to convene a National Congress and to establish a constitutional government within a year of the cessation of hostilities. The Sixth National Congress endorsed Chiang Kai-shek's undertaking of January, 1945, to summon a People's Congress in the following November to discuss and adopt a constitution and to elect a President, Vice-President and Chairman of the five Yuan. The government of the 18 provinces is entrusted to civil and military governors, the latter (Tuchun) ranking first and holding practically all the powers of government; under them each province is subdivided into circuits

superintended by *Taoyin* or intendants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government in all important questions, and especially so in foreign affairs.

War with Japan.—On July 7, 1937, a "state of war" occurred between China and Japan, under whose auspices Manchuria declared its independence of China in 1932. Japanese troops invaded China and occupied a great part of Chinese territory, including Shanghai. Many Chinese cities were bombed from the air and others burned by the invaders or by retreating Chinese. After the Japanese attack on Pearl Harbour (Dec. 7-8, 1941) China declared war on the remaining Axis powers, becoming a member of the ABCD Nations (American, British, Chinese, Dutch) at war with the enemy in the Pacific.

On July 7, 1944, China entered her seventh year of war with calm confidence and in good spirits, and on VJ Day (Aug. 15, 1945) shared in the total victory of the Allies over their common enemy.

RELIGION.—The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than a religion) and, since its introduction in the first century of the Christian era, Buddhism. All three are professed and practised by Chinese other than Moslems (who number about 50,000,000), Christians (Roman Catholics about 1,250,000; others 400,000) and Jews.

EDUCATION.—Education is compulsory from the age of 6 to 12. In 1942 there were about 230,000 primary schools in operation with over 500,000 teachers and 20,000,000 pupils. There were also 3,000 secondary schools, with 53,000 teachers and about 800,000 pupils. There were about 60,000 students at Universities, University Colleges and Technical Schools. The University of Peking was founded in 1902, and in 1920 an Imperial University was established in each province.

LANGUAGE AND LITERATURE.—The Chinese Language, with its many dialects, is supplemented for intercourse with foreigners (mainly English and American) by a *lingua franca* known as pidgin English (pidgin being a Chinese attempt to pronounce the word "business"). This broken English, with the idiom of colloquial Chinese, is becoming less important now that many educated Chinese speak English correctly and fluently and Chinese-speaking English and Americans are on the increase. Chinese literature is among the richest in the world and paper has been employed for writing and printing for nearly 2,000 years, movable wooden blocks having superseded carved wooden slabs many centuries ago. Confucian books of religion, histories, works dealing with philosophy and the arts, poetry, and literary criticism, novels and romances are abundant and many have been translated into other tongues. In 1922 there were upwards of 1,250 Chinese newspapers and magazines, published at regular periods in Peking, Shanghai, Tientsin, and the other large centres, in addition to English and other Foreign daily newspapers. Now that hostilities have closed it is intended to develop the intellectual and literary life of the people of China. In three years (1939-41) 4,000,000 persons have been taught to read and write, and it is estimated that by Dec. 31, 1945, the number will exceed 19,000,000.

REHABILITATION.—Various health schemes are contemplated, including the training of pharmacists, etc. (On Oct. 12, 1944, Dr. T. F. Tsiang,

Chinese member of the Council of UNRRA, outlined at Washington, D.C., a comprehensive scheme, calling for an outlay of \$3,500,000,000 (U.S.) = £875,000,000, for relief work and repair of war damage. UNRRA would be asked to contribute \$945,000,000 (U.S.) in the first two years and China would herself contribute \$1,000,000,000 within China and \$1,500,000,000 abroad for essential supplies. China has abundant natural resources, but lacks technicians, and in July, 1943, the Ministry of Education decided to send 1,000 students every year to Great Britain and the United States for the next five years to prepare for post-war reconstruction and development.

RESTORATION OF TERRITORY.—On Oct. 1, 1930, *W'ichaiwei*, the island of *Liu King* and certain other islands, leased to Great Britain in 1898, were restored to China. The area comprised in the lease was about 285 square miles, with a population of about 170,000. On Jan. 15, 1931, the Belgian concession at Tientsin was also formally restored.

EXTRATERRITORIALITY.—Gt. Britain and the U.S.A. announced jointly on October 9, 1942, the abrogation of the extraterritorial rights and privileges hitherto enjoyed by their nationals in China, in order to emphasize their friendship and solidarity with their Chinese ally. Treaties embodying these agreements were signed January 11, 1943.

FINANCE.

Budget of the National Government.

(Jan. 1-Dec. 31, 1939)

Standard Dollars.

Ordinary Revenue	\$2,850,000,000
Ordinary Expenditure	2,850,000,000
External Debt (Jan. 1, 1931)	£153,000,000

The official rate of exchange is \$1 = 15.24d.; the *Standard Dollar* or *Yuan*, was quoted in 1942 at about 24d. to 34d. = \$1; the rate on Chungking (September, 1943) was 3d. to 34d. = \$1.

At March 1, 1942, according to the official statement of the Ministry of Finance, the total internal debt was \$11,000,000,000 (including arrears of capital and interest), the external debt being \$22,000,000,000.

The *Chinese Customs Revenue* in 1940 amounted to \$475,740,000 (£28,742,625) against \$331,320,000 (£20,077,250) in 1939. The *Salt Revenue* in 1936 was \$205,433,000.

PRODUCTION AND INDUSTRY.—China is essentially an agricultural and pastoral country. Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax, are the most important crops. Failure of the 1942 harvest in the grain and ricefields, caused by protracted drought and aggravated by plagues of locusts, caused a disastrous famine in the province of Honan, affecting 20,000,000 people. Livestock is raised in large numbers. Silkworm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities, and flour and rice milling have grown important in late years. The mineral wealth of the country is very great, coal of excellent quality being produced; iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundantly found. Oil is produced in the province of Kansu and in South Manchuria. An Indo-China pipe line was under construction in 1944 from Calcutta via the Brahmaputra Valley to Assam, and thence to Burma and the Chinese frontier.

TRADE.

Values in Standard Dollars.

Special Trade.

Year.	Imports.	Exports.
1932	\$1,632,000,000	\$768,000,000
1939	1,333,654,000	1,027,247,000
1940	2,027,143,000	1,970,121,000
1942	1,444,340,000	191,700,000
1943	3,124,320,000	164,460,000

External Trade, 1940.

In Standard Dollars = 0.715 Haikwan Taels.

Country.	To China.	From China.
Great Britain	\$81,609,000	\$196,798,000
India	175,275,000	89,900,000
Hong Kong	146,972,000	367,500,000
Malaya	22,876,000	61,870,000
France	7,815,000	31,820,000
Germany	55,033,000	4,000,000
Italy	6,766,000	6,600,000
Japan	466,290,000	126,400,000
U.S.A.	435,500,000	565,670,000

The principal imports in 1940 were:—

Article.	Standard Dollars.
Raw Cotton, &c.	304,384,000
Chemicals	86,402,000
Metals and Ore	124,981,000
Machinery	76,558,000
Dyes and Paints	59,400,000
Tobacco	49,266,000
Coal and Fuel	51,140,000
Woolens	34,987,000
Fishery products	31,760,000
Cotton goods	58,463,000

The import of Indian opium is now prohibited.

The principal exports in 1940 were:—

Article.	Standard Dollars.
Textile fibres	342,000,000
Animal products and poultry	322,330,000
Metals and minerals	140,758,000
Piece goods	116,129,000
Oils, tallow and wax	100,980,000
Tea	104,570,000
Hides, skins, &c.	65,816,000
Seeds	45,544,000

	1942.	1943.
Imports from U.K.	£556,000	£1,153,000

Maritime Customs.—The Chinese Maritime Customs consists of about 1,000 Europeans, a large proportion of whom are British subjects, and some 8,000 Chinese. By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. In addition to the collection of dues at the Treaty Ports, this service is responsible for the payment of the Indemnities and foreign Loans secured on the Customs; it also manages the Light-house Administration, is closely associated with conservancy operations, and keeps a small fleet of cruisers to enforce its regulations.

COMMUNICATIONS.—Of the total area of China about half consists of table lands and mountainous districts where communications and travel are generally difficult and dangerous, the highest point being *Minya Konka* (24,900 ft.) about 150 miles west of Chungking. To open up sea communications from the south-west the *Burma Road* over 770 miles in length from Lashio, Burma, to Kunming in Yunnan was constructed in 1937-39. The road was the chief highway for war supplies to China, until cut by the Japanese in February, 1942; the success of the Allies in Burma in 1945 restored the use of the road and of communication between

Yunnan and Burmese ports. Motor lorries perform the journey in seven days, in contrast with the difficult and lengthy pack-mule transit before the road was constructed. A new road is in course of completion from a point in Assam to join the old Burma Road in the province of Szechwan. Another motor road to connect Szechwan with Sinkiang was under construction before the outbreak of the Sino-Japanese war, and there is motor road and railway connexion between Chungking and French Indo-China. Owing to the increasing number of American-built motor vehicles the National Government adopted (in October, 1945) driving on the right of the road. In districts not served by roads the principal means of communication from E. to W. is afforded by the rivers, of which the principal are the Yangtse (3,400 miles), Hoangho (2,600), Yellow and Si Kiang (1,650), and from N. to S. by the Great Canal.

Railways.—The length of the railways is less than 8,000 miles, inclusive of the Manchurian lines, or less than one-fifth (per 100 sq. miles) of those available in Turkey.

Shipping.—The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtse. In 1940 the total tonnage of the 31,891 ocean vessels entered and trade and on the Yangtse. In 1940 the total tonnage of the 31,891 ocean vessels entered and cleared at Chinese ports was 23,675,600 tons.

Post Office.—The Chinese Post Office was established by Imperial Decree in 1896 and placed in the hands of Sir Robert Hart, the great Inspector-General, who developed it on modern lines. It remained a branch of the Maritime Customs until the death of Sir Robert Hart in 1911, when it was transferred to the Ministry of Communications and a Foreign Co-Director. Letters can be sent all over China at the uniform rate of 5 cents per 20 grammes. The number of Post Offices and Agencies (1943) was over 70,000. In 1937-1938, 580,000,000 postal packets and 5,000,000 parcels were handled. There is a flourishing Post Office Savings Bank with deposits (1936) exceeding \$38,000,000.

Telegraphs connect Peiping with Europe and Tibet and the line being extended to Lhasa. There are about 53,000 miles of land lines and several high-power wireless installations. Telephones, municipal and long-distance, are in general use in the settled and trade areas, and wireless telephony has been installed in the large centres.

OUTLYING TERRITORIES.

Manchuria—estimated area 500,000 square miles; estimated population (1940) 43,000,000. In 1939 the population was estimated at Chinese and Mongols 38,000,000, Japanese 700,000, Koreans 1,250,000, others 100,000.

Manchuria consists mainly of fertile agricultural land, and about half the cultivable land is worked, principally under soya beans and other pulse, kaoliang (the main food of the people) millet, maize, wheat and rice; cotton and tobacco are also grown; wool and furs are largely exported, and lumbering is an important industry. Mineral products include salt, coal, iron ore, lead, copper, gold, aluminium shale, and manganese. Apart from the Kwantung Leased Territory, factories have been established in large numbers at Mukden and at Newchwang and elsewhere for the manufacture of a wide range of home-consumed products, including textiles, beer, and metal products. There are important flour and oil mills at Harbin and other towns. At Anshan and Fushun, near

Mukden, there are important steel and shale oil factories. At Fushun and Supingkuo coal liquefaction plants have started production.

The South Manchuria and Manchoukuo State Railways have a total length of approximately 6,000 miles.

The principal articles of export are soya beans, bean cake, coal, millet, ground nuts, maize, sulphate of ammonia, hemp seed, salt, bean oil, bristles, skins, perilla seed, wild raw silk and pig iron. In 1938 restrictions were placed on the export of many articles, including wool and furs, and these have been followed by further stringent measures of trade and exchange control. The principal imports are flour, cotton fabrics, tobacco leaves, raw cotton, gunny bags, sugar, iron and steel, vehicles, machinery and tools, silk goods, electrical appliances, paper, rice, chemicals, timber, boots and shoes, alcoholic drinks and table waters, sea products and woolsens.

The principal towns are: Mukden, with a population estimated in 1939 at 834,703, Harbin (517,130), HSINKING, the capital (425,270), Ψ Antung (220,587), Kirin (138,910) and Ψ Newchwang (165,918). Ψ Dairen, in the Kwantung peninsula, is the most important port for Manchurian trade, the chief ports in Manchuria itself being Ψ Newchwang (Yingkow), Ψ Antung and Ψ Hulutao. Three ports are being constructed in North Korea which will greatly improve communication between North Manchuria and Japan.

Mongolia—estimated area about 1,360,000 square miles—population 3,000,000 to 5,000,000 (of whom the greater number are Buddhists).

In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognised as an Autonomous Republic. Negotiations with Russia, after the 1917 revolution, led to an alliance, and by Treaty (May 31, 1924) the U.S.S.R. acknowledged the suzerainty of China over Outer Mongolia.

Outer (North-West) Mongolia covers an area of about 360,000 square miles, and consists of an elevated plateau bounded by the Russian Altai range (N.W.), the Sayans (N.E.), the Kentei (S.E.), and the Ektagh Altai (S.W.). The plateau contains many lakes and is watered by numerous rivers, among which are the headwaters of the Yenisei, the Irtysh and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen). The exports are wool, hides, skins, and gold.

The Capital of Outer Mongolia is Ulan Bator (Ulan-Bator-Khoto, "Town of the Red Knight"); other centres are Uhasutai, and Koldo, of importance as trading posts on the main caravan routes. Part of Outer Mongolia has declared itself independent of its suzerain as the Republic of Tannu Tuva. The districts affected lie between the Sayan and Tannu Ola ranges, the capital of the Republic being Chem Belder (or Krasny, "Red Town").

Inner Mongolia covers an area of about 1,000,000 square miles and includes the Gobi ("Desert"), or *Sa-shuo* ("Sand Desert"), which covers nearly one-third of the total area, and in the extreme south-east the Ordos Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwang-ho River. In the north-east of Inner Mongolia rises the Kwantun, which flows into the Dalai Nor in Manchuria. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The *wool* industry (as in North-West Mongolia) is of importance, and the raising and the breeding of camels, and the transport, in order to supply

the caravan routes from China to Siberia. The centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobi, the general direction of the caravan routes being from south-east to north-west. The principal centres are: Kalgan, Kuku-khoto, Kuku-erghi, Dolon-Nor and Biru-khoto. In the north-east, Kera-lun (on the river of that name) is a junction of the southern routes from the Chinese province of Pechili and the western route from Urga, in N.W. Mongolia.

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma, but is separated therefrom by the Himalayas. The area is estimated at 453,000 square miles with a population 3,000,000. About one-fifth of the male population are monks and polyandry is common. There is an army with an establishment of 10,000 all ranks, consisting of infantry serving on a militia basis and armed with modern weapons. India imports from Tibet wool, borax, salt, and musk; musk, horn and herbs are sent to China. The imports are chiefly cotton and woollen goods, grain, hardware, glass, sugar, biscuits, dried fruits and tobacco, with silver bullion and coined rupees to balance the excess of exports. The Indian rupee is the coinage of Tibet, with a Tibetan paper money (*Tranka*). 25 trankas = 1 rupee. Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces. Under the Anglo-Chinese Sikkim Convention of 1890 a trade mart was opened at Yatung; but as the Tibetans persistently disregarded the Convention, a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on August 3, 1904. A new Convention was signed (Sept. 7), providing for the erection of boundary pillars between Sikkim and Tibet; for three trade marts, with British and Tibetan agents; for unrestricted traffic by existing routes; and for payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (April, 1906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognized the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec. 1905, the ruler of Tibet, the Tashi Lama, visited India. The Dalai Lama, who fled before the British advance on Lhasa, returned to Tibet in Jan., 1910. The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb., 1912, the Dalai Lama again fled to India, pursued by Chinese troops. He was then deposed by the Chinese Emperor. The British Government refused the Dalai Lama's appeal for their intervention, but allowed him to remain at Darjiling. He left India in June, 1912, for Lhasa, where sharp fighting occurred between the Chinese and Tibetans, the former being worsted. In August, 1912, the British Minister at Peking

presented a Note to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed, and representatives of the British, Chinese and Tibetan Governments met in conference at Simla in Oct., 1913, to discuss the relations between the three countries. A convention, the terms of which have not been made public, was initiated by the three representatives, but the Chinese Government have so far refused to ratify it. A new Dalai Lama, a boy, was installed at Lhasa, on February 22, 1940.

Chinese Tur'istan (or *Sin'istan*) has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes *Zhetysay* and Chinese *Tartary*, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Kashgar and Urumchi.

The *Paracels*, a group of islets and reefs in the South China Sea (about 150 miles E. of Cochon China) and the *Pratas*, a cluster of islands to the S.E. of the Paracels, are Chinese dependencies.

CAPITAL OF THE CHINESE REPUBLIC, Chungking. Population (1943), 880,000. The seat of Government was transferred from Peiping (Peking) to Nanking in 1928 and during the Sino-Japanese War it was removed to Hankow. After the fall of Hankow (October, 1928) the Government removed to Chungking, in Szechwan, about 1,500 miles from the coast.

Nanking, principal city in the province of Kiangsu, and the seat of the provincial government of Kiangnan (embracing the three provinces of Kiangsu, Kiangsi and Ngan-hui). About 1000 A.D. it was named Kiang-nan, but in 1368 was changed to Nanking ("Southern Capital"). The city is built on the south bank of the Yangtze River, about equidistant from Canton and Peiping, and is connected by railway (192 miles) with Shanghai. *Peiping*, the former capital, had an estimated population of 1,300,000 in 1921.

Shanghai, before the Japanese occupation, comprised (a) the *International Settlement* administered by the Shanghai Municipal Council; (b) the *French Concession*, an independent administration; and (c) the *Shanghai City, Chapei* and *Nantao* areas surrounding these settlements with a total population of 3,550,376.

The population of the principal ports and trade marts is estimated as follows:—*Amoy*, 250,000; *Antung* (100,000); *Canton*, 870,000; *Chang-sha*, 700,000; *Chefoo*, 250,000; *Chingkiang*, 220,000; *CHUNGKING*, 700,000; *Foochow*, 400,000; *Hankow* (including *Wuchang* and *Hanyang*), 800,000; *Ichang*, 110,000; *Mengtsz*, 200,000; *Nanking*, 1,300,000; *Ningpo*, 300,000; *Shanghai*, 3,550,376; *Shasi*, 150,000; *Soochow*, 300,000; *Swatow*, 200,000; *Tientsin*, 1,400,000; *Tsingtau*, 400,000; *Wansien*, 300,000; *Wenchow*, 700,000; *Wuchow*, 100,000; *Wuhu*, 140,000.

FLAG: Red, with blue canton bearing a white sun.

BRITISH EMBASSY, CHUNGKING.

Ambassador Extraordinary and Plenipotentiary.

His Excellency Sir Horace James Seymour, K.C.M.G., C.V.O. (1942) £7,750
Counsellor, G. A. Wallinger (acting).

1st Secretaries, H. M. Eyres; B. E. F. Gage (acting).

2nd Secretary, R. G. A. Etherington-Smith.
Chinese Secretary, G. V. Kibon.

Asst. do., J. F. Ford.

Counsellor (Commercial), J. C. Hutchinson, O.B.E.

Commercial Secretaries (local rank), Capt. H. E. Watterson; J. T. Asquith.

Naval Attaché, Capt. E. W. Billyard-Leake, D.S.O., R.N.

Military Attaché, Maj.-Gen. E. C. Hayes.

Assistant do., Maj. E. J. C. Cowell; Maj. K. E. F.

Miller, M.B.E.; Maj. O. C. T. Dykes; Capt.

J. H. G. Cooper; Lt. D. Campbell.

Air Attaché, Wing-Comdr. J. Warburton, R.A.F.

Assistant Air Attaché, Group Capt. G. Bartholomew; Wing-Comdr. L. W. Ansell-O'Gorman.

Chaplain, Canon G. Allen.

Accountant, W. C. Johnstone.

Archivist, A. Veitsch.

BRITISH CONSULAR OFFICES.

Chungking—*Consul-General*, C. A. Whitmore, O.B.E.

" *T'ia*—*Consul*, F. A. Nixon.

Kashgar—*Consul-General*, M. C. Gillett.

Kweilin—*Consul*, C. B. B. Heatcote-Smith (acting).

" *Vice-Consul*, C. W. Martin.

Yunnan-fu—*Consul-General*, A. G. N. Ogden, O.B.E.

" *Consul*, E. B. Boothby.

" *Vice-Consul*, D. Heugh.

BRITISH COUNCIL—*Principal Representative in China* (*Chungking*), Professor P. M. Roxy, LL.D.

British Council Cultural Scientific Office, Chungking.
In charge, Dr. J. Neudham.

BRITISH CHAMBERS OF COMMERCE—Before the outbreak of the Sino-Japanese war there were British Chambers of Commerce at *Amoy*, *Canton*, *Chefoo*, *Chungking*, *Foochow*, *Hankow*, *Shanghai*, *Swatow*, *Tientsin*, and *Tsingtau*.

Peiping, distant 11,770 miles; transit (Peace Time), 39 days (or by Siberian Railway 13 to 14 days).

COLOMBIA.

(República de Colombia.)

President (1946–50), Señor Dr. Don Alberto Lleras Camargo, assumed office Aug. 7, 1945.

Minister of Foreign Affairs, Señor Dr. Don Fernando Londoño.

EMBASSY IN LONDON.

63 Cadogan Square, S.W.1.

Ambassador Extraordinary and Plenipotentiary, His Excellency Señor Dr. Don Jaime Jaramillo Arango (17. v. 44).

1st Secretary, (vacant).

2nd Secretary, Señor Dr. Don Eduardo Nieto Calderon.

Civil Attaché, Señor Don Tomás Jaramillo; Señor Don Luis Robledo.

Consulate-General, 63 Cadogan Square, S.W.1.
Vice-Consul in Charge, Señor Dr. Don Luis Sanín Aguirre.

Consul-General in Liverpool, Señor Don Alvaro Holguín y Caro, North House, North John Street.

Consul in Glasgow, Señor Don Henrique Molano Campuzano, 219 St. Vincent Street.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 79° W. long., with an estimated area of 461,606 square miles, and a population (1942) of 9,523,000, of whom more than one-half are whites and half-castes.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Quesada established a government of certain coastal communities under the name of New Granada, which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1821. In 1829 Simon Bolivar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic. There is a Congress of two Chambers, Senate (56 members) and Chamber of Deputies (112 members).

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic.

The principal rivers are the Magdalena, Cauca, Atrato, Caqueta, Meta, Putumayo and Patia. The Patia flows through the famous *Minima Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guatara) is spanned by the Rumbhaca Arch, or *Inca's Bridge*, of natural stone. On the Funza is the Great Fall of *Taquendama*, 480 feet in height.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; petroleum is available in enormous quantities, and in the year 1940 the output was 25,555,859 barrels; it is possible that new oilfields will shortly be opened near the Venezuelan frontier. The principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption, consist of woollen and cotton stuffs.

The Navy consists of 2 destroyers and 5 gunboats, with personnel 1,500; the standing army consists of about 10,000 men. Railroads are in their infancy, about 2,104 miles being open in 1939, with 22,491 (1938) miles of telegraph; there are also (1939) 4,125 miles of national roads, in addition to departmental (some macadam), and "dirt" roads (passable by motors in dry weather only). There is a daily passenger and mail service between Bogota and Barranquilla and a bi-weekly service in concert with Pan-American Airways to the U.S. New York can be reached in 2 days and mail is delivered in England 6 to 9 days after leaving Bogota. There are wireless stations at Barranquilla, Bogota, Medellin, Cali and Cucuta.

Roman Catholicism is the established religion, but all religions are tolerated.

Language and Literature.—Spanish is the language of the country and education has been free since 1870. Great strides have been made in reducing illiteracy and it is estimated (1945) that about 60 per cent. of those over 10 years of age can read and write. In addition to the National University at Bogota (founded in 1572) there are universities in the departments of Medellin, Cartagena, Popayan and Nariño. There is a flourishing press in urban areas and a national literature supplements the rich inheritance from the time of Spanish rule.

COSTA RICA.

(Republica de Costa Rica.)

President (1944-1948), Licenciado Teodoro Picado Michalsky, born 1899, assumed office May 8, 1944.
Minister of Foreign Affairs, Don Julio Acosta Garcia.

LEGATION IN LONDON.

Minister in London (vacant).

Consulate-General, 95 Gresham St., E.C.2.

Consul-General (vacant).

Consul, John C. Eggers.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of about 23,000 English square miles, and a population (Jan. 1, 1944) of 706,596. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824-1839 it was one of the United States of Central America. Under the Constitution of 1927 there is a single chamber Congress of 44 members, elected for 4 years.

The coastal lowlands by the Caribbean Sea have a tropical climate but the interior plateau, with a mean elevation of 4,000 feet, enjoys a temperate climate. The capital is 103 miles from the Atlantic and 72 miles from the Pacific.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, cocoa and beans, the soil being extremely fertile.

The chief ports are Limon, on the Atlantic coasts, through which passes the bulk of the important banana trade with the U.S. and U.K., as well as by far the larger part of the other exports and imports; and Puntarenas on the Pacific coast. In 1939 731 vessels (1,488,693 tons) entered at Costa Rican ports. About 400 miles of railroad are open. In 1939 there were 450 post offices and 196 telegraph offices (17 wireless), with 1,903 miles of telegraph and telephone line. A considerable amount of English capital is embarked in the Republic.

Spanish is the language of the country. Education is compulsory and free, but it is from the leisured class alone that the executive, legislature, and judiciary are recruited.

FINANCE.

1943.

Ordinary Revenue.....	Colones 50,400,000
Extraordinary do.....	29,900,000
Expenditure.....	80,800,000
Public debt (June 30, 1944):—	
External.....	144,000,000
Internal.....	73,300,000
Exchange Rate, Colon (nominally 25 Cents U.S.)	
fixed (January, 1937) at Colones 5.61 = \$1 U.S.	

TRADE.

1943.

Total imports.....	U.S. \$20,400,000
Total exports.....	12,200,000
Imports from U.K. (1943).....	£122,000
Exports to U.K. (1939).....	£349,280

The chief exports (1943) were coffee (U.S. \$8,000,000), bananas (U.S. \$2,124,000), cocoa (U.S. \$1,110,000), gold and silver bullion, skins and hides, fresh fruit and timber. The imports (in 1943, 61 per cent. from United States, 6 from United Kingdom) were cotton goods (U.S. \$2,710,000), mineral oil (U.S. \$1,000,000), hardware provisions, railway materials, machinery, paints, and general merchandise.

CAPITAL, San José, pop. (1941), 76,200; Cartago, 22,000; Ψ Limon, 18,000; Alajuela, 13,000; Heredia, 11,000; and Ψ Puntarenas, 8,741.

FLAG: Five horizontal bands, blue, white, red, white, blue (the red band twice the width of the others).

BRITISH LEGATION.

British Envoy Extraordinary, Minister Plenipotentiary S. G. Irving, C.M.G. (1943) (resident at Panama, q.v.).

Vice-Consul, A. Murray; R. Bray.

Port Limon—Vice-Consul, R. C. Johnston.

San José is 5,687 miles from London; transit direct 18 days; via New York, 20 days; Air Mails (via New York) 11 or 12 days from London.

CUBA.

(Republica de Cuba.)

President of the Republic (1944-48), Ramón Grau San Martín, born Sept. 13, 1887, assumed office, Oct. 10, 1944.

LEGATION IN LONDON.

33 Wilton Crescent, S.W.1 [Sloane 5814].

Minister in London, Señor Dr. Don G. de Blanck.

Attaché, Señor Don I. de Agramonte.

Consul, Señor Don Julio A. Brodermann.

Consul-General, Liverpool, Señor Don Antonio

Ros y Fernandez de Castro.

Consul, Glasgow, Señor Don Raoul Aenlle.

Vice-Consul, do., Señor Don Erasmo Pelles.

Consul, Belfast, Señor Don Juan E. Yero.

Cuba (the largest of the "West India" Islands) lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,778 sq. miles and a population of 4,499,952 (Dec. 31, 1940).

The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, 1762-1763, when it was returned to Spain in exchange for Florida.] The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1880 to 1886. The government of Spain was marked by a generally corrupt administration, complicated by internal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the 19th century in a fierce and blood-thirsty war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1904, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were

instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated, with a Congress of two Chambers, a Senate of 37 members elected for 9 years and a Chamber of 228 Deputies elected for 6 years. In 1933 a revolution was followed by provisional government until May, 1936, when a constitutional government was elected. A new Constitution drafted in 1940 was signed at Guaimaro on July 1 and promulgated in Havana on July 5. The general elections held throughout the island on July 14, resulted in a victory for Colonel Fulgencio Batista, the candidate of the Socialist-Democratic Coalition. Col. Batista assumed the Presidency on Oct. 10, when the new Constitution came into force.

Of the total area of 28,000,000 acres, there were (1941) 2,327,000 acres under sugar, about 500,000 acres under tobacco, sweet potatoes and bananas. Rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pineapples, &c.) flourish. The chief agricultural products of the island are sugar and tobacco; sugar crop (1944) 5,500,000 tons; tobacco crop (1943-4) 60,000,000 lb.; coffee (1943-4) 600,000 bags each 132 lb.; the chief product of the forests is mahogany, while cedar is also used for boxing the tobacco crop. The live stock includes about 5,000,000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

8,720 route miles of railroad are open (public service 3,059; private lines on plantations and in mining areas 5,651) and about 6,000 miles of telegraph line; there are about 2,200 miles of roads. The island forms an important zone in the services of Pan-American Airways and its subsidiary the *Cia Nacional Cubana de Aviación*.

Language and Literature.—Spanish is the language of the island but English is widely understood. Education is compulsory and free. The University of Havana was founded in 1728 but until its enlargement under American auspices in the first quarter of the twentieth century no great progress was made in secondary or higher education. Public libraries have been established and there is a flourishing daily press with wide circulations.

FINANCE.

	1943-4.	1944-5.
Revenue (Budget)...	\$119,150,000	\$140,000,000
Expenditure (Budget)	111,320,000	140,000,000
Public Debt (June 30, 1944):—		
Internal.....	77,200,000	
External.....	102,900,000	

Nominally \$=Peso=U.S.\$1. The U.S.\$ has, however, been quoted at a premium of about 20 per cent. in terms of Cuban currency during 1943.

TRADE.

	1943.	1944.
Imports.....	\$177,400,000	\$208,600,000
Exports.....	350,600,000	427,100,000

In 1943 U.S.A. sent 78 per cent. of imports and received 86 per cent. of the exports.

The exports are principally sugar, molasses and tobacco; the imports are food and beverages, textiles and machinery.

GENERAL. Havana (pop. December 31, 1938, 1,000,000), other towns are Santiago (107,125), Camaguey (128,105), Santa Clara (99,509), Pinar del Rio (92,258), and Matanzas (72,826).

Clara (99,509), Pinar del Rio (92,258), and Matanzas (72,826).

FLAG: Five horizontal bands, blue and white (blue at top and bottom) with red triangle, close to staff, charged with silver star.

EMBASSY IN LONDON.

8 Grosvenor Place, S.W.1.

Czechoslovak Ambassador in London, His Excellency Maximilian Lobkowitz (May 13, 1942).
Residence, 23 Wilton Crescent, S.W.1.
Counsellors, M. Viktor Jansa; M. Karel Vanek; M. Otakar Votisek.
Military and Air Attaché, Col. Josef Kalla, O.B.E.
Assistant Military Attaché, Major Vladav Velinsky; 1st Lt. Pavel Podolier.

Czechoslovakia, formerly part of the Austro-Hungarian Monarchy, declared its independence on Oct. 28, 1918 (Czechoslovak Independence

Day), the territory thus affected having an area of 55,500 square miles with a total population of 15,300,000, reduced by 5,000 square miles and 800,000 persons under the treaty of June 29, 1945, ceding Ruthenia to U.S.S.R.

Province	Area.	Population.
Bohemia	20,000	7,000,000
Moravia and Silesia	10,500	4,000,000
Slovakia	20,000	3,500,000
Total	50,500	14,500,000

In September, 1938, Adolf Hitler demanded the cession of the Sudeten district. On Sept. 29, 1938, a Four Power Conference at Munich acquiesced in the annexation of the territory, on the understanding that no further demands would be made, but on March 14, 1939, Nazi troops invaded Czechoslovakia, in flagrant violation of the terms of the Munich Conference, and two days later Adolf Hitler proclaimed that Czechoslovakia had "ceased to exist" and had become a Protectorate of the Reich under the names Bohemia and Moravia, with Dr. Hacha as President of the Nazi-controlled government in Prague and von Neurath as "Protector" of Bohemia and Moravia.

CZECHOSLOVAK NATIONAL COMMITTEE.

On July 22, 1940, Great Britain recognized the Czechoslovak National Committee set up in London as a provisional Czechoslovak Government, and on July 18, 1941, Gt. Britain fully recognized the Czechoslovak Government.

On July 18, 1941, an agreement was signed in London between the governments of U.S.S.R. and the Czechoslovak Republic restoring diplomatic relations, recognizing the Czechoslovak Government set up in London, authorizing the formation of Czechoslovak contingents on Russian territory and mutually pledging the contracting parties to joint action in combating Hitlerite Germany.

On Dec. 19, 1941, the Czechoslovak government issued a declaration to the effect that it did not recognize any transfer of Czechoslovak property into foreign hands.

On Aug. 5, 1942, the British government declared that they regarded themselves free from any engagements in respect of the Munich Agreement, and that they would not be influenced by any changes effected on Czechoslovak territory in or since the year 1938.

During their triumphal progress in the European War Soviet forces captured Bratislava, capital of Slovakia, on April 4, 1945, and after the unconditional surrender of Germany on May 8, 1945, steps were immediately taken to inaugurate the Second Republic of Czechoslovakia.

Language and Literature.—Czech and Slovak are the official languages but the literature is mainly Czech in Bohemia, Moravia and Silesia. The Reformation gave a widespread impulse to Czech literature, the writings of Jan Hus (who was martyred in 1415) familiarising the people with Wyclif's teaching. This impulse endured to the close of the seventeenth century when Amos Komensky, or Comenius (1592-1670) was expelled from the country. Under Austrian repression, and with the outlawing of the national language, there was a period of stagnation until the national revival in the early nineteenth century. Modern prose drama and fiction are represented by several authors of international reputation, notably Jaroslav Hilbert (born 1871), Viktor Dyk (1877-1931), F. X. Svoboda (born 1860), R. M. Capek-Chod (1860-1927), Arnost Dvůr

(born 1880), and Karel Capek (born 1890). Liberty of the Press ceased with the violation of Independence in 1939. The restoration of the Republic should see the re-establishment of a prosperous and influential press and to the re-appearance of many of the 50 daily newspapers formerly published in Prague, Brunn, Plzen, Olomouc, Moravia, Ostrava and Bratislava.

Education.—Before the Nazi invasion there were about 15,000 public and private elementary schools, with about 1,800,000 pupils and about 400 secondary and technical schools with 160,000 students. The Czech university at Prague (8,000 men and 2,500 women undergraduates in 1938) was founded in 1348; there is also a German university at Prague; a Czech university at Brno and a Slovak university at Bratislava.

Finance.—Pre-war revenue (1938) in the currency then in use Czechoslovak Koruna (Crown) of 100 heller was Kč10,120,000 with expenditure Kč10,117,000. In October, 1945, currency reform was introduced and a new coinage KCS (Koruna of Czechs and Slovaks) adopted, with exchange value fixed at 50KCS = 1 U.S. dollar; 200KCS = £1 sterling.

Trade.—Pre-war trade (1937) in the old currency showed imports valued at Kč11,000,000,000 and exports at Kč12,000,000,000.

CAPITAL. Prague (Praha), on the Vltava (Moldau) the former capital of Bohemia with a population (1930) of 848,828. Other towns are Brno (Brünn) in Moravia (265,000), Bratislava (Pressburg), where the Danube forms the southern boundary of the Republic (124,000), and Plzeň (Pilsen) in Bohemia (115,000).

BRITISH EMBASSY.

Thunovská ulice 12, Prague III.

Ambassador Extraordinary and Plenipotentiary, His Excellency Philip Bowyer Bouverie Nichols, C.M.G., M.C. (May 13, 1942).
Commercial Counsellor, J. W. Taylor, M.B.E.
Archivist, Miss P. M. Macpherson.

DANUBE COMMISSIONS.

The *International Danube Commission* (Headquarters—see below—Palais Igumano, Kralja Aleksandra, Belgrade) was created by the Treaty of Versailles (1919). The Commission so created maintained the liberty of navigation and the equal treatment of all flags of the Danube from Ulm (Württemberg) to Braila (Roumania) and its international system, obtaining funds for administrative expenses from equal contributions of all the States represented. From Braila to Sulina (the mouth of the Danube), the navigation was controlled by the *European Commission of the Danube* (Headquarters, Galatz), created by the Treaty of Paris, 1856, after the Crimean War, the Commission containing in 1939 representatives of Gt. Britain, France, Italy, Roumania, Yugoslavia and Germany. The river is connected by canals with the Main, a tributary of the Rhine (Ludwig Canal); a new and deeper canal is under construction to permit the passage of larger craft than at present, thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea. The total length of the Danube is about 1,738 miles, and ocean-going vessels reach Braila, where trans-shipment into river barges is necessary. A pilotage and river-improvement service was maintained by the later-

national Commission at the Iron Gates (head-quarters, Orsova), the expenses being met by shipping ducs.

The chief towns on the Danube are the Black Sea port of Sulina, with Galatz (confluence of the Sereth), Braila, Turnu-Severin (where a bridge is projected which will link Roumania with Yugoslavia) and Orsova (Iron Gates), in Roumania; Ruschuk, Vidin and Lom Palanka, in Bulgaria; Belgrade, the capital of Yugoslavia; Buda-Pest, the capital of Hungary; Bratislava in Slovakia; Vienna (the former seat of the Commission) and Linz, in Austria; Passau and Regensburg, in Bavaria; and Ulm, in Württemberg.

The financial situation of the European Commission is shown below:—

	Gold francs.
Receipts during 1938	2,663,735
Expenditure, 1938	2,672,804

DENMARK.

(Kongeriget Danmark.

 Consul-General and Commercial Counsellor, Chr. M. Rottbøll.
 Commercial Secretary, Wegner Clausen.
 Vice-Consul, C. Jacobsen.

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Fünen, Lolland, &c., the peninsula of Jutland, and the outlying island of Born-

holm in the Baltic. Denmark is situated between 54° 34'—57° 45' N. lat., and 8° 5'—15° 12' E. long., with an area of 16,576 square miles, and a population (Nov. 5, 1940) of 3,844,000, estimated (Dec. 31, 1943), at 3,973,000. In 1943 there were 84,346 births (21.4 per 1,000 inhabitants), 37,982 deaths (9.6 per 1,000) and 36,738 marriages (9.3 per 1,000). Infant mortality (1943) was 45 per 1,000 live births.

The throne is hereditary in the house of Schleswig-Holstein-Sonderburg-Glücksburg. There is a Diet (Rigsdag) of two Chambers, the Senate (Landsting) of 76 members, elected for 8 years, and the Folketing of 149 members, elected for 4 years.

In 1864, Denmark was attacked by Prussia and Austria and deprived of Schleswig-Holstein (Prussia taking the whole territory after a further war with Austria in 1866). At the conclusion of peace between the Central Powers and the Allies in 1919, the question of Schleswig-Holstein was subjected to a plebiscite of the inhabitants, and North Schleswig became part of Denmark.

On April 8-9, 1940, German forces invaded Denmark without effective opposition, and occupied the capital and the country. Copenhagen was liberated by the Allies, May 5, 1945.

One-third of the population live exclusively by agriculture, and about one-half by manufactures and trade. The chief products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter; manufactures are, for the most part, for home consumption.

Sea-going mercantile marine (1937) 511 steamers, with a gross tonnage of 570,000. There are (1937) 5,061 kilometres of railway and 14,306 km. of telegraph line.

EDUCATION is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen (founded in 1479) and Aarhus (1928).

LANGUAGE AND LITERATURE.—The Danish language is akin to Swedish, with an admixture of German words. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian Anderson (1805-1875), Georges Brandes (1842-1927), with Henrik Pontoppidan and Karl Gjellerup, who shared the Nobel Prize for Literature in 1917, and Johannes V. Jensen, who received the same award in 1944. In 1940 there were 93 daily newspapers in Denmark, of which 12 were published in Copenhagen.

FINANCE.

	1945-46.
Revenue (Budget)	Kr. 985,800,000
Expenditure (Budget)	1,129,300,000
Debt (March 31, 1944) :—	

Internal

Internal	Kr. 2,328,700,000
External	579,000,000

Kr. = Krone: At par, 18.59 Kroner = £1. Exchange during 1939, 20.50 to 22.40 Kr. = £1. From January 1 to April 8, 1940, rate was 18.13 Kr. to 20.63 Kr. = £1. In January, 1942, rate was fixed by German invaders at Kr. 1 = 0.522 Reichsmark.

TOTAL TRADE.

	1943.
Total Imports	Kr. 1,225,000,000
Total Exports	1,338,000,000

The principal imports are coals, minerals, oils, timber, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, coffee, tea, cereals, feeding stuffs, oil seeds, and colonial produce. The chief exports are agricultural produce, including barley, bacon, hams, butter, eggs, hides, skins, horses and cattle.

CAPITAL, ψ Copenhagen. Population (1935), 666,269 (with suburbs, 843,168). Other centres are ψ Aarhus, 90,898; ψ Aalborg, 48,132; ψ Odense, 76,116; ψ Horsens, 20,856; ψ Randers, 30,254; ψ Viborg, 30,714; ψ Fredericia, 22,000; ψ Kolding, 24,000; and ψ Vejle, 25,000.

FLAG: Red, with white cross.

BRITISH LEGATION.

(Bredgade, 26, Copenhagen.)

British Envoy Extraordinary and Minister Plenipotentiary, His Excellency Alec Walter George Randall, C.M.G., O.B.E. (1943)..... £2,000
Thorshavn (12 cc)—I'ac-Consul, R. Brockie.

Outlying Possessions.

The outlying possessions and colonies of Denmark have about 43,000 inhabitants. The FAR ψ , or Sheep islands (540 sq. m., pop., 1935, 25,700), capital, Thorshavn, are governed by a *Lagting* of 25 members, and send representatives to the *Landsting* and *Folketing* at Copenhagen. Imports from U.K. (1943) £809,000. GREENLAND (ice-free portion about 34,000 sq. m., total area about 838,000 sq. m., population, 1930, 16,000), is divided into 3 provinces (South, North and East). South Greenland (cap., Godthaab) has a *Landsraad* of 12, and North Greenland (cap., Godhavn) of 11 members. The trade of Greenland is a Government monopoly. Imports from U.K. (1943) £2,000. In April, 1911, the United States of America acquired certain rights to establish air bases in Greenland.

Governor of Faroe, Aage Hilbert, appointed 1936.

Copenhagen, distant 728 miles; transit, 36 hours.

DOMINICAN REPUBLIC.

(República Dominicana.)

President, Generalissimo Rafael Leonidas Trujillo, born Oct. 24, 1891; assumed office Aug. 16, 1942.

LEGATION IN LONDON.

67 Eaton Place, S.W.1.

Envoy Extraordinary and Minister Plenipotentiary in London, Señor Don Andres Pastoriza (August, 1945).

The Republic of Santo Domingo, formerly the Spanish portion of the island of Hispaniola, is the oldest settlement of European origin in America. The island was discovered by Christopher Columbus in December, 1492, who named it "La Española" or "Little Spain." In 1496 he ordered his brother, Bartholomew Columbus, to found the capital at the mouth of the Ozama River, on the south of the island, which city he called Santo Domingo. The island immediately became the objective for adventurous Spanish colonists, who exploited the native Indians almost to the point of extermination for the sake of the gold found in the streams. African negroes were imported for the sugar and other plantations both in Santo Domingo and Haiti, and this accounts for the present large proportion of negro blood in both countries.

In 1821 Santo Domingo broke away from Spain and declared itself independent, but in 1822 it was invaded and subjugated by its negro neighbours from the west, the Haitians. The latter were driven out on Feb. 27, 1844, when the Dominican Republic was definitely proclaimed by the natives, and has so remained except for an interregnum of two years (1861-1863) when the Spaniards again took possession, but were eventually forced to withdraw.

On November 29, 1916, American military forces landed in Santo Domingo and a Military Government was proclaimed. From October 21,

1922, a Provisional Dominican Government was in office until July 12, 1924, when a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the Customs and the redemption of foreign obligations, which continue to be administered by an American official. On Sept. 24, 1940, a new convention was signed at Washington; this provides for the withdrawal of the U.S. Receiver-General, the Customs to be collected by the Dominican Government, and the whole public revenue to be deposited in an agreed bank, the service of the debt being recognized as a first charge on the deposit. Congress consists of a Senate of 16 members, elected for 4 years, and of a Chamber of Deputies of 52 members, also elected for 4 years.

The Dominican Republic comprises an area of about 19,322 square miles, with a population of 1,826,407 (Dec. 31, 1942). An extensive system of motor highways, totalling nearly 900 miles of first-class roads, has been built, and as a result of recent repairs, they are now in excellent condition for motoring. There are about 1,400 miles of second-class roads and cart roads. The streets of the capital (the name of which was changed in January, 1935, from Santo Domingo to Ciudad Trujillo) have been repaired and asphalted. There is a direct road from Ciudad Trujillo to Port-au-Prince, the capital of Haiti, enabling the journey from capital to capital to be made in one day. There are about 150 miles of public railway, and a telephone system connects practically all the towns of the republic. There are 8 wireless stations, and the All America Cable Company maintains an efficient service with all parts of the world. Radio Communications of America have a wireless station in Ciudad Trujillo.

Spanish is the language of the Republic and education has made considerable progress under American guidance. Native literature has not yet produced authors of world-wide reputation.

Sugar, cocoa beans and coffee are the most important crops, and tobacco is grown in fair quantity. Other products are mahogany, furniture woods, lignum-vitæ, log-wood, divi-divi, cotton, wax, honey, maize, hides, turtle-shell and starch.

FINANCE.

	1943.	1944.
Revenue.....	\$13,300,000	\$15,700,000
Expenditure.....	13,300,000	15,700,000

Debt (Sept. 1, 1942)—

External, Funded.....	\$14,056,000
Internal, Floating.....	3,000,000
\$ = U.S. Dollar.	

TRADE.

	1942.	1943.
Imports.....	\$11,500,000	\$14,300,000
Exports.....	20,000,000	36,100,000

In 1943 U.S.A. sent 80 per cent. of the imports and received 34 per cent. of the exports; U.K. sent 4 per cent. and received 68 per cent. of the exports.

British trade is hampered by distance (as compared with the U.S.), by lack of resident British merchants and industrial undertakings, and by indifferent and slow steamship services from Europe.

The chief imports in 1943 were cotton goods, iron and steel manufactures and machinery, chemicals, jute bags and sacks and motor spirit; the chief exports were sugar, cocoa, coffee and molasses.

CAPITAL, Ciudad Trujillo (formerly called Santo Domingo), on the Ozama, founded in 1496 by Bartolomeo (brother of Christopher) Columbus; population (1935) 71,297. Santo Domingo City

was partially destroyed by hurricane, September 3, 1930; rebuilding proceeded rapidly and the effect of the storm have practically disappeared. Other cities, are Santa-Isabel de los Caballeros (34,000) and San Pedro de Macoris (20,000).

FLAG : Red and blue, with white cross.

BRITISH LEGATION.

(23 Calle 19 de Marzo, Apartado No. 596, Ciudad Trujillo.)

British Envoy Extraordinary and Minister Plenipotentiary and Consul, C. F. W. Andrews (Feb. 27, 1944).

Naval Attache, Rear-Admiral (serving as Captain) H. B. U.S., C.M.G., C.I.F.

Military Attache, Major F. A. Sampson.

Air Attache, Squadron Ldr. C. J. Lewin, R.A.F.

BRITISH CONSUL OFFICES.

Barahona—Vice-Consul, C. Gordon.

Ciudad Trujillo—Vice-Consul, H. H. Gosling; H. G. G. Fray.

La Romana—Vice-Consul D'A. A. Wetherall.

Puerto Plata—Vice-Consul, D. Mc. C. Reid.

San Pedro de Macoris—Vice-Consul, Canon A. II. Beer, M.B.E.

BRITISH CHAMBER OF COMMERCE, Ciudad Trujillo.

Ciudad Trujillo is distant 4,600 miles; transit, 16 to 22 days.

ECUADOR.

(República del Ecuador.)

President of the Republic, Señor Dr. Don José María Velasco Ibarra, assumes office, June 1, 1944.

Minister of Government, Dr. C. Guevara Moreno.

Foreign Affairs, Señor C. Ponce Niequiquez.

Defence, Major Carlos Mancheno.

LEGATION IN LONDON.

21 Cavendish Square, W.1.

Minister in London, (vacant).

Chargé d'Affaires, Consul-General and Counsellor of Legation, Señor Don A. Ruiz, Arosemena.

Consuls at Liverpool, Birmingham, Hull, Glasgow, and Cardiff.

An equatorial State of South America, the mainland extending from lat. 1° 38' N. to 4° 50' S., and between 75° 20' and 81° W. long., comprising an area, reduced by boundary settlements (Jan. 29, 1942) with Peru, to about 226,000 sq. miles.

The Galapagos (Tortoise) Islands, forming the province of Colon, were annexed by Ecuador in 1832. The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 12 large and several hundred smaller islands with a total area of about 3,000 sq. miles and an estimated population of 1,000. The capital is San Cristobal, on Chatham Island. Although the archipelago lies on the equator the temperature of the surrounding water is well below equatorial average owing to the Antarctic Humboldt Current. The islands export guano and orchilla moss.

The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822). A new constitution is being framed. In the meantime that of 1906 has been adopted. A Presidential election was to have been held on June 4, 1946, but it was preceded by a revolt against the existing

government, and Dr. Ibarra, a banished ex-President, assumed the Presidency on June 1, 1944, and appointed a cabinet.

The Republic of Ecuador is divided into 17 provinces and one territory. It has a population (Jan. 1942) of 3,065,871, mostly descendants of the Spaniards, aboriginal Indians, and Mestizos. The territory of the Republic extends across the Western Andes, the highest peak of which is *Aconagua*, in the Chikara sector (22,970 ft.), the highest peaks in Ecuador being Chimborazo (20,702 ft.), Illimiza (17,405 ft.), Canchara (16,515 ft.), Cotacachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotacachi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,600 ft.), and Sincholaque (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

Its chief products are cocoa (40,000 metric tons in 1943), petroleum, rice, vegetable ivory, bananas, cotton, coffee, indiarubber, sugar, orchilla weed, straw hats and hammocks, bark, yams, tobacco, fruit, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. A railway connecting Guayaquil and Quito was opened in 1908. In October, 1926, an American Financial Mission arrived in the country and their recommendations were enacted as laws, but these have since undergone substantial reforms. A new customs tariff, prepared by the Mission, came into force on July 1, 1927. Several amendments were made to the Tariff in 1935 increasing the duty on numerous articles by 50 per cent., and surcharges are imposed on goods from countries with unfavourable trade balance. Preferential tariffs were also established. Further increases of duties have since been made.

In November, 1927, the Swedish Match Company of Stockholm secured the exclusive right to import and manufacture matches in Ecuador for a period of 25 years in return for a loan of 8,800,000 sucres, which sum was applied towards the establishment of a Mortgage Bank. Congress of 1931 rescinded this contract, and the monopoly is now administered direct by the Government. The loan was repaid in 1935 by a cash payment of 22 per cent. of the total debt in full settlement.

With the consent of the Ecuadorian government U.S. troops have established bases (Aug. 1942) in the Galapagos and on the Santa Elena peninsula, the westernmost part of the Ecuadorian mainland.

Language and Literature.—Spanish is the language of the country. The electorate of the House of Representatives is confined to adult male and female citizens who can read and write and in recent years considerable headway has been made in reducing the high figure of illiteracy. 4 daily newspapers are published at Quito and 6 at Guayaquil. Elementary education is free and compulsory. In 1940-41 there were 320,000 pupils at the 2,710 primary schools. The 3 Universities (at Quito, Guayaquil and Cuenca) had about 1,800 Students in 1940-41. There is a British Institute at Quito (Director, Kenneth G. Wilson, M.A.).

FINANCE.

	1945.
Revenue (Budget).....	Sucres 326,200,000

Consulate-General, 26 South Street, W.1.

Consul-General, Mohamed Aref Zulficar.

Vice-Consul, I. Tewfik; Abdel Hamid Zaki.

AREA AND POPULATION.—The total area of Egypt is estimated at 1,000,000 square kilometres (386,110 square miles), the inhabited area being only 35,168 square kilometres (13,578 square miles) with a population enumerated (Census of March 27, 1937) at 15,932,694 and estimated (Dec. 31, 1939) at 16,650,000. Of the total population in 1937, males numbered 7,947,193 and females 7,957,332. In 1942 there were 658,324 births and 494,358 deaths, giving a birth rate of 38.1 per 1,000 inhabitants and a death rate of 28.6 per 1,000. Deaths under 1 year were 168 per 1,000 live births.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, and (c) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberged (or St. John's Island). This territory lies between 22° and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is continuous with the Anglo-Egyptian Sudan. The western boundary runs from a point on the coast 10 kilometres N.W. of Sollim to the latitude of Siwa and thence due S. along the 25th meridian to the parallel of 22° N. (the N. boundary of the Anglo-Egyptian Sudan) at 'Uweinat Mountain. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of Aquaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aquaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *faddans* (12,431 square miles) and the area of lakes at 641,000 *faddans* (1,039 square miles), a total of 8,308,000 *faddans* (13,470 square miles).

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to its mouth. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 12 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of

depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the Oases, of which the principal, from S.E. to N.W., are known as Kharga, Bahariya, Farafra, Bahariya, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo, stand the Pyramids of Giza, of which the highest, the Great Pyramid, is 451 feet high. (A new pyramid, making 4 in all, was discovered by Prof. Selim Hassan in Feb. 1932). Close to the pyramids is the Great Sphinx, 189 feet long. In the Eastern Desert a great backbone of high and rugged mountains extends north-westwards from Abydos to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main wadis from well to well, and here and there are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestone plateau, which extends southward for about 150 miles and terminates in the great scarp of El Tih. South of El Tih the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. Springs and wells occur in fair abundance, mostly in the wadis, and running water (mostly brackish) is found at a few points.

of Damietta and Bahariya Coasts. (2) Including Siwa, Bahariya and Farafra.

Native Population.—There are three distinct elements in the native population of Egypt. The principal is the "Egyptian" element, i.e. a Hamito-

Semite race, known in the rural districts as *Tellahin* (*fellahin*—ploughman, or tiller of the soil). The *Fellahin* have been mainly Muhammadans since the conquest of the country in the 7th century, but there are altogether about 1,000,000 Coptic and Greek Orthodox Christians in Egypt. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts, of whom about one-seventh are real Bedouins, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated and of the Nile Valley and the Faiyūm. The third element is the *Nubian* of the Nile Valley between Aswān and Wadi-Halla, of mixed Arab and negro blood. The Bedouins and Nubians are Muhammadans.

Foreign Population.—At the Census of 1937 the foreign residents were 229,600, of whom 76,264 were Greeks, 56,462 Italians, 34,169 British, 24,332 French and Tunisians, and 38,373 others.

Religion.—At the Census of 1937 there were 24,552,695 Muhammadans, 1,699,186 Coptic and Greek Orthodox Christians, 204,784 other Christians (Protestant and Reformed Churches), and 62,953 Jews. The chief Muhammadan religious authorities in Egypt are the *Sheik el Gamel el Azhar* and the *Mufti el Di-yor el Masriya*.

Government.—From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 200 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811 and was eventually made hereditary governor of Egypt and the Sudan by a firman from the Sultan of June 1, 1841.

In 1882, a military revolt, headed by an officer of the Egyptian Army (*Ahmed Arabi Pasha*), assumed alarming proportions and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation until 1936 (see below).

During the War of 1914–18 a British Protectorate over Egypt was declared (Dec. 18, 1914) and Khedive Abbas Hilmi was deposed. He was succeeded by Hussein Kamel, with the title of Sultan, and died Oct. 9, 1917, being succeeded by his brother, Ahmed Fuad. The British Protectorate terminated on Feb. 28, 1922, and Sultan Ahmed Fuad was proclaimed King of Egypt. Following closely on the accession of the present King, Egypt became a sovereign state by the *Anglo-Egyptian Treaty*, signed in London (Aug. 26, 1936); the military occupation by British troops was terminated and Ambassadors were duly accredited at the Courts of St. James's and Cairo. Provision was made in the Treaty for a reconsideration of its terms in 1956.

The security of Egypt was threatened after the outbreak of war in 1939 and reinforcements were sent from Britain and the Dominions. Axis troops invaded Egypt in 1940 and fierce fighting ensued, with Allied victories and reverses, until the decisive victory in "The Battle of Egypt" (Oct.–Nov. 1942) drove the enemy out of the country.

As evidence of Egypt's gratitude for victory a total sum of £225,000 was subscribed to commemorate the battle of El Alamein. A sports

centre and club for United Nations' forces has been opened at Gezira, and a new village of 100 cottages, with hostels, schools and a hospital unit, intended primarily to benefit sufferers from tuberculosis, is being established at Enham, near Andover, Hampshire (England) to be known as Enham-Alamein.

Rulers of Egypt since 1811.

Name	Born.	Reigned.
Mohammed Ali (Fah) ..	1769 ..	1805-1848
Ibrahim (Fah) ..	1789 ..	1848
Abbas I ..	1813 ..	1848-1854
Said ..	1822 ..	1854-1863
Ismail (Khedive) ..	1830 ..	1863-1879
Mohammed Tewfik (Khedive) ..	1852 ..	1879-1892
Abbas II (Khedive) ..	1874 ..	1892-1914
Hussein Kamel (Sultan) ..	1853 ..	1914-1917
Fuad I (King) ..	1868 ..	1917-1936
Farouk I (King) ..	1920 ..	1936-

Legislature.—Parliament (*Barlaman*) consists of a Senate (*Majlis Al-Shuyukh*) of 100 members of whom three-fifths are nominated by the King, the remainder being elected (for 10 years) on the basis of 1 Senator for every 180,000 inhabitants; and of a Chamber of 150 Deputies (*Majlis Al-Nuwab*) elected (for 5 years) on the basis of 1 for every 60,000 inhabitants.

Executive.—The executive power is exercised by the King, through his Ministers, within the limits of the Constitution, the Ministry being held jointly responsible to the Chamber of Deputies.

Local Government.—The chief towns constitute governorships (*muhafzas*), and the remainder of the occupied country is divided into provinces (*mudiriya*), which are subdivided into districts (*markaz*), each under a *mamur*, who controls the head man (*omda*) of each village in his district. By the law of 1883 provincial councils were instituted, consisting of two representatives from each *markaz*, under the presidency of the *mudir* (or governor) of the province. These councils were reorganized in 1920 and were made the elementary education authority for the province, with certain restricted powers of local government.

Defence.—The Army comprises 3 Infantry Brigades (11 battalions), 2 squadrons of Cavalry, 4 Artillery batteries, 1 Company of Garrison Artillery, 1 motor machine-gun battery and 1 Engineer company. Service is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen by ballot; but certain classes (professionals, students, Government employees, &c.) are exempt and exemption may also be purchased for £250, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army. The effective strength of the Army in 1939 was 23,000. A small Air Force of 2 squadrons (12 aeroplanes), was increased in 1944 to 500 aeroplanes. Under Article 8 of the Treaty of 1936 the defence of the Suez Canal Zone is maintained by British Troops until such time as the Contracting Parties agree that the Egyptian Army is in a position to ensure, by its own resources, the liberty and entire security of navigation of the Canal.

There is no Navy in the proper sense of the term; there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess steamers on the Nile for inspection purposes.

The Egyptian Police (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 306 officers (75 Europeans), 476 European constables, and 6,583 men, the

latter 369 officers and 6,162 men. There are also 60,859 *ghafirs*, or native night-watchmen.

Language and Literature.—Arabic is the main language of Egypt and since the last quarter of the nineteenth century an Arabic daily press has modernised the spoken idiom. The rich literature of Arabia is an inheritance from Islam and in the past half century indigenous poetry and drama have given abundant evidence of vitality. French and English are secondary languages in urban areas. In 1940 18 daily newspapers were published in Cairo (9 Arabic, 1 English, 1 Armenian, 3 French, 3 Greek, 1 Italian) and 10 at Alexandria (2 Arabic, 3 Greek, 3 French, 1 English, 1 Italian).

Education on native lines has long been given in elementary vernacular schools. The native system of education is complicated by the more promising pupils at the Azhar University in Cairo, the principal University of the Moslem world. In 1940-41 there were 3,931 *Maklabs* (elementary vernacular schools), with 563,170 male and 492,320 female pupils. The Government primary schools give a 4-years' course and prepare for admission to secondary, agricultural and other special schools. There are *Collèges* of Medicine, Law, Education, Engineering, Fine Art, Commerce, Veterinary Science and Agriculture at Cairo, and evening classes for workmen. Much assistance is given to education by private enterprise and benevolence, and foreign schools abound. The University of Fuad I, founded in 1908, had 7,945 men students and 819 women students in 1940.

Agriculture.—The principal crops grown during *Saif* (summer) are cotton, rice, sugar cane, and sorgho (maize). *Nili* (flood) part of *Saif*, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally commences in July; the principal crops are maize and rice. *Chiuwi* (winter) commences in November and ends in June; the principal crops are cereals, berseem (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba.

Live Stock.—In 1943 there were 31,000 horses, 827,000 asses, 1,203,000 cattle, 1,000,000 buffaloes, 1,500,000 sheep, 760,000 goats, 175,000 camels and 31,000 swine.

Fisheries.—The sea and lake fisheries employed 27,000 men and 12,000 boys in 1940, the product of the fisheries being valued at £665,000.

Minerals.—The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organization are chiefly foreign. The principal products in 1941 were petroleum 1,221,000 metric tons, manganese ore, phosphate rock 112,000 metric tons, gypsum, natron, and sulphate of sodium.

Manufactures and Industries.—The principal articles of Egyptian manufacture are cotton and woollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery and cigarettes. The principal Egyptian industries are dyeing, tanning and cement.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta and Ismailia continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the first Cataract. At this point a steamer connexion runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Sollum, thus joining Tripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1941, was 3,690 miles (including 157 miles of branch line and 1,000 miles of siding), 58,165,254 passengers and 8,486,960 metric tons of merchandise were carried during 1943-44, the gross receipts being £11,255,962 and the working expenses £6,013,350. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 883 miles of light railways exploited by public companies.

A swing bridge, constructed since the outbreak of war in 1939, across the Suez Canal, established connexion between Cairo and Beirut, Syria, over the northward extension of the Palestinian railway system from Haifa to Tripoli (Syria), and there is now a continuous line linking the Libyan port of Tobruk and the former Turkish capital of Istanbul.

Roads and Caravan Routes.—A sea coast motor road is under construction from Alexandria to Mersa Matruh, with a projected extension along the coast to Sollum and thence to connect with the Italian coast road in Libya. The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arabi, leading to Dar Fur and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qosir being probably the most frequently used.

Shipping.—For the SUEZ CANAL, see p. 958. —Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollum and Matruh on the Mediterranean, Tor, Abu Zenima, Zeltia, Jemsa and Hurgada in the Gulf of Suez, and Safage, Qosir and Halaib on the Red Sea. The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a depot at Suez. In 1940 (excluding war traffic), 3,896 mercantile steamers (11,014,000 tons) entered Egyptian ports.

Posts and Telegraphs.—There were in 1941 5,605 post offices and stations. There were on March 31, 1941, 13,000 miles of State telegraph and 445,000 of State telephone wire. In addition, the Eastern Telegraph Company have lines throughout the country. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *saraf* (village tax-collector).

FINANCE.

	1944-45.	1945-46.
Revenue (Budget)...	£76,700,000	£84,500,000
Expenditure (do.)...	76,700,000	86,800,000

Debt.—The Egyptian debt was stated as follows on April 30, 1943 and 1944:—

	1943.	1944.
Internal:—		
Consolidated.....	£12,000,000	£86,000,000
Floating.....	5,000,000	6,000,000
External.....	89,700,000	*nil

* The Foreign Debt (including Ottoman Debt) was repatriated in September, 1943.

£E (Egyptian pound of 100 piastres) = £1 os. 6½ d. sterling. Rate of Exchange (Jan.-Sept. 1943), Piastres 97-50 = £1.

TRADE.

	1942.	1943.
Total Imports.....	£55,000,000	£37,700,000
Total Exports.....	18,700,000	25,000,000
Imports from U.K..	£8,823,000	£4,503,000

The principal imports are textiles, metals and manufactures thereof, coal and coke, chemicals, machinery, vehicles, vegetables and foodstuffs, timber and wood and paper. The exports are principally raw cotton, cotton seed, oil seed cake, mineral products and onions.

CAIRO, the capital (population 1937, 1,307,422), stands on the E bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khân-el-Khalili, the Hamzawi, and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character. The Anglican Cathedral of All Saints overlooks the Nile and occupies a site presented to the British colony by the Egyptian government.

Ψ **ALEXANDRIA** (pop. 1937, 682,101), founded B.C. 332 by Alexander the Great, was for over 1,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great *pharos* (lighthouse), 480 feet high, with a lantern burning resinous wood, was one of the "Seven Wonders of the World." Alexandria now contains two royal palaces, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. Population at the Census of 1937—Tanta (94,421), Ψ Port Said (126,907), Mansura (68,637), Asyut (59,925), Fayum (63,582), Zagazig (59,321), Mahalla el Kubra (62,807), Damanhur (61,791), Minya (50,688), Ψ Suez (49,669), Beni Suef (45,173), Ψ Damietta (40,482), Giza (37,649), Qena (34,433), Shibin el-Kom (32,555), Sohga (37,918), and Ψ Rosetta (26,000).

CAPITAL, Cairo.

FLAG: Green, with 1 white crescent (convex side to flagstaff), and three 5-pointed white stars (arranged in an equilateral triangle) between the horns.

BRITISH DIPLOMATIC AND CONSULAR OFFICERS
(The Embassy, Kasr-el-Doubara, Cairo.)

British Ambassador, His Excellency Rt. Hon. Lord Killearn, G.C.M.G., C.B., M.V.O. (1936).....£11,400
Counsellor, (vacant).
1st Secretary (local rank), B. A. B. Burrows.
2nd Secretaries, C. H. Johnston; P. J. Stirling; T. E. Evans.
3rd Secretary (local rank), B. C. Flynn, M.B.E.
Aide-de-Camp to Ambassador, Flight-Lieut. H. G. Burnand, R.A.F.
1st Secretary (Commercial, with local rank of Counsellor), C. Empson, C.M.G.

1st Secretary (Commercial), R. Reid-Adam.
 2nd Secretary (Commercial), W. A. T. Sowden.
 Oriental Minister, Sir Walter Alexander Smart,
 K.C.M.G.
 Legal Adviser (with local rank of Counsellor),
 E. F. W. Besly, C.M.G.
 Assistant Oriental Secretaries, F. H. Tomlyn, O.B.E.;
 D. J. M. Irving; T. C. Ravensdale; P. G. D.
 Adams.
 Financial Counsellor, W. J. Johnson, C.M.G., O.B.E.
 Director of Publicity Section, Lorj Kinross.
 Archivist and Accountant, H. I. B. Coe, M.B.E.
 Asst. Archivist, T. J. McGurk, M.B.E.
 Clerical Officers, W. S. Forbes, M.B.E.; O. R.
 O'Rafferty.
 shorthand Typist, Miss K. M. Potts, M.B.E.

CONSULAR OFFICES.

Alexandria—Consul-General, C. A. W. Were, C.M.G.
 " Consul, D. Wilson.
 " Vice-Consul, R. W. Bailey; P. Cassar, M.B.E.
 " Medical Adviser, Dr. G. N. Clark, F.R.C.S.
 Cairo—Consul-General, W. L. Bond.
 " Consul, H. R. Bird.
 " Vice-Consul, J. A. F. Gethin.
 " Pro-Consul, R. S. Lewis.
 " Medical Adviser, Dr. C. H. G. Pochin.
 Ismailia—Consul-General, (vacant).
 " Pro-Consul, J. M. Groves.
 Port Said—Consul, C. O. Wakefield-Harvey.
 " Vice-Consul, W. C. G. Graham; Joseph W.
 Caruana, M.B.E.; P. Gent; P. P. Caruana.
 Suez—Consul, F. H. Gamble.
 " Vice-Consul, R. M. M. Brett; R. A. Finlay.
 " There are Consular Agents at Assiut, Aswan, Beni
 Suef, Mansura, Medinet el Fayoum, Mehalla Kebir,
 Minia, Sohag, Tanta and Zagazig.

F.L.B.M. CONSULAR COURT.

(sitting at Cairo, Alexandria and Port Said).
 Judge, E. F. W. Besly, C.M.G.
 Asst. do., C. H. Haines, M.B.E.
 Crown Advocate, W. R. Fanner, M.C.
 Registrar, G. W. Gerrard, O.B.E.

BRITISH COUNCIL—Chief Representative in the
 Middle East, Professor T. S. R. Boase, M.C.,
 The British Council, Sharia Fuad el Awal,
 Cairo.

Representative in Egypt, R. W. G. Reed, C.B.E.,
 25 Sharia Abou el Sebaa, Cairo.

There are British Institutes at Cairo, Alexandria,
 Minia, Assiut, Zagazig, Mehalla-el-Kobra and
 Tanta.

BRITISH CHAMBER OF COMMERCE OF EGYPT,
 5 Sharia Borsa el Gueddia, P.O. Box No. 79,
 Cairo; 6 Rue de l'Antienne Bourse, Alexandria,
 and P.O. Box No. 65, Port Said.

CAIRO is 2,520 miles from London; transit *via*
 Trieste, 5 days; *via* Marseilles, 6 days.

ETHIOPIA.

(Ye-Itiopia Negussa Negest Mengist).

Emperor of Ethiopia, His Imperial Majesty Haile
 Selassie I, G.C.B., G.C.M.G., G.C.V.O., LL.D., son of
 the late Ras Makonnen, Governor of Harar;
 born July 24, 1892; crowned as *Negus* (King), Oct.
 1928; proclaimed Emperor April 2, 1930; crowned as
 Emperor Nov. 2, 1930; in exile 1936-1940; led his
 patriot army 1940-41; restored to the Throne, April 5,
 1941.

Crown Prince, H.L.H. Prince Asfa Wessen, eldest
 son of the Emperor, born July 27, 1916; married
 May 9, 1932, Princess Welette Israel, daughter of
 Ras Sayoum. Their Highnesses have a daughter.

LEGATION IN LONDON.

6 Princes Gate, S.W. 7.

Minister in London, H.E. Belata Ephrem Tewelde
 Medhen, appointed Nov. 8, 1945.
 Counsellor of Legation, Ato Abbede Retta.

Ethiopia is an inland country in North-Eastern
 Africa, bounded on the North by the former
 Italian Colony of Eritrea; on the South by Kenya
 and Uganda; on the West by the Anglo-Egyptian
 Sudan; and on the East by French and British
 Somaliland, and the former Italian portion of
 Somaliland, the northern and eastern neighbours
 cutting it off from access to the Red Sea, from
 which it is distant about 40 miles along the greater
 part of the Eritrean boundary. The area is
 estimated at 350,000 square miles, with an estimated
 population of 6 to 8 millions, of whom less than
 one-half are Abyssinians and the remainder Gallas,
 negro tribes on the west and south frontiers, and
 Danakil and Somalis on the east. Abyssinia is
 volcanic and mountainous, with several lofty
 peaks, the highest being Mount Kollo (14,100 ft.)
 and Abuna Josef (13,780 ft.), with many others
 above 10,000 ft. The country is reputed to
 contain some mineral wealth; iron is not uncommon,
 and gold is washed in various streams. While
 mica, platinum, salt, saltpetre, and sulphur are also
 procurable. The lower country and deep valley
 gorges are very hot; the higher plateaux are well
 watered, with a genial climate. In the hotter
 regions, sugar-cane, coffee, &c., flourish; in the
 middle zone maize, wheat, barley, wild oranges
 and other fruit trees, tobacco, potatoes, &c., are
 cultivated; and above 6,000 feet are excellent
 pastures with some corn cultivation. The forests
 are a potential source of wealth and include rubber
 trees. There are two seasons in the year, a dry
 winter, October to May, and a rainy summer from
 June to September. The chief river is the Blue
 Nile, issuing from the Tsana lake; the Atbara and
 many other tributaries of the Nile also have their
 rise in the Abyssinian highlands. Horses, mules,
 donkeys, oxen, goats, and sheep, and camels in the
 lowlands, form a large portion of the wealth of the
 people.

The principal pursuits are agriculture and cattle
 breeding, the chief exports being coffee, civet,
 wax, hides and gold.

The chief imports are salt, cottons, building
 materials and petroleum.

The Abyssinians, or Amharas, who inhabit
 Amhara, Tigre, Gojam, and parts of Shoa and
 Galla, are Christian (a branch of the Coptic
 Church). The head of the Coptic Church is the
 Coptic Patriarch at Alexandria, who appoints the
 Abuna (Metropolitan Bishop) of Ethiopia.
 Moslems predominate in the north-western terri-
 tories, Harar, Jimma, and in parts of Galla Sifama,
 the Moslem centre being at Harar.

A railway links Addis Ababa, the capital, *via*
 Dire Dawa, with Jibuti, 486 miles away. Several
 roads were under construction during the Italian
 occupation from the Capital to the coast. The
 first (538 miles) from Assab to Dessie, linking
 Addis Ababa to the Red Sea Coast, was opened in
 1939.

Under the Constitution of 1931, restored in
 1942, the absolute power of the Emperor is
 subject to certain limitations. There is an Upper
 Chamber of Nobles, nominated by the Emperor,
 and a Lower Chamber nominated by nobles and
 local chiefs.

Defence.—Ethiopia was invaded by Italy and
 after a long and arduous campaign (1935-36) was
 annexed to the Italian East African Empire from
 1936-1941. The country was freed from Italian

rule by British and Imperial forces, Addis Ababa being captured and the Emperor proclaimed as the rightful ruler, April 5, 1941. Gondar, the last centre of Italian resistance, surrendered on Nov. 27, 1941. British and Imperial troops have been withdrawn.

The Ethiopian Army comprises infantry, artillery, engineers, signals, ordnance and supply services, and a regiment of armoured cars is being formed. A British Military Mission, with a small number of commissioned and non-commissioned officers, is assisting in the formation and training of the army.

Education.—Education is provided in government schools and also in voluntary Mission centres. There are technical or secondary institutes for Christians and Moslems, and a military school at Addis Ababa. The languages are Amharic and Arabic. English is the chief foreign language taught in the schools and at the British Council Institute and Technical School at Addis Ababa. The Emperor has renewed the campaign against illiteracy since his restoration.

Finance.—Under the Anglo-Ethiopian Agreement (Dec. 21, 1944) Gt. Britain undertook to make a gift of £3,000,000 spread over 3 years on condition that the expenditure was first approved.

	1942-43.	1943-44.
Revenue.....	£1,615,000	£2,345,000
Subsidy.....	1,125,000	500,000
Total.....	£2,740,000	£2,845,000
Expenditure.....	£2,547,000	£3,128,000

CAPITAL, Addis Ababa (population fluctuates, but was estimated at 150,000 in 1944); other principal towns are Dire Dawa, Harar, Gore, Jimma, Debra Markos (the capital of Gojam), Adua (the capital of Tigre), Gondar, Sayo, Aksum, Antalo, Dembecha and Ijube. There are ancient architectural remains at Aksum, Gondar, and Ankober.

ETHIOPIAN FLAG: Three horizontal bands; green, yellow, red.

BRITISH LEGATION.

(Addis Ababa.)

Envoy Extraordinary and Minister Plenipotentiary and Consul-General (vacant).....£3,800
Accountant (with local rank of Consul and of 2nd Sec.), M. E. Taylor, M.B.E.
Archivist, C. Whitworth.

BRITISH CONSULAR OFFICES.

Addis Ababa—Consul-General (see above).
" Consul (with rank of 1st Sec.), F. A. G. Cook, O.B.E.
" Vice-Consuls (with local rank of 2nd Sec.), R. F. G. Sarell; J. R. Boyce.
Gore—Consul, Capt. A. H. A. Alban, D.F.C.
Mega—Consul, Maj. H. M. Grant, M.B.E., M.C.

BRITISH CONSUL.

Representative in Ethiopia, H. L. Littler, The British Institute, Addis Ababa.

There are British Institutes also at Harar, Jimma and Dessie.

FINLAND.

(Suomi.)

Minister, Gustav Mannerheim, born 1889,

COUNCIL OF STATE.

(April 17, 1945.)

Prime Minister, M. Juho Paasikivi (Non-party).
Foreign Affairs, M. C. J. Enckell (Non-party).
Defence, M. Peckala (Social-Democrat).
Interior, M. Leino (Communist).
Justice, M. Kekkonen (Agrarian).
Finance, M. Tuomila (Liberal).
Education, M. Heio (Sixling).
Agriculture, M. Jutila (Agrarian).
Transport, M. Vuori (Social-Democrat).
Trade and Industry, M. Gartz (Swedish).
Social Affairs, M. Kolpi (Social-Democrat).
Supply, M. Hillilä (Agrarian).

A country situated on the gulfs of Finland and Bothnia, which was captured by Russia from Sweden, and united to the Russian Empire, as an autonomous but not sovereign Grand-Duchy, in 1809. When the Russian Empire broke down in 1917 Finland declared herself an independent sovereign state (Dec. 6, 1917).

In 1939, during the European War, the U.S.S.R. made demands upon Finland for territorial concessions which the Finnish Government were unable to grant. The U.S.S.R. invaded the country and by Treaty signed March 15, 1940, there was cession of Rybach Peninsula in North, territory in North Centre, of the Karelian Isthmus in the South (including Viipuri, Viipuri Bay and shores of Lake Ladoga) and a 30 years' lease of the port of Hangö and neighbouring mainland. The total land and lake area ceded under the treaty is approximately 16,170 sq. miles. Finland joined the Axis Powers when Germany attacked U.S.S.R. in 1941, and took part in the campaign against the Allies. In 1944, during the successful Soviet counter-attack on the Axis forces in Russia, Finnish resistance was overcome, Viipuri falling on June 20. In accordance with conditions required by U.S.S.R. the Finnish government called upon Germany to withdraw German forces from Finland by Sept. 15. On Sept. 4, 1944, the "cease fire" was sounded in Finland and a peace delegation set out for Moscow. On Sept. 19, an armistice was signed by U.S.S.R., Gt. Britain and Finland. Territorial concessions to U.S.S.R. included Karelia, the Petsamo area and the Porkkala headland.

The area in 1939 was 149,926 square miles, with a population (Dec. 31, 1942) of 3,887,217 (1,902,303 males and 1,984,914 females), of whom (in 1939) 89.4 per cent. were Finnish-speaking, 10.1 per cent. Swedish-speaking, 0.2 per cent. refugees and 0.3 per cent. others (mainly Lapps, leading a nomadic life in the north). The 1944 area is stated in the *League of Nations Handbook* at 348,000 square kilometres (129,363 square miles) with an estimated population of 3,716,000, Dec. 31, 1942. In 1943 there were 75,363 births (20.2 per 1,000), and (in 1942) 25,393 deaths (13.9 per 1,000); infant mortality (1942) 67 per 1,000 live births. Nearly all the inhabitants are Lutherans. The *Åland Archipelago*, a group of some 300 small islands at the entrance to the Gulf of Bothnia (area 557 square miles, population about 28,050), forms part of the Republic. There are 3 universities, 1 at Helsinki (Helsingfors) and 2 at Turku (Åbo); the university of Helsinki (founded 1640 at Turku and removed to Helsinki in 1828) had 6,478 students (1938). There are 1 technical and 3 commercial high schools. The leading crops are rye, barley, oats, wheat and potatoes. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests (62,400,000 acres) are a great source of wealth; there is no European country so wealthy in forests except Russia.

On June 17, 1940, Marshal Petain sought terms of surrender from the Germans. A number of French troops had reached British ports after the evacuation of the British Expeditionary Force from Dunkirk and St. Valer, and on June 23, 1940, after stating that the French Government had capitulated before all means of resistance had been exhausted, General de Gaulle announced the formation of a Provisional National Committee "to defend that part of the French Empire which has not yet been conquered by Germany and to free that part of France still under the yoke of the invader."

On July 14, 1942, the name of the Free French movement was changed, in full agreement with the Allies, to *La France Combattante* (Fighting France).

La France Combattante comprised the union of all French nationals, wherever they might be, and of French territories joined together to collaborate with the United Nations in the war against the common enemy: it was the symbol of resistance to the Axis by all French Nationals repudiating the capitulation and contributing by all means at their disposal to the liberation of France.

On October 20, 1940, General de Gaulle set up a Council of Defence of the French Empire and on September 24, 1941, a French National Committee.

On June 3, 1943, after prolonged negotiation, there was set up a *French Committee of National Liberation*, which was recognized by the United Nations on August 26, 1943.

On October 23, 1944, the de Gaulle administration was recognized by the United Nations as the government of France.

AREA AND POPULATION.—The most westerly State of Central Europe, extending from 42° 20' to 52° 5' N. lat., and from 7° 45' E. to 4° 45' W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1914) at 207,076 square miles, divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory ceded by the *Treaty of Frankfurt* (May 10, 1871) amounted to 5,602 square miles; that regained by the *Treaty of Versailles* (June 28, 1919) to 5,819 square miles, making the 1939 area of France (exclusive of Algeria) 212,895 square miles, with a population (census of March 8, 1936) of 41,905,968 (inclusive of Alsace and Lorraine).

More than 2,000,000 prisoners-of-war and civilian workers were deported to Germany during the war; of this number 1,365,394 had been repatriated from the British, American and French zones by June 8, 1945, leaving 500,000 to 800,000 still awaiting return from the U.S.S.R. zone. In 1943 there were 589,301 births (15.9 per 1,000), 609,596 deaths (16.4 per 1,000); the deaths under 1 year were at the rate of 75 per 1,000 live births. Marriages in 1939 numbered 258,260 (6.2 per 1,000 inhabitants); in 1943 the rate was 5.7 per 1,000.

GOVERNMENT.—The monarchical system of government was overthrown by the *French Revolution* (1789-1793), and the *First Republic* endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20-June 29, 1815), until the *Second Republic* of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the *Third Republic* was set up. The constitution of the Third Republic vested the

legislative power in a Chamber of Deputies (numbering 618 in 1940) elected for 4 years, and a Senate (numbering 314 in 1940) elected for 9 years, one-third retiring every 3 years. The executive was vested in the President, who was elected for 7 years by the Senate and Chamber assembled in Congress. The President of the Republic selected a President of the Council of Ministers from among the leaders of the various political groups and confirmed his choice of colleagues. Dr. H. A. L. Fisher (in *A History of Europe*) shows that in practice the legislature was too strong and the executive too weak. The legislature could not be dissolved until its term ran out, and its standing committees usurped many of the functions of the cabinet. The average duration of French Cabinets was less than 12 months, and they were liable to be upset at any moment by a new and unforeseen combination of groups in the Chamber. Much of the energy of the Ministry, which might have been devoted to legislation, was exhausted in parliamentary strategy designed to

(a), (b), (c). These Departments correspond with the districts of Alsace and Lorraine.

stave off defeat in the division lobbies. This system endured throughout the Great War of 1914-1918 and until the collapse of France on June 17, 1940, a new régime being instituted during the German occupation with a "constitution" promulgated on July 12, 1940, under which the Senate and Chamber of Deputies were abolished and replaced by a *Conseil National*, with advisory functions, but without voting power. The Provisional Government under General de Gaulle denounced the constitution of 1940 and restored the Third Republic and its constitution, as in force in 1939.

Under the De Gaulle administration there was a single chamber legislature (The National Consultative Assembly) which met at Algiers until France was liberated. Women were eligible for membership. The *Caisse Centrale de la France Libre* (established Dec. 2, 1941) issued notes and controlled internal exchange, the notes being backed by a gold reserve amounting to one-third of the note issue. The gold was obtained from French Equatorial Africa.

The enlarged Consultative Assembly met in the Luxembourg Palace (Paris), formerly the Senate House, on Nov. 7, 1944. The Assembly included 6 women, the first time women had sat in a French parliament. At the October elections (1945) 33 women were returned.

Under the constitution promulgated in October, 1945, a *National Constituent Assembly* of 522 Deputies has been elected consisting of 136 Communists, 136 Mouvement Républicain Populaire, 129 Socialists and 121 minor group.

PRODUCTION.—The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beet-root (for the manufacture of sugar), hops, &c. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c.

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orleans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent (1,274,000,000 gallons of wine were produced in 1938, reduced to 840,000,000 gallons in 1942), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1938 amounted to 767,000,000 gallons. The live stock (1941) included 14,290,000 cattle, 8,500,000 sheep and lambs, 4,000,000 pigs, 2,000,000 horses, and 1,000,000 goats. The mineral resources include coal, pig iron, copper, lead, silver, antimony and salt. Under Article 50 of the *Treaty of Versailles*, the coalfields of the Saar Basin were ceded to France for 15 years, at the end of which time the inhabitants decided by a *plébiscite* to return to Germany. In 1911 the coal mines of France produced 30,000,000 tons, and the production of the enlarged area reached 44,226,000 metric tons of coal in 1936 and 49,206,000 in 1939. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk and lace. Glass manufacture and pottery are also important, and the sardine fisheries and the culture of oysters are a source of wealth.

DEFENCE.—*War of 1914-1918.* On Aug. 2, 1914, Germany invaded Belgium, in violation of the *Treaty of London* (the "Scrap of Paper") signed on April 19, 1839 by France, Gt. Britain, Austria, Prussia, the Netherlands and Russia. On the following day France, and on Aug. 4 Gt. Britain, declared war on Germany. After initial reverses

France and her ally checked the German advance at the Marne (Sept. 4-9, 1914) and a war of attrition set in, the Allies being aided in its later stages by the vast resources of materiel and personnel of the United States. On Nov. 11, 1918, the Allies agreed to an armistice, and as a result of the Peace Conference at Versailles (Jan. 18—June 28, 1919) Alsace and Lorraine were restored and part of the German Colonial possessions were allotted to France. Experience gained in the War of 1914-18 caused the construction of a vast series of trenches along the frontier, behind the trenches being a chain of fortresses, the system being known as the *Magnin Line*, stretching from the Eastern (Swiss) to the North-Western (Belgian) frontiers. *War of 1939-1945.* On Sept. 3, 1939, France and Great Britain declared war on Germany in consonance with the Anglo-French guarantee of the integrity of Poland. British troops of all arms were moved into France under the terms of the guarantee and for several months the military operations were mainly confined to bombardments by the guns of the opposing Maginot and Siegfried Lines.

On May 10, 1940, Germany invaded Belgium and turned the Maginot Line. On May 28 King Leopold of Belgium capitulated. On June 11 the French Government moved to Tours and on June 14 the French Government moved to Bordeaux. On June 16, 1940, the French Cabinet under M. Reynaud decided to ask Germany for an armistice and handed their resignations to President Lebrun, who empowered Marshal Pétain to form a new government. On June 17 Marshal Pétain sought terms for an armistice from Germany and Italy and an armistice agreement was signed with Germany on June 22 and with Italy on June 24. "The renowned French Army beaten into complete and total submission with less loss than the casualties which they suffered in any of the half-dozen of the battles of 1914-1918." (Mr. Churchill.)

The British Expeditionary Force sent to the help of France in their common cause was left to extricate itself from the battle front, and after a fighting retirement to the coast 337,130 troops (224,534 British and 112,546 Allies, mainly French) were evacuated from the ports of Dunkirk and St. Valéry by vessels of every type and size under the command of the Royal Navy, and under such protection as the Royal Air Force was able to afford, a joint operation which will rank high in the annals of the British Fighting Services. On "D" Day (June 6, 1944) the operation was reversed. Sea, land and air personnel of the Allied Expeditionary Force secured a wide landing space, followed by effective occupation on the Normandy coast. Cherbourg was captured on June 27 and Caen on July 9. Paris was liberated on Aug. 23 and Dieppe was occupied by Canadian troops on Sept. 1, 1944.

On November 11, 1942, on receipt of news of the successful landing of the expeditionary forces of the United Nations in North Africa, Hitler ordered German troops to invade "Unoccupied" France. The following day Italian forces occupied Nice and landed in Corsica. On December 1, 1942, Admiral Darlan assumed the powers of Chief of the State in North Africa (Algiers), Admiral Darlan was assassinated on December 24, 1942, and was succeeded by General Henri Giraud, who assumed the title of French Civil and Military Commander-in-Chief on February 7, 1943. On June 12, 1943, General Giraud became Joint President (with General de Gaulle) of the Committee of National Liberation. General de Gaulle resumed sole Presidency on November 9, 1943.

In France itself underground forces (F.F.I.—Forces Françaises de l'Intérieur) stubbornly resisted

the invaders, and with the *men of the Maquis* and the army of the French Committee of National Liberation joined the Allied Expeditionary Force in driving the invaders from the soil of France.

Post-War Reorganization.—On April 3, 1945, facts and figures were given by Supreme Headquarters Allied Expeditionary Force regarding Allied aid to France since the national resurgence under General De Gaulle's leadership. *Army*—The French Army was completely trained, equipped and maintained by the United States Army in Morocco and in France, with contributions to equipment and maintenance from Great Britain and Canada. *Navy*—20 French warships (including the battleship *Richelieu*) were overhauled, refitted and re-armed at a cost exceeding £50,000,000 and 200 vessels were added to the French Navy. *Air Force*—The strength of the French Air Force, trained and equipped by the Allies, was greater in April, 1945, than at the outbreak of war in 1939.

LANGUAGE AND LITERATURE.—French is the universal language of France and of a large proportion of the people of Belgium, Luxembourg, Switzerland, Italy, Egypt, Tunisia, Algeria, Mauritius, Haiti, the Province of Quebec, Canada, and of the State of Louisiana, U.S.A., to whom the almost inexhaustible literature of France is a treasured heritage. The work of the *French Academy*, founded by Richelieu in 1635 has established *le bon usage*, equivalent to "The King's English" in Great Britain. French authors have been awarded the Nobel Prize for Literature on 6 occasions—R.F.A. Sully-Prudhomme (1901), F. Mistral (1904), Romain Rolland (1915), Anatole France (1921), Henri Bergson (1937) and Roger M. du Gard (1937). In 1940 daily newspapers published in French numbered 32, of which 2 was in English, 2 in American, 2 in German and 1 in Russian.

EDUCATION.—The educational system is highly developed. *Central Administration* comprises (a) Ministry of Public Instruction; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (a) Territorial Academies, with inspecting staffs for all grades; and (b) Departmental Councils, presided over by the *prefet*, charged especially with primary education. By the Law of July, 1904, all congregationalist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary*: *Secular, comp. and free*. Age 6-13. Schools include (a) infants; (b) lower primary; (c) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary*: State lycées, communal colleges, and many private establishments, 7-yrs. course, either (a) purely classical; (b) purely modern; (c) Latin and sciences; or (d) Latin and modern languages. Degree of Bachelor conferred on completion. For women, a similar organization, course 5-6 yrs. *Sevres* school and the Sorbonne Association are well known. (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) There are 27 *Universities* (State Universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix (A.D. 1409), Algiers (1827), Bordeaux (1447), Caen (1432), Clermont (1222), Grenoble (1339), Lyons (1562), Montpellier (1225),

Nancy (1572), Paris (1150), Poitiers (1431), Rennes (1735), Strasbourg (1567), and Toulouse (1230), (with over 82,000 students in 1935).

ARCHAEOLOGY, ETC.—There are dolmens and menhirs in Brittany, prehistoric remains in Dordogne, cave drawings in Ariège and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Caesar found Gaul "divided into three parts" and described three political groups—Aquitanians south of the Garonne, Celts between the Garonne and the Seine and Marne and Belgae from the Seine to the Rhine. Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, etc., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and XVIIIth century chateaux survived the French Revolution.

COMMUNICATIONS.—The length of the *Routes Nationales* in 1933 was about 50,000 miles, and of local roads 342,000 miles. The principal rivers of France are the Seine, Loire, Garonne, and Rhone, the navigable waterways having a length of (1937) 6,000 miles. The Rhone is navigable for 1,200-ton vessels from the sea to Switzerland.

The system of railroads in France is very extensive; they are almost entirely *cédéés*, and became State property after the expiration of the concession (January 1, 1938). The length of lines of general interest, inclusive of local lines, open for traffic on January 1, 1938, was 26,430 miles, of which about 2,000 miles are electrified. The length of telegraph wires (1937) was 240,000 miles, and of telephone lines 131,000 miles, with 1,560,000 subscribers.

Shipping.—The French mercantile marine in 1939 consisted of 11,300 vessels of 3,000,000 gross tons. During the year 1938 the tonnage of French and foreign vessels entering French ports amounted to 52,000,000 tons.

FINANCE.

	1945.
Revenue (Budget).....	Fcs. 172,000,000,000
Expenditure (do.).....	384,300,000,000
Internal Debt (Dec. 31, 1944):	
Consolidated.....	Fcs. 581,110,000,000
Floating.....	1,028,444,000,000
Total.....	Fcs. 1,609,554,000,000

The *Franc* (of 100 *Centimes*) at par (prior to Sept. 29, 1931) 124.21 = £1 sterling. In 1940 (Jan. 1 to June 21) the Exchange Rate was Fr. 176.50 (highest) and Fr. 176.63 (lowest). On military occupation by Axis the *Franc* was fixed (May, 1940) at 0.05 *Reichsmark*, and (June, 1941) at 0.38 *Lire*.

Fixed Exchange (1944).—On Feb. 8, 1944, a financial agreement between the British Government and the French Committee of National Liberation fixed the rate of exchange at 200 *francs* = £1 and provided that no change should be made without prior consultation.

Financial Agreement (1945).—A Financial Agreement between France and Great Britain was signed in Paris (March 27, 1945) containing "the necessary financial foundation for the resumption and development of commercial intercourse" between the *franc* and sterling zones, including reciprocal credits (£100,000,000 in London for France and

Frans 20,000,000,000 in Paris for Great Britain) to finance imports.

COMMERCE.

The principal imports are wine, coal and coke, wool, cotton, cereals, petroleum, chemicals, oleaginous fruits and seeds, machinery, raw skins, timber, caoutchouc, copper and coffee. The principal exports are chemical products, iron and steel, textiles (silk and cotton), automobiles, wine, soaps and perfume, and glass.

1938	23,340,000	23,638,000

ALSACE LORRAINE AND ALGERIA.

Alsace Lorraine.—Alsace-Lorraine, formerly a part of the Holy Roman Empire, was ceded to France in 1648 at the Peace of Westphalia, and was ceded to Germany by the Treaty of Frankfurt (May 10, 1871), after the Franco-Prussian War. At the close of the War, 1914-1918, the Provinces were regained by France under the Treaty of Versailles (July 28, 1919). They embrace the fertile plain between the Rhine and the Vosges, and stretch beyond these mountains as far as Luxembourg. Wine, tobacco, hops, iron, and coal are among the leading productions, and the cotton industry is most flourishing. The former *Reichsland* of Elsaß Lothringen was again occupied by Germany after the French collapse of June 7, 1940, and was re-annexed to Germany as "Westmark" (as against "Ostmark," Austria), with a civil governor Gauleiter Wagner, for Alsace and Gauleiter Burckel for Lorraine and the Saar. The area is 5,605 square miles; the population in March, 1931, was 1,898,376. Principal towns (1936), Strasbourg (pop. 193,119), Mulhouse (96,697), and Metz (83,119).

Algeria.—Algiers surrendered to a French force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. Since 1881 the three northern departments of Algeria—Algiers, Oran, and Constantine—have formed an integral part of France, under a Governor-General, assisted by a Consultative Council of 15 official members and a Superior Council of 60 members. Algeria sends 3 Senators and 10 Deputies to Paris. Algeria lies between 4° 36' W. to 6° 16' E. longitude, 37° 6' N. to an undetermined S. limit, about 30° N., covering an area estimated at 222,120 square miles, with a population (1936) of 7,234,684, of whom 987,252 were Europeans and 6,247,432 natives. The revenue in 1940 was estimated at francs 2,526,300,000, and the expenditure at francs 2,526,780,000. The total value of imports in 1938 was 4,466,600,000 francs, and of the exports 5,649,700,000 francs. The bulk of trade is with France. The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1939 there were over

3,000 miles of railroad open for traffic; and in 1938 the number of ships engaged in foreign trade entering Algerian ports was 3,956. The principal town is Ψ Algiers, the capital (municipal population, 1936, 252,321), a most important coaling station and much frequented as a health resort; other large towns are Ψ Oran (194,750), Constantine (106,834), Ψ Bona (83,300), Sidi bel Abbas (52,000), Pizi Ouzon (41,000); Ψ Phillipville (65,000), Mascara (32,000), Tiennenc (52,000), Ψ Bougie (31,620), and Ψ Mostaganem (38,555).

Southern Algeria, consisting of the Territories of Ain Sefra, Ghardaia, Touggourt and the Saharan Oases, was formed into a separate colony on Dec. 24, 1902. The population of Southern Algeria at the census of 1936 was 642,651 (included in the figure given above).

Governor-General, M. Yves Chataignier.

Representative in Algeria of the British Council, A. Gill, 26 Boulevard Carnot, Algiers.

CAPITAL OF FRANCE. Paris, on the Seine.

Paris was liberated by *Les Forces Françaises de l'Interieur*, or F.F.I., after four days' serious fighting Aug. 19-22, 1944, having been occupied by Nazi forces since June 14, 1940.

Population (Jul. 7, 1940), 1,057,046. In 1931 the population of Paris was 2,891,020 and in 1935, 2,829,746. "Greater Paris" in 1936 had a population of 4,889,438. The seat of the Petain Government was Vichy. Fifteen other cities exceeded 100,000 at the Census of 1930— Ψ Marseilles (regained by F.F.I. and Free French forces, Aug. 23 1944), 913,520, Ψ Lyons 561,525, Ψ Bordeaux 258,438, Ψ Nice 241,916, Toulouse 213,220, Lille 200,575, Ψ Nantes 195,185, Strasbourg 193,119, St. Etienne 190,234, Ψ Le Havre 164,083, Ψ Toulon 150,310, Ψ Rouen 122,632, Nancy 121,301, Reims 116,687, Roubaix 107,105, Clermont Ferrand 101,126, Ψ Brest 80,000, Ψ Calais 68,000, Ψ Caen 62,000, Ψ Boulogne 52,000, Ψ Cannes 50,000, Ψ La Rochelle 48,000, Ψ Lorient 46,000, Ψ St. Nazaire 44,000, Ψ Cherbourg 40,000, Ψ Dunkirk 32,000, Ψ Dieppe 26,000, Ψ St. Malo 14,000; and in Corsica, Ψ Ajaccio 40,000, Bastia Ψ 53,000.

Paris is distant from London 267 miles.

FLAG: The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

In ASIA.—French India includes Ψ Pondicherry, on the Coromandel coast; Chandernagore, on the Hooghly; Ψ Karikal, in the Cauvery delta; Ψ Yanam, in the Godavary delta; and Ψ Mahé, on the Malabar coast—the total area being 200 square miles, with an estimated population (1936) of 293,000. The trade of Pondicherry and Karikal

in 1937 was valued at Fr. 80,442,000 for imports, Fr. 143,373,000 for exports.

Governor of French Establishments in India, M. Louis Bonvin (1938).

French Indo China (Administrative Capital, Ψ Saigon) comprises the possession of Cochinchina and the four protectorates of Cambodia, Annam, Tonkin, and Laos.

In 1939 the trade of French Indo-China was valued at Fr. 2,382,260,000 for imports, and at Fr. 3,494,736,000 for exports. *Governor-General of French Indo-China, Rear-Admiral G. Thierry d'Argonville (Aug. 1945).*

Cochin-China, a French Colony, ceded to France by the King of Annam in 1868, has an estimated area (including the Condor Islands) of 24,000 square miles and a population (1936) of 4,616,000. Rice (3,720,000 metric tons in 1938) and sugar are the principal products. The imports were valued at 1,127,500,000 Fr. in 1938 and the exports at 2,111,360,000 Fr. The capital and principal seaport is Ψ Saigon (pop. 111,000); Ψ Cholon (125,000).

Cambodia, a French Protectorate since 1863, has an estimated area of 70,000 square miles and a population (1936) of 3,100,000. Rice is the principal crop. The capital is Ψ Phnom Penh (103,000). *King of Cambodia, Sihanouk, elected April, 1941*, in succession to his grandfather, King Sisowath Monivong, who died April 7, 1941.

Annam, a French Protectorate since 1884, has an estimated area of 58,000 square miles and a population (1936) of 5,660,000. Rice is the principal product. The imports were valued in 1938 at 47,740,000 Fr. and the exports at 112,860,000 Fr. The capital is Hue (40,000), the seaports being Ψ Tourane (47,000) and Ψ Qui Nhon. *Emperor of Annam, Bao Dai, b. 1913, acceded Nov. 6, 1945.*

Tonkin, a French Protectorate since 1883, has an established area of 43,000 square miles and a population (1931) of 8,000,000. Rice is the principal crop. The imports were valued in 1939 at 946,500,000 Fr. and the exports at 548,120,000 Fr. The capital is Ψ Hanoi (124,000), the principal seaport being Ψ Haiphong (122,000).

Laos (which includes the protected Kingdom of Luang Prabang), a French Protectorate since 1893, has an estimated area of 100,000 square miles and a population (1936) of 1,000,000. The capital is Vientiane (10,000).

Kwang Chou Wan, leased from China for 99 years in 1898 (territory increased 1899), area about 250 square miles and a population (1936) 200,000; capital, Fort Bayard (9,500), was restored to China in February, 1943.

IN ASIA MINOR.—The French mandatory sphere of Syria has a total area of about 60,000 square miles, with an estimated population of 2,820,000 (see also pp. 962-3).

IN AFRICA.—*Algeria* (see p. 907) is an integral part of France. *Morocco* (see pp. 934-6) is a French (and partly Spanish) protectorate.

A *French African Conference* was held at Brazzaville (French Equatorial Africa) from Jan. 30—Feb. 8, 1944, under the chairmanship of M. René Pleven, Commissioner for the Colonies. It was attended by the Governors General of French West Africa, French Equatorial Africa and Madagascar and by Governors of 15 component territories, with "observers" from Algeria, French Morocco and Tunisia. General De Gaulle opened the conference which dealt with post-war development and reconstruction.

Tunisia has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends

southwards to the Sahara, with a total area of about 45,000 sq. miles and a population (Census of 1936) of 2,668,313 (Europeans 219,587, including 108,068 French civilian population, 94,289 Italians). The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The principal minerals are coal, copper, lead, zinc and iron, and phosphates and marble are also worked.

In 1940 the revenue was 811,200,000 Fr. and the expenditure 810,960,000 Fr.

The chief exports are phosphates, olive oil, wheat, sparto grass, barley, beans, blankets, sponges, and dates; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. In 1939 the imports were valued at 849,121,000 Fr. and the exports at 752,408,000 Fr. Ψ Tunis, the capital (connected by canal with La Goulette on sea-coast), has a municipal population of 219,578 at the Census of 1936; it occupies a site near that of Carthage; other towns are Ψ Sfax (43,333), Ψ Bizerta (34,798), Susa (28,463), Kairwan (22,991), Ψ Gabes (20,000) and Ψ Monastir (11,000).

Troops of the United Nations entered Tunisia on November 7-8, 1942, and expelled the Axis forces, Bizerta being captured by U.S. troops on May 7, 1943, Tunis falling to the British First Army on the same day. The Axis losses were 341,000 (including 207,000 German and Italian prisoners). The total losses of the Axis armies from the initial landing in North Africa to October 29, 1943, exceeded 600,000, including 470,000 prisoners; the total losses of the United Nations were just under 100,000.

Bey and Possessor of the Kingdom of Tunisia, H.H. Sidi Alim, installed May 16, 1943.
French Resident-General, General Charles Maste, May 14, 1943.

The Federation of French West Africa extends from Mauritania to Dahomey, and has a total area of 1,799,159 square miles and a population (Census of 1936) of 14,702,583 (Europeans, 24,708). The capital of the Federation is Ψ Dakar (Senegal), which had a population (1936) of 92,634. The revenue and expenditure of French West Africa were balanced in 1938 at 1,126,270,000 Fr. The trade of the Federation of French West Africa in 1937 was valued at 1,694,500,000 Fr. for imports and 1,512,000,000 Fr. for exports, the principal exports being ground nuts (almost entirely from Senegal), palm kernels, palm oil, cocoa, cabinet woods, bananas, gold and cattle. French West Africa consists of *Senegal* (77,814 sq. miles, pop. 1,697,671), capital, St. Louis; *Mauritania* (322,344 sq. miles, pop. 383,098); *French Guinea* (96,865 sq. miles, pop. 2,011,721); *Ivory Coast* (189,029 sq. miles, pop. 3,850,653); *Dahomey* (47,144 sq. miles, pop. 1,351,521); and the inland colonies of *French Sudan* (582,437 sq. miles, pop. 3,568,966) and the *Niger* (483,526 sq. miles, pop. 1,746,878). The territory of Upper Volta was apportioned in 1934 to French Sudan, the Niger Colony and Ivory Coast. *Governor-General of French West Africa, M. Pierre Cournaire (July, 1943).*

Mandated Territories.—Between Dahomey and the Gold Coast Colony lies the French sphere of the former German colony of *Togoland* (20,464 sq. miles, pop. 750,000); capital, Lome (12,000); and between (British) *Nigeria* and the French Congo the French sphere of the former German colony of *Kamerun* (143,475 sq. miles). *Governor of French Cameroun, Col. Leclerc, appointed 1940.*

French Equatorial Africa (capital, Brazzaville), consists of the *Gabon* (106,121 sq. miles, pop.

387,000), capital, Ψ Libreville (pop. 4,500), Ψ Port Gentil (3,000); *Middle Congo* (93,000 sq. miles, pop. 662,000), capital, Brazzaville (pop. 4,000), connected by railway with Ψ Pointe Noire (5,000); *Ubangi Shari* (290,000 sq. miles, pop. 1,200,000), capital, Bangui (pop. 23,500) and *Chad* (481,000 sq. miles, pop. 1,100,000), capital, Fort Lamy (pop. 6,000). The trade of 1937 was valued at 1,694,425,000 Fr. for imports and 1,512,150,000 Fr. for exports. In 1940-41 strategic roads were constructed by the Fighting French administration from Duala (Cameroons), N.E. to Chad and thence E. to Darfur (Anglo-Egyptian Sudan) and from Duala E. to Bahr el Ghazal (Anglo-Egyptian Sudan). The former is joined at Fort Lamy (Chad) by roads from Lagos (Nigeria) and Takoradi (Gold Coast). *Governor-General of French Equatorial Africa*, General de Laminat.

French East Africa consists of *French Somaliland* (9,000 sq. miles, pop. 70,000, including 700 Europeans). Capital, Ψ Jibuti (pop. 20,000). French Somaliland is separated from the Aden Protectorate by the Straits of Bab el Mandeb and occupies the coast of N.E. Africa round the Gulf of Tadjura, extending about 80 miles inland (Ethiopia). Imports, 1938, 147,700,000 Fr.; exports 85,300,000 Fr. The local budget was balanced for 1939 at 26,000,000 Fr. A railway from Jibuti crosses the S. boundary and runs *via* Dire Dawa to Addis Ababa, the capital of Ethiopia.

Madagascar, 228,000 square miles, pop. (1936) 3,797,936), is 240 miles distant from the S.E. coast of Africa, and is the fifth largest island in the world. It has been a French Protectorate since 1890. In 1896 the Hova dynasty was suppressed and Queen Ranavalona III. (born 1861, died 1916, who had reigned since 1883) was exiled to Algeria, the administration being entrusted to a Governor-General. Agriculture and cattle raising are the principal industries; the minerals include gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrow-root), beans, hides, skins, fibre, rice, timber and rubber; the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital, Antananarivo, has a population of 230,000; other towns are Ψ Tamatave (the chief port) 25,000, Ψ Mayunga 24,000, Ψ Diego Suarez 13,000, Ψ Mananjary, Ψ Yuleur, Andoveranto and Vohehar. The trade of Madagascar (1940)—Imports, 363,760,000 Fr.; Exports, 616,500,000 Fr. Imports from U.K. (1943), £465,000. The Madagascar budget for 1939 was balanced at 243,700,000 Fr.; public debt (December 31, 1938), 823,870,000 Fr. *Governor-General of Madagascar*, M. De Saint Mart, appointed 1943.

British naval and land forces occupied the port of Diego Suarez on May 5, 1942, and further operations led to the occupation of the capital of the island on September 23. The French garrison asked for an armistice on Nov. 5, 1942, and resistance then ceased throughout the island.

Dependencies of Madagascar are the *Comoro Archipelago* (capital, Zandzi), consisting of the islands of Great Comoro, Anjouan, Mayotte and Mohilla and of certain islets, the total area being about 800 sq. miles, with a population (1936) of 123,516. In the Mozambique Channel are Juan de Nova, Europe Island and Bassas da India, the last being uninhabited. Other dependencies are *La Réunion* (formerly Ile de Bourbon), about 420 miles E. of Madagascar, in occupation since 1643. Area about 1,000 sq. miles, population (1931) 200,000; capital St. Denis (27,000); trade (1938): imports 264,000,000 Fr.; exports 206,500,000 Fr. Assigned to the administration of Réunion are the distant islands of St. Paul (3 sq. miles), New Amsterdam (27 sq. miles) and Kerguelen (with

Macdonald and Heard Islands), containing whaling and fishing stations (1,200 sq. miles). The *Crozet Islands* (200 sq. miles) and *Adelle Land*, in the Antarctic Zone, are also dependencies of Réunion.

IN AMERICA.—Off the south coast of Newfoundland are two small groups of islands, of which the largest are St. Pierre and Miquelon. St. Pierre and Miquelon were occupied by Free French forces (without authority from Gen. de Gaulle) in January, 1942. In the West Indies, Martinique (capital, Ψ Fort de France, pop. 52,051, with Ψ Trinité, 39,173 and Ψ Marin 31,369) and Guadeloupe (capital, Ψ Basse Terre, pop. 13,638, with Ψ Pointe à Pitre, 44,557), Marie Galante (Ψ Grand Bourg 12,827), Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin. By agreement between the French authorities at Martinique and U.S. naval authorities, French warships at Martinique were immobilised in May, 1942. In South America, is French Guiana (capital, Ψ Cayenne, 12,000). Included in French Guiana is a group of islands (St. Joseph, Ile Royal, and Ile du Diable) known as Iles du Salut. On Devil's Isle, Major Dreyfus was imprisoned from 1894-1899. The total area of French possessions in North and South America is 35,320 square miles, with a population of 450,000.

SOUTH CHINA SEAS.—In April, 1933, France occupied certain small islands (Spratly, Ambokna Cay, Itu Abu, Deux Iles group, Loaita and Thi Tu) between 7° 52'—12° 29' N. lat. and 111° 55'—114° 25' E. long.

IN OCEANIA.—New Caledonia (7,200 sq. miles, pop. 50,500, capital, Ψ Noumea) is a large island with dependencies, the Isle of Pines, the Wallis Archipelago, the Loyalty Islands (Mahé, Lifou, Uvéa, &c.), the Huon Islands and Futuna and Alofi. New Caledonia was occupied by U.S. troops in April, 1942. The Society Islands (Tahiti, Moorea, &c., capital Papeete) have an area of about 650 sq. miles, and a population of about 14,000; the Marquesas (Nukahiva, Hivasa, &c.), 500 sq. miles, pop. 2,500; Leeward Isles (Huahine, Raiatea, Tahaa, Bora Bora, Maupiti, &c.); the Gambier Islands (Mangareva, &c.); the Tubuai Islands (Rurutu, Raiavae, Rimatava, &c.); Rapa Island; Makatea; Clipperton Island; and Malao Island. *Governor of French Pacific*, M. Henri Sautot, O.B.E., appointed 1940.

BRITISH CHAMBER OF COMMERCE.

6 Rue Halévy, Paris.

GERMANY.

**Deutsches Reich* (German Realm).

(See also pp. 589-590.)

On June 5, 1945, following upon the unconditional surrender of German armed forces on land, at sea, and in the air (May 8, 1945), representatives of the Supreme Commands of the United Kingdom, the United States of America, the U.S.S.R., and of the Provisional Government of the French Republic assumed supreme authority with respect to Germany, including all the powers possessed by the German Government, the German High Command and any German State, Municipal or Local Government or Authority. The Declaration was drawn up in the English, Russian, French and German languages and was signed at Berlin by Field-Marshal Montgomery, General of the Army Eisenhower, Marshal Zhukov and General F. de Lattre de Tassigny.

Germany, within her frontiers as they were on

* Modern German historians refer to the National Socialist (Nazi) régime as *Dritte Reich*. The first was the Holy Roman Empire, established in 962 by Otto I of Saxony, enduring until 1806. The second was established by Prince Otto von Bismarck, after the Franco-Prussian war in 1871. The third was

Dec. 31, 1937, is divided into Four Zones of Occupation, as under:—

Eastern Zone—U.S.S.R.

North-Western Zone—Gt. Britain.

South-Western Zone—U.S.A.

Western Zone—France.

The area of Greater Berlin is occupied by forces of each of the Four Powers and is administered by an Inter-Allied governing authority.

The ultimate delimitation of Germany's boundaries was considered by the Three Power Conference (President Truman, Mr. Churchill and Generalissimo Stalin) which opened at Potsdam on July 16, 1945, but certain changes had already taken place. The western boundary of U.S.S.R., includes the north-eastern corner of East Prussia with its seaport capital of Königsberg, and Poland is in occupation of the remainder of East Prussia and of extensive territory to the west, in compensation for the loss of territory to U.S.S.R. east of the Curzon Line, carrying the western frontier of Poland to the Rivers Oder and Neisse.

AREA AND POPULATION.

	Sq. miles.	Population.
Germany (1933)	181,466	65,336,000
Saar (1935)	734	840,000
Total	182,200	66,176,000

THE HISTORY OF GERMANY from 1863-1945 is marked by Wars of Aggression. In 1864, Prussia, in company with Austria, attacked Denmark, and after a short campaign annexed the peninsula of Schleswig-Holstein. In 1866, as a result of war with Austria (the Seven Weeks' War), Prussia acquired the hegemony of the North German Confederation from Austria. After the Franco-Prussian War of 1870, when Prussia wrested Alsace Lorraine from France, the North and South German Confederations became the German Confederation, the King of Prussia being proclaimed German Emperor at Versailles on Jan. 18, 1871.

The Constitution of the German Empire was based on the Prussian model, instituted by Bismarck, Prussian Chancellor from 1862 to 1890. The leading principle was that, although Parliament may vote new taxes and discuss laws, three things lie outside and beyond it. It may not control the armed forces, or frame policy, nor make or unmake governments. To the last days of the Hohenzollern Empire this principle was followed in constitutional practice.

At the outbreak of the War of 1914-1918, Germany was a Confederate League bearing the name German Empire (*Deutsches Reich*) under the hereditary presidency of the King of Prussia holding the title of German Emperor. At the close of the War (1918) the Reichsland of Elsass-Lothringen was restored to France, and the Saar basin was also temporarily ceded; parts of Posen and Prussia were ceded to Poland, North Schleswig to Denmark, and Moresnet and Malmédy to Belgium, Danzig becoming a Free State under the superintendence of the League of Nations. After a plebiscite, part of Silesia passed to Poland, and Memelland to Lithuania. The Saar district was returned to Germany in 1935. The German Colonies, which had extended over 1,035,086 sq. miles in Africa, 96,220 sq. miles in the Pacific, and 2,943 sq. miles in Asia—a total of 1,134,229 sq. miles, with a population estimated in 1914 at 15,000,000—were renounced, and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France; German East Africa to Great Britain; German

S.W. Africa to the Union of South Africa; the German Pacific possessions to Japan, Australia and New Zealand.

HITLER'S RISE TO SUPREME CONTROL.—On Nov. 9, 1918, two days before Germany sued for an Armistice from the victorious Allies, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. In January, 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female). Under the new Constitution of Aug. 11, 1919, the federal legislature consisted of a *Reichstag* representing the whole nation and elected by popular suffrage (male and female), with proportional representation; and a *Reichsrat* representing the separate states. Ministries were dependent upon the support of parliamentary majorities. The people had the right of initiative and the referendum. Bills dealing with economic questions or social issues arising thereout were first to be submitted to an advisory Economic Council (*Reichswirtschaftsrat*), which was replaced in 1935 by a Reich Economic Chamber.

Between the Revolutions of 1918 and 1932, the government of the Reich and of most of the states was almost continuously conducted by Cabinets supported by the middle and moderate-Left parliamentary parties, of which the Social Democrats and the Catholic Centre were the largest. The extreme Conservative-Nationalist parties and the Communists were in opposition. Successive elections practically obliterated the moderate-Conservative People's Party and the Democrats, while the Centre and Social Democrats remained relatively stable, and the Communists gained. Largely at the expense of the middle parties, the National Socialistic (Hitlerite) party rapidly increased, gaining its first successes at the Reichstag Election of Sept. 1930. In June, 1932, an ostensibly non-party (in reality ultra-Conservative) Cabinet was formed with Herr Franz von Papen as Chancellor. Under a form of martial law the Socialist-Centre Cabinet of Prussia was expelled from office, and the Reichstag was twice dissolved. In an election of July 31 the *Nationalsozialistische Deutsche Arbeiterpartei* (National Socialist German Workers' Party, or Nazis) gained 230 seats, but in the later election of November 6 their number fell to 196. Papen was succeeded in November by General von Schleicher. The organizer of the Nazi party was Adolf Hitler, who was born at Braunau, Austria, on April 20, 1889, and had migrated as a young man to Bavaria. On January 30, 1933, a joint Nazi-German-National Cabinet was formed with Adolf Hitler as Chancellor, Papen as Vice-Chancellor, and the German-National leader Hugenberg as Minister of Economy. This Cabinet change rapidly took the dimensions of a "National Revolution" of exclusively National Socialist colour. Hugenberg and his party associates were driven from office, and Adolf Hitler's Cabinet, after a victorious Reichstag election in March, pursued a radical policy consisting of abrogation of the Constitutional guarantees, expulsion from office of non-Nazis and monopolisation of all well-paid official posts by Party adherents, expulsion of non-Nazis from profitable positions in private business and replacement with Nazis, persecution of and violence against Jews, Liberals and Socialists, and centralisation of control over the states by the creation of "statthalterships." Later elections of plebiscite character yielded governmental majorities of 99 per cent., the competences of the federated states were further restricted in 1934, and finally the states'

sovereignty was transferred to the Reich. Manifestations of discontent, and an anti-governmental plot, led in June, 1934, to the assassination of over 70 persons, including a member of the Cabinet, Herr Roehm, the former Chancellor, General Schleicher and his wife, the ex-Prime Minister of Bavaria, and several generals. President von Hindenburg died on Aug. 2, 1934, and the presidential office was fused with the Chancellorship, Adolf Hitler taking the title of "Leader" (*Führer*). Serious conflicts between the government and the Evangelical and Roman Catholic Churches occurred between 1934 and 1938. After 1935 domestic politics fell into the background, and were replaced by international issues arising out of the Reich's denunciation of the Locarno Pact, Rearmament, the violent propaganda feud with Russia, the annexation of Austria, and the quarrel over the Sudeten-German districts of Czechoslovakia. Active official propaganda was conducted for the return of the colonies. In November, 1938, following the assassination of a member of the German Diplomatic Staff in Paris, further steps were taken against the Jews in Germany, a fine of £80,000,000 being imposed.

After the death of von Hindenburg (Aug. 2, 1934) Adolf Hitler exercised supreme and uncontrolled authority in the Reich, and the programme outlined in *Mein Kampf* (published 1933) for the domination of Europe was set in motion as soon as the armed forces of Germany had been brought to the required strength. During the execution of the programme smaller nations were incorporated into the Reich "one by one" (as predicted in *Mein Kampf*) in spite of protests from Great Britain and France, whose efforts to protect the weaker countries received support from the U.S.A. and the U.S.S.R. In Sept. 1938, Neville Chamberlain, the British Prime Minister, visited Hitler at Berchtesgaden and later in the month held conversations with him at Godesberg. On Sept. 29, 1938, the British and French Prime Ministers (Chamberlain and Daladier) attended the Munich Conference with Adolf Hitler and Benito Mussolini, and signed an agreement under which large territories of Czechoslovakia were ceded to Germany, the Conference receiving an assurance from Hitler that Germany had no further territorial aims. From this Conference the British Prime Minister returned to Heston Aerodrome with a paper signed by Hitler and himself recognising the desire of the British and German people never to go to war with one another again.

On March 15, 1939, German troops occupied Prague and Hitler drove into the city and hoisted the swastika above the home of the official residence of the President of Czechoslovakia. The British Prime Minister denounced the occupation as out of accord with the spirit of the Munich Agreement and the (Acting) Secretary of State in Washington denounced Germany's "wanton lawlessness." On March 20 Lithuania was coerced into surrendering Memel territory, and on Aug. 24 Hitler appointed a Führer in Danzig.

On Nov. 25, 1936, Germany and Italy signed a treaty at Berlin directed against the activities of the Moscow Communist International. To this *Anti-Comintern Pact* Japan, Manchukuo, Hungary and Falangist Spain expressed adherence.

In March, 1938, German forces invaded Austria, which was incorporated into the Reich. In Sept. 1938, the Sudeten area of Czechoslovakia was occupied by German troops. On March 15-16, 1939, Germany annexed Slovakia and declared a Protectorate of Bohemia and Moravia, thus extinguishing for a short time the independent State of Czechoslovakia.

On May 22, 1939, Germany and Italy signed a

* Under the so-called *Arjan Paragraph*, which grants full citizen rights only to Aryans.

10-year unconditional offensive-defensive alliance, a final move in what had become known as the *Berlin-Leningrad* line.

After concluding a Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany declared Danzig to be incorporated into the Reich, and on Sept. 1, 1939, Germany invaded Poland, thus precipitating war with France and Great Britain, who had (March 31) given a pledge to support Poland against aggression. On Sept. 17, 1939, Soviet armed forces invaded Poland and on Sept. 22, 1939, Germany and Soviet Russia declared, in a joint manifesto, that the Republic of Poland had ceased to exist and was divided into Eastern (Russian) and Western (German) districts.

On April 8-9, 1940, German forces invaded and over-ran Denmark, and seized the capital and other parts of South Norway.

On May 9-10, 1940, Germany invaded the Low Countries (Belgium and the Netherlands) and Luxembourg. After the defection of Belgium (May 28) German troops over-ran Northern France. On June 10, Italy declared war on France and Great Britain. Paris was occupied by German troops on June 14, and three days later the French Cabinet (Pétain) sought terms of peace. The British forces in Belgium, France and Norway were withdrawn with relatively small loss in personnel. *The Battle of Britain*—The *Blitzkrieg* (Lightning War) was diverted against Great Britain after the capitulation of the French Army, and on Aug. 22, Marshal Goering's *Luftwaffe* (Air Force) began the attack which was to prepare the way for the "Invasion of Britain." The losses sustained by the invaders caused the Battle of Britain to die down, but during the long-sustained battle considerable damage was caused to coastal towns and to London and other centres, with heavy loss of life among the civilian population. Military objectives in Berlin, throughout Germany, and in seaports and other centres of occupied territory, were repeatedly attacked by British and Allied air forces, concentrations of shipping collected for the "Invasion of Britain" being constantly harassed.

On April 6, 1941, Germany invaded Yugoslavia and joined Italy in the attack on Greece. The campaign in Greece and Crete, although apparently a success for German arms, marked the turning point in the war for the domination of Europe. Locally victorious and causing an evacuation of forces from Crete humiliating to the Allies, the plan for a lightning war against the U.S.S.R. was postponed for one month and this delay, coupled with the unexpected stubbornness of the Soviet defence, prolonged the Russian campaign beyond the prescribed limits.

On June 22, 1941, Germany attacked Russia and the lightning war proceeded at first according to plan, but (as stated above) the advance was checked by valiant and stubborn defence until winter came to the aid of the U.S.S.R., when the Soviet armies assumed the offensive and repulsed the forces that were besieging Moscow, Leningrad and Stalingrad.

In Oct. 1941, Nazi troops were in occupation of Austria, Czechoslovakia, the greater part of Poland, Belgium, the major part of France, Denmark, Norway, The Netherlands, Luxembourg, Greece and Crete, and Yugoslavia, with Bulgaria and Roumania in complete subservience to Reich policy and Italy as a docile junior partner.

The war went well on all fronts for the Reich until November, 1942, when the victories of El Alamein in North Africa and of Stalingrad in U.S.S.R. marked the beginning of the ascendancy

of the United Nations in the European theatre of war.

In 1943 a general Soviet offensive had thrown back the invaders (by November 30) almost to the Polish frontier. In September, 1944, troops of the Allied Expeditionary Force penetrated the Siegfried Line in the West, while Soviet armies crossed the borders of East Prussia.

On May 2, 1945, German forces in Italy surrendered unconditionally to Field-Marshal Sir Harold Alexander and on the same day Berlin capitulated to Marshal Zhukoff. On May 5, 1945, German forces in North-West Europe surrendered unconditionally to Field-Marshal Sir Bernard Montgomery. On May 8, 1945, the unconditional surrender of all German armed forces was accepted by representatives of General of the Army Dwight D. Eisenhower, Supreme Commander of the Allied Forces in Europe, and of Marshal Zhukoff, Commander-in-Chief of the Soviet armies.

Adolf Hitler is presumed to have died, probably a suicide, on April 30, 1945.

NATURAL RESOURCES.—Forests cover 12,654,170 hectares, of which 9,020,161 hectares of coniferous trees are the basis of a flourishing wood and wood-products industry. Although a great part of North Germany is sandy and infertile, natural conditions in general favour agriculture. The crops are rye, wheat, spelt, oats, barley, buckwheat, maize, potatoes, beans, leguminous and 100 plants, including sugar-beet, hops, vegetables, fruits, vines, flax, hemp, rape, and tobacco. The livestock and dairying industries have attained a high degree of perfection. Mineral wealth includes coal, iron, manganese, copper, lead, zinc, tin, nickel, quicksilver, gold, silver, sulphur, antimony, cobalt, arsenic, bismuth, wolfram, uranium, graphite, alum, boracite, pyrites, petroleum, potash, amber, semi-precious stones, and china clay; chalybeate brine-springs and medicinal waters are abundant. The minette iron mines of Lorraine were lost by the Peace Treaty of 1919, and as the remaining iron ore is low-grade and in part technically unsatisfactory, Germany was mainly dependent upon import. A Reich share-company for exploitation of home ore-fields was founded in 1937.

VITAL STATISTICS.—In 1943 there were 1,318,081 births (16.2 per 1,000 inhabitants), 999,370 civilian deaths (12.6 per 1,000) and 591,453 marriages (7.3 per 1,000). The infant mortality (1943) was 72 per 1,000 live births. In 1936 illegitimate births numbered 102,031. In 1938 there were 49,508 divorces. There were (1936) 57 large towns with over 100,000 inhabitants.

RELIGION.—Religious confessions (without Austria) were in 1933:—Protestants 40,865,151, Roman Catholics 21,172,087, Jews 499,682, others 2,646,614.

LANGUAGE AND LITERATURE.—Modern (or New High) German has developed from the time of the Reformation to the present day, with differences of dialect in Austria and Alsace and in the German-speaking cantons of Switzerland. The literary language is usually regarded as having become fixed by Luther and Zwingli at the Reformation, since which time many great names occur in all branches, notably philosophy, from Leibnitz (1646-1716) to Kant (1724-1804), Fichte (1762-1814), Schelling (1775-1854) and Hegel (1770-1831); the drama from Goethe (1749-1832) and Schiller (1759-1805) to Sudermann (1857-1928); and in poetry, Heine (1800-1856). German authors have

received the Nobel Prize for Literature on five occasions—Theodore Mommsen (1902), R. Eucken (1908), P. Heyse (1909), Gerhart Hauptmann (1912), and Thomas Mann (1929).

EDUCATION.—There were (in 1938) 51,120 public elementary schools with 179,260 teachers (131,280 male, 47,980 female) and 7,596,440 pupils (3,828,781 boys and 3,767,659 girls). Intermediate schools (9 to 10 years' course) numbered 1,563, with 272,630 pupils (133,700 boys, 138,930 girls); there were also continuation and special occupational schools and superior schools (between elementary-intermediate school class and universities). There were 25 universities, with 6,000 professors and teachers and 44,000 students (6,500 women). Of these institutions, six (Leipzig 1409, Rostock 1419, Greifswald 1456, Freiburg 1457, Munich 1472, and Tübingen 1477) were founded in the fifteenth century and three (Königsburg 1544, Jena 1577, and Würzburg 1582) in the sixteenth.

SOCIAL LEGISLATION.—Prince von Bismarck, Imperial Chancellor from 1870-1890, initiated schemes for compulsory insurance against sickness in 1883. In 1884 the schemes were extended to cover accidents and in 1889 a further extension covered infirmity from old age. In 1911 comprehensive reforms were introduced with provision of pensions for widows and orphans, but unemployment insurance was not enforced until 1927. In 1935 the National Socialist government replaced the Employers' Associations and Trades Unions with a National Labour Front and introduced compulsory Labour service for men and women, with partial restrictions of the right of choice of occupation and of residence.

LAW AND JUSTICE.—On Aug. 24, 1942, Adolf Hitler issued a decree formally abolishing the last remnant of statutory justice throughout the Greater Reich. By this decree Hitler proclaimed himself Supreme Arbitrer of Law, Otto Georg Thierack, President of the Secret People's Court, being appointed Minister of Justice to act under instructions from the Führer and Reichsminister Lammert (Defence Minister).

On Oct. 23, 1945, a new judicial system was proclaimed by the Allied Control Council assuring all Germans of equality before the law.

DEFENCE.—Increases of the regular Army and Navy and the construction of an Air Fleet proceeded secretly during the first two years of Nazi rule, and in March, 1935, Germany denounced the Treaty regulations, and declared her intention to maintain a conscript army of 36 divisions. The reconstruction of the German Air Force was also officially admitted and the reconstruction of the Navy was undertaken in defiance of Treaty obligations. An agreement establishing a ratio between German and British naval force was later concluded, but this was also repudiated. At the outbreak of War in 1939 the German Navy was believed to consist of 6 10,000-ton "pocket" battleships, armed with 11-inch guns, having a speed of 26 knots (of which *Graf von Spee* was scuttled in South American waters in Dec. 1940); 2 of 26,000 tons, and 4 of 35,000 tons (*Bismarck* was sunk, May 27, 1941 and *Tirpitz*, 45,000 tons, destroyed by R.A.F. Nov. 12, 1941; *Scharnhorst* and *Gneisenau* were permanently disabled); 6 light and 9 large cruisers; 2 aircraft carriers; and 60 to 70 submarines, of which about one half were ocean-going. In 1936 the term of compulsory service was lengthened from one to two years. In 1938 was undertaken the fortification of the Western frontier on a great scale, a *Siegfried*

Line being planned to face the French Maginot Line.

In 1942 a Home Guard organization (*Wacht*) was created, with a *Stadtwacht* in urban and a *Landwacht* in country districts.

The Volkssturm.—On Oct. 18, 1944, Hitler called up all able bodied men from 16 to 60 for defence against the victorious Allies, after the model of the *Home Guard* in Gt. Britan. The *Gauleiter* of each Gau was placed in command, under the supreme command of the *Reichsführer S.S.* (Heinrich Himmler).

COMMUNICATIONS.—The total length of the Railroads at end of 1936 was 43,000 miles, of which 42,300 were State owned. The number of registered automobiles (July 1, 1938) was, including Austria, 1,305,608, motor cycles 1,582,000, and motor lorries 382,837. Since 1933 2,100 kilometres of new motor-roads have been opened to traffic. Length of *Telegraph* and *Telephone Lines* (business year 1937-38), 397,000 kilometres; telegrams transmitted 20,251,000; post, telegraph, and telephone offices, 64,760; telephone subscribers, 3,624,000. The number of employees in the service of post, telegraphs, and telephones was 397,000. In addition to some 6,000 miles of navigable rivers there are over 1,500 miles of canals and 1,600 miles of ship canals. On January 1, 1913, the Mercantile Marine consisted of 2,098 sea-going steamers of 17 65 register tons and upwards (4,380,348 tons gross register), and of 2,420 sailing vessels (447,870 tons gross register); number of seamen, 77,746. As a result of the War and of the Peace Treaty shipping in 1919 sank to 419,000 tons, but there has since been a rapid recovery, and in 1939 shipping had increased to 4,492,708 gross tons. Recovery was helped by the establishment of eleven new yards during the War of 1914-18. The chief ports of Germany are Hamburg on the Elbe; Bremen, on the Weser; Stettin, on the Oder; Königsberg, on the Pregel; Kiel, on the Baltic; Emden, on the Ems; and Lübeck, on the Baltic. Arrivals at all ports were: 1913, 34,396,691 net tons; 1937, 45,212,000 net tons. Traffic in the *Kiel Canal* in 1938 was: vessels, 53,530; net tonnage 22,580,000. The total length of inland waterways in 1939 was 5,060 miles, including 300 miles of the *Mittel-land Canal*, opened Oct. 30, 1938, which connects Berlin with the natural waterways of the Oder, Elbe, Weser and Rhine. Craft up to 1,000 tons reach Berlin from the North Sea and the canal provides a south-western route to Basle, an eastern route to Breslau, or via the Oder, to the Baltic.

PUBLIC FINANCES.—The state financial structure was radically altered after the War of 1914-18. The Reich appropriated the chief direct taxes, including income tax, which had formerly been collected by the states and municipalities; and the states lost the profits from their railways, which were taken over by the Reich. The Reich was thereby compelled to contribute to the state and municipal revenues, mainly out of the yield of income and turnover taxes. The net *Budget Estimates* for 1934-35 (in which are not included the separately financed Railways and Posts) were:—

	1,000,000 Reich-mark.
Revenue	6,458
Expenditure	6,458

After 1934-35 Reich Budgets were sanctioned by the Cabinet in regular form, but the totals and the details were kept a secret. The gross yield of Reich taxation was 32,650 million marks in 1941-42, as against 6,647 millions in 1932-33.

Revenue Figures.

	Rm.
1930	23,500,000,000
1939	27,200,000,000
1941	30,000,000,000
1941-42 From the Reich ..	32,000,000,000
From Occupied Countries, etc. . .	13,000,000,000

The Reichsmark, of 100 Reichspfennig, was of the value of 20.43 Rm. = £1 at the date of the outbreak of war (Sept. 3, 1939).

THE GERMAN DEBT.

Figures of "disclosed indebtedness" have been issued, as under:—

	Rm.
March 1938	11,793,000,000
Sept. 1939	39,749,000,000
Dec. 1940	79,000,000,000
Aug. 1941	108,000,000,000
July 1942	151,200,000,000
May 1943	208,830,000,000

There are no trustworthy estimates of "undisclosed indebtedness."

In the second half of the year 1940 the War bill of the Reich was stated to be at the rate of Rm. 68,000,000,000 per annum and for the year 1941 at the rate of Rm. 72,000,000,000 per annum. Currency notes circulating at Feb. 18, 1945, were of the nominal value of 53,000,000,000 marks, an increase of 16,000,000,000 marks in 12 months.

The debts of the constituent states on Dec. 31, 1937, totalled 2,331 million marks, and of the Hanse cities 555 million Rm.; of the municipalities (with over 10,000 inhabitants), 9,243 million Rm. (on Sept. 30, 1937).

FOREIGN DEBTS.—A short-term foreign debts crisis began in July, 1931, owing to sudden withdrawals of credits to German banks, for which the Reichsbank was unable to deliver gold or exchange. Under a "standstill agreement" of February, 1932, Germany was protected against any further substantial withdrawals of credits, but she was to pay and transfer the interest thereon. A Government census for February 29, 1932, showed public and private indebtedness abroad at 20,623 million marks, whereof 10,753 millions short-term (maturing before March, 1933), and 10,470 millions long-term. In addition were foreign claims in the shape of holdings of German domestic securities and real property, which brought the total indebtedness to an estimated 254-261 milliard marks. Of the 20,623 millions debt proper, 3,125 millions were liabilities of the Reich (mainly Dawes and Young loans), 1,215 state and municipal debts, 6,706 millions bank debts, and 8,785 millions debts by Agriculture, Industry and Communications. The chief creditor countries were:—

	Total Claims. Marks.	Whereof Long-Term. Marks.
U.S.A.	8,392,000,000	5,165,000,000
Netherlands ..	3,575,000,000	1,914,000,000
Switzerland ..	2,761,000,000	1,746,000,000
Great Britain ..	2,415,000,000	1,129,000,000
France	956,000,000	482,000,000

On Oct. 14, 1942, it was announced in Geneva that Germany had an external debt owing to other European States of 15,500,000,000 Swiss Francs (238,000), the debt to Switzerland being 1,000,000,000 Swiss Francs.

CULTURE.—Agriculture is the leading German occupation. The cultivated area in 1939

Crop.

Acres.

Produce
(metric tons).

	Acres.	Produce (metric tons).
Rye	12,081,000	9,381,000
Oats	8,205,000	8,827,000
Wheat	6,049,000	5,585,000
Barley	4,833,000	4,244,000
Potatoes	7,940,000	56,300,000
Sugar Beet	1,421,000	17,400,000
Hay	18,780,000	25,000,000

Area under orchards is 103,742 hectares, vineyards 82,110 hectares. The live stock census of December, 1939, showed: horses, 3,800,000; cattle, 23,500,000; swine, 24,000,000; sheep, 6,000,000.

INDUSTRY.—Industry is highly developed in all the larger German states. Prussia leads in coal-mining, iron and steel, metalwares, machinery, and electro-technical articles, but manufactures comprise practically all branches. The cotton works are extensive, and there are numerous manufacturing of silk, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, as well as chemicals and brewing. Bavaria produces machinery, jewellery, scientific instruments, pottery, wood-products, paper, leather, textiles, and beer. Special manufactures of Saxony are machinery, yarns and cloth, knitted goods, hosiery, furs, pottery, glass, and musical instruments. Württemberg has manufactures of textiles, paper, leather, firearms, clocks, and tobacco; Baden of chemicals, jewellery, and cigars. The toys industry of Thuringia is important.

In 1942 there were over 2½ million foreign workers in Germany, including over 1,000,000 Poles, 300,000 Italians, 200,000 Belgians, 250,000 Czechs and Slovaks, 160,000 from the Netherlands, 100,000 French and 80,000 Croats.

FOREIGN TRADE.

Imports.

Exports.

	Imports. Marks.	Exports. Marks.
1927	14,228,000,000	10,801,000,000
1931	6,632,000,000	9,600,000,000
1935	4,159,000,000	4,270,000,000
1936	4,218,000,000	4,768,000,000
1937	5,455,000,000	5,901,000,000
1938	5,443,000,000	5,249,000,000

In 1938 the Foreign Trade of Germany was shared as under:—

	To Germany. Marks.	From Germany. Marks.
Country.		
Argentina	240,000,000	152,900,000
Belgium	154,400,000	190,400,000
Brazil	219,600,000	163,200,000
China	106,600,000	104,600,000
Czechoslovakia ..	188,800,000	161,600,000
France	159,100,000	229,000,000
India	151,200,000	114,300,000
Italy	284,200,000	349,100,000
Japan	28,900,000	102,800,000
Netherlands	208,100,000	459,800,000
Sweden	267,400,000	275,200,000
United Kingdom ..	309,200,000	374,100,000
U.S.A.	454,500,000	157,200,000

At the outbreak of War (Sept. 3, 1939) the sea-borne trade of Germany outside Northern Europe ceased, owing to the command of the sea exercised by the United Nations.

FEDERATED STATES.

PRUSSIA.

The Republic of Prussia comprises the larger portion of Germany, with a total area of 113,750

sq. miles and a population (Census of May 17, 1939), of 47,762,040. *Heligoland* (an island of 130 acres, with a population of about 4,000 in 1933), which had been taken from Denmark by a British naval force September 5, 1807, was ceded to Germany (in exchange for rights in East Africa) June 18, 1890. The island formed part of the Schleswig Holstein Province of Prussia until the unconditional surrender of Germany on May 8, 1945. On May 13, 1945, it was occupied by British forces.

CAPITAL, Berlin, on the Spree (341 square miles) had a population on May 17, 1939, of 4,332,242. The city was repeatedly bombed by the Allies and surrendered unconditionally to U.S.S.R. forces May 2, 1945. It is now occupied by Soviet, American, British and French armed forces.

Other largest cities are: Cologne, on the Rhine (768,426), captured by U.S. 1st Army, March 6, 1945; Essen, on the Ruhr (659,871); Frankfurt on the Main (546,650); Düsseldorf, on the Rhine (539,905); Hanover, on the Leine (472,530); Duisburg (431,260); Dortmund, on the Emscher (537,000); Wuppertal (398,099); Gelsenkirchen (313,000); Bochum (303,288); Magdeburg (334,358); Stettin (268,920); Kiel (272,311); Halle, on the Saale (220,370); Oberhausen (191,905); Kassel (217,085); Krefeld-Uerdingen (169,920); Aachen (Aix-la-Chapelle) (165,710); Wiesbaden (172,039); Lübeck (153,630); Hagen (151,870); Erfurt (166,670); Solingen (138,600); Mulheim, on the Ruhr (136,800); Potsdam (136,200); Hildesheim (126,402); München-Gladbach (127,115); Saarbrücken (135,080); Münster (143,750); Bielefeld (128,714); Harburg (118,200); Remscheid (103,450); and Bonn (101,400).

Breslau, on the Oder (615,000), Głiwitz (117,700) and Beuthen (100,500) are situated in the territory occupied by Poland; East Prussia, including Königsberg (668,000), the seaport capital, is occupied by U.S.S.R., the lower portion being occupied by Poland.

BAVARIA.

The Republic of Bavaria is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16'—50° 34' N. lat. and 9° 01'—13° 50' E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. The total area is 29,486 sq. miles, and the population on May 17, 1939 (excluding Saarpfalz), 8,280,000. The Thuringian Duchy of Coburg was incorporated in Bavaria in 1921.

CAPITAL, Munich, on the Isar. Population (1939), 828,325. Other large towns are Nurnberg, N.W. of Munich (430,851); Augsburg, on the Wertach-Lech (185,704); Ludwigshafen, on the Rhine (143,417); and Würzburg (108,620).

SAXONY.

The Republic of Saxony has an area of 5,866 English square miles, with a population on May 17, 1939, of 5,206,861.

CAPITAL, Dresden (occupied by Allied forces, May 8, 1945). Pop. (1939), 625,174.

Its chief towns, after the capital, are Leipzig (pop. 701,606), the great book-market; Plauen (pop. 110,342), and Chemnitz (pop. 334,563), the Manchester of Saxony. Wittenberg, the capital of "Upper Saxony" (a province of Prussia since 1815) was "the cradle of the Reformation." It contains the tombs of Martin Luther and Philip

Melancthon, and the castle church upon the door of which Luther nailed his 95 Theses.

WÜRTTEMBERG.

The Republic of Württemberg has an area in 7,534 English square miles, and a population (of 1939) of 2,907,166, of whom 30 per cent. are Roman Catholics.

CAPITAL, Stuttgart. Population (1939), 459,538.

MINOR STATES.

Baden—5,819 sq. m., pop. 2,518,103. Capital, Karlsruhe (189,850).

Other towns: Mannheim (283,801), Freiburg (111,860).

Hesse—2,968 sq. m., pop. 1,469,909. Capital, Darmstadt (115,526); Mainz (158,971).

Mecklenburg—5,068 sq. m., pop. 910,628. Capital, Schwerin; Rostock (122,400).

Oldenburg—2,479 sq. m., pop. 582,400. Capital, Oldenburg.

Brunswick—1,418 sq. m., pop. 599,208. Capital, Brunswick (201,306).

Anhalt—906 sq. m., pop. 436,213. Capital, Dessau (120,732).

Lippe—470 sq. m., pop. 188,598. Capital, Detmold.

Schaumburg-Lippe—130 sq. m., pop. 54,162. Capital, Bückeburg.

Land-Thüringen—Saxe-Weimar-Eisenach, Saxe-Meiningen, Saxe-Altenburg, Schwarzburg-Rudolstadt, Schwarzburg-Sondershausen, Reuss-Greiz, Reuss-Gera and Gotha—4,541 sq. m., pop. 1,760,595. Capital Weimar.

The Free Hanse Cities are Lübeck, on the Trave (area 115 square miles, pop. 153,630), Bremen, on the Weser (area 99 square miles, pop. 342,123), and Hamburg, on the Elbe (area 160 square miles, pop. 1,682,220). Frontier readjustments of the Hanse Cities, the most important of which was the inclusion of Altona (formerly Prussian) in Hamburg, were decreed in 1937.

GREECE.

(Hellas.)

King of the Hellenes, George II., K.G., G.C.M.G., G.C.V.O., D.S.O., born July 20, 1890; *accessed* Sept. 27, 1922 (on the abdication of his father King Constantine I.); *deposed* March 25, 1924; *restored to the Throne* (after a Plebiscite) Nov. 3, 1935; *married* Feb. 27, 1921, Princess Elizabeth of Roumania (born Oct. 12, 1894); *marriage dissolved* June 6, 1925.

Crown Prince (Diadoch) H.R.H. Prince Paul, brother of King George II., born Dec. 14, 1904; *married* (Jan. 9, 1938) Princess Frederika, daughter of the Duke of Brunswick (born April 18, 1917), and has issue Princess Sophia, born Nov. 2, 1938; Prince Constantine, born June 2, 1940; and Princess Irene, born May 11, 1942.

Greek Regent, Archbishop Damaskinos, G.C.M.G., sworn in Dec. 31, 1944.

CABINET.

(Sworn in Nov. 1, 1945.)

Prime Minister, Minister of Foreign Affairs and Minister of Marine, Prof. Panayotis Kanelopoulos. *Finance*, Prof. G. Kassimatis. *Justice*, Prof. G. Economopoulos. *War*, General Georgoulis.

Interior, M. Paros.
Public Order, M. Satsotas.
Labour, N. Catalanos.

On Nov. 2, 1935, the Cabinet adopted a Five Point Programme:—

- I. Energetic handling of economic problems.
- II. Raising the morale of the Greek people, who had been brought to the verge of despair by fear of the future.
- III. Re-establishment of law and order.
- IV. Punishment of collaborators with enemy.
- V. Introduction of elections at earliest possible date.

ROYAL GREEK EMBASSY IN LONDON.

51 Upper Brook Street, W.1.

Ambassador Extraordinary and Plenipotentiary, Monsieur Thanassis Aghinides (November, 1942).

Minister Councillor, Monsieur J. A. Romanos.

Do. (for Press Affairs), Monsieur A. A. Pallis.

1st Secretaries, Monsieur Otho Contostavlos; Monsieur Dimitri Lambros.

Secretary, Monsieur Leonidas Papagos.

Hon. Attaché, Monsieur P. P. Agenti, D.Litt.

Commercial Councillor, Monsieur Spiro X. Constantimidis.

Press Attaché, Monsieur Chr. S. Hourmouzios.

Service Attachés, 71 Park Street, London, W.1.

Military Attaché, Colonel Th. Grigoropoulos.

Naval Attaché, Capt. E. Georgacopoulos, R.N.

Assistant Naval Attaché, Commander G. Sarris, R.N.

Air Attaché, Air Vice-Marshal G. Cassimatis, R.A.F.

Consulate General, 7 Park Lane, London, W.1.

Consul General, Monsieur B. Mostras.

A maritime Kingdom in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S and W. by the Ionian Sea, and on the E. by the Aegean and Turkey, with an estimated area of 50,271 sq. miles and a population (Census of May 15, 1928) of 6,204,684; estimated at 7,534,975, Dec. 31, 1940.

The area of the mainland is 41,457 sq. miles, and of the islands 8,810 sq. miles. The mainland divisions are: *Central Greece* (which includes the island of Euboea and the *Sporades*, or "scattered islands," of which the largest is *Skyros*), *Thessaly*, *Peloponnese* (or "Island of Pelops," joined to the mainland by the Isthmus of Corinth), *Macedonia* (which includes Mt. Athos), *Epirus* and *Thrace*. The islands are the *Cyclades* (a circular group numbering about 200, with a total area of 923 sq. miles; the chief islands are *Syra*, *Andros*, *Tinos*, *Naxos* and *Santorini*, *Milos*, *Serifos* and *Paros*), the *Ionian Islands* (*Cephalonia*, *Corfu* and *Zante*), *Crete*, and the *Aegean Islands* (*Chios*, *Lesbos* and *Samos*). In *Crete* there was for 7,600 years (5000 to 1400 B.C.) a flourishing civilisation which spread its influence far and wide throughout the Aegean, and the ruins of the palace of *Minos* at *Cnossos* afford evidence of astonishing comfort and luxury. Greek civilisation emerges about 1300 B.C. and the poems of *Homer*, the blind poet of *Chios*, which were probably current about 800 B.C., record the 10 year struggle between the *Achaean*s of *Greece* and the *Phrygians* of *Troy* (1194-1184 B.C.).

Prior to the Balkan Wars of 1912-13 the area was less than 25,000 sq. miles, the addition of portions of *Macedonia* and *Epirus*, *Crete* (2,950 sq. miles, population 336,151), and certain *Aegean Islands* increasing the area to 43,522 sq. miles. During the War of 1914-18 *Greece* eventually declared for the Allies against the Central Powers, and her territories were increased by the occupation

of *Thrace* (including the monastic republic of *Mount Athos*), and the islands of *Imbros* and *Tenedos*. By the *Treaty of Lausanne* (1923) *Greece* lost Eastern *Thrace* (that part lying E. of the *Maritza* river) and the islands of *Imbros* and *Tenedos*, which were retroceded to *Turkey*.

Government.—The Independence of *Greece* dates from March 25, 1821, and was ratified by the *Treaty of Adrianople* (Sept. 12, 1829) and the *Convention of London* (Feb. 3, 1830), after a successful insurrection against the *Turkish* government, to which the country had been subjected since the 15th century. After a succession of rulers of the *Glucksburg* dynasty the Kingdom was declared a Republic by the Constituent Assembly on March 25, 1924. On Oct. 11, 1935, it was again declared a Kingdom, and a plebiscite held on Sunday, Nov. 3, 1935, caused the return to the Throne of King *George II*. Prior to Aug. 4, 1936, the legislature consisted of a Senate (*Gerousia*) of 120 members, and of a Chamber of Deputies (*Vouli*, or *Boule*) of 250 members elected for 4 years by universal manhood suffrage, women being electors for local government purposes only.

In August, 1940, *Greece* became embroiled with Italy on allegations of Greek complicity with unrest in *Albania*. On October 28, 1940, Italy declared war on *Greece* and invaded the country from *Albania*, but within a month Greek troops, assisted on land and sea and in the air by Great Britain, expelled every invader and advanced in triumph across *Albania*. On April 6, 1941, Germany invaded *Yugoslavia* and came to the aid of the defeated Italian forces. The fresh onslaught led to the occupation of *Greece* by Nazi troops and to the withdrawal from *Greece* (and eventually from *Crete*) of the forces sent to the assistance of *Greece* by the Allies. By her own exertions and by allied help *Greece* was freed in October, 1944.

Production.—Agriculture is the principal industry and employs more than half the population, the most important product being tobacco, which accounts for nearly half the total exports of *Greece*. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. Currants were originally brought from *Corinth* and were known as *raisins de Corinthe*, anglicised as currants. The principal minerals are silver, lead, zinc, emery, copper, magnesium, sulphur, salt, and marble. The chief manufactures are smelting, textiles, and shipbuilding.

Defence.—Service in the Army is universal and compulsory between the ages of 21 and 57. Both the land and sea forces were reorganised during the War of 1914-1918, and about 150,000 all ranks fought with the Allied Armies.

The armed forces of *Greece* were reformed in the Middle East, and all three arms took part in operations in the Mediterranean and other sectors. In 1943-1944, *Gr. Britain* transferred 2 destroyers and 4 corvettes to the Greek navy. Various groups of partisans carried on civil war after the expulsion of the invaders.

A British mission, under the direction of Lt.-Col. Sir Charles G. Wickham, K.B.E., D.S.O., formerly Inspector-General of the Royal Ulster Constabulary, arrived in Athens in July, 1945, armed by the Greek government with full powers to reorganise the Greek police force, gendarmerie and prison service, free from politics.

Communications.—There were (1928) 1,993 miles of railroad open for traffic. There is a ship canal cutting through the Isthmus of *Corinth* for ships up to 5,000 tons. The post offices number 1,345, telegraphs, 4,960 miles. The mercantile marine consisted (1936) of 615 steamships and motor vessels

(1,820,403 tons). In 1938, 2,992 ocean-going vessels (5,475,780 tons) entered the ports.

Education is free and compulsory, maintained by local taxation supplemented by State grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

Language and Literature.—Modern Greek is a new language, intermediate between ancient Greek and Romance, the *argot* of the Aegean (compounded from Greek, Turk, Slav and Latin) which bore little resemblance, except for the Greek characters in which it was written, to the language of Plato or Aristotle. Modern Greek literature may be said to have been founded by Adamantios Korais (Diamant Coray) who lived and died in Paris (1748-1833). In 1940 there were 30 daily newspapers, of which 12 were published in Athens.

FINANCE.

Revenue (Budget) Drachmæ 16,500,000,000
Expenditure (do.) 30,300,000,000

On March 31, 1940, the total of the Greek Public Debt was stated at Dr. 52,746,000,000 (*Internal*—Consolidated Dr. 14,849,000,000, Floating Dr. 450,000,000—Total Dr. 15,299,000,000; *External*, Dr. 37,447,000,000).

The Greek Drachma (of 100 Leptæ) was quoted in 1941 at 515 = £1 sterling.

TRADE.

1940. 1941.
Total imports Dr. 12,215,000,000 Dr. 4,840,000,000
Total exports 9,080,000,000 3,904,000,000

The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. The exports consist of currants, tobacco, wine, olives, olive oil, figs, cognac, hides, lead, iron ore, magnesite, iron pyrites, chrome ore, emery, marble, sponges and carpets.

CAPITAL, Athens. Population (1937), 400,000. Other large towns are: Ψ Thessaloniki (Salonica) (240,000), Ψ Piræus (290,000), Ψ Patras (67,000), Ψ Volo (48,000), and Ψ Cavalla (52,000); in Crete: Ψ Heraklion or Candia (39,000), Ψ Canica (27,000), and Ψ Rethymno (10,000); in the Ionian Islands: Ψ Corfu (35,000), Ψ Zante (23,000), and Ψ Argostolion (10,000); in the Cyclades: Ψ Hermopolis (22,000); in Lesbos: Ψ Mytilene (32,000); in Chios: Ψ Chios (27,000).

FLAG: 9 horizontal bands, alternately blue and white, with white cross, on blue ground, in corner.

NATIONAL DAY: March 25.

BRITISH EMBASSY.

(8 Odos Dragatsaniou, Athens.)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Reginald W. A. Leeper, K.C.M.G., C.B.E. (1943).

1st Secretary, R. P. Heppel.

2nd Secretary, E. R. Warner.

Commercial Secretary, A. N. Cumberbatch, C.B.E.

Military Attaché, Lt.-Col. G. H. N. Larden.

Financial and Economic Adviser (with local rank of 1st Secretary), E. R. Lingen.

Administrative Officers, Maj. H. D. Rydér; Maj.

D. Wallace (local rank); E. K. Waterhouse

(local rank).

Archivist, H. W. Speck.

Athens—Consul-General, H. A. D. Hoyland, C.B.E.

Salonica—Consul-General, T. C. Rapp, C.M.G., M.C.

GUATEMALA.

Republica de Guatemala.

President, Dr. Juan Jose Arevalo, assumed office March 15, 1945.

LEGATION IN LONDON.

21 Cavendish Square, W.1.

Envoy Extraordinary and Minister Plenipotentiary in London, His Excellency General Miguel Ydigoras Fuentes (April 3, 1945).

Consul-General, Señor Dr. Don Ismael Gonzalez-Arevalo.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. long. from 88° 12' 49' to 92° 13' 43', and comprises an area of 45,452 square miles, and a population (at the census of 1940) of 3,284,269. There is a single chamber legislative assembly of 67 members and a Council of State of 7 members. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Dec., 1917. The country is well watered by numerous rivers; the climate is hot and very malarious near the coast, temperate but enervating in the higher regions. The rainfall in the capital is 57 in. per annum. 740 miles of railway were open for traffic in 1943. There were 4,079 miles of State telegraph and 4,172 of State telephone working on Dec. 31, 1934. The chief Ψ seaports are San José de Guatemala and Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side.

Language and Literature.—Spanish is the language of the country, and since the establishment of the University at the capital in 1918 education has received a marked impulse and the high figure of illiteracy is being reduced. The National library contains about 30,000 volumes in the Spanish tongue. In 1940 there were 4 daily newspapers in the capital.

FINANCE.

1943-44
Estimated Revenue Quetzales 10,600,000
Estimated Expenditure 10,600,000
External Debt (Dec. 31, 1943) 9,400,000
At par 1 Quetzal = \$1 U.S.
Exchange rate (1943), 4.10 Q = £1.

TRADE.

1943.
Imports Quetzales 17,900,000
Exports 20,200,000
1942 1943
Imports from U.K. £115,000 £82,000

The principal export is coffee, other articles being bananas, chicle (chewing gum), hides, honey, timber and gold. The chief imports are textiles, cotton, yarn, wheat, flour, petroleum and vehicles.

CAPITAL, Guatemala. Pop. (1940), 176,780; other towns are Quezaltenango (41,858), Coban (45,919), Zacapa (30,113), and Ψ Puerto Barrios (3,000).

FLAG: Three vertical bands, blue, white, blue.

BRITISH LEGATION.

HAITI.

(République d'Haiti.)

President, Elie Lescot, born 1883; assumed office May 10, 1942.

Foreign Affairs, M. Serge Léon Défly.

LEGATION IN LONDON.

c/o The American Embassy,
1 Grosvenor Square, S.W.1.

Minister in London, H.E. Monsieur Léon Laleau (1945).

The Republic of Haiti is the western or French-speaking portion of Hispaniola, which, next to Cuba, is the largest of the "West India" Islands. A French colony from 1677, it was proclaimed independent on Jan. 1, 1794, by insurgents under the leadership of Toussaint L'Ouverture (born 1743; died 1803), originally a black slave, who became commander-in-chief of the island and President. He capitulated to the French in 1802 and died in captivity in 1803. A further revolt under Jean Jacques Dessalines, also a former black slave, who had fought under Toussaint L'Ouverture, established the independence of the French portion of the island. Dessalines became Emperor of Haiti, but was assassinated in 1806. In 1858 Haiti was again declared a republic. It is now governed under a Constitution ratified in 1932. The legislature consists of a Senate (21 members) and a Chamber of Deputies (37 members). The President is elected by the legislature for a period of six years. In 1925 a treaty was entered into with the U.S.A. whereby certain public services were to be controlled by U.S. officials. On Oct. 1, 1931, the U.S. officials in charge of Public Health, Public Works, and the Agricultural Technical Service, were withdrawn, and the *Garde d'Haiti* was completely Haytianised and turned over to Haitian officers on Oct. 1, 1934. The last Company of the U.S. Marines left Haiti Aug. 15, 1934, after an occupation of 19 years. The Financial Service remains under U.S. control; there is a Fiscal Representative and a Deputy-Fiscal Representative appointed by the President of Haiti upon the nomination of the President of U.S.A.; the Fiscal Representative has under his control the Customs service, and may employ not more than 100 Americans. The internal revenue service was turned over on Oct. 1, 1934.

The area of the Republic of Haiti is estimated at 10,714 square miles, with a population estimated in 1936 at about 3,000,000 inclusive of about 100,000 foreign residents.

The mountains of Haiti are richly and heavily forested, and the climate is equatorial, nearly to

their summits. Haiti is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sisal, sugar, honey, gums, and oil-seeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. There are about 135 miles of railway. Wireless telephony was established in 1937 between Haiti and Porto Rico, Santo Domingo, New York and Europe. A wireless broadcast station (Radio-Haiti) has been erected at Leogane, about 22 miles west of Port-au-Prince. In 1940-41 the entries and clearances at Port-au-Prince were 442 steam and motor vessels (1,253,681 tons).

Language and Literature.—French is the official language of the country, but most of the people speak a debased dialect known as Creole French. Education is free and nominally compulsory but despite the impetus afforded during the American occupation it is not widespread and there is no recognised native literature. In 1940 there were 2 daily newspapers in French at Port-au-Prince.

Revenue	Gourdes 36,000,000
Expenditure	" 36,000,000
Total debt (Sept. 30, 1944):—	
Internal	" 25,000,000
External	" 35,500,000
5 Gourdes = \$1 (U.S.).	

Total imports	Gourdes 49,200,000
Total exports	" 53,100,000

The principal exports are coffee, raw cotton, logwood, cocoa, sugar and sisal; the principal imports cottons, foodstuffs, machinery, mineral oil and soap.

CAPITAL, Ψ Port-au-Prince. Population, 125,000; other centres are: Ψ Cap-Haitien (20,000), Ψ Aux Cayes (15,000), Ψ Gonaves (12,000), Ψ Jacmel (10,000), Ψ St. Marc (10,000), Ψ Port de Paix (8,000).

HONDURAS.

(República de Honduras.)

President, Dr. Tiburcio Carías Andino, born March 25, 1876; assumed office Feb. 1, 1933; term extended to Jan. 1, 1949.

LEGATION IN LONDON.

Minister in London (vacant).

Consulate-General in London, 67, Basinghall St., E.C.2.

Consul-General, Liverpool, Licenciado Don Tiburcio Canas C.

Honduras, one of the five Republican States of Central America, lies between lat. 13 and 16° 30' N. and long. 83° and 89° 41' W., with a seaboard of about 400 miles on the Caribbean Sea and an outlet, consisting of a small strip of coast some 60 miles in length on the Pacific. Its frontiers are contiguous to those of Guatemala, Nicaragua and El Salvador. The Mosquitia territory is in dispute with Nicaragua, but the matter is under arbitration. The Republic contains a total area of approximately 44,375 square miles and a population of 1,105,504 (Census 1940) of mixed Spanish and Indian blood. There is a strong negro element in Northern Honduras. The country is very mountainous, being traversed by Cordilleras, but possesses well watered fertile valleys and wooded tablelands. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and healthy in the uplands.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century, Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed.

Under the revised Constitution of 1936 the Legislature consists of a single Chamber Assembly of 39 members elected by popular vote in the ratio of one deputy per 25,000 inhabitants. The executive authority is vested in the President who is assisted by a Council of six Ministers. The Republic is divided into 17 departments and one territory, La Mosquitia, which is inhabited by Indian tribes and largely unexplored.

The chief industry is the production of bananas. Other products are coffee, coconuts, tobacco, beans, maize, rice and tropical fruits. Cattle raising is practised in the districts of Olancha and Yoro, and it is estimated that the country carries 500,000 head of horned cattle. There are large tracts of uncultivated land.

The mineral resources of the country are reputed to be considerable, though still largely unexploited. In the year ending June 30, 1942, 3,500,000 oz. of silver and 29,000 oz. of gold were extracted. The two principal mines are under American control.

920 miles of railway were in operation in the year 1943 chiefly to serve the banana plantations and the Caribbean ports. Apart from about 600 miles of metalled motor highways, the roads are for the most part tracks fit only for mule and ox-cart. In the Aviation Division there are 32 landing fields in use in Honduras, exclusive of emergency fields. There are 2,825 miles of telephone lines 4,597 miles of telegraph lines and 349 post-offices.

The chief ports are Puerto Cortes, La Ceiba, Tela and Truxillo on the North Coast, through which passes the bulk of the banana trade with the United States and Europe, and Amapala situated on Tiger Island in the Gulf of Fonseca on the Pacific side.

Language and Literature.—The language of the country is Spanish. Education, although free and nominally compulsory, is backward and illiteracy is lamentably high. There is no recognised native literature.

FINANCE. 1944-45.

Revenue (Budget).....	11,400,000
Expenditure (do.).....	11,400,000
Foreign Debt (June 30, 1944).....	3,500,000
Internal Debt (June 30, 1944).....	10,000,000

The currency is the *Lempira* (named after a native chief), value of 50 cents, U.S.

In 1925 the Government of Honduras ratified an agreement concluded with the Council of Foreign Bondholders providing for the liquidation of the Foreign Debt by annual payments of £40,000 over a period of 30 years, and these payments are regularly made.

TRADE.

	1943.
Imports.....	U.S. \$9,300,000
Exports.....	3,700,000
Imports from U.K. (1943).....	27,000
Exports to U.K. (1939).....	£138,914

British Military Representative, Maj.-Gen. O. P. Edgumbe, M.C.

British Political Representative, A. D. F. Gascoigne.

COALITION CABINET.

(Appointed Nov. 15, 1945.)

Prime Minister, M. Zoltan Tildy (Smallholders' Party).

The 18 Portfolios are held by 9 Smallholders' Party; 4 Communists; 4 Social Democrats; and 1 National Peasants' Party.

By unanimous vote of the National Assembly, Hungary was re-constituted a Kingdom in 1920, after having been declared a Republic on Nov. 17, 1918. Hungary joined the Anti-Comintern Pact on Feb. 24, 1939, and on Nov. 20, 1940, signed the German-Italian-Japanese Pact, thus siding definitely with the Axis Powers. On April 6, 1941, Hungarian armies invaded Yugoslavia.

On March 19, 1944, Germany occupied Hungary and on March 22 a Quisling government was set up with Dome Sztoay (formerly Hungarian Minister to the Reich) as Prime Minister and Minister of Foreign Affairs. He was succeeded (Aug. 1944) by Colonel-General Lakatos.

The victorious advance of the Soviet armies in Oct.-Nov. 1944, freed Hungary from Axis domination, Soviet troops entering Budapest on Nov. 5.

The area of Hungary in 1941 was 160,165 sq. kilometres (61,847 sq. miles) as against 283,086 sq. kilometres (109,300 sq. miles) in 1914.

After the defeat of Germany and Austria,

Hungary in 1918, Hungary was compelled, under the *Treaty of Trianon* (June 4, 1920), to cede Transylvania to Roumania; Croatia and Slavonia to the new Yugoslav kingdom; Slovakia and Ruthenia to Czechoslovakia; and the Burgenland to Austria, thus losing 66 per cent. of territory and 58 per cent. of population.

As a result of the *First Vienna Award* of Nov. 2, 1938, part of Slovakia and Ruthenia was returned to Hungary. In March, 1939, she recovered the remainder of Ruthenia and a further small portion of Slovakia by military action. During the progress of the War (1939-40), in which neither country was then engaged, Hungary demanded from Roumania the cession of the greater part of Transylvania and with the support of the Axis Powers obtained, under the *Second Vienna Award* (Aug. 30, 1940), about two-thirds of the territory claimed, including the towns of Cluj (Klausenburg) and Oradea Mare (Grosswardein), the latter being a University seat. Under the Soviet-Roumanian Peace Treaty of Aug. 23, 1944, the Vienna Award of Aug. 30, 1940, was repudiated. Political neighbours are Slovakia and U.S.S.R. on North, Yugoslavia on South, Roumania on East and Germany on the West.

The population, which includes large German, Slovak, Roumanian and Ruthenian minorities, was 14,699,785 (at the census of Jan. 31, 1941) of whom 75 per cent. were Magyars. At the date of the German occupation (March 19, 1944) Hungary had about 60,000 Polish refugees, with their own schools and Press, as Hungary and Poland were not at war. The plight of the Poles and Jews became desperate after the occupation and wholesale deportations and slaughter were employed in their "elimination."

The greater part of the area of Hungary consists of the Alföld or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine. There are rich coal deposits in the mountainous districts, 13,807,000 tons of coal and lignite being produced in 1941. The discovery of the Lipe oilfield in 1937 increased the output of oil from 312 tons (Jan.-June, 1937) to 750,000 tons in the year 1943. A land reform carried out in 1920-1925 resulted in the parcelling out of about 1,000,000 acres into small holdings.

No part of Hungary touches the sea. The length of navigable rivers is 687 miles; there are about 7,223 miles of railways (including those in the recovered territories) and 7,000 miles of telegraph.

Religion and Education.—All religions are tolerated under Hungarian rule; about two-thirds of the Magyars are Roman Catholics, and the remainder mostly Calvinist. Education is compulsory from the age of 6 to 15, with (1940) 130,000 infants in over 1400 infant schools, and over 1,000,000 pupils in the 8,000 elementary schools. There are also middle and continuation schools, and six state universities with over 8,000 students in 1940.

Language and Literature.—Magyar, or Hungarian, is one of the Ural-Altaic languages and has retained its purity since its introduction into Western Europe in the ninth century. Magyar literature developed in relatively modern times (from the later years of the eighteenth century). Prose literature provides many famous names, including Nikolas Jósika (1794-1865), Josef Eötvös (1813-1871), and Maurus Jókai (1825-1904). English was increasing in commercial use until the outbreak of war in 1939. In 1940 there were 27 daily newspapers, of which 12 were published in Budapest.

Government.—A single chamber National Assembly (introduced Jan. 4, 1920), was replaced in Dec., 1926, by a Parliament composed of a Chamber of Deputies (*Képviselőház*) elected by universal suffrage, and an Upper Chamber (*Ellenzök*) which corresponds in a modified form to the Chamber of Magnates as it existed before the revolution of 1918. There were (Feb. 1942) 373 Deputies and 288 members of the Upper Chamber. In 1939 the secret ballot was introduced in the rural constituencies.

The form of government to be introduced at the conclusion of Allied occupation was still under discussion in November, 1945.

FINANCE. 1944.

Revenue (Budget).....	Pengos 5,866,700,000
Expenditure (do.)	6,147,000,000
Public Debt (Sept. 30, 1943)	6,501,000,000

ICELAND.

(Island.)

President (Aug. 1, 1945 to July 31, 1948), Sveinn Björnsson.

Prime Minister (Oct. 22, 1944) and *Minister for Foreign Affairs*, Olafur Thors.

LEGATION IN LONDON.

6 West Eaton Place, S.W.1. [Sloane 1380.]
Minister Plenipotentiary in London, His Excellency Stefan Thorvaldsson.

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The population was 223,979 on Dec. 31, 1942.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to be free and independent States under the same Sovereign, came into force on Dec. 1, 1918, but since the constitution granted in 1904 the assembly (*Althing*) had been more or less independent of the Government at Copenhagen in internal questions. On the German invasion of

Denmark in April, 1940, the Icelandic Government was temporarily invested with the royal power by a resolution of the *Althing*. On May 17, 1941, the *Althing* decided to elect a Regent to serve for one year at a time. After the German invasion of Denmark the island was occupied by a British force (May 10, 1940) as a preventive and protective measure, and on July 8, 1941, marines from U.S.A. were landed on the island.

On the occasion of the landings above mentioned H.B.M. Minister in Iceland sent a note to the Icelandic Government declaring that Gt. Britain promises to recognize the absolute independence and sovereignty of Iceland and to provide that it shall not be encroached upon by the terms of the peace treaty nor in any other way at the conclusion of the War.

On May 23, 1944, by plebiscite, the Act of Union of Dec. 1, 1918, was repealed and a new constitution adopted under which a republican form of government was instituted. The new constitution was proclaimed on June 17, 1944, at Thingvellir, where the *Althing* was founded in 930 A.D. The membership of the *Althing* was maintained at 52, of whom 14 are elected to form the Upper House.

The principal products of the island are fish, fish oils, mutton, wool and ponies. The principal exports are fish, cod liver oil, fish meal and sheepskins; the imports consist of almost all the necessities of life, the chief items being grain and meal, sugar, coffee, salt, coal, oil and petrol, cotton goods, tobacco, spirits, hardware, and timber.

The mercantile marine consisted (1942) of 419 steam and motor vessels of 40,000 gross tons (motor vessels 358 of 14,000 tons; steam 61 of 26,000 tons). Iceland is in direct telegraphic communication with Great Britain.

Language and Literature.—The ancient Norroena (or Northern tongue) presents close affinities to Anglo-Saxon and as spoken and written in Iceland to-day differs little from that introduced into the island in the ninth century. There is a rich literature with two distinct periods of development from the middle of the eleventh to the end of the thirteenth century and from the beginning of the nineteenth century to the present time.

	1944.
Revenue (Budget).....	Kronur 94,307,000
Expenditure (do.).....	89,765,000

Chargé d'Affaires, Colonel Shaker el Wadi.

3rd Secretary, Sayid Awni Khalidi.

Attaches, Sayid Burhan-ud-Din Bashayan; Sayid Feisal Damlujic.

Iraq, or Mesopotamia, "the land between the rivers" (Euphrates and Tigris), extends from Kurdistan on N. and N.E. to the Persian Gulf on the S. and S.E., and from Iran on E. to Syria and the Arabian Desert on W. the approximate position being between 37° to 48° E. long., and from 37° to 30° N. lat. The territory was freed from Turkish rule during the War of 1914-18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen. Maude succumbing to cholera after the capture of Baghdad). Under the Treaty of Lausanne, ratified on Aug. 6, 1923, Turkey renounced the sovereignty over Mesopotamia, and its future administration was entrusted to Great Britain by the Supreme Council of the Allies. A provisional Arab Government was set up by the High Commissioner in Nov., 1920, and in Aug., 1921, the Emir Faisal (3rd son of ex-King Hussein of the Hejaz) was elected King of Iraq, to be enthroned on Aug. 23, 1921. In March, 1924, a Constituent Assembly met in Baghdad, and passed an organic law and an electoral law for the election of a Chamber of Deputies. The constitution thus instituted is a Constitutional Monarchy, hereditary in the family of King Faisal, with a Senate of 20 members nominated by the King, and a Chamber of Deputies of 150 members elected by manhood suffrage. The first Parliament under this Constitution was opened by King Faisal on July 16, 1925. Under the decision of a Commission of Judges and Senators the heir apparent must be a male, and in the absence of a male the nation will select a successor. An application for admission to the League of Nations came before

the Assembly in 1932, and Iraq was freed from all Mandatory control through admission to the League on October 3, 1932. On June 30, 1930, a new Treaty was signed at Baghdad by the High Commissioner and the Prime Minister. This Treaty is of 25 years' duration from the entry of Iraq into the League, and regulates the relations between Great Britain and Iraq during that period on the basis of an alliance between two equal and independent States.

The total area of Iraq is about 116,000 sq. miles, the distance from Basra in the south to Mosul in the north being approximately 500 miles. Population (estimated 1935):—

Liwa.	Males.	Females.	Total.
Bagdad	256,903	242,507	499,410
Diyala	110,057	105,843	215,900
Kut	70,097	68,103	138,200
Diwanliyah	174,250	242,581	416,831
Hillah	107,784	103,882	211,666
Kerbala	62,082	62,208	124,290
Dulaim	67,777	62,059	129,836
Basrah	145,212	141,100	286,312
Amara	137,554	126,954	264,508
Muntafik	114,921	117,009	231,930
Mosul	229,940	223,064	453,004
Arbil	92,180	88,491	180,671
Kirkuk	112,714	110,920	223,634
Sulaimani	98,470	85,734	184,204

Total 1,779,941 1,780,515 3,560,456

The *Liwa* is the present Iraqi unit of administration, the *Pilayet* being the former Ottoman unit.

Mosul *Liwa* covers a great part of the ancient kingdom of Assyria, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul.

There is evidence that an advanced civilisation had been reached in the alluvial valley of the Euphrates while Europe was in a state of barbarism. Astronomy, geometry, engineering and land surveying were cultivated by the Sumerians of Mesopotamia, and various arts reached a point of perfection by 3000 B.C., as recent investigations at Ur of the Chaldees have shown. Sumerian culture spread from Mesopotamia to Crete and Egypt and to Greece. In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C.

Of the total population there were in 1935 Muslims 3,136,632 (five-thirteenths being Sunni and eight-thirteenths Shiite), Christians 101,375, Jews 90,070, and other religions 47,134 (Mandaeans, Yazidis, Bahais &c.).

The *Euphrates* (which has a total length of 1,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles), the latter rising in the north-west of Erzerum in the Dumluk Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Garmat Ali, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the districts of Diarbekir Van and Bitlis conjoin.

The country is capable of supporting a population considerably greater than the present one. Irrigation is developed and extended. Apart from the valuable revenues to be derived from oil, the wealth of the country depends upon agricultural development, and two harvests can be raised in the year, the chief crops being wheat and barley, and Indian corn, wheat

averages 464 lb. per acre, barley 612 lb., and rice over 1,000 lb. Cotton growing, after an uncertain early period, is now on the increase, and in 1933 there were 11,000 acres under cotton. Much headway has been made in popularising the local use of the indigenous tobacco plant. Crude petroleum production for the 10 years 1934-1943 (in millions of metric tons):—

1934	1,031	1939	3,817
1935	3,682	1940	2,375
1936	4,011	1941	1,374
1937	4,255	1942	2,636
1938	4,363	1943	3,324

Oil royalties have been received by the Government, as under:—

Year	Iraqi Dinars
1940-41	1,575,915
1941-42	1,463,377
1942-43	1,463,377
1943-44	2,794,245

Communications and Trade. The country is being rapidly opened up and communications improved and secured, particularly in the hitherto inaccessible northern districts. The port of Basrah is well equipped and able to handle expeditiously all sea-borne trade. Continuous dredging of the Shatt-al-Arab has provided a navigable channel of 22½ feet at low water (as compared with 9 feet before dredging was begun) giving easy access to the Port at all times. The desert route between Baghdad and the Mediterranean was opened up in 1923 and is now a main traffic artery. Baghdad has a modern airport which is busy with trans-continental traffic; it is used by Imperial Airways, K.L.M., and Iranian State Airlines.

The Baghdad Railway.—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway) to the Persian Gulf at Kuwait, *via* Baghdad, a total length of 1,550 miles, with a single track of 4 ft. 8½ in. gauge. Its projected course was from Konieh to Adana, thence S.E. to Aleppo, Irbil, where it would cross the Euphrates and enter Iraq, and Mosul, and thence S. down the right bank of the Tigris to Bagdad and the Persian Gulf. The section Konieh-Eregli-Bulgurlu (24 miles), was opened in Oct., 1904, and at the outbreak of War (1914) about 1,200 miles (out of the total of 1,550 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo, and in the desert W. & S. of Mosul). The first through train from Basrah to Bagdad left Basrah on January 13, 1920. In 1936 the Iraq Government decided to link Bagdad with Mosul and Tell Kocheh. The alignment chosen is a prolongation of the existing Bagdad-Bajil line and this construction was completed and opened on July 17, 1940, thus linking Mosul, Bagdad and Basrah with one another and with Europe. The first through train from Basrah reached Ankara on July 20, 1940.

Language and Literature.—The language is Arabic (see Arabia), French and English being auxiliary tongues. There were (1940) 8 daily newspapers published in Bagdad (one in English and Arabic) and 1 (Arabic only) in Basrah.

FINANCE.		1945-46.
Total revenue (Budget)	£	16,500,000
Total expenditure (do.)	£	16,500,000
The Iraqi Dinar of 1,000 Fils = 5 Riyals = 10 shillings.		

TRADE.

	1942.	1943.
Total imports	£12,200,000	£15,600,000
*Exports	4,500,000	4,900,000

The principal imports are cotton piece-goods, tea, sugar, cereals, iron and steel, textiles, and silk piece-goods; the chief exports are oil, dates, barley, wool, live animals and hides and skins.

CAPITAL.—The chief city is Baghdad, the former capital of the Abbassid dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." A golden chain and badge, the gift of the British government to the Mayor of Baghdad, was handed to the Iraqi Minister in London by the Lord Mayor on Jan. 25, 1944. Baghdad has an estimated population of over 340,000, other towns being Basrah, 62,000, and Mosul (opposite the site of Nineveh), 98,000.

" Indian Vice-Consul, Khan Sahib Tahir Hussain Quraishi.
Pro-Consul, E. C. Rose.
Basrah—Consul-General, W. L. C. Knight, C.M.G.
" Consul, A. T. Oldham.
" Vice-Consul, Glyn Davies.
Mosul—Consul, J. P. G. Finch, O.B.E.
" Pro-Consul, A. J. de Kcalita; W. H. Spring.

BRITISH COUNCIL.—*Representative of the British Council in Iraq, T. W. Murray, M.B.E., The British Council, White Lodge, Bagdad.*

BRITISH CHAMBERS OF COMMERCE, Bagdad and Strand Road, Basrah.

Bagdad is 840 miles by air from Cairo, Egypt. Motor convoys carrying mails run twice weekly between Bagdad—Haifa (the normal route for letter post).

ITALY.

(Regno d'Italia.)

King of Italy, Victor Emmanuel III, born November 21, 1869; succeeded to the throne July 29, 1900, having married, Oct. 24, 1896, Princess Helen of Montenegro.

CHILDREN OF THE KING OF ITALY.

1. Princess Jolanda, born June 1, 1901; married April 9, 1923, Count Calvi di Bergolo (3 daughters, 1 son).
2. Princess Mafalda, born Nov. 19, 1902; married Sept. 23, 1925, Prince Philip of Hesse (3 sons, 1 daughter); died Aug. 29, 1944.
3. Prince Umberto, Prince of Piedmont, Lieutenant of the Realm, born Sept. 25, 1904; married Jan. 8, 1930, Princess Marie José of Belgium, and has issue (a) Princess Maria Pia, b. Sept. 24, 1934; (b) Vittorio Emanuele, Prince of Naples, b. Feb. 12, 1937; (c) Princess Maria Gabriella, b. Feb. 25, 1940; (d) Princess Beatrice, b. Feb. 2, 1943.
4. Princess Giovanna, born Nov. 13, 1907; married Oct. 25, 1930, the late King Boris of Bulgaria, having issue (a) Simeon II, Tsar of Bulgaria, born June 16, 1937; (b) Princess Marie Louise, born Jan. 13, 1933.
5. Princess Maria, born Dec. 26, 1914; married Jan. 23, 1939, Prince Louis of Bourbon-Parma.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome a decree was signed on June 5, 1944, by King Victor Emmanuel and Marshal Badoglio under which Prince Umberto, the King's son, became "Lieutenant-General of the Realm." The King remains head of the House of Savoy and retains the title of King of Italy.

CABINET.

(Sworn in June 20, 1945.)

Prime Minister, Signor Ferruccio Parri (born, 1890), Action Party.
Deputy Prime-Ministers, Signor Pietro Nenni, Socialist; Signor Giovanni Brosio, Liberal.
Foreign Affairs, Signor Alcide de Gasperi, Christian Democrat.
Justice, Signor Palmiro Togliatti, Communist.
Finance, Signor Mauro Scocimaro, Communist.
Treasury, Signor Ferdinando Ricci, Liberal.
War, Conte Stefano Jacini, Christian Democrat.
Navy, Admiral Raffaele de Courten, Non-party.
Air, Signor Mario Cevalotto, Labour Democrat.
Reconstruction, Signor Meuccio Ruini, Labour Democrat.
Education, Prof. Vincenzo Arangio-Ruiz, Liberal.
Commerce and Industry, Signor Giovanni Gronchi, Christian Democrat.
Food, Signor Enrico Molé, Labour Democrat.
Transport, Signor Ugo La Malfa, Action Party.
Post-War Rehabilitation, Signor Emilio Lussu, Action Party.
Labour and Social Welfare, Signor Gaetano Barbareschi, Socialist.
Public Works, Signor Giuseppe Romita, Socialist.

EMBASSY IN LONDON.

14 Three King's Yard, Davies Street, W.1.
Italian Ambassador in London, His Excellency Conte Nicolo Carandini, 4 Grosvenor Sq., W.1.
Counsellor, Signor Bartolomeo Migone.
Do. (specially attached), Prof. Eduardo Ruffini.
Commercial Counsellor, Signor Vittorio Signorilli.
1st Secretaries, Conte Guerino Roberti; Signor Andrea Ferrero.
Secretaries, Conte Alessandro Manassei di Coltestatte; Signor Raimondo Manzini.
Labour Attache, Barone Franco Malfatti di Montetretto.

* Excluding crude petroleum exported.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba and about 70 islands (with certain dependencies hereinafter noted). The Kingdom of Italy is bounded on the N. by Switzerland and Germany, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, &c., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area of the kingdom of Italy may be estimated (1945) at 310,000 sq. kilometres, about 193,000 sq. miles, with a population, estimated in October, 1943, at 45,637,000.

Births in 1942 numbered 915,127 (20.2 per 1,000), deaths 638,944 (14.1 per 1,000), infant mortality 108 per 1,000 live births. Marriages in 1942 numbered 285,202 (6.3 per 1,000).

Suly (Trinacria) was the first province that the Romans gained beyond the confines of the peninsula; *Saraguna* was added soon after, at the close of the Second Punic War (202 B.C.).

On the west of the peninsula are wide and fertile plains, with ample streams and sheltered seaports, but on the east the spine of the Apennines runs close to an inhospitable coast for the greater part of its length and except for the harbours of Brindisi and Otranto there is little shelter from the storms of the Adriatic. The Alps form the northern limit of Italy, dividing it from France, Switzerland, Germany, Austria and Yugoslavia. *Mont Blanc* (15,782 feet), the highest peak, is in the French Pennine Alps, but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to 14,000 feet.

The chief rivers are the Po (220 miles) and Adige in the north, Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The *Rubicon*, a small stream flowing into the Adriatic near Rimini (and now usually identified with the Fiumicino) formed the boundary between Italy and Cisalpine Gaul: "crossing the Rubicon" (as Caesar did in 49 B.C., thus "invading" Italy in arms) is a step definitely indicating an aggressive course of action.

**Albania* (Shqipëria), made up of parts of the Ottoman Empire (Scutari, Yanina, Kosova and Monastir) on the East coast of the Adriatic Sea, has a total area of 11,000 sq. miles; total population (Census of 1930) 1,003,704. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the *Treaty of London* of Dec. 20, 1912. On Good Friday (April 7), 1939, Italian armed forces invaded Albania, and on April 12 Signor Mussolini declared Albania to be part of the Italian Empire.

On Oct. 28, 1940, Italy declared war on Greece and invaded that country from Albania, but within a month Greek troops and their allies expelled every invader and advanced in triumph across Albania. On April 6, 1941, German troops were sent through Yugoslavia to the assistance of Italy. The Albanian people resolutely opposed the Axis invaders and widespread guerrilla activity constantly harassed the enemy. The patriot forces entered the capital on Nov. 20, 1944, and Durazzo was freed on the following day.

Albania is generally mountainous with heights of more than 6,000 feet. Industry is primitive, agriculture and sheep and goat rearing being the principal occupations, and olives and olive-oil, grapes and tobacco the principal products. There is some mineral wealth (bitumen, oil, lignite, copper, iron), which remains largely undeveloped; oil, has been found in satisfactory quantities near Berat. Wells have been sunk and a pipe-line laid down between the oil-field and Valona. Exports

of oil figured in the Customs statistics for 1937 as 59,271 tons—value 1,185,400 gold francs. There are passable motor roads between the principal centres. The harbour at Durazzo, which has a mooring frontage of 450 metres, can accommodate vessels up to 7 metres draught alongside the quays; elsewhere in the harbour there is anchorage in 4 metres of water; the channel giving access to the harbour has a depth of 7.5 metres. The trade of Albania in 1937 was valued at *Francia* (Gold Francs) 20,315,087 for imports and 10,175,065 for exports. The Italianised currency is based on the standard 625 Albanian Francs = 1 lira. The principal towns are Tirana, the capital, pop. 30,806; Scutari (pop. 29,209); Elbasan (pop. 13,796); Argyrokastro (10,836); Berat (pop. 10,403); Korcha or Koritza (pop. 22,787); Ψ Durazzo (pop. 9,739); and Ψ Valona (pop. 9,106).

ITALIAN GOVERNMENT.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848 to 1870, in which the great patriots Mazzini (born 1805; died 1872) and Garibaldi (born 1807; died 1882) were the principal figures. It was completed when Lombardy was ceded by Austria in 1850 and Venice in 1866, and through the evacuation of the Papal States by the French in 1870. In 1872 the King of Italy entered Rome, and that city was declared to be the capital. The government was that of a constitutional monarchy with a legislature of two houses—the Senate (of 385 life members appointed by the King) and the Chamber of Deputies of 536 members (elected by adult manhood suffrage).

After the Fascist Revolution, which followed the March to Rome (Oct. 22, 1922), an entirely new and complex form of government was built up—the Fascist "syndical-corporative" state. The Senate and Chamber were retained, but the latter were elected *en bloc*, a list being drawn up by the Fascist Grand Council and submitted to the electorate for acceptance or rejection as a whole.

Signor Benito Mussolini, known as *Il Duce* (The Leader), was born July 29, 1883, and was in office as Prime Minister from June 30, 1924, until July 25, 1943, when the Fascist régime was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death on April 28, 1945.

Fascism stood originally for a national anti-communist movement, and culminated in dictatorship. The name was derived from the *fascis*, bundles of rods, with axe in centre, carried before high magistrates in ancient Rome as a symbol of authority, and were intended to symbolise the growth of the movement in bands or groups. The uniform contained a black shirt which was imitated in other countries.

Marshal Pietro Badoglio, who succeeded Signor Mussolini in the office of Prime Minister, was created Duke of Addis Ababa after the Italo-Abyssinian war. He announced his intention to summon the Senate and the Chamber in order that a constitutional form of government on a democratic basis might be instituted. Female suffrage was granted in February, 1945, and was in force for the first post-war election.

PRODUCTION.—Agriculture (including the growing of grapes, olives, chestnuts and rice) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are produced in the South, chiefly in Apulia; while fruit abounds and is largely exported; wheat production has been greatly stimulated under the Fascist régime. The cultivation of the silkworm forms an important industry. Italy is poor in mineral resources. The production of sulphur is important and among

* See also p. 868.

other minerals produced are iron pyrites, mercury, lead, zinc, aluminium, potassic salts and iron ores. Marble is quarried in considerable quantities. Salt and tobacco are Government monopolies.

The chief manufactures are woollen, cotton, silk, rayon, hemp, and linen yarns and tissues, iron and steel and their products, shipbuilding, gloves, motor vehicles, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption.

DEFENCE.—In 1939, owing to the international situation, the Army called up extra classes until one to one and a half million were under arms. These were later reduced to about 900,000.

The National Militia formed part of the Armed Forces of Italy and was brought into closer touch with the Army, and its units took their place alongside Army units. Its rôle included the territorial land and air defence of Italy, and the pre- and post-military training of, theoretically, every able-bodied male Italian.

The Italian Navy afloat at the date of the Armistice (Sept. 8, 1943), except *Conti di Cavour* under repair at Pola, steamed into British harbours under Allied escort, the battleship *Roma* being sunk by Axis air attack during the voyage. At the outbreak of war in 1940 the Navy included 2 battleships (completed in 1940), *Liberto* and *Umberto Veneto* of 35,000 tons, with nine 13-inch guns, carrying 4 aircraft with 2 sister vessels under construction, 2 modernised 23,000 ton battleships with ten 12 6-in. guns, seven 10,000 ton cruisers (8-in. guns), twelve 5,000-7,500 ton cruisers (6-in. guns). (*Barleameo Colleone* was sunk in Mediterranean by H.M.A.S. *Sydney*, July 19, 1940); 3 battleships and several other vessels were sunk or seriously damaged by air attack on Taranto, Nov. 11-12, 1940). There were 63 modern destroyers, 32 modern torpedo boats, 31 old torpedo craft and over 100 submarines. There were also a large number of high-speed motor torpedo boats, gunboats and auxiliaries. In addition 2 old 23,000 ton battleships were undergoing extensive reconstruction, and there were 12 light cruisers of 3,500 tons and a number of submarines building. Spezia and Taranto are the chief naval bases. The *Air Force* (*Regia Aeronautica*) consisted of three Air Corps and the independent commands of Sardinia, Sicily and the Dodecanese.

On May 22, 1930, Signor Mussolini signed a 10-year unconditional offensive-defensive pact with Nazi Germany, a final move in what had become known as the *Berlin-Rome Axis*.

On June 10, 1940, Italy declared war on Great Britain and France, and on Oct. 28, 1940, Italy invaded Greece over the Albanian border.

After the disasters suffered by Italy at the hands of British and Imperial forces in East Africa and in Libya, and in Albania at the hands of the Greeks, *Il Duce* acquiesced in the virtual occupation of Italy by Nazi troops.

On Nov. 11, 1942, Italy invaded the French Riviera and occupied Nice; the following day Italians were landed in Corsica.

The conquest of Libya was completed in 1942-43 by the British VIIIth Army (under General Montgomery) and all Axis forces were expelled from or captured in North Africa by the forces of the United Nations, which afterwards (July 10, 1943) invaded Sicily and (Sept. 3, 1943) the Italian mainland. On Sept. 3, 1943, the United Nations granted Italy's request for an Armistice, which became effective on Sept. 8, 1943. German armies continued the struggle in the north, but Rome fell on June 4, 1944, and on May 2, 1945,

German forces in Italy surrendered unconditionally to Field-Marshal Sir Harold Alexander.

LANGUAGE AND LITERATURE.—Italian is a romance language derived from Latin and has been classified as Gallic-Italian, spoken in the north and north-west (Piedmont, Lombardy and Emilia); Venetian; Tuscan and Roman, in central Italy (Tuscany, Latium, Umbria, the Marches, Campania, Abruzzi and Apulia); and Ibero-Italian in Sicily and Sardinia and in Calabria and Liguria. Italian literature (in addition to Latin literature, which is the common inheritance of the civilised world) is one of the richest in Europe, particularly in its golden age (Dante, 1265-1321; Petrarch, 1304-1374; and Boccaccio, 1313-1375) and in the renaissance during the fifteenth and sixteenth centuries (Ariosto, 1474-1533; Machiavelli, 1469-1527; Tasso, 1544-1595). Modern Italian literature has many noted names in prose and verse, notably Carducci (1835-1907) and Gabriele d'Annunzio (1864-1938). The Nobel Prize for Literature has been awarded to Italian authors on three occasions—G. Carducci (1906), Signora G. Deledda (1926), and Luigi Pirandello (1934). In 1940 there were 66 daily newspapers published in Italy, of which 20 were published at Rome, 6 at Genoa and 6 at Milan.

EDUCATION.—Primary Education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the 26 Universities are of very ancient foundation, Bologna, Genoa, Macerata, Naples, Padua and Perugia in the thirteenth century; Siena, Rome, Pisa, Pavia and Ferrara in the fourteenth century; Catania and Turin in the fifteenth century; Parma, Messina and Urbino in the sixteenth century.

COMMUNICATIONS.—On June 30, 1938, there were 14,334 miles of railway open for traffic, 3,591 being electrified; the post-offices (1937) numbered 11,344, and there were 41,423 miles of telegraph line. The sea-going commercial marine (1939) consisted of 1,057 steamers (1,600,486 metric tons), 293 motor vessels (378,996 metric tons) and 2,301 sailing vessels (99,228 metric tons). In 1938 261,54 ships (93,290,000 net tons) entered Italian ports; the clearances were 261,390 (93,077,000 net tons).

FINANCE

	1944-45.
Revenue (Budget).....	Lire 12,938,000,000
Ordinary Expenditure.....	" 33,658,000,000
Extraordinary do.....	" 95,413,000,000
External debt (Sept. 30, 1935) U.S. \$79,275,400	
Internal (June 1, 1945).....	Lire 850,000,000,000

The Italian *Lira* (of 100 Centesimi) was quoted at 73.0 to 80.10 = £1 sterling in 1939.

The Allied Military Financial Agency (AMFA), operating from Tunis, introduced (August, 1943) a new currency, the Allied Military *Lira* (*Amilira*) in Occupied Italian Territory. AMFA fixed a rate of 400 *Lira* to £1 and 100 *Lira* to \$1, U.S., at which rate Italian currency is exchanged for those of the Allies.

TRADE

	1938.	1939.
Imports.....	L11,265,000,000	L10,309,000,000
Exports.....	10,476,000,000	10,823,000,000

The imports chiefly consist of coal, cotton, wool,

machinery and apparatus and their parts, timber, raw hides, wheat, oleaginous seeds, coffee, cellulose, fresh and prepared fish, iron and steel scrap, copper, mineral oils and residues.

The principal exports are rayon fibres and waste, cotton tissues, lemons, cotton yarns, cheeses, almonds, fresh fruit, hemp, tomato preserves, woollen tissues, rice, raw thrown silk, rayon tissues, oranges and mandarins, motor vehicles, wines.

CAPITAL, Rome, founded according to legend by Romulus in the year now known as 753 B.C., is situated on the Tiber, 15 miles from its mouth. It was the focal point of Latin civilisation and dominion under the Republic and afterwards under the Roman Empire, and became the capital of Italy when the kingdom was established in 1872. Rome was the first of the capitals to be freed from Axis occupation, Allied forces entering the city, during a long and arduous campaign, on June 4, 1944. Population (1936), 1,183,441 (estimated, March 1, 1943, at 1,480,253). Other towns are Milan (1,118,731), Naples (877,305), Genoa (630,058), Turin (658,572), Florence (331,379), Bologna (279,244), Venice (267,103), Trieste (252,303) (the administration of Trieste, which had been occupied by Yugoslav forces, was taken over by Allied Military Government on June 12, 1945), Bari (197,181), Verona (162,914), Livorno or Leghorn (128,721), Reggio (118,649), Brescia (127,860), Ferrara (119,649), Spezia (111,748), Taranto (137,555), Ancona (90,000), Ravenna (82,000), Torre Annunziata (73,000), Salerno (68,000), Rimini (65,000), Savona (65,000), Fiume (54,000), Torre del Greco (52,000), Pola (48,000), Brindisi (42,000), Sicily, Palermo (417,862), Catania (244,415), Messina (195,958), Trapani (64,000), Marsala (63,000), Syracuse (54,000), and Sardinia, Cagliari (111,187).

ITALIAN COLONIES, &c.

After the British victories in Cyrenaica there was created an Occupied Enemy Territories Administration (OETA), as a Department of General Headquarters, Middle East. In 1943 the title OETA was dropped and the occupied Italian territories are now administered by a branch of the Army Staff bearing the title Civil Affairs, under a Chief Civil Affairs Officer.

Tripolitania, Cyrenaica and Eritrea are thus administered, with Headquarters at Cairo. Somalia is grouped with British Somaliland and the Somali districts of Ethiopia (by special agreement with the Emperor Haile Selassie) under the Chief Civil Affairs Officer, East African Command, Nairobi.

In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna) were incorporated in the national territory of Italy as *Libia Italiana*. Libya, on the northern coast of Africa, is bounded on E. by Egypt and the Anglo-Egyptian Sudan and extends westward to the French territories of Tunisia and Algeria and southwards to the Sahara. Libya was occupied by Italy in 1911-12, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred by Turkey to the King of Italy. A road has been constructed along the coast from the Tunisian to the Egyptian frontiers, with a total length of over 1,000 miles. Libia Italiana has a total area of 820,000 square miles, with a population of about 1,000,000. In Oct. 1938, in accordance with a colonisation scheme, 16,000 immigrants left Genoa for Libya. Owednat, the highest peak in the colony, was ascertained (1933) to be 6,000 ft. There are no rivers in the country, the rainfall being precarious, a good crop being obtained only four or five

years. Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, wool, cattle, and horses. The ancient ruins in Cyrenaica, i.e., at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli; a four-sided arch erected to the Emperor Severus and a Roman market place were uncovered in Leptis Magna in 1931-32. The population of Benghazi consists of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests. The capital of Libia Italiana is Tripoli (population 60,000); other centres being Benghazi (63,000), Derna (14,000) and Homs (35,000). The revenue and expenditure of Libya in the financial year 1939-40 were reported as balanced at lire 600,000,000. The trade of Libya was stated in 1938 at lire 882,058,000 (imports) and lire 108,962,000 (exports).

Italian East Africa (*Africa Orientale Italiana*) was constituted June 1, 1936, from the newly-conquered kingdom of Abyssinia and the Italian colonies of Eritrea and Somalia. During the war (1939-41) British and Imperial troops defeated the Italian armies in Abyssinia, Addis Ababa being captured April 5, 1941, when the country was restored to its former ruler. The Italian garrisons in Eritrea and Somalia were also accounted for, Asmara, the capital of Eritrea, being captured (April 1, 1941) and Mogadishu, the capital of Somalia on Feb. 25, 1941. Italian East Africa was not self-supporting. Few industries and little agriculture had been developed under the Fascist régime, imports greatly exceeded exports and the territories were maintained by large grants-in-aid from Italy. New industries were not encouraged, but since the British administration took over in 1941 many commodities have been locally produced, including soap, margarine, buttons, flour, bricks, boot polish, tinned food, pickles, fish oil, pottery, glass and beer.

Eritrea.—This former colony extends from Ras Kasar, 18° 2' N., to Ras Demolira, 10° 42' N., and is bounded on N.W. by the Anglo-Egyptian Sudan, on S. by Ethiopia, and on S.E. by French Somaliland. It consists of a high, mountainous hogback interspersed between the Red Sea and the Sudan, flanked on east and west by flatter territory. The mountains range up to 10,000 ft. and Asmara, the capital (pop. 140,000, 40,000 Europeans), stands at 7,800 ft. above mean sea level. Total area 64,000 square miles, with a population of about 808,000, of whom about 50,000 are Europeans. Of the population about half are Coptic Christians and the remaining half Muhammadans. Massawa (pop. 15,000) is the chief port, where there is a good harbour, other centres being Keren (50,000), Decameré (9,000), Adi Ugri, Agordat and Tessené. A railway from Massawa runs to Asmara and thence inland to Keren and Agordat, with projected extensions towards the S.E. boundary.

Somalia comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 11° N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by the Indian Ocean, and on W. by British Somaliland, Abyssinia, and British E. Africa. The total area, including the territory of Jubaland (and the port of Kismayu), transferred from

Kenya by Great Britain in 1925, is about 220,000 sq. miles, and the population is estimated at 900,000. The capital is Mogadishu, on the Indian Ocean, estimated population 37,000.

Tientsin.—Italy obtained in 1902 a concession of land fronting the Peiho river (China); area 20 sq. miles, a pop. about 10,000 natives; this district, occupied by Japanese forces in Sept. 1943, is again under Chinese control.

Aegean Dependencies.—Rhodes, Egea and the Dodecanese (12 islands occupied by Italy in 1912 during the war with Turkey, viz.: Stampalia, Scarpanto, Caso, Piscopi, Nisiro, Callimno, Lero, Patmo, Cos, Simi, Calchi, and Lipso). The seat of administration is at Rhodes (pop. 26,000). The population of the Aegean Dependencies is about 100,000.

Other Dependencies.—The ancient kingdom of Zara, on the Dalmatian coast, has been an Italian province since 1923. Area, 42 sq. miles, pop. 28,000. Capital Zara (pop. 21,000). The *Lagosta* and *Pelagosa Islands* (20 sq. miles, pop. 1,800) are dependencies of Zara.

Panellaria Island (part of Trapani Province) in the Sicilian Narrows, has an area of 31 sq. miles and a population of 10,000. Although strongly fortified it was captured by the Allies on June 11, 1943.

The *Pelagian Islands* (Lampedusa, Linosa and Lampione) are part of the Province of Agrigento and have an area of 8 sq. miles, pop. 3,000; these surrendered to the Allies on June 12, 1943.

Saseno Island, in the Bay of Valona, area 2 sq. miles, is a Naval Station.

ITALO-BRITISH INSTITUTE, Palazzo Primoli, Rome.—Founded July 23, 1945, to foster economic, political and artistic relations and the interchange of students and professors. **President,** Senator Einaudi, **Governor of the Bank of Italy.**

JAPAN.

(Dai Nippon—Great Land of the Rising Sun.)

Emperor of Japan (Dai Nippon Teikoku Tenno), His Imperial Majesty Hirohito, born April 29, 1901; succeeded Dec. 25, 1926; married (1924) Princess Nagako (born March 6, 1903), daughter of the late Prince Kuniyoshi Kuni (died Jan. 27, 1929), and has issue two sons and four daughters:—

Her-Apparent, His Imperial Highness Prince Akihito Tsugu-No-Miya, **Crown Prince,** born Dec. 23, 1923.

Brothers of the Emperor:—

(1) H.I.H. Prince Yasuhito Chichibu, born June 25, 1902, married Sept. 28, 1928, Setsuko Matsudaira (born Sept. 9, 1909).

(2) H.I.H. Prince Nobuhito Takamatsu, born Jan. 3, 1905, married Feb. 4, 1930, Kikuko Tokugawa, grand-daughter of the late Shogun Tokugawa.

(3) H.I.H. Prince Takahito Mikasa, born Dec. 2, 1915.

CABINET.

(Oct. 8, 1945.)

Prime Minister, M. Shidehara.

Foreign Affairs, M. Yoshida.

Education, M. Tamon Maeda.

War, General Sadamo Shimomura.

Home Affairs, M. Zenjiro Horikiri.

Finance, Viscount Keizo Shibusawa.

Transportation, M. Takeo Tanaka.

Navy, Admiral Soemu Toyoda.

Commerce and Industry, M. Sunkuro Ogisawara.

Welfare, Dr. Hitoshi Ashida.

Without Portfolio, Dr. Chujo Iwata; M. Joji Matsumoto; M. Daizaburo Tsugita.

Area and Population.—The Japanese Empire consists of 4 large and many small islands said to number 4,223 in all, to which there have been annexed parts of the continent of Asia, together with islands under mandate from the League of Nations. The Empire is situated in the North Pacific Ocean between longitude 135° 31' East and 119° 18' West, and between latitude 20° 25' and 50° 55' North, with a total area of 681,273 square kilometres (263,051 square miles) and a population (Census of October 1, 1940) of 105,226,101.

Japan Proper consists of *Honshū* (or Mainland), 330,537 sq. k. (89,011 sq. m.), *Shikoku*, 18,773 sq. k. (7,248 sq. m.), *Kyūshū*, 42,079 sq. k. (16,247 sq. m.), *Hokkaidō*, or *Yezo* (which includes the *Kurile Islands* as the Province of Chishima), 88,775 sq. k. (34,277 sq. m.), and *Ryūkyū* or *Luchu Islands*, 2,386 sq. k. (620 sq. m.), a total of 382,545 sq. k. (147,604 sq. m.) with a population (Census of Oct. 1, 1940) of 73,114,308. The island of *Taiwan* (Formosa) including *Bōkotō* (Pescadores), 35,834 sq. k. (13,836 sq. m.), population (1937), 5,609,042, was ceded by China at the close of the Sino-Japanese War, 1895. *Karafuto* (southern portion of Saghalien Island), 36,090 sq. k. (13,935 sq. m.), population (1937) 226,046, was ceded by Russia in 1905; in Sept. 1945, Soviet forces occupied the whole island. *Kwantung Province* (with South Manchurian Railway Zone) a peninsula to the South of Manchuria, part of which was leased by China to Russia, 3,759 sq. k. (1,451 sq. m.), was obtained on lease for 99 years from China in 1905, and *Chosen* (Korea) on the Asiatic mainland, 220,769 sq. k. (85,241 sq. m.), population (Oct. 1, 1940) 24,300,000 was annexed in 1910. Under the Treaty of Versailles (1919) the *Marshall, Caroline, Ladrone* (except *Guam*) and *Pelew Islands*, former German possessions in the North Pacific, were placed under Japanese mandate and became known as *Nanyō*, total area 2,149 sq. k. (829 sq. m.), population (1937) 121,128. In addition to these dependencies Japan had a "protective" interest in *Manchukuo*.

After the unconditional surrender to the United Nations (Aug. 15, 1945), Japan was occupied by Allied forces under General MacArthur (Sept. 25, 1945), and the status of parts of the former Japanese Empire has yet to be determined, but under the Treaty of Friendship and Alliance between

U.S.S.R. and China (Sept. 1, 1945) the U.S.S.R. recognised Chinese sovereignty over Manchuria, Dairen was recognised as a free port, Port Arthur became a joint Soviet-Chinese naval base and the Chinese Eastern and Southern Manchurian railways were placed under joint Soviet-Chinese control.

Vital Statistics.—Japan Proper contained (at the Census of 1935) 69,254,148 inhabitants (34,734,133 males, 34,520,015 females). In 1938 there were 1,930,322 births, 1,260,517 deaths, 539,129 marriages and 44,007 divorces. On Oct. 1, 1937, there were 1,043,422 persons (592,233 males and 451,179 females) living abroad, of whom 369,959 were in America and 154,933 in Australia and New Zealand. In 1937 there were 31,257 foreigners (20,266 males, 10,991 females) living in Japan. The *Ainu*, an uncivilised tree-dwelling tribe, the remnant of the indigenous inhabitants, are still found in the island of Hokkaidō.

Physiography.—The coastline exceeds 17,000 miles and is deeply indented so that few places are far from the sea. The interior is very mountainous, and crossing the mainland from the Sea of Japan to the Pacific is a group of volcanoes, mainly extinct or dormant. Fuji-san, or Fuji-no-yama, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is 12,370 ft. high and has been dormant since 1707, but Asamayama, 90 miles S.W. of Tokyo, was in eruption May 9, 1942, and caused widespread damage. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan Proper extends from sub-tropical to sub-arctic zones. Heavy snowfalls are frequent on the western slopes of Hokkaidō, but the Pacific coast is warmed by the Japan current. There is a plentiful rainfall and the rivers are short and swift-flowing, offering abundant opportunities for the supply of hydro-electric power. The principal waterfall, "Splendour of the Sun," at Nikko in the prefecture of Shimotsuke, Hokkaidō, has an unbroken fall of 350 feet.

Government.—According to Japanese tradition, Jimu, the first Emperor of Japan, ascended the throne on Feb. 11, B.C. 160. Under the Constitution of Feb. 11, 1889, the monarchy is hereditary in the male heirs of the Imperial house. The ruler (*Dai Nippon Teikoku Tenno*) is correctly described as Emperor; the archaic word *Mikado* is of doubtful etymology and appears to mean "August Gate," i.e. the entrance to the sacred precincts where the Emperor lived. A similar usage was "Sublime Porte," i.e. the entrance to the residence of the Ottoman Sultan. The Diet (*Taikoku Gikai*) consists of the House of Peers (*Kizokuin*) of 404 members and the House of Representatives (*Shugiin*) of 466 members, elected for 4 years by universal adult male suffrage. Members of both houses receive 3,000 yen annually and travelling expenses.

Agriculture and Livestock.—Owing to the mountainous nature of the country not more than one-sixth of its area is available for cultivation. There were in 1940 over 52,000,000 acres of forest, which include the Cryptomeria japonica, Plaus massoniama, Zelkova keaki, and Pawlownia imperialis (largely used for fancy boxes, etc.), in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. In 1938 there were about 15,000,000 acres under cereals (rice 8,000,000 acres). The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 10,000,000 metric tons being produced annually. The floral kingdom is rich, beautiful,

and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown. Mulberry trees are extensively grown and the output of silk amounted in 1939 to three-quarters of the world's total. The Live Stock in 1937 included 1,500,000 horses, 1,800,000 cattle, 300,000 goats, 200,000 sheep and 1,200,000 swine.

Minerals.—The country has considerable mineral resources, including gold and silver, and copper, lead, zinc, iron, chromite, white arsenic, coal, sulphur, petroleum and salt, but steel, iron ore and coal were among the principal pre-war imports to supply deficiencies at home.

Commerce and Industry.—The chief manufactures are silk and cotton woven goods, cotton yarn, earthenware, lacquered ware, matches, paper, glass, cement, chemicals and fertilisers, sugar, brushes, flour, insulated electric wire, woollen fabrics, rubber goods, soap, porcelain, mats, matting, hemp-braids, knitted goods, vegetable oil, crude camphor, camphor oil, straw-plaits, and bronze, while shipbuilding is an important industry in the yards.

Communications.—There were 14,612 miles of Government and private railroad (steam and electric) on Dec. 31, 1935, in addition to 2,782 miles open in Korea, 935 miles in Formosa and 300 in Saghalien. Shimonoseki, in Honshū, is connected with Moji, in Kyūshū, by the Kwanon Tunnel (1½ miles) under the Shimonoseki Straits. The mercantile marine of Japan and her dependencies consisted in 1939 of 1,581 steamships of 4,100,882 gross tons and 756 motor ships of 1,528,963 gross tons. The total tonnage entered at the chief ports in 1937 was 56,520 steam, motor and sailing vessels, gross tonnage 140,450,000. The three great ports are Kobe, Yokohama and Osaka, the first-named having a large transhipment trade, in addition to direct imports and exports, dealing with about 4,800,000,000 postal packets annually, and 550,000 miles of telegraph wire carrying 80,000,000 messages; the telephone subscribers numbered just under 1,000,000.

Sino-Japanese War, 1937-1945 and Second World War, 1941-1945:—

Japan declared a State of War with China on July 7, 1937, the day when Japanese troops occupied Peking, and on Nov. 12, 1937, Shanghai was captured. On Sept. 27, 1940, Japan, Germany and Italy signed a ten year pact for mutual support in the case of any country not yet at war becoming involved in the European or Sino-Japanese conflicts.

On April 13, 1941, a five year neutrality pact was concluded between Japan and U.S.S.R. On April 5, 1945, the Soviet government informed the Japanese Ambassador in Moscow that it was the intention of the U.S.S.R. to denounce the pact.

On Dec. 7-8, 1941, Japan delivered an air attack on Pearl Harbour, the United States naval base in Hawaii, and after the attack declared war on the U.S. and Gt. Britain. On Dec. 8 the United States declared war on Japan and the same day Gt. Britain and the Dominions issued a similar declaration. On Dec. 10-11 Germany and Italy declared war on the United States. Singapore was captured on Feb. 15, 1942, and Rangoon on March 9, but on May 7, 1942, the Japanese invasion fleet was defeated in the Coral Sea and on June 4 a further defeat was inflicted in the Battle of Midway Island. On Oct. 18, 1944, U.S. troops landed in the Philippines and on March 16, 1945, Iwojima (750 miles from Japan) was captured by

U.S. forces. On May 3, 1945, British forces re-occupied Rangoon and after many air attacks the first atomic bomb used in warfare was dropped on Hiroshima on Aug. 6, 1945.

On Aug. 8, 1945, the Soviet government declared war on Japan.

On Aug. 9, 1945, the second atomic bomb fell on Nagasaki.

On Aug. 15, 1945, Japan surrendered unconditionally to the United Nations.

Armed Forces.—After the unconditional surrender the land forces were disbanded and disbanded and all aircraft were confiscated by the occupying forces. Between the treacherous attack on Pearl Harbour (Dec. 7, 1941) and VJ Day (Aug. 18, 1945), 318 Japanese warships were sunk or put out of action, including 12 battleships, 15 aircraft carriers, 4 escort carriers, 16 heavy and 20 light cruisers, 126 destroyers and 125 submarines. In October, 1945, the United Nations agreed to scuttle all surviving Japanese war vessels, except 38 destroyers and some coast defense vessels. The warships scuttled included 1 battleship, 4 aircraft carriers, 4 cruisers and 51 submarines.

Religion.—All religions are tolerated. The principal forms of Japanese religion are Shintoism and Buddhism. The Roman Catholic Church was recognized in 1941, and has an archbishop and three suffragan bishops. Until the outbreak of the war there were seven British and Japanese and three American "Protestant Episcopal" bishops.

Education is in the lower grades free and compulsory, with over 12,000,000 children in the elementary schools. High schools are State-aided, and prepare for a 3 years' course at the Universities. There are high schools for girls, and the technical and special schools are well attended. There are six State Universities of Tokyo (2), Kyoto, Tohoku (at Sendai), Hokkaido and Kyūshū (at Fukuoka), with over 21,000 students, and 5 medical universities.

Language and Literature.—Japanese is one of the Altaic group of languages and remained a spoken tongue until about A.D. 750 when "Chinese-Japanese" was introduced as a written and printed language. Illiteracy is only 10 per cent. of the nation in Japan Proper. English is the language of commerce and is compulsory in the high schools. There were (1935) 4,759 libraries in Japan, with over 12,000,000 volumes. In 1940 there were 41 daily newspapers in Japan, of which 13 were published at Tokyo, 6 at Osaka and 5 at Kobe.

FINANCE.

	Budget 1944-45
Ordinary revenue.....Yen	14,083,000,000
Extraordinary do.....	36,884,000,000
Total.....	50,967,000,000
Ordinary expenditure.....Yen	20,173,000,000
Extraordinary do.....	30,794,000,000
Total.....	50,967,000,000
Internal Debt (Feb. 28, 1944):—	
Consolidated.....Yen	72,856,000,000
Floating.....	1,909,000,000
Total.....	74,765,000,000

The External Debt (March 31, 1943) was stated at Yen 1,222,000,000.

The exchange value of the Yen (of 100 Sen) in London in 1941 (Jan. 1 to Sept. 30) averaged 2.74.

FOREIGN TRADE OF JAPANESE EMPIRE.

	1939.	1940.
Imports .. Yen	2,917,000,000	Yen 3,710,000,000
Exports .. "	3,576,000,000	" 3,972,000,000

The chief imports are raw cotton from India, U.S.A., Egypt, and China; wheat from Canada, Australia and U.S.A.; oil cake from Kwantung Province and China; wool from Australia; crude rubber from Malaya; lumber from U.S.A.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from the U.S.A. and Europe. Sugar is largely imported from the Netherlands East Indies, Philippine Islands and Formosa; kerosene oil from U.S.A. and the Netherlands Indies; beans, peas, and pulse from China, Kwantung Province, and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton fabrics, cotton yarns, tea, refined sugar, knitted goods, matches, coal, camphor, straw-plaits, porcelain, earthenware, marine products, paper, glass and toys.

Formosa.—The island of Formosa (Taiwan) was ceded by China to Japan (June 2, 1895) in accordance with the Treaty of Peace. On the E. coast of the island are the highest known sea cliffs in the world, 3,000 feet sheer above the water. Imports, Yen 322,000,000; exports, Yen 440,000,000, in 1937. The colony has been self-supporting since 1906, producing 24,250,000 bushels of rice in 1938, and it is the principal source of the world's camphor supply. Capital, Taihoku (Taipei), pop. (1935), 287,846; other towns are Tainan (117,000), Ψ Taichu (80,000), Ψ Takao (100,000), Ψ Kurun (90,000) and Kagi (80,000).

Korea (Cho-sen).—By a treaty of Aug. 23, 1910, Korea was annexed to Japan and became part of the Japanese Empire.

Korea is situated between 122° and 128° E. long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice and other cereals, beans, cotton, tobacco, and hemp; fruit-growing is making progress and sericulture is thought to have a bright future. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision at Songdo (Kaijo), and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. There are extensive forests in the extreme north. The principal exports are rice, beans, silk, fish, fish-oil and manure, iron and iron ore, raw cotton, livestock and hides. Manufactures are as yet in a primitive condition, but are growing, including cotton yarn, silk-reeling, sugar, paper, artificial fertilisers, cement, flour (output at present small in each case). The greater part of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. Capital, Seoul (Keijo), pop. (1940) 706,000; other centres are Ψ Fusan (210,000), Heijo (186,000), Taikyū (111,000) and Ψ Kimsen, formerly Chemulpo (102,000).

Korean Finance.

	1941-42.
Revenue (Budget)	Yen 1,012,600,000
Expenditure (do.)	" 1,012,600,000
Debt (March 31, 1938)	" 600,000,000

* NANYO.

(Mandated Territory in the North Pacific.)

Under the Treaty of Versailles, 1919, Germany renounced the sovereignty of all overseas possessions and the German Pacific islands, between longitude 172° 30' E. and 121° 30' W. and between latitude 20° 33' N. and 1° 02' S. were placed under Japanese mandate, with a proviso that they should not be militarized, a condition ignored by Japan. These islands, in *Micronesia*, have a total area of 2,149 sq. k. (829 sq. m.), with a population (1937) of 121,128 (68,628 males and 52,500 females) and comprise:—

(1) The *Marshall Islands* which consist of two chains of atolls and lagoon islands known as *Ratak* and *Ralik*, the former with 13 and latter with 21 islets, covering altogether 800 square miles and extending N. to S. for 600 miles, about 2,200 miles from Tokyo and 2,000 from Pearl Harbour. Population (1940) 10,440. The chief island and administrative centre is Jaluit. Ψ Kwajalein has an excellent harbour and Roi is an air base. The Marshall Islands were captured by U.S. forces in 1944.

(2) The *Caroline Islands* (Eastern) have centres of administration at Truk and Ponapé; (Western) at Palau and Yap. Together there are over 500 islands and islets with a total population of 40,000 (Ponapé 12,000; Yap 7,000; Palau 13,000).

(3) The *Ladrones* or *Marianne Islands* consist of two groups, 14 islands in all and exclude *Guam* (the largest island) which was ceded to U.S.A. by Spain in 1898. The remaining *Ladrones* were sold by Spain to Germany in 1899 for \$5,000,000. The seat of government was at Saipan. On July 11, 1944, Saipan was occupied by U.S. forces, a heavy blow to Japanese prestige, resulting in the fall of the Tojo government.

The estimated revenue and expenditure for Nanyo in 1937-38 was Yen 8,700,000

CAPITAL OF THE JAPANESE EMPIRE, Tokyo, formerly called Yedo, the residence of the Emperor; population Oct. 1, 1940, 6,778,804. On Sept. 1, 1923, a disastrous earthquake destroyed great portions of the cities of Tokyo and Yokohama, but the work of reconstruction has since been completed. The chief cities are—

Tokyo, Honshū (1940).....	6,778,804
Ψ Ōsaka, Honshū (1940).....	3,252,340
Ψ Kyoto, Honshū, ancient capital (1940).....	1,089,726
Ψ Nagoya, Honshū (1940).....	1,328,084
Ψ Yokohama, Honshū (1940).....	968,091
Ψ Kobe, Honshū (1940).....	967,234
Ψ Fukuoka, Kyūshū (1940).....	306,706
Yawata, Kyūshū (1940).....	261,309
Kure, Honshū.....	231,000
Sendai, Honshū.....	220,000
Ψ Hakodate, Hokkaidō.....	207,900
Ψ Nagoshima, Kyūshū.....	182,009
Kokura, Kyūshū (1940).....	173,638
Ψ Ōtari, Hokkaidō.....	154,000
Ψ Niigata, Honshū.....	135,000
Ψ Shimonoeki, Honshū.....	133,000
Ψ Moji, Kyūshū.....	122,000

Hiroshima, in Honshū (population, 1940, 244,000) was totally destroyed by atomic bomb, Aug. 6, 1945; on Aug. 9, 1945, a similar fate befell Ψ Nagasaki, in Kyūshū (population, 1940, 212,000).

FLAG: White, charged with rising sun (red).

The status of islands placed under Japanese mandate at the end of 1914-18 awaits the decision of the United Nations.

BRITISH EMBASSY.

(No. 1, Goban-cho Kojimachi-Ku, Tokyo.)

(Withdrawn.)

Yokohama, 11,260 miles distant from London; transit, 38 days (via Vancouver, 23 days; via Siberia, 16 days).

LIBERIA.

(Republic of Liberia.)

President, Hon. William V. S. Tubman, elected

May 6, 1943; installed Jan. 2, 1944.

Vice-President, C. L. Simpson.

Secretary of State, G. L. Dennis.

Treasury, William E. Dennis.

Attorney-General, C. Abayomi Cassell.

Postmaster-General, James T. Phillips.

LEGATION IN LONDON.

31 Pont St., S.W.1. [Sloane 8360.]

Envoy Extraordinary and Minister Plenipotentiary in London, Baron de Lynden.

Vice-Consul (London), R. Broadhurst, Saffron

House, 23 Charterhouse St., E.C.1.

Consul-General (Liverpool), Wilmot A. David,

512 Tower Buildings, Liverpool.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the rivers Cavalla, S.E., and Mano, N.W., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised since 1847 as an independent State. The population is estimated (League of Nations Handbook) at 2,500,000.

The executive power is vested in a President elected for 8 years, assisted by a ministry; there are two houses of Legislature, the Senate, with 10 members elected for six years, and the House of Representatives with 21 members elected for four years. There is no regular army, but there is an enlisted frontier force of about 750 men. In 1927 arrangements were made with the Finance Corporation of America for a loan of 5,000,000 dollars, of which one-half has been issued. The previous 1912 loan, in which British financial interests preponderated, was paid off from the proceeds of the new loan, which is secured by a first lien on all Government revenues in excess of \$525,000. The Loan Agreement also provides for financial supervision by American officials and additional experts to be employed by the Liberian Government. There are 9 ports of entry, including 3 river ports. In 1939, 536 vessels (1,390,535 gross tons) entered. U.S. troops landed in Liberia in October, 1942, following an agreement (signed March 31, 1942) authorising the U.S. to protect and defend any part of the Liberian territory liable to attack by hostile forces.

FINANCE.		1943.

Monrovia, 3,650 miles distant; transit, by English steamers from Liverpool, 11 to 20 days; also by Netherlands and U.S. vessels from Continent and U.S.A.

LIECHTENSTEIN.

(Fürstentum Liechtenstein.)

Prince, Franz Josef II., b. Aug. 16, 1906; *sur.* Aug. 25, 1938; *married* March 7, 1943, Countess Gina von Wilczek.

A Principality on the Upper Rhine, between Vorarlberg (Austria) and Switzerland; area 59.6 square miles, pop. (1930) 10,273. The main industries are agriculture (chief products being corn, cattle, wine and turf) and textiles. Revenue (1942), 2,243,000 Swiss francs; Expenditure, 2,239,000 Swiss francs; debt (Dec. 31, 1941) 5,810,150 Swiss francs.

The language of the Principality is German.

FLAG: Blue and Red.

CAPITAL, Vaduz. Pop. (1941) 2,020.

British Consul-General, E. G. Cable, C.M.G. (resides at Zurich, Switzerland).

LUXEMBURG.

(Grand-Duché de Luxembourg.)

Grand Duchess, H.R.H. Charlotte, born Jan. 23, 1896, succeeded (on the abdication of her sister) Jan. 9, 1919; *married*, Nov. 6, 1919, Prince Felix of Bourbon-Parma. *Heir Apparent*, Prince Jean, born Jan. 5, 1921.

Prime Minister, M. Pierre Dupong.

Foreign Affairs, M. Joseph Bech.

Labour, M. Pierre Krier.

Justice, M. Victor Bodson.

LEGATION IN LONDON.

27 Wilton Crescent, S.W.1.

Envoy Extraordinary and Minister Plenipotentiary and Consul-General in London, M. Monsieur André J. Clasen.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815-66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23, 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the commencement of the war in 1914, but was liberated in 1918. By

the Treaty of Versailles, 1919, the country was declared to be free from all ties with Germany. The Grand Duchy was again invaded and occupied by Germany on May 9, 1940, the Grand Duchess and her consort being established in London until the country was freed. On returning to the capital (April 14, 1945) they received a tumultuous ovation.

The area is 999 square miles; the population (1935) 296,913, nearly all Roman Catholics. There is a Chamber of 55 Deputies, elected by universal adult suffrage for 6 years, one-half renewable every 3 years. The Grand Duchy is rich in iron-ore. The revenue in 1939 was estimated at £1,355,229,716, expenditure £1,353,439,719; debt (Nov. 15, 1938) £1,762,535,122. The Luxembourg Franc = 1.25 Belgian Francs. There are 328 miles of railway. The capital, Luxembourg (population 57,740) is a dismantled fortress.

FLAG: Red, white, blue.

48 Belgrave Square, S.W.1.

Ambassador in London, His Excellency Señor Dr. Don Alfonso Rosenzweig Diaz (April 19, 1944).

Secretary of Legation, Señor Don Oscar Crespo de la Serna.

Military Attaché, Colonel Luis Rivas Lopez.

Asst. Naval Attaché, Commander Alfredo Marquez Ricano.

Consul-General in London, Señor Dr. Don Luders Denegri.

Vice-Consul, Señor Don José H. Rojas.

Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30' N. lat. and 87° to 117° W. long., and comprising one of the richest and most varied zones in the world. It comprises 23 states, 3 territories, and the federal district of Mexico, making in all 32 political divisions, comprehending an area of 768,883 square miles, with a population (1940) of 19,473,741, estimated (June 30, 1943) at 21,153,000. In 1942 there were 871,554 births and 459,306 deaths. In 1940 there were 146,060 marriages, 167,161 immigrants and 150,510 emigrants.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are, respectively,

longed from the north to a convergence towards the narrow isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of California, with a mountainous surface, separated from the mainland by the Gulf of Lower California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citaltepetl ("El Pico de Orizaba") on the east. In February, 1943, a new volcano was in eruption about 250 miles from Mexico City and 20 miles from the town of Uruapan. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 6,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 6,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, which runs from Lake Chapala to the Pacific. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), *Patzcuaro* and *Xochimilco*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October.

The early Toltec invaders of the valley of Mexico gave place in the 13th century to the *Aztec*, who were conquered in the 16th century by Spanish adventurers under *Hernan Cortes*, whose remains have been definitely located in the Temple of Jesus, Mexico City. They are contained in a marble vault, with the funeral garments.

Spanish rule was established at *Tenochtitlan*, a 14th century Aztec city (now Mexico), and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war, 1810-1821. In 1820 a Republic was proclaimed, but Iturbide declared himself Emperor in 1821. He was shot in 1824, and a Republic was again established. From 1837-1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1862 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire and the execution of the Emperor gave rise to the new Republic, which has endured to the present day. The most prominent of modern Presidents was *Porfirio Diaz*, who ruled (except during 1880-4) from 1876 to May 25, 1911. Since the fall of *Porfirio Diaz* internal disturbances have continued with varying degrees of intensity, and considerable friction (amounting, at times, almost to a state of war) has arisen with the U.S.A.

Under the Constitution of Feb. 5, 1917 (amended 1933 and 1934) Congress consists of a Senate of 58 members, elected for 6 years, and of a Chamber of Deputies of 173 members elected for 3 years.

Archaeological Remains.—Mexico is rich in archaeological remains, and work is proceeding in every district to remove the earth covering which for many centuries has kept them from view. Near the City of Mexico are a number of pyramids built to a great extent with boulders from the river beds. The *Pyramid of the Sun* (now called "Tonalá") is 700 feet from N. to S., and 725 feet from E. to W., and rises to a height of 226 feet.

The *Pyramid of the Moon* (now called "Mextli") is 426 feet \times 511 feet, and rises to 180 feet. The staircases vary in construction between terrace and terrace and are found to be intact. Other places of interest are near Oaxaca, Papantla, Zempoala on the Continent, and Uxmal, Chichen-Itza and other points on the E. side of Yucatan.

Inter-American Conference.—At the Inter-American Conference held at Chapultepec in 1945 an "Economic Charter of the Americas" and the *Act of Chapultepec* (guaranteeing the independence of the 21 nations concerned) were adopted without a dissentient vote.

Communications.—Vera Cruz, Tampico, Progreso, and Puerto Mexico are the chief ports on the Atlantic and Manzanillo, Mazatlan, Acapulco, Salina Cruz, and Guaymas on the Pacific. There were 14,690 miles of railroad open on Sept. 1, 1938, and 68,000 miles of telegraph. The railroads have in a large measure been built by American and British companies. Improvements and new construction are now being undertaken (1939) in various parts of the Republic, on the National lines. The Highway Commission of Mexico has constructed some 3,000 miles of road, finished with asphaltic treatment, and there is in addition a total of some 4,000 kilometres of roads in the Republic which are passable. There is a network of 50,000 kilometres of old roads, of which about 12,000 are impassable. The Federal Government's Six-year Plan (promulgated in 1934) calls for the construction of further asphalted roads. The international highway from Laredo, Texas, to Mexico City, which is part of the projected *Pan-American Highway*, has been completed and was formally opened July 1, 1936. It is passable at all seasons. A further section (625 miles) from the southern frontier of Mexico to Panama is under construction by the U.S. government. The city of Mexico is linked with all the larger towns by telephone; the line is now extended to the U.S. border and thence is connected to Canada and Europe. The city is connected by wireless to U.K. and Europe. The principal air routes from Mexico City are to Brownsville, to Los Angeles, to Merida (with connexion to Havana and Miami) and to Tapachula (with connexion to Guatemala, Central American Republics and Panama).

Production.—The total acreage of arable land is estimated at 300,000,000 acres, of which about 12,000,000 are under cultivation. Grazing land is estimated at 120,000,000 acres and about 50,000,000 acres are forest covered. The principal agricultural crops are maize, beans, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla and all kinds of tropical fruit. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen); About half the world's supply of sisal comes from the province of Yucatan. The forests abound in mahogany, rosewood, ebony, and caoutchouc trees, large scale cultivation of rubber being undertaken under supervision by U.S. experts in 1942.

The live stock in 1943 included 10,000,000 cattle, 4,000,000 sheep, 2,000,000 horses, 750,000 mules, 2,000,000 asses, 6,500,000 goats and 4,000,000 swine.

The principal industry in the Republic is mining. The mineral wealth is very great: silver and gold, copper, lead, and quick-silver, iron and coal and petroleum are the leading products.

Silver produced in 1943 amounted to 2,700,000 metric tons and gold (1943) to 23,300 kilograms. The other mineral production is stated at: lead, 127,800 metric tons (1942); copper, 39,000 metric tons (1943); zinc, 31,800 metric tons (1942).

Crude Petroleum Production.

(10 years, 1934-1943.)

Year.	Metric tons.	Year.	Metric tons.
1934	5,826,000	1939	6,547,000
1935	6,142,000	1940	6,722,000
1936	6,262,000	1941	6,569,000
1937	7,159,000	1942	5,315,000
1938	5,877,000	1943	5,345,000

In 1938, the Government expropriated the properties of the principal foreign oil companies operating in Mexico. The expropriation decree provided that compensation would be paid, over a 10-year period, by means of a certain percentage (to be determined later by the Government) of oil produced from the expropriated properties. The properties of the expropriated companies are at present being managed by an organisation called *Petroleos Mexicanos*, the board of which consists of five representatives of the Government and four of the petroleum workers.

On April 18, 1942, Mexico agreed with U.S. government as to the amount of indemnity to be paid for U.S. oil companies and on July 1 \$8,000,000 was paid over as a first instalment of the indemnity. Other sums were paid under separate agreements, and in consequence of a decision of the Supreme Court (July 2, 1942) the property of two subsidiaries of the American Oil Company were returned, the Court holding that the Cardenas Government's expropriatory decree did not apply to subsidiaries of foreign undertakings.

Woolen and cotton spinning and weaving, the making of footwear, and other branches of industry, are encouraged by high protective duties.

Defence.—The Army has a strength of about 115,000, all ranks. The Navy comprises 4 modern escort vessels and some gunboats. There is a small Air Force. Owing to the sinking of Mexican ships by Axis U-boats Mexico declared war on the Axis powers, May 22, 1942. Mexican troops took part with the Allies in the Italian campaign of 1943-44.

Language and Literature.—Spanish is the official language of Mexico and is spoken by more than half the people of the country. Of the Indian-speaking population about one-fourth speak Nahuatl or Mexican; one-sixth Maya; one-sixth Zapotecan and another sixth Otomian, the remainder speaking Totonocan, Tarascan or other variety of the minor linguistic families. At the conquest by Spain in the sixteenth century all traces of Aztec civilisation and nationality were ruthlessly suppressed by the conquerors. After the establishment of independence in 1821 little progress was made in education until the accession of Porfirio Diaz to the Presidency in 1876, and after his resignation in 1911 a period of anarchy produced temporary stagnation, but in recent years the Federal government has enforced compulsory education in all States and there has been a marked improvement in attendances. The National Library at the capital contains about 500,000 volumes. The Press of Mexico is in a flourishing condition with many daily newspapers in the capital and in other urban centres. The first printing press and the first regularly issued newspaper in the New World were established by the Spaniards in Mexico City.

Education.—Primary education is free and compulsory, but in 1930 illiterates throughout the country amounted to 60 per cent. of the population above 10 years old, the Federal District having the lowest percentage. In 1943 there were over 15,000 primary schools, with 1,400,000 pupils, about 200 secondary schools with 30,000 pupils and 30 technical and commercial colleges. The

National University at Mexico City was founded in 1553 and reorganised in 1910; there are 9 other Universities, including one exclusively for women students. The prevailing religion is Roman Catholic.

FINANCE.

	1945.
Estimated revenue (<i>Budget</i>)	\$1,006,000,000
Expenditure (<i>do.</i>)	1,006,000,000
Internal debt (Dec. 31, 1943) :—	
Consolidated	788,000,000
Floating	69,000,000
External debt (Dec. 31, 1943)	1,340,000,000.
\$ = Pesos. Rate of exchange (Jan. 1-Sept. 30, 1943). Pesos 20-50 = £1.	

TRADE.

	1942.	1943.
Total Imports	\$751,600,000	\$860,700,000
Total Exports	705,500,000	1,080,200,000
Imports from U.K. (1943)	£683,000	
Exports to U.K. (1939)	£581,720	

The imports (mainly from U.S.A.) consist very largely of machinery and implements for industry, mining and agriculture, and of chemical products. Only textiles of the finest quality are now imported. Important exports are silver, gold, petroleum products, copper, lead and zinc, also sisal hemp (henequen), coffee, cotton, resins, fresh vegetables and dried vegetables.

CAPITAL, Mexico City, Pop. (1940), 1,464,556. Other towns are Guadalajara (228,049), Monterrey (180,942), Puebla (137,324), Mérida (98,334), León (86,090), Tampico (81,334), Aguascalientes (81,124), San Luis Potosí (78,042), Torreon (76,613), Vera Cruz (70,958), Chihuahua (60,000), Pachuca (52,500), Saltillo (50,000).

• 18 Austin Friars, E.C.2.

Consul-General, R. Le Mesurier.

Vice-Consul, K. E. Eckenstein.

Chancellor, F. W. Bates.

A miniature Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino. The Principality comprises a narrow strip of country about 3 miles long and 1½ miles broad, with (1938) 23,956 inhabitants, and a yearly average of over 2,000,000 visitors. The whole available ground is built over, so that there is no cultivation. Monaco has a small harbour (24 ft. alongside quay), and the import duties are the same as in France. There is an Assembly of 12 elected members and a Council of Government of 3 ministers. There is a local police force of 200 men.

CAPITAL, Monaco.

Monaco—Consul-General (vacant).

Consul (vacant).

MOROCCO.

(Moghreb el akas "The Farthest West")

French Protectorate, and Spanish and International Tangier Zone.

Sultan, Sidi Mohamed, born 1911; proclaimed Nov. 20, 1927.

Morocco, one of the Barbary States, is situated on the north-west of the African Continent, between 27°-36° N. latitude and 1°-12° 40' W. longitude, with an area estimated at 183,350 square miles, and a population of over 7,500,000. It is traversed from the Atlantic coast in the west to the African frontier in the

north-east by five parallel ranges, known generally as the *Atlas Mountains*. Between the various ranges lie well-watered and fertile plains, the lower slopes of the northern flanks of the mountains being well wooded, while the southern slopes are exposed to the dry winds of the desert and are generally arid and desolate. The most northerly point of Morocco is the peninsula of Ceuta, which is separated from the Continent of Europe by the narrow strait of Gibraltar. The Jebel Musa dominates the promontory, and with the rocky eminence of Gibraltar was known to the ancients as *The Pillars of Hercules*, the western gateway of the Mediterranean. Between 32° N. and 30° N. is the headland Ghir, which encloses a bay containing the port of Agadir, formerly known as the "Gate of the Sudan."

The climate of Morocco is generally good and healthy, especially on the Atlantic coast, the country being sheltered by the Atlas Mountains from the hot winds of the Sahara. The extremes of temperature in Tangier and Mogador are 92° Fahrenheit in the summer and 37° in the winter, with a rainy season from November to April, but the summer-heat figures at all the intervening ports (Larache, Port Lyautey-Mehedia, Rabat-Sale, Fedala, Casablanca, Mazagan, and Saffi) are markedly higher; the last-named port being the hottest. The Mediterranean coast is drier and less temperate, but not unhealthy, while the plains of the interior are intensely hot.

Government.—Morocco is divided into three zones—the French Zone, the Spanish Zone, and the International Tangier Zone. Until her collapse in the War of 1939-45, France was the paramount power, and represented the Sultan of Morocco in all foreign relations. Spain has had relations with Morocco for many centuries. The northern portion of Morocco, as defined in the Franco-Spanish Treaty of 1912, forms a Spanish "sphere of influence" which extends over the whole of Northern Morocco, with the exception of the International zone round Tangier. In this sphere occurred the joint Franco-Spanish military operations against Abd el Krim, the Rif leader, which culminated in the surrender of Abd el Krim in May, 1926, and the final pacification of the French and Spanish zones in the following year. Ceuta and Melilla are (Spanish) "State Territories" and both are "free" ports. Ceuta (on the Mediterranean coast, opposite Gibraltar), in 35° 54' N. lat. and 5° 18' W. long., has been a Spanish possession since the close of the 16th century, and forms part of the administrative province of Cadiz. Melilla, on a rocky promontory of the Rif coast, is connected with the mainland by a narrow isthmus; it has been a Spanish possession since 1492. The Peñon (Rock) of Alhucemas, Peñon de Velez, and Zafarin islands are Spanish possessions. A special international régime was designed for Tangier before the War of 1914-18 by negotiations between the British, French and Spanish Governments, but the outbreak of the War prevented this régime from being put into operation. A new Convention instituting the *International Zone of Tangier* was, however, signed by the three governments at Paris on Dec. 18, 1923, and was brought into force on June 1, 1925. The Convention was modified by a Protocol signed at Paris, July 25, 1928, by the three Powers and Italy, who thereby adhered to the Convention. The Convention provided for a complete international administration of the zone, except as regards native affairs, which were reserved to the Sereefian authority. British capitulatory rights in the French zone were abolished as from January 1, 1928, by a Franco-British Convention of July 29, 1927.

During the second world war (March, 1941) Spain deposed the Sultan's representative in Tangier and substituted Khalifa Sidi Mulay Hassan ben el Mehedi.

Production, Industry, &c.—Among the agricultural products are wheat, barley, maize, beans, peas, birdseed, linseed, coriander, cummin, fenugreek, esparto, and hemp, and the northern slopes of the Atlas produce many fruits, principally figs, almonds, pomegranates, lemons, olives, oranges, and grapes, the latter growing also in the plains. An irrigation canal (25 miles) linked with the river Oum Er-Rabia (French zone) was opened in 1938. The live stock includes large quantities of horses, cattle, sheep and goats, while the egg industry is of importance. Important deposits of coal, manganese, iron ore, lead and zinc, as well as other minerals in smaller quantities, have been prospected, and are being increasingly exploited. The discovery of what may prove to be an important oil deposit was made at Jebel Tselfat (French zone) in the spring of 1934 and gypsum has been located in the Spanish zone. Gold and silver are also found. Phosphates are exported in increasingly large quantities and constitute a great source of wealth for the French zone. The trade of Morocco is chiefly with France and Algeria, Great Britain, Italy, Spain, Belgium and Japan. The chief imports are cotton, sugar, motor vehicles, petroleum, building materials, soft goods, tea and edible oils; the exports are chiefly grain, phosphates, eggs, hides and skins, wool, vegetable fibre and early vegetables and fruit. The Spanish zone exports iron ore, lead (from Melilla neighbourhood), skins, cork and vegetable fibre; the chief exports from Tangier are preserved fish, skins, eggs and Morocco leather. The unit of currency in the French protectorate is the Moroccan franc, which is closely allied to the French franc, while in the Tangier zone the Moroccan franc and Spanish peseta are legal tender. In the Spanish zone the Spanish peseta is current.

Communications.—The French Protectorate authorities are engaged in the serious development of normal gauge railways in their zone, and (Oct. 1939) 1,713 kilometres of normal gauge track were in working order. In addition, the completion of the Tangier-Fez full gauge system gives through service between Tangier and the principal towns of the French zone, and a normal gauge line links Fez to the Algerian frontier at Oujda. Telegraphic communication is established from Tangier by submarine cables to Gibraltar, Ceuta-Málaga and Arzila-Cádiz, and by land to Casablanca. There are wireless stations at Tangier, Ceuta, Melilla, Tetuan (military), Rabat, and Casablanca; inland lines have been built by the French connecting all important places in their zone, as well as to the borders of the Spanish zone, and the latter line has been extended to Tangier. The chief roads in the Tangier and Spanish zones are those linking Tangier to Ceuta *via* Tetuan, linking Melilla to the International Bridge (French zone), and the Tetuan-Melilla road, *via* Targuist and Villa Sanjurjo in the North; and Tangier to Arzila, Larache, and the French zone in the South. The French zone is well equipped with good main and secondary roads. In normal times a daily *Air Service* is maintained between Toulouse and Casablanca, stopping at Barcelona, Alicante, Oran and Fez (where it can be joined by train from Tangier); there is a service between Lisbon—Tangier—Casablanca—Dakar in connexion with the South American line.

Language and Literature.—The majority of the inhabitants speak Arabic (see Arabia), with French and Spanish as auxiliary tongues in their respective

zones. In 1940 there were 9 daily newspapers in the French zone and 2 in the Spanish zone.

Education.—There are numerous native schools in all zones, with secondary schools attached to mosques and at Fez there is a university of great repute in the Moslem world. European schools have been established in the French and Spanish zones and special schools have been opened for Jewish pupils. Generally speaking, however, the bulk of the native population can neither read nor write.

Finance.—The revenue of the French Zone in 1944 was 2,605,000,000 francs and the expenditure 2,604,700,000. The budget of the Spanish Zone balanced at 111,785,000 pesetas in 1938. The revenue of the Tangier Zone was 29,796,000 francs and the expenditure 29,653,000 francs in 1940.

External Trade.—The imports into the French Zone in 1939 were valued at 1,142,000,000 francs, and exports from French zone, 1939, 891,000,000 francs. The imports into the Spanish Zone were valued at 123,146,000 silver pesetas in 1938, and the exports at 71,143,000 silver pesetas. The imports into the Tangier Zone (1938) were valued at 94,693,830 francs and the exports from the zone at 11,380,286 francs.

MOROCCAN TRADE WITH U.K.

	1942.	1943.
Imports from U.K.	£125,000	£234,000
Exports to U.K. (1938-39) £752,590		£1,599,567

CAPITAL of French zone, Ψ Rabat, population 84,000 (Fez in the North, and Marrakesh in the South are the old capitals of the Sultans). Other towns (with populations exclusive of French army of occupation) are Fez (144,424), Marrakesh (190,314), Meknes (74,702), Salé (31,823), Ψ Casablanca (population at 1936 census 257,430, swollen by refugees from France, Tunisia and Algeria to an estimated total of 1,000,000 in 1943), Ψ Rabat, with Salé (115,202), Ψ Mazagan (24,391), Ψ Safi (25,159), Oujda (34,523), Ψ Kenitra or Port Lyautey (21,000) and Ψ Mogador (16,000) with Ψ Agadir (6,000) in South Morocco.

CAPITAL of Spanish zone, Tetuan, population 50,000; other towns being Ψ Ceuta (51,000), Ψ Melilla (65,000), Ψ Larache (30,000) and Alcazarquivir (30,000). *Spanish High Commissioner*, General Luis Orgaz, appointed May 10, 1941.

CAPITAL of International zone, Ψ Tangier, population 47,000.

FLAG OF THE SULTAN OF MOROCCO: Red, with green pentagram (the Seal of Solomon).

Consul-General, Th. H. de Meester.

Consul, A. Furnée.

Vice-Consul, W. Arriens.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46'—53° 34' N. and long. 3° 22'—7° 14' E., consisting of 12 provinces and containing a total area of 13,514 square miles, with a population estimated (Dec. 31, 1942) at 9,076,300 (4,530,400 males and 4,545,800 females). In 1943 there were 209,270 births (23.0 per 1,000 inhabitants) and 91,445 deaths (10.1 per 1,000); infant mortality at 40 per 1,000 live births is the second lowest figure for European countries (Sweden being 29 per 1,000). In 1939 the infant mortality rate of 34 per 1,000 was the lowest in the world.

The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The highest point is at Vaals, 656 ft. above mean sea level, but almost half the country is below the mean level of the sea. The principal rivers are the Rhine, Maas, and Yssel with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seed, potatoes, oats, rye, wheat, barley, beans, peas, buck-wheat, sugar-beet, chicory, flax, hemp, bulbs and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, sugar, chemical and pharmaceutical products, matches, perfumery, bicycles, boots and shoes, starch, potato flour, engines, metal substances, iron and steel, wireless sets and parts, works of art in gold and silver, incandescent lamps, machinery, motors, paper, cardboard, printing, oils, beer, "geneva" and other liquors. Coal production (1939) 12,861,000 metric tons. Diamond-cutting, in former days, employed numerous hands in Amsterdam.

Government.—The Kingdom of the Netherlands was constituted by the Treaty of London (June 14, 1814) under a Prince of Orange-Nassau, a descendant of the house which has taken a leading part in the destiny of the nation since the 13th century. The States-General comprises the *Eerste Kamer* of 50 members, elected for 6 years by the Provincial Diets; and the *Tweede Kamer* of 100 members, elected for 4 years by men and women voters of 25 years and upwards. Members of both chambers are paid.

Defence.—In May, 1940, the Home Forces consisted of a permanent cadre of 1,430 officers and 6,477 other ranks. An annual conscript levy produced a further 32,000 men who served for 12 months. The first line army on mobilization numbered 124,000, or including reserves 270,000 all ranks. The Royal Navy consisted of 12 protected and 60 unprotected vessels. A large proportion of those in home waters joined the British Fleet.

Language and Literature.—Netherlandish, or Dutch, is a Teutonic language, closely akin to Old English and Low German. Its use was encouraged during the Spanish occupation of the Low Countries by literary clubs (*Kamers*) and it became the language of the Netherlands, and of a large number of the people of Belgium, of South Africa, of Netherlands' India (Java, etc.) and of Netherlands' West Indies. Modern literature is shared by the Netherlands with Belgium.

Illiteracy is practically unknown in the Netherlands. In 1940 there were 89 daily newspapers of which 8 were published in Amsterdam, 7 in Rotterdam and 6 in Utrecht.

Religion.—The majority of the people (about 55 per cent.) belong to the several Reformed Churches, the remaining 45 per cent. (with the exception of about 125,000 Jews) being Roman Catholics.

Education.—Private State-aided primary instruction is encouraged rather than public, though the latter is provided if required, by local taxation. The average attendance at primary schools is 96 per cent. Secondary schools for working classes are numerous, well equipped and attended. The principal Universities are at Amsterdam, Groningen, Leiden, Nijmegen (R.C.), and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (commercial), Wageningen (agriculture), and Tilburg (Commercial).

Communications.—The total extent of navigable rivers and canals is 4,687 miles, and of first-class roads 1,250 miles. There were 2,105 miles of railroad open in 1938, 504 miles of telegraph cable, and 6,960 miles of telephone cable. Air service connects Amsterdam and Rotterdam with Groningen, Enschede, Eindhoven and Flushing. The mercantile marine, on Jan. 1, 1939, consisted of 940 steam and motor vessels of 2,254,896 net tons.

An Act for the damming and draining of parts of the Zuyder Zee was passed in 1918. The first reclamation was almost fully developed and plans had been published to reclaim a further portion in the north-east region. The dam was completed in 1932. Progress had been made with the reclamation of the North-Eastern Section of the Zuyder Zee, which would have been completely drained by 1941 but for the Nazi invasion.

FINANCE.

Budget Estimates.

	1939.	1940
Ordinary Revenue	Fl. 710,718,493	Fl. 741,096,863
Ordinary Expenditure	744,733,786	746,503,172
Capital Revenue	25,359,150	28,908,000
Capital Expenditure	264,057,505	269,095,854
Funded Debt (July 31, 1944)	5,957,000,000	
Floating Debt (July 31, 1944)	6,146,000,000	
Total (July 31, 1944)	12,103,000,000	
Total (Dec. 31, 1944)	12,500,000,000	

The Netherlands Florin (or Guilder) of 100 Cents has a par value of about 15.74. In 1939 the exchange value in London was about Fl. 7.40 to 8.83 = £1 sterling.

TRADE.

	1939.	1940.
Total imports	Fl. 5,766,651,000	Fl. 862,000,000
Total exports	566,215,000	561,000,000

The external Trade was shared as under in 1939:—

Country.	To Netherlands.	From Netherlands.
Belgium	Fl. 220,000,000	Fl. 90,000,000
France	74,000,000	51,000,000
Germany	358,000,000	136,000,000
Neth. Indies	91,000,000	101,000,000
U.K.	118,000,000	226,000,000
U.S.A.	146,000,000	42,000,000

The principal imports in 1939 were textiles, iron and steel and manufactures thereof, cereals and flour, timber and wood, coal and coke, mineral oil, seeds, manure and hides and skins. The chief exports in 1939 were textiles, cheese, and butter.

Surinam—Consul, E. T. Lambert (resides at Curacao).

Paramaribo—Vice-Consul, H. A. W. Benz.

Transit from London to The Hague 8 hours.

NETHERLANDS COLONIES.

The Dependencies of the Kingdom of the Netherlands declared their adherence to the cause of the Allies and were not affected by the German occupation of the Low Countries. The Netherlands Government and the Netherlands East Indies declared war on Japan on Dec. 13, 1941. Java and other Dependencies were for some time in hostile Japanese occupation, but the Colonial fleet, under most valiant leadership, played an important part in the war in the Pacific, in combination with the Allies, as one of the ABCD Powers (American, British, Chinese, Dutch) in the Far East.

L. Netherlands' East Indies:—

"Netherlands' India" comprises the islands of Java and Madura, the island of Sumatra, the Riuw-Lingga Archipelago (which with Karim, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the "Residency of Riuw"), the islands of Banks and Billiton, part of the island of Borneo, Celebes Island, the Molucca Islands (Ternate, Halmahera, Buru, Ceram, Banda, Timor-Laut, Larat, Bachiam, Obi, Kei, Aru, Babar, Leti and Wetar), part of New Guinea, part of Timor Island, and the islands of Bah and Lombok, with a total area of 730,000 sq. miles, and a population estimated at 53,000,000. The administrative capital is Batavia (pop. about 260,000). Mount Wilhelmina in New Guinea is the highest point in Oceania.

Java and Madura (51,000 sq. miles, pop. 1939, 40,000,000) furnish sugar, tobacco, tea, coffee, tin, rubber, and other products for exportation. Certain parts of the "outlying" islands are frequently administered by their own princes, subject

to the directions of a Netherlands Resident. There was (1929) a colonial army of 1,293 officers and 37,000 men. The colonial revenue for 1939, was estimated at Fl.578,435,000, and the expenditure at Fl.621,761,000: the debt of Netherlands India at Jan. 1, 1938) was—Consolidated Fl. 1,313,000,000; Floating Fl.38,000,000. The trade of Netherlands India was valued in 1940 at Fl.434,000,000 for imports and at Fl.620,000,000 for exports, the value of rubber exported being Fl.135,000,000 (Fl.17,500,000). The trade with Great Britain in 1938 was £3,984,000 (exports to Great Britain) and (1941) £7,589,000 (imports from Gt. Britain). *Lieutenant-Governor of Netherlands India*, Dr. H. J. van Mook (1944).

BRITISH CHAMBER OF COMMERCE FOR NETHERLANDS' E. INDIES, *London Office*, Cecil Chambers, 86 Strand, W.C.2.

II. Netherlands' West Indies:—

"Nederlandsch West-Indie" comprise the mainland colony of Surinam (Dutch Guiana) in South America, and certain islands in the West Indies known as the Colony of Curacao (Curacao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of Dutch Guiana is about 54,000 sq. miles, with a population (1934) of 164,085; area of Curacao, 436 sq. miles, population (1934), 79,395. Bauxite is an important export. The administrative capital of Surinam is Paramaribo (pop. 52,000); the capital of Curacao is Willemstad (pop. 21,000); of Aruba, Oranjestad; of Bonaire, Kralendijk; of St. Martin, Philipsburg; of St. Eustatius, Oranjestad; and of Saba, Bottom. *Governor of Curacao*, Dr. P. A. Kasteel (1942).

NICARAGUA.

(República de Nicaragua.)

President (1939-1947). General Anastasio Somoza born Feb. 1, 1895; installed Jan. 1, 1937; re-elected for period March 30, 1939 to May 1, 1947. *Minister for Foreign Affairs*, Señor Dr. Don Mariano Arguello Vargas.

LEGATION IN LONDON.

Minister in London (vacant).

Consulate, 15 Union Court, E.C.2.

Secretary in Charge, Herbert C. Cock.

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45'—15° N. lat. and 83° 40'—87° 38' W. long., containing an area of 51,660 English square miles and a population (1941) of about 1,000,000, of whom about three-quarters are mixed blood and the rest of pure Spanish descent, and Indians, including the Mosquitos, who dwell on the Atlantic littoral and were formerly under British protection.

Nicaragua was discovered by Columbus in 1502, and was overrun by the Spaniards under Davila in the first quarter of the 16th century, forming part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution came into operation on March 22, 1939. The President is elected by direct suffrage for six years. Congress comprises a Senate of 15 members (together with the Presidents of the Republic) and a Chamber of Deputies of 55 members.

The chief products are coffee, bananas, sugar, rubber (tender, mahogany, rosewood, &c.), tobacco, rice, beans, coconuts, gold and silver. The length of the railway is 842 miles.

of telegraph and 3,216 miles of telephone, and a powerful wireless station was completed at Managua in 1924. Good roads are very few, and transportation, especially in the rainy season (May-Nov.), is attended with great difficulties.

Until the advent of aircraft the Atlantic littoral was practically isolated from the rest of the Republic and the chief centres of population, but T.A.C.A. Airways now have a bi-weekly service between Managua and the Atlantic littoral.

Language and Literature.—The official language of the country is Spanish. In 1940 there were 4 daily newspapers published at Managua. Education is backward, at least 60 per cent. of the population being illiterate. There are Universities at Managua, León and Granada.

FINANCE.

	1944-45.
Estimated revenue.....	C\$54,100,000
Estimated expenditure.....	54,100,000
External debt (June 30, 1944).....	27,800,000
Internal debt (June 30, 1944).....	1,800,000

Official Exchange Cordobas 5 = U.S. \$1.

London rate (Sept. 1943), C\$20.45 = £1.

TRADE.

	1942.	1943.
Imports.....	C\$6,800,000	C\$13,500,000
Exports.....	5,500,000	7,600,000

Considerable quantities of foodstuffs are imported as well as cottons and other manufactures, principally from the United States, which also take the greater part of the exports; the chief exports are coffee, bananas and gold.

CAPITAL, Managua. Population (1942) 120,000; Matagalpa, 46,000; León, 48,000; Granada, 35,000; Corinto, 18,000; Bluefields, 8,000. Corinto, on the Pacific, is the chief port, handling about 70 per cent. of the total trade; Bluefields and Puerto Cabezas on the E. coast are mainly concerned in the banana and timber trade to New Orleans, U.S.A.

FLAG: Three horizontal bands, blue, white, blue (the arms of the Republic on white band, displaying five volcanoes, surmounted by cap of liberty under a rainbow).

BRITISH LEGATION.

Envoy Extraordinary, Minister Plenipotentiary and Consul-Gen. (resident at Guatemala), Rees J. Fowler (1945).

Norway, a kingdom in the northern and western portion of the Scandinavian peninsula, was founded in 872. From 1397 to 1814 Norway was united with Denmark and from Nov 4 1814, with Sweden, under a personal union which was dissolved June 7, 1905, when Norway regained complete independence.

On April 8-9, 1940, Germany invaded Norway, occupying Oslo and other places of importance. The government refused to submit, and with the assistance of Allied forces, the Norwegian navy and air force, with a hastily mobilised army, offered armed resistance until the Allies evacuated Norway, June 10, 1940. After the unconditional surrender of Germany (May 8, 1945) the Quisling, or traitor, government fled the country and the Norwegian government returned to Oslo from its temporary refuge in London. The King and the Royal Family landed at Oslo from Great Britain on June 7 1945.

Norway is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 counties (*fylker*) and comprises an area of 244,556 sq miles with a population (1940) of 2,937,000. In 1940 there were 47,873 births (16.3 per 1,000 inhabitants), 31,493 deaths (10.7 per 1,000) and 27,816 marriages (9.4 per 1,000), the infant mortality rate (1939) was 37 per 1,000 live births.

The Norwegian coast line is extensive, deeply indented with numerous fiords and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands separated by deep and narrow valleys. The cultivated area is about one-fourth part of the country, forests cover

nearly one-fourth, the rest consists of highland pastures or uninhabitable mountains.

The chief industries are agriculture and forestry manufactures fisheries and shipping. Agriculture and forestry give employment to 30 per cent. of the population. Manufactures are aided by great resources of water power estimated at 9,200,000 kw of which 14 per cent are utilized. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of any other European country. The Norwegian merchant fleet has been modernized and ranks fourth among the mercantile fleets of the world.

Government—Under the constitution of May 17, 1904, there is a bicameral legislature (*Storting*) of 150 members of whom one quarter form the Upper Chamber (*Lagting*) and the remainder the Lower Chamber (*Odelting*) in which all legislation arises.

Defence—In October 1943, there were forces of the three arms operating from Great Britain. The Navy consists of 25 warships and about 30 auxiliary vessels, with 600 officers and 4,600 petty officers and ratings. The Air Force has two fighter and two coastal command squadrons.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. The attendance, before the invasion was high. Secondary schools are provided by the State by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo was attended in 1939 by 4,229 students.

Language and Literature—Norse is a branch of the Scandinavian languages and is the language of the mainland of Svalbard, and of (Danish) Faroe (sheep islands). Old Norse literature is among the most ancient (and the richest) in Europe. Modern Norwegian became formed at the time of the Reformation but modern Norwegian literature dates from the establishment of a national university at Christiania (Oslo) in 1811 and with the writings of Vergeland (1805-1845). Some of the famous names are Henrik Ibsen (1828-1906) the dramatist, Bjørnstjerne Bjørnson (1832-1910) the dramatist, journalist, dramatist and novelist and Nobel Prize-winner in 1903, Jonas Lie (1833-1908) novelist Knut Hamsun (born 1859) novelist and Nobel Prize-winner in 1920, and Sigrid Undset (born 1882), champion of Norwegian womanhood and herself a Nobel Prize-winner in 1928. In 1940 there were over 100 daily newspapers in the country, of which 9 were published at Oslo, 7 at Bergen, 6 at Trondheim and 4 at Alesund.

Communications—The total length of railways open in 1938 was 3,998 km, of which 160 km were private lines. The length of telegraphs and telephones in 1938 was 59,924 km (State, 38,988) with 1,224,300 km of wire (State, 866,600). The mercantile marine, Jan 1, 1939, consisted of 4,308 vessels of 4,756,400 gross tons. The gross earnings of the Norwegian mercantile marine in foreign traffic amounted in 1937 to about 750,000,000 kroner.

FINANCE

	1940-41 Kroner.
Ordinary Revenue (Budget)	696,600,000
Extraordinary do	120,700,000
Ordinary Expenditure (do)	714,600,000
Extraordinary do	111,700,000
Internal debt (June 30, 1939)	1,528,000,000
External debt (do)	596,400,000

British Ambassador Extraordinary and Minister Plenipotentiary, His Excellency Sir Lawrence Collier, K.C.M.G. (May 13, 1942) £2,800

SVALBARD.

(Spitsbergen and Bear Island.)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitsbergen ("Pointed Mountain") Archipelago was recognised by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway. In September, 1941, Allied forces (British, Canadian and Norwegian) landed on the main island. After destruction of the accumulated stocks of coal and dismantlement of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to a British port and the Russians (about 1,500) to the U.S.S.R.

The Svalbard Archipelago lies between 74° - 82° N. lat. and between 10° - 35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stord Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. The principal mineral is coal. In 1938 the coal output was 526,516 tons. The wintering force in 1938-39, was 2,316 strong; the archipelago is also visited by hunters for seal, foxes and polar bears.

Svalbard revenue (1939-40) kroner 254,050
do. expenditure (1939-40) 254,050

South Cape is 360 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsø, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsø to Green Harbour is 1 to 3 days; from Al derden 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° $49'$ - 71° $9'$ N. lat. and 7° $53'$ $9'$ $5'$ W. long.) was joined to Norway by law of Feb. 27, 1930.

BI LAND.

Norwegian Antarctic.

BOUVET ISLAND (54° $26'$ S. lat. and 3° $24'$ E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER THE FIRST ISLAND (68° $50'$ S. lat. and 90° $35'$ W. long.), was declared a dependency of Norway by resolution of Government, May 1, 1931.

PRINCESS RAGNHILD LAND (from 70° $30'$ to 68° $40'$ S. lat. and 24° $15'$ to 33° $30'$ E. long.) has been claimed as Norwegian since Feb. 17, 1931.

On Jan. 14, 1939, the Norwegian Government declared the area between 20° W. and 45° E., adjacent to Australian Antarctica, to be Norwegian territory.

OMÁN. See Arabia.

PANAMA.

(República de Panamá.)

President, Señor Don Enrique A. Jimenez, assumed office, June 15, 1945.

LEGATION IN LONDON.

1 Palace Gate, W.8.

Minister in London (vacant).

Charge d'Affaires, Señor Don Eusebio A. Morales.

Panama on the Isthmus of that name which connects N. and S. America, was formerly one of the nine Departments of Colombia. After a revolt (Nov. 3, 1903) it declared its independence and established a separate Government, with a single chamber legislature meeting every two years and now consisting of 32 elected members. The area of the Republic is 31,890 sq. m., the population (1940) 631,637 (excluding Canal Zone). The soil is extremely fertile, but there is little cultivation and nearly one-half of the land is unoccupied. The chief crops are bananas, coconuts, cacao, coffee, and cereals. A railway 47 miles in length joins the Atlantic and Pacific oceans.

Education is compulsory and free from 7 to 15 years and there were about 70,000 children enrolled in 1943-44. There are 11 secondary schools and technical and commercial colleges. The national university, established in 1935, had an enrolment of 1,700 students in 1943-44.

FINANCE.

1944.

Budget Revenue	Balboas 27,200,000
Budget Expenditure	26,300,000
External Debt (June 30, 1944)	16,200,000
Internal Debt (June 30, 1944)	2,200,000

The monetary unit is the Balboa (= \$1 U.S.); no Panamanian paper currency is issued, and U.S. dollar bills of all values are in circulation in the Republic and in the Canal Zone.

TRADE.

	1942.	1943.
Imports	\$37,900,000	\$40,300,000
Exports	2,300,000	2,000,000

The imports are almost entirely manufactured goods and foodstuffs; the exports are bananas, cacao, coconuts, and hides.

Language and Literature.—The language spoken is Spanish. In 1940 there were 5 daily newspapers published in the capital.

CAPITAL, Panama. Population (1940), 133,346. Colon (1940) 49,000.

Dependencies of Panama.—The Republic has a penal settlement at La Guardia on the island of Coiba (or Quibo) in the Pacific and stations on the island of Taboga. Coiba has an area of about 194 sq. miles and Taboga of about 4 sq. miles.

THE PAPAL STATE.

(Stato Città Vaticana.)

Sovereign Pontiff (261st), His Holiness Pope Pius XII. (Eugenio Pacelli), born in Rome, March 2, 1876, elected Pope (in succession to Pius XI.) March 2, 1939.

The office of the ecclesiastical head of the Roman Catholic Church (*Santa Sede* or Holy See) is vested in the Pope of Rome, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles, with a population of 3,124,688. During the reign of Pius IX. (1846-1878) the Papal States of Romagna, Umbria and the Marches were incorporated in the Kingdom of Sardinia and with the remaining States (Rome, Comara, Viterbo, Civita Vecchia, Velletri and Frosinone) became part of Unified Italy in 1870. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel Gandolfo, and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognised the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and of the Catholic Church in Italy and agreeing to pay 750,000,000 lire in cash and the income at 5 per cent. on 1,000,000,000 lire State bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power.

LIST OF POPES FROM 1591.

Sovereign Pontiff.	Family Name.	Elected.
Innocent IX.	Facchinetti	1591
Clement VIII.	Aldobrandini	1592

Registrar, Miss E. K. Tindall.

PARAGUAY.

(República del Paraguay.)

President (1943-48), Señor Dr. Don Higinio Morinigo, assumed office, Sept. 6, 1940, on death of President Estigarribia; elected President, Feb. 14, 1943.
Interior, Colonel Amancio Pampliega.
Foreign Affairs, Dr. Don Horacio Chiriani.

LEGATION IN LONDON.

Minister in London (vacant).
Acting Consul-General in London (ad interim), Miss May Stork, 51 Cornwall Gardens, S.W.7.

An inland State of South America, situated between 20°-60° S. lat. and 54°-62° W. long. The area of Paraguay (exclusive of the Chaco) is computed at 61,600 square miles, and it contains a population estimated in Dec. 31, 1942, at 1,072,000 (with a further 50,000 in the Chaco, including 8,000 Indians).

Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain, and from 1814-1840 was governed by Francia, a Paraguayan despot, who was succeeded by Lopez, 1840-1862. In 1864 Francisco Solano Lopez succeeded his father, and in 1864 declared war against Brazil, Argentina and Uruguay being

involved in the struggle. Against these three nations Lopez conducted a five years' war, which terminated in his defeat and death at the *Battle of Cerro Cora*, March 1, 1870. This dogged struggle reduced the country to complete prostration, and the population, which was 800,000 in 1857, is alleged to have fallen in 1870 to 250,000, of whom barely 30,000 were men.

Congress consists of one chamber containing one member for each 25,000 inhabitants. The Senate was abolished under the constitution adopted in 1940 and replaced by a Council of State nominated by the government.

Paraguay proper consists of a series of plains, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draft. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asunción; but is liable to shrink unduly with drought. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or endless is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The *Chaco*, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war in Sept., 1932, but an armistice was signed with Bolivia June 12, 1935. The *Chaco* is practically a dead level, though a slight and uniform rise westward is now known to exist, and suffers much from floods and still more from drought.

Production.—Agriculture and cattle raising are the principal industries, the extensive plains being naturally suited both for pasture and tillage. Agricultural methods are primitive, the chief products being *yerba maté* (native tea), tobacco, cotton, oranges, grape fruit, sugar, rice, peanuts and maize. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad.

Communications.—A railway, 232 miles in length, which belongs to an English company, connects Paraguay with the Argentine railway system. The journey from Asunción to Buenos Aires (985 miles) occupies 5½ hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days).

Defence.—There is a small permanent military force of about 3,000 all ranks. Four river craft patrol inland waters.

Language and Literature.—Most of the inhabitants are bi-lingual, speaking Guaraní (the language of the extinct tribe of Indian inhabitants at the time of the Spanish occupation) and Spanish. In 1940 there were 6 daily newspapers published at Asunción.

Education.—Primary education is free and compulsory. There are a few secondary and special schools and a national university with close on 2,000 students in 1944.

FINANCE.

1944.

Guaranies	20,600,000
Debt (Oct. 31, 1944)	25,500,000
Gold	\$3,250,000
	2,500,000

Paraguay proposed to resume payment of interest on the External Sterling Debt (3% Loans of 1886-96, and 1915) as from Jan. 1, 1943.

The Paraguayan debt due to Brazil under the peace treaty of Asunción (1872) was cancelled by a decree of the Brazilian President, May 5, 1943.

Currency.—From November 4, 1943, a new currency unit (*Guaraní*, plural *Guaranies*) symbolised by a crossed G, replaced the *Peso Fuerte* at the rate of 1 *Guaraní* = 100 *Pesos*, and 1 75 *Guaranies* = 1 Gold *Peso*.

TRADE.

1942.

1943.

Imports....	Gold \$17,200,000	Gold \$21,100,000
Exports.....	16,500,000	20,200,000

The imports are chiefly articles of food and drink, cotton goods, tobacco, and vehicles. The chief articles of export are quebracho extract, cattle and meat products, hides, timber, *yerba maté*, tobacco, oranges and petit grain oil.

CAPITAL. Ψ Asunción. Pop. (1942), 120,000; other centres being Villarrica 36,000, Itá 31,000, Capiatá 20,000, Carapegua 18,000, Concepción 15,000, and Ψ Encarnación 13,000.

26 Princes Gate, S.W.7.

Chancery of the Embassy and Consulate, 50 Kensington Court, W.8.

* The name of the Kingdom is Iran, but owing to usage "Persia" comes more easily to foreigners.

Ambassador in London, His Excellency Seyed Hassan Taqizadeh (24 iii '44).
Counsellor, Hossain Ghods.
and Secretaries, Kazem Nia-mir; Mahmoud Foroughi.
Press Attaché, A. H. Hamzavi.
Air Attaché, Col. Assadollah Bayandor.
Attaches, Mahmoud Sheyda; F. Adamyat; E. Kazemi.
1st Secretary (Honorary), Dr. Seyyed Fakhroddin Shadman.
Financial Counsellor (Honorary), Fathollah Noury-Esfandiary.
Commercial Attaché (Honorary), Nubar Sarkis Gulbenkian.

Persia comprises an area of 628,000 sq. miles, with a population estimated in 1939 at over 15,000,000.

Persia is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Mohammerah to Ahwaz in 1888. Railways have been constructed since 1927, and caravans and pack-animals are now being superseded by motor transport of passengers and goods on all main roads.

The *Trans-Iranian Railway*, from Bandar Shah, on the Caspian Sea, to Bandar Shapur, on the Persian Gulf, was officially inaugurated by H.I.M. the Shah on Aug. 26, 1938; this line has a total length of 872 miles, the total cost, after eleven years work, being approximately £30,000,000; the line runs through the Capital and opens up the fertile province of Mazandaran. The branch line from Garm Sar towards Meshed has been completed up to Damghan, 363 kilometres from Tehran. The extension from Tehran to Tabriz has been completed up to Zandjan, 315 kilometres from Tehran. In the southern section there are seven tunnels through the Zagros range, the longest exceeding 2½ miles. There is a railroad from Tabriz to Julfa and a branch line from Ahwaz to Khorramshah was opened in 1942.

The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Oilfields in Southern Persia have been successfully worked by an English company since 1902, the output in 1939 being 78,200,000 barrels (of 42 gallons) and in 1940 78,600,000 barrels. The only important manufacture is that of woollen carpets (mostly a domestic industry); shawls, silks, and cotton fabrics are also produced, and several cotton spinning mills and sugar factories have recently been installed as well as a jute factory, a cement factory, a modern silk spinning and weaving mill and an up-to-date tobacco and cigarette factory and various other industrial concerns (at Tehran). There are extensive forests in the north and west. Sheep and goats are numerous, and good wool is produced.

The Persians are mostly Shi'ah Muhammadans, but there are many adherents of Bahaism (an eclectic form of Deistic religions), and Armenian Christians. Persia now possesses modern Civil and Penal Codes.

Persia was ruled for many years by Shahs of the Kajar Dynasty, with despotic power, subject only to the influence of interpreters of the sacred law. Owing to increasing popular discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in Dec., 1905. In Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution, which set up a Legislature of a houses,

a Senate of 60 Members (half nominated, half elected) and a Constituent Assembly of 136 Members, elected for 2 years. He was succeeded in 1907 by his son Muhammed Ali Shah, who was deposed by the National Assembly in 1909, to be succeeded by his son, Sultan Ahmad Jahan (under the regency of Nasir-ul-Mulk, until 1914). As a result of the energy of Prime Minister H.H. Reza Khan the authority of the Government was re-established over almost the whole country. On Oct. 31, 1925, the last representative of the Kajar Dynasty, Shah Sultan Ahmed, who had been absent from the country for some time, was deposed by the National Assembly, which handed over the government to the Prime Minister, Reza Khan Pahlavi, who was elected Shah on Dec. 13, 1925, by the Constituent Assembly. The Shah took the oath on Dec. 15 and was publicly proclaimed, and was crowned on April 25, 1926.

Owing to Nazi penetration the Shah and many of the government officials showed a leaning towards the Axis powers and after Germany's invasion of U.S.S.R. in 1941 counter measures were taken by joint British-Soviet forces, leading to the expulsion of Nazi agents.

Under the Anglo-Soviet Treaty of Alliance with Persia (Jan. 29, 1942), the independence and territorial integrity of Persia are guaranteed by Gt. Britain and U.S.S.R. On Sept. 9, 1943, Persia declared war on the Axis powers.

On Sept. 16, 1941, Shah Reza Pahlavi abdicated and left Tehran, after nominating the Crown Prince as his successor. Negotiations with the Constituent Assembly led to the accession of the Crown Prince as a constitutional ruler. Reza Pahlavi died July 26, 1944.

For the purposes of local government the country is divided into 10 Divisions (*Ustans*) comprising 49 Provinces (*Shahristans*), under Governors-General and Governors, respectively.

Defence.—Persia possesses an army, well equipped on modern lines, of approximately 200,000 all ranks and a small fleet in the Persian Gulf. The Gendarmerie is being reorganized under an adviser from the U.S.A. The Persian Air Force has about 150 machines, mainly of British manufacture.

Education.—Since 1943 primary education is compulsory and free. There are over 5,000 schools, with 300,000 pupils, in addition to American, French, Russian, Iraqi and Jewish schools, including a French school for girls only. There is a university at Tehran.

On October 12, 1942, Persia adopted a new Standard Time 3½ hours in advance of Greenwich Time.

Language and Literature.—Persian, or Farsi, the language of Iran, and of some outlying districts formerly under Persian rule, is an Indo-European tongue, the written language having a Semitic origin with writing from right to left. Among the great names in Persian literature are those of Abu'l Kásim Mansur, or Firdausi (A.D. 939-1020), Omar Khayyam, the astronomer-poet (died A.D. 1122), Shems-ed-Din Muhammad, or Hafez (died A.D. 1389) and Mohammad bin Khawandshah, bin Mahmud, commonly called Mirkhond (1433-1498), author of a universal history. In 1940 there were 12 daily papers in Persia, of which 7 (4 Persian and 3 French) were published at Tehran.

FINANCE.

1944-45.

Administrative revenue.....	<i>Rials</i> 3,960,000,000
Commercial (do.)	6,370,000,000
Administrative expenditure...	4,570,000,000
Commercial (do.)	5,760,000,000
Foreign Debt (Dec. 31, 1942) .	127,200,000,000

Administrative income and expenditure since 1932-33 are exclusive of the receipts and outgoing of undervillains under State management, the latter being embodied in a "Commercial Budget."

The *Rial* of 100 Dinars was tied to the U.S. Dollar from Dec. 21, 1939, and the official rate was fixed at *Rials* 17 = 1 U.S. 100 *Rials* = 1 *Pahlavi*. In May, 1942, the official rate was fixed at 128 *Rials* = £1.

Production and Industry.—Agriculture is the principal occupation of the people, wheat, barley, rice, fruits, gums, drugs, wool, tobacco and cotton being the chief products. Viticulture is also important. Carpet weaving on hand looms is the principal industry. Minerals are said to abound and are believed to include coal, iron, copper, lead, nickel and cobalt. Non-metallic minerals include marble, borax and rock salt. There are turquoise mines at Nishapur. The petroleum production for the 12 months ended March 21, 1943, was: motor spirit, 1,560,000 metric tons; kerosene, 816,000 metric tons; heavy oils, 6,161,000 metric tons.

TRADE.

	1942.	1943.
Imports ... <i>Rials</i>	2,394,000,000	<i>Rials</i> 2,247,000,000
Exports ... "	4,053,000,000	" 4,414,000,000

The leading imports into Persia are cotton fabrics, tea, sugar, motor vehicles, railway material, and industrial machinery; the principal exports are heavy oils, petrol, carpets, opium, gum, fruits, cotton and rice. All foreign trade was in Feb., 1937, declared to be a State monopoly, and restrictions on imports and on exchange transactions were imposed; the control on foreign exchange transactions was removed in 1933 but was reimposed March 1, 1939.

British commercial interests in Persia exceed those of any other country, the trade between the British Empire (including India, the Dominions, &c.) and Persia amounting to about 56 per cent. of the total trade of the country (1938-9), inclusive of oil exports and of non-dutiable imports.

CAPITAL: Tehran, population (1940) 521,246, scene of historic meeting between President Roosevelt, Marshal Stalin, and Mr. Churchill (December, 1943). Other large towns are Tabriz (213,542), Isfahan (205,000), Meshed (176,000), Shiraz (130,000), Resht (122,000), Kerman (90,000), Hamadan (100,000), Yazd (55,000), Bushire (20,000), Bandar Abbas (10,000), Lingah, Khorramshahr (22,000), and Bandar Shapur.

FLAG: White, bordered with green (top) and red (bottom), with arms (lion and sun) in centre.

Consul-General, Liverpool, Señor Don Juño Fernandez Dávila.

There are Consulates at *Glasgow, Cardiff, Hull, Birmingham, Sheffield, Southampton and Belfast*.

Peru is a maritime Republic of South America, situated between $2^{\circ}31'22''$ and $19^{\circ}13'$ S. latitude and between 69° and $81^{\circ}19'$ W. longitude. The territory between $7^{\circ}47'$ S. and $19^{\circ}13'$ S. was occupied by Chile, as the result of the Pacific War of 1879-1882. In 1929 the Province of Tacna was returned to Peru, Chile retaining the Province of Arica. The area of the Republic (1932) was 428,626 square miles, and the population enumerated at the Census of 1940 (the first since 1876) was 7,023,111; boundary settlements (Jan. 29, 1942) with Ecuador increased the area by about 50,000 sq. miles and the population was estimated (Dec. 31, 1943) at 7,396,000. In 1943 there were 176,431 births, 96,751 deaths and 20,261 marriages.

Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541), who subjugated the Incas (the ruling caste of the Quichua Indians), who had invaded the country some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of 1821-1824, established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended in 1860, 1929, 1933, 1936 and in 1939), and is that of a democratic Republic. The President is elected for six years by direct vote of the people. Congress is composed of a Senate and of a Chamber of Deputies, each renewable as to one third part, by lot, every two years.

The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest peak being *Aconcagua*, in Chile (22,976 feet); the highest points in the Peruvian sector are *Huascaran* (22,211 feet), *Huandoy* (20,855 feet), *Ausangate* (20,235 feet), *Arequipa* (or *Misti*) volcano (18,364 feet), *Hualcan* (20,000 feet), *Chachani* (19,037 feet), *Anajashua* (18,020 feet), *Pichupichu* (17,724 feet), and *Mount Mitigs* (17,583 feet).

There are four distinct regions, the *Costa*, west of the Andes, the *Sierra* or western slopes of the Andes, the *Punas* or mountainous wastes below the region

of perpetual snow; and *Montana*, the inward slopes and boundless forests of the Amazonian basin. The coastal area, lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current; its chief products are sugar, cotton, petroleum, wool, hides and skins, and it contains the chief towns and most of the white population. In the barren, mountains section are to be found minerals in great richness and variety which await improved transport facilities before their production can be considerably increased; it is inhabited by Indians in a low state of civilization. Upon the eastern slope of the Andes are to be found very large tracts suitable for cultivation and stock raising.

Agriculture and stock raising, the latter increased of late years through the acclimatization and crossing of the zebu, are the principal industries, employing over 80 per cent. of the inhabitants. The chief crops are maize (the staple food of the Indian population), cotton, sugar, wheat, rice and potatoes. Plantations have been made of rubber, quinine, and tea. There are vast reserves of various kinds of timber in the Amazonian country, which also produces wild rubber.

In recent years the coastal and sierra zones have been opened up by means of roads and air routes and efforts are now being made to extend similar benefits to the tropical eastern zones, which lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state.

Andean Highway.—The completion in 1944 of the trunk road from the Pacific port of Callao, via Lima, Oroya, Cerro de Pasco (14,700 ft.), Huanuco, Tingo Maria, to Pucallpa, the river port on the Ucayali, one of the largest tributaries of the Amazon and accessible all the year round to vessels of 3,000 tons, forms a link between the Pacific, the Amazon and the Atlantic. The trunk road runs through the *Boqueron del Padre Abad*, a pass rediscovered on July 22, 1937, in the backbone of the Blue Cordillera.

Minerals valued (1942) at sales 375,000,000 included petroleum and its derivatives, gold, silver, copper, lead, zinc, vanadium (of which Peru is the largest producer in the world, with an output of 1016 tons in 1942) and antimony. The Lobos and other islands on the Pacific coast provide guano (120,000 tons in 1941 season).

The total length of the railways open (1937) was about 3,000 miles, of which 1,195 miles are under the control of the Peruvian Corporation. There is also steam navigation on the eastern rivers Ucayali (see *Andean Highway*, above) and Huallaga, and in the south on Lake Titicaca and the (Bolivian) River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. Wireless telegraphy stations have been established in Iquitos and other places in the interior. The coast district is served by a national company and by the Chile-U.S.A. route *la Peru*.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 8,000 of all ranks; the Navy includes 2 cruisers built at Barrow, 3 destroyers and 4 submarines. There is a military aerodrome at Las Palmas (near Lima) and a seaplane station at Ancon.

Education.—Elementary education is compulsory and free for both sexes between the ages of 7 and 14, with about 500,000 pupils at the 6,000 schools in 1943. Secondary education is provided at 50 State schools with 5 year courses from 12 to 17 and at over 100 institutions conducted by Religious Orders. There are also rural agri-

cultural schools for Indians. The University of San Marco at Lima, founded in 1551, had about 2,300 students in 1943. The Catholic University, also at Lima, had over 1,000 students, and there are smaller Universities at Arequipa, Trujillo and Cuzco.

Language and Literature.—Spanish is the official language of the country and notably of the original Spanish stock from which the governing and professional classes are mainly recruited, but the bulk of the nation is composed of Incas whose language (Quichua) is still spoken in the Sierra. Of the remaining non-Spanish races the majority are *mestizos* (half-breeds) speaking various Indian dialects. Before the arrival of Pizarro the Incas had attained a high state of culture, which survived four centuries of Spanish oppression, ending with the Declaration of Independence (July 28, 1821). Modern Peruvian literature includes a national drama in the Spanish tongue and many Peruvian writers have attained international fame. The national library founded at Lima in 1821 was pillaged by Chileans in the Pacific War of 1879-1882, but many of the scattered manuscripts and books have since been recovered. The first printed news-sheet in South America was issued at Lima in 1594 and in 1940 there were 30 daily Peruvian newspapers and many monthly and weekly magazines and reviews of the first rank. A chair of English was established in 1938 at the Universidad Mayor de San Marco in Lima.

FINANCE.

	1945.
Public revenue (estimated).....	Soles 446,500,000
Public expenditure (do.).....	446,500,000

Special Attaches, M. Jozef Rucinski; M. Stanislaw Dembinski.

Attaché, M. Jozef Tysza.

Consulate-General, London, 63, Portland Place, W.1. Consul-General, Dr. K. Poznański.

The Republic of Poland was proclaimed at Warsaw in November, 1918, and under the Treaty of Versailles (June 28, 1919) the assentors to the Covenant of the League of Nations, and the signatories of the Treaty of Peace, guaranteed the independence of the Republic, which was reconstituted within the limits of the 18th-century "Polish Commonwealth." This State extended in the year 1772 over an area of about 286,000 sq. miles, and included a population of about 13,000,000. To this was added in 1938 about 420 sq. miles (pop. 242,000) ceded by Czechoslovakia, chiefly in Cieszyn Silesia. The area of the Republic in 1939 was about 150,572 sq. miles, with a population of about 34,756,000 (of whom in 1932 22,208,076, or 69 per cent., were Poles, and 9,944,860, or 30 per cent., other nationalities). The predominant religion of the people is Roman Catholic, but there are a considerable number of Protestants and about 3,000,000 Jews.

In 1938 there were 849,873 births (24.6 per 1,000 inhabitants), 479,602 deaths (13.9 per 1,000) and 278,713 marriages (8.1 per 1,000). In 1938 infant mortality was 140 per 1,000 live births.

In March, 1939, France and Great Britain entered into a treaty with Poland to preserve the integrity of Polish territory, and the invasion of the country by Germany on Sept. 1, 1939, precipitated war with the guarantors. On Sept. 17, 1939, armed forces of the U.S.S.R. invaded Eastern Poland, and on Sept. 21, 1939, Germany and Russia declared in a joint manifesto that the Republic of Poland had ceased to exist, and its territories were divided into Eastern (U.S.S.R.) and Western (German) districts. Poland has thus suffered a fourth partition. The first, under the Treaty of St. Petersburg, Feb. 17, 1772 (Russia, Prussia and Austria), the second, under the Treaty of Grodno, Sept. 23, 1793 (Russia and Prussia); the third, by the final act of the Congress of Vienna, June 9, 1815 (when Poland was divided between Prussia, Austria and Russia, except for a Congress Kingdom under the protection of the Tsar of Russia and the small Republic of Cracow). In Sept., 1831, this Congress Kingdom was annexed by Russia and on Nov. 6, 1848, the Republic of Cracow was annexed by Austria, and Poland ceased to exist as a separate State until re-formed under the Treaty of Versailles (June 28, 1919). In the fourth partition, under the Treaty of Brest-Litovsk (Sept. 21, 1939), the Government of Germany and the U.S.S.R. established a demarcation line between the German and Soviet armies, passing along the River Pissa up to its confluence with the River Narew, then along the Narew up to its confluence with the River Bug, then along the Bug up to its confluence with the River Vistula, then along the Vistula up to the mouth of the River San, and then along the San up to its source. Under this fourth partition

the U.S.S.R. received 77,000 sq. miles, with 13,000,000 inhabitants, and Germany 73,000 sq. miles, with 22,000,000 inhabitants.

On July 18, 1942, after Germany's invasion of U.S.S.R., it was officially stated that the Soviet Union stood for the freedom and independence of Poland to the same degree as for the freedom and independence of Czechoslovakia and all countries occupied by Hitlerite Germany.

On April 21, 1945, a 20 year treaty "of friendship, mutual assistance and post-war co-operation" between the Soviet Union and Poland was signed in the Kremlin at Moscow by Marshal Stalin and M. Osóbka-Morawski, Prime Minister and Minister for Foreign Affairs in the Polish (Lublin) Provisional Government.

The new frontiers of Poland will be finally determined by the Council of the United Nations, but some changes have already taken shape, as foreshadowed at the Teheran Conference (Nov. 28-Dec. 1, 1943), in compensation for territories occupied by U.S.S.R. east of the Curzon Line. The southern boundary is not affected, except that part formerly dividing Poland from Ruthenia (Czechoslovakia); the northern boundary is the Baltic Sea, from West of Königsberg (former capital of East Prussia) to east of Swinemünde in Pomerania; and the western boundary is formed by the Rivers Oder and Neisse.

On Feb. 9, 1942, a Presidential Decree appointed a National Council for Poland of 31 members and the first session was opened in London on Feb. 25, 1942.

POLISH ARMED FORCES.—At the outbreak of war in 1939 the Polish Army was the sixth largest among those of the United Nations. Between the date of their arrival in Great Britain after the collapse of France, Polish airmen operated with the Fighter Command of the Royal Air Force, taking part in many raids over enemy occupied territory and sharing in the victory in the Battle of France. Polish units fighting with the Royal Navy have also taken their full share of risks and successes.

LANGUAGE AND LITERATURE.—Polish is a western slavonic tongue (see U.S.S.R.), the Latin alphabet being in use, as in Czechoslovakia. Polish literature developed rapidly after the foundation of the University of Cracow (a printing press was established there in 1474 and there Copernicus died in 1543). A national school of poetry and drama survived the dismemberment and the former era of romanticism was followed by realistic and historical fiction, including the works of Henryk Sienkiewicz (1846-1916), Nobel Prizewinner for Literature in 1905, Boleslaw Prus (1847-1923), and Stanislaw Reymont (1868-1925), Nobel Prizewinner in 1924. In 1939 there were 70 daily newspapers published in Poland, 21 of them at Warsaw.

FINANCE		1939-40
Estimated revenue Zlotys	2,523,000,000
Estimated expenditure	2,533,000,000
Internal Debt (March 31, 1939):—		
Consolidated	2,462,000,000
Floating	356,000,000

Portugal lies between 36° 58'—42° 9' 12" N. lat. and 6° 11' 48"—9° 29' 45" W. long., being 302 miles in length from N. to S., and averaging about 117 in breadth from E. to W. Continental Portugal occupies the western part of the Iberian Peninsula, bounded on north and east by Spain, and on south and north by the Atlantic ocean; it contains an area of 34,500 square miles, with an estimated population (June 30, 1943) of 7,954,000. The Azores and Madeira Islands in North Atlantic are politically an integral part of the Republic. Population (June 30, 1941): Azores 284,755; Madeira 249,771.

In 1943 there were 197,396 births (24.8 per 1,000 inhabitants), 121,525 deaths (15.3 per 1,000) and

58,144 marriages (7.3 per 1,000). The infant mortality rate was 133 per 1,000 live births.

From the close of the eleventh century until the year 1200 the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove the *King and Royal family into exile, and the National Assembly of Aug. 21, 1911, sanctioned a Republican form of government. Under the Constitution of 1933 the President is elected for seven years by direct vote of the electors. The Prime Minister is appointed by the President, who also appoints the other Ministers on the recommendation of the Prime Minister. The Government is responsible only to the President. There is a single Chamber Legislature (*Assembleia Nacional*) of 90 members elected by direct vote of the electors. In practice the candidates are exclusively those put forward by the Government party. There is also a "Corporative Chamber" consisting of representatives of local authorities and industrial, commercial and other "corporations" (Organisations of employers and employees), to which all bills introduced into the Chamber must be submitted for its opinion. The Legislature is in session for three months in the year. In the recess the Government legislates by decrees or decree-laws, of which the latter only must be confirmed by the legislature. Both men and women enjoy the franchise; but there are certain educational or tax-payment qualifications.

The chief agricultural products of continental Portugal are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, vines, and almonds, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known universally as "port" is shipped from Oporto.

There are extensive forests of pine, oak, cork and chestnut, covering about 20 per cent. of the total area of the country, and lumbering is the second largest industry. Sardine fisheries are of importance, and hides and wool are included in the exports.

The mineral products are principally wolfram, lead, tin, antimony, coal, manganese, iron pyrites, iron, slate, and bay-salt, which last, from its hardness and purity is in demand. The manufactures consist of silk, woollen, linen, and cotton fabrics, metal and earthenware, goods, tobacco, cigars, &c. The mercantile marine (1941) numbered 790 vessels with a tonnage of 232,600. Railways 2,230 miles in extent were open for traffic in 1941.

Defence.—Military service is compulsory for all men who are physically fit, less than 25 per cent. being exempted each year. The peace strength of the army is officers 4,673 (active list), 1,054 (reserve); other ranks about 35,000. On mobilisation, practically all fit men under 45 would be called to the colours. The navy consists of 731 officers and 5,677 ratings, manning a total of 40 destroyers, sloops, submarines and gunboats, of which 5 destroyers, 6 sloops, and 3 submarines are of modern construction. The total number of Service aeroplanes is about 100.

Language and Literature.—Portuguese is a Romance language with admixtures of Arabic and other idioms. It is the language of Portugal and Brazil. Portuguese language and literature reached the culminating point of their development

* Ex-King Manoel, of the House of Braganza, was born Nov. 15, 1889, and succeeded to the throne on the assassination of his father and elder brother, Feb. 1, 1908; died at Fulwell Park, Twickenham, Middlesex, July 2, 1932.

† Occupied towns (formerly German) as shown on p. 947.

in the *Lusiads* (dealing with the voyage of Vasco da Gama) and other works of Camoens (Camoës) born in 1524, died in 1580. Until the second quarter of the nineteenth century Portuguese literature dominated that of Brazil. Modern literature, both prose and verse, is in a flourishing condition and there are 18 daily newspapers, of which 9 are published at Lisbon.

Education is free and nominally compulsory between the ages of 7 and 15, but is not strictly enforced, and about 50 per cent. of the population above 7 years old are illiterate. A ten-year plan (1941-50) to decrease illiteracy includes the provision of 8,240 additional primary schools at a cost of about £5,000,000. Secondary education is mainly conducted in State lycées, but there are also private schools. There are also military, naval, technical and other special schools. There are Universities at Coimbra (founded in 1290), Lisbon (1292) and Oporto (1292).

FINANCE. 1945.

Revenue (Budget).....	Escudos 3,983,000,000
Expenditure (do.).....	3,982,000,000

Bissau—Vice-Consul, J. A. Graham.

BRITISH COUNCIL.—Representative in Portugal, 5, George West, O.B.E., The British Institute, Rua de Luis Fernandes 3, Lisbon.

There is a British Institute also at Oporto.

BRITISH CHAMBER OF COMMERCE IN PORTUGAL, 4 Rua Victor Cordon, Lisbon (Branches at 6 Rua dos Clerigos, Oporto, and 13a Rua de Junha, Funchal, Madeira).

Lisbon, distance 1,110 miles; transit, 50 hours.

MADEIRA AND THE AZORES.

Madeira and The Azores are administratively parts of Portugal. Gt. Britain obtained permission for the United Nations to establish bases in the Azores by treaty with Portugal (October 16, 1943). The Madeiras are a group of islands in the

Atlantic Ocean about 520 miles west of Lisbon, and consist of Madeira, Porto Santo and 3 uninhabited islands (Desertas). The total area is 324 square miles, with a population of 249,711 (1940). Ψ Funchal in Madeira, the largest island (270 square miles), is the capital, with a population of 31,352; Ponta do Sol (6,190). Machico (8,619).

The Azores are a group of 9 islands (Flores, Corvo, Terceira, Sao Jorge, Pico, Fayal, Graciosa, Sao Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 square miles and a population of 284,755 (1940). Ψ Angra, in Terceira, the capital of the group, had a population of 10,642 in 1930; Ψ Ponta Delgada (18,022), where U.S. oil companies have installed tanks for refuelling shipping, and Ψ Horta (7,643).

PORTUGUESE COLONIES.

CAPE VERDE ISLANDS, off the west coast of Africa, consists of two groups of islands, Windward (Santo Antao, Sao Vicente, Santa Luzia, Sao Nicolao, Boa Vista and Sal) and Leeward (Maio, Sao Thiago, Fogo and Brava) with a total area of 1,526 square miles and a population (Census of 1940) of 181,286. Estimated revenue and expenditure (1943) Escudos 20,000,000; imports (1942) Escudos 69,000,000; exports, Escudos 20,000,000; shipping entries (1940) 3,170,610 tons. Capital, Ψ Praia (6,000). Vessels take coal and oil at Ψ Mendello, Sao Vicente (pop. 20,000).

SAO THOMÉ AND PRINCÍPE ISLANDS, in the Gulf of Guinea (area 372 square miles, population (1941), 60,490). Estimated (1943) revenue and expenditure Escudos 11,600,000; imports (1942) Escudos 20,000,000, exports, Escudos 50,000,000; shipping entries (1942) 80 vessels (263,000 tons). Capital, Ψ Sao Thome (3,187). The fort of St. John Baptist on the Slave Coast is a dependency of the Province of Sao Thomé.

PORTUGUESE WEST AFRICA (Angola and Portuguese Guinea) has an area of about 502,000 square miles and a population of about 4,400,000. Angola, area 488,000 sq. miles, pop. 3,738,000, with present capital Ψ St. Paul de Loanda (pop. 40,000), and capital designate Nova Lisboa, includes also Kabinda and Portuguese Zaire (N. of Congo). Estimated revenue and expenditure (1943) *Angolares 323,700,000; imports (1942) *Angolares 228,000,000; exports, Angolares 480,000,000. Shipping entries (1936) 5,330,087 tons. A new port is projected for Loanda, to accommodate ships of 23 ft. draught. Portuguese Guinea, area 14,000 sq. miles, pop. (1940) 351,000 (capital Ψ Bolama, population 4,000) estimated revenue and expenditure (1943) Escudos 38,000,000; imports (1942) Escudos 71,000,000, exports Escudos 56,000,000; shipping entries (1941), 65,000 tons.

A transcontinental railway from Benguela (Lobito Bay) in Angola, traversing the Katanga mineral district of the Congo and thence running southwards through Rhodesia to Bulawayo and eastwards to Beira is being developed under British, Belgian and Portuguese control. This line makes through communication from Lobito Bay on the Atlantic to Beira on the Indian Ocean.

Representative of The British Council in Portuguese West Africa, C. Sanders, Secretary of the Anglo-Portuguese Club, Loanda.

PORTUGUESE EAST AFRICA, OR MOZAMBIQUE, Lourenco Marques, Inhambane, Quilimane, Tete, Mozambique, Cape Delgado and Nyasa, together with the territory of Manica and Sofala administered by the Mozambique Company under a charter expired in 1941, has a total area of 297,657

*Angolar (of 100 Centavos or 20 Macutas)

square miles, with a population of 5,081,266. Capital, Ψ Lourenco Marques (48,000). Estimated revenue and expenditure (1943) Escudos 577,000,000; imports (1942), Escudos 568,000,000; exports, Escudos 339,000,000; shipping entries (1942), 2,423,000 tons.

PORTUGUESE INDIA has a total area of 1,636 square miles, with a population of 600,000, and includes Ψ Goa, Ψ Damaun, and Ψ Diu. Estimated revenue and expenditure (1943) Escudos 58,000,000; imports (1940) Escudos 105,000,000; exports, Escudos 2,000,000; shipping entries (1940), 700,000 tons.

Ψ MACAU, in China, on the Canton River, has an area of 5 square miles and a population of 157,175. Estimated revenue and expenditure (1943), Escudos 41,300,000 (the local currency is the pataca, 10 = £1); imports (1936), £983,258; exports, £571,061; shipping entries (1938), 3,117,000 tons.

PORTUGUESE TIMOR (the northern portion of the island), in the Malay Archipelago, has an area of 7,329 square miles, with a population of 474,363. Estimated revenue and expenditure (1943) Escudos 9,500,000; imports (1940) Escudos 4,000,000; exports, Escudos 4,200,000; shipping entries (1939), 100,000 tons. Capital, Ψ Dilly, pop. 7,000. Timor was invaded by Japanese and Portugal protested against their barbarous treatment of the inhabitants.

ROUMANIA.

(România.)

King, Mihai (Michael), G.C.V.O., born Oct. 25, 1921; succeeded to the throne on the death of his grandfather (King Ferdinand), 1927; abdicated (in favour of his father Carol), June 8, 1930; resumed throne (on abdication of King Carol), Sept. 6, 1940.

CABINET.

(March 6, 1945.)

Prime Minister, Dr. Petre Groza.

Vice-do, and Minister for Foreign Affairs, M. Gheorghe Tatarescu.

Justice, M. Lucretiu Patrascanu.

Finance, M. Dumitru Alimaneanu.

Interior, M. Teohari Georgescu.

Industry and Commerce, M. Petre Bejan.

Mines and Oil Industry, M. Tudor Ionescu.

Religious Denominations, Rev. Constantin Burducea.

LEGATION IN LONDON.

[Roumanian interests in the United Kingdom are in charge of the Swedish Legation (Special Division), 1 Belgrave Square, S.W.1.]

Roumania is a kingdom of South-Eastern Europe formerly the classical Dacia and Scythia Pontica, having its origin in the union of the Danubian principalities of Wallachia and Moldavia (and the addition thereto of a strip of Southern Bessarabia) under the Treaty of Paris (April, 1856). The principalities remained separate entities under the suzerainty of the Turkish Empire until 1859, when Prince Alexandru Ion Cuza was elected Prince of both Principalities, still under the suzerainty of the Porte. Prince Cuza abdicated in 1866

and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown is now vested. By the *Treaty of Berlin* (July 13, 1878) a new Principality (consisting of the two above mentioned) was recognised as an independent State, and part of the *Dobruja* (which had been occupied by the Roumanians) was incorporated in the new Principality. On March 27, 1881, the former Principality was recognised by the Great Powers as a Kingdom. Roumania is not a "Balkan" State. She took no part in the military operations of the Balkan League against Turkey in 1912-13. Her unexhausted military power secured for her a readjustment of her south-eastern (*Dobruja*) frontier in 1913. In the War of 1914-1918, Roumania fought on the side of the Allies from Aug. 27, 1916, and her territories were greatly increased as a result of the War; the *ante bellum* area of the Kingdom (74,461 sq. miles) was estimated at 123,000 sq. miles in 1939, and the 1915 population of 7,897,311 increased to 19,033,363 (1935 census); estimated at 19,933,802, July 1, 1939. *Insula Serpilor* (Isle of Serpents) in the Black Sea, ceded by Turkey in 1878, carries a lighthouse maintained by the Danube Commission; area about 50 acres, with about 8 inhabitants.

The outcome of the War of 1914-18 added Bessarabia (April 9, 1918), the Bukovina (Nov. 28, 1918), Transylvania, The Banat and Crisana-Mamurash (Dec. 1, 1918), these additions of territory being confirmed in the Treaty of St. Germain, 1919, and the Treaty of Petit Trianon, 1920. In 1940, however, Roumania was forced to restore some of the added territory.

On June 27, 1940, in compliance with an ultimatum from U.S.S.R., Bessarabia and Northern Bukovina were ceded to the Soviet Government, the area affected being about 20,000 sq. miles, with a population of about 4,000,000.

In August, 1940, Roumania ceded to Bulgaria the portion of Southern Dobruja (about 3,000 sq. miles) taken from Bulgaria in 1919.

In 1940, Hungary made persistent demands for the cession of the greater part of Transylvania, and on Aug. 30, 1940, it was announced that pressure from the Axis Powers had forced Roumania to cede about two-thirds of Transylvania to Hungary. The territory thus ceded has an area of about 16,000 sq. miles. The population involved numbered about 3,000,000.

In 1941 the Antonescu Government permitted the passage of Nazi armed forces into Roumanian territory, and before the end of the year a general German occupation was carried out. After the German attack on U.S.S.R. Roumanian armed forces were sent into the conflict under German direction.

The victorious advance of the Soviet Armies reached Roumania in August, 1944, and on August 23, terms of peace were granted by U.S.S.R. Roumania declared war on Germany on Aug. 25.

By the terms of the armistice of Sept. 12, 1944, between the Allies and Roumania the cessions of territory to U.S.S.R. were confirmed, but the Vienna award concession of Transylvania to Hungary was cancelled. The area in October, 1945, was estimated at 91,934 sq. miles, with an estimated population of 22,000,000. In 1942 there were 411,389 births (24.4 per 1,000 population), 327,828 deaths (19.5 per 1,000) and 138,140 marriages (8.2 per 1,000). The infant mortality rate was 183 per 1,000 live births.

GOVERNMENT.—Before the upheavals of 1939-40 the government was that of a Constitutional Monarchy, with a bi-cameral legislature consisting of a Senate of 56 members, of which half the

members are nominated by the Government and half are elected for 9 years, and of a Chamber of Deputies (*Camera Deputatilor*) of 385 members, elected for 6 years by universal suffrage. The executive was entrusted to a council of ministers.

During the unrest following the *Second Vienna Award* (Aug. 30, 1940), King Carol appointed General Ion Antonescu, President of the Council of Ministers, with dictatorial powers. On Sept. 6, 1940, King Carol abdicated, and King Mihai was proclaimed, but his efforts to stem the pro-Axis current were unavailing and he left the country.

PRODUCTION.—The soil of Wallachia, Bessarabia, and Moldavia is among the richest in Europe, producing wheat, maize, millet, oats, barley, rye, beans, and peas. Grape vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp, and the rich lands of Bessarabia produce wheat, maize, barley, flax, tobacco, water melons, fruit, and grapes. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, with intense winter cold and summer heat, and fierce summer droughts sometimes defeat these principal industries. The forests of the mountainous regions are extensive (17,851,401 acres), and the timber industry is important. The country is rich in minerals, and produces petroleum, salt, coal, lignite, iron, gold, and mica; the workers in the oilfields are the largest single unit of workers in any one industry. All large estates have been expropriated and divided among the peasants.

LANGUAGE AND LITERATURE.—Roumanian is a romance language with many archaic forms and with admixtures of Slavonic, Turkish, Magyar and French words. The folk-songs and folk-lore, composed by the people themselves, and transmitted orally through many centuries (and collected in the 19th century), form one of the most interesting of such collections. Modern literature has been encouraged by a national society. In 1940 there were 36 daily newspapers, of which 23 were published in Bucharest. The dominating religion is that of the Greek (Orthodox) Church.

EDUCATION is free and nominally compulsory, there being 14,900 primary schools with 1,451,800 in attendance. Secondary schools are well attended. There are also special schools and Universities at Bucharest, Iassy, and Cernauti. A Government High School of Commerce was opened in 1913.

COMMUNICATIONS.—In 1937 there were 7,000 miles of railway open for traffic in the whole kingdom; railway communication requires great development in order to cope with the problem of carrying the cereal crops to the shipping ports. There are 23,000 telegraph and telephone offices. The mercantile marine consists of about 120 steamers and 600 sailing vessels. The Black Sea ports are Sulina and Constantza; the latter is linked with the interior by a railway.

FINANCE		1944-45.

SALVADOR.

(República de El Salvador.)

President, Señor Don Miguel Tomas Molina, assumed office, Nov., 1944.

LEGATION IN LONDON.

Minister in London (vacant).

Consul-General in London, Señor Don Samuel Jorge Dawson, 19 Helena Court, Eaton Rise, Ealing, W.5.

The Republic of Salvador extends along the Pacific coast of Central America for 170 miles with a general breadth of 43 miles, and contains an estimated area of 13,176 square miles, with a population estimated (Dec. 31, 1942) at 1,829,826. It is divided into 14 Departments.

In 1943 there were 71,554 births (38.1 per 1,000 inhabitants), 38,366 deaths (20.4 per 1,000) and 6,156 marriages. Infant mortality was (1943) 120 per 1,000 live births.

Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish viceroyalty of Guatemala until 1821. In 1840 the Republic broke away from the federation of Central American States. The government is based upon a written constitution adopted in Jan., 1939. The President is elected for 6 years by direct vote. There is a single chamber National Assembly of 42 members, elected annually, and a Council of Ministers appointed by and responsible to the President.

The surface of the country is very mountainous, many of the peaks being volcanoes. The highest peak is the Santa Ana volcano (8,300 feet). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot and unhealthy, but towards the interior the altitude tempers the severity of the heat and much has been done in recent years to improve sanitary conditions and services. There is a wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of Salvador, the most recent being that of

1919, when great damage was done to the capital and other towns.

The principal river is the Rio Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while farther away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the present Santa Ana volcano. The eastern spur of this volcano forms the peak of Izalco, which is in an almost constant state of volcanic activity, and (on account of its visibility from the ocean) is known as "The Lighthouse of the Pacific."

The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as maize, indigo, rice, balsam, &c. Cotton-growing on a large scale was commenced in 1924, but on account of the ravages wrought by insects it was practically abandoned after two seasons; after a lapse of some years it was revived in 1935. In the lower altitudes towards the east sisal is produced and used in the manufacture of coffee and sugar bags. A British railway nearly 100 miles in length connects Acajutla with the capital and with the important coffee centre of Santa Ana. A line from the port of La Union (on the Gulf of Fonseca) to the capital was opened in 1922. Two new lines were opened in 1927, one from the capital to Santa Lucia, a suburb of Santa Ana, tapping the upper Lempa Valley; the other from the coffee centre of Ahuachapan to Santa Lucia. A new line from Santa Lucia to Zacapa (in Guatemala) was opened to traffic in 1930 and affords continuous railway communication between San Salvador and Guatemala City and Barrios. During 1924-26 the re-draining and re-paving of most of the capital were completed, and plans have been made for the macadamizing or paving of several hundred miles of rural roads, many of which are now passable all the year round. There is a good motor road between the port of La Libertad and the capital (23 miles), while motor transportation is possible throughout the year between the capital and Guatemala City, over the International road opened in 1923. The Pan-American Airways maintain regular services connecting San Salvador with the U.S. via Guatemala-Mexico-Brownsville, and connecting with Panama via Honduras, Nicaragua, Costa Rica.

There are 202 post-offices and 257 telegraph offices. There is a wireless (receiving and transmitting) station at the capital, and during 1925 a broadcasting station was inaugurated.

Language and Literature.—The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. In 1940 there were 3 daily newspapers published at the capital.

Education.—Primary education is compulsory and free. There are secondary, commercial and technical schools with 2,400 pupils in 1943, and a national university at the capital with 600 students.

FINANCE.

Revenue (Budget)	29,200,000
Expenditure (do.)	29,200,000

SAN MARINO.

(Repubblica di San Marino.)

Regents, Two "Capitani Reggenti."

CONSULATE-GENERAL IN LONDON.

Consul-General, Grand-Uff. Melville A. Jamieson, 103 Knightsbridge, S.W.7.

Vice-Consul, Comm. Giovanni Sovrani.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century. The Republic always resisted the Papal claims and its integrity was respected by Italy, with which country it concluded (June 28, 1897) a treaty of *amicizia e buon vicinato*; a new treaty on similar lines was signed on March 31, 1939. The Republic is governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. A Council of Twelve forms a Supreme Court of Justice. The area is 38 square miles, the population 15,545. There is an army of about 1,000. The city of San Marino occupies the slope of Mount Titano, and has an impregnable castle, where King Berengar of Lombardy took refuge in A.D. 950, a fine church and Government palace, and a theatre. The principal industries are wine, cereals, cheese, oil and cattle raising, in addition to the utilisation and export of worked stone from Mount Titano and production of white and hydraulic lime at Serravalle. A Treaty of Extradition was concluded between the Governments of Great Britain and the Republic of San Marino on Oct. 16, 1899. An electric railway runs from Rimini (55 minutes).

The revenue and expenditure 1939-40 balanced at 6,009,920 lire; there is no debt. The capital, San Marino, has a population of 2,000.

FLAG: Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

British Consul-General (vacant).

SAUDI ARABIA. See Arabia.

SIAM.

(Prades Thai.)

King, Ananda Mahidol, born Sept. 20, 1925; succeeded March 2, 1935.

Council of Regency, Prince Aditya; General Chao Phya Brijayendra Yodhin.

President of the State Council (Prime Minister), Minister of Defence and of Foreign Affairs, Marshal Luang Pibul Songgram.

The Kingdom of Siam, or Muang Tai "Land of Free Men," formerly known as Thailand (area 198,247 square miles; population, 1937, 14,464,489), is a buffer State between British Burma and French Indo-China, and its integrity was guaranteed by the British and French Governments by the Anglo-French Agreement of April, 1904. Until the middle of 1932 the King was an absolute monarch, but in June, 1932, a successful *coup d'état* was carried out in the capital and the King invited to rule in future as a constitutional monarch. A temporary Constitution Act was promulgated on June 27, 1932, a modified version of which was later made permanent and signed by the King on December 10. The Constitution provides that the King, as head of the State, shall exercise legislative power by and with the consent of the People's Assembly, executive power through the State Council (the Ministers of State), and judicial power through the Courts duly established by law. The People's Assembly is composed of 156 members, half of whom are elected and half nominated; provision is also made whereby, after a period of years, all the members shall be elected by the people.

An armed rebellion, organised by a reactionary faction against the leaders of the new regime, occurred in October, 1933. On March 2, 1935, King Prajadhipok (afterwards known as the Prince of Sukhodaya; died May 30, 1941) abdicated and the present King was proclaimed, a Council of Regency being appointed to act during the King's minority.

Hostilities between Siam and French Indo-China in 1940-41 ended by Japanese mediation March 6, 1941. Under a Treaty of Peace (May 6, 1941) France ceded to Siam considerable tracts in Laos and Cambodia in return for a payment of 6,000,000 piastres in equal annual instalments.

Siam was invaded by Japan on Dec. 8, 1941, and after a mild resistance it was announced in Tokyo (Dec. 21) that a 10-year treaty for mutual assistance against Gt. Britain and her Allies had been signed by Japan and Siam.

Japan "presented" to Siam the Malay States of Kedah, Perlis, Kelantan and Trengganu, but with the utter defeat of Japan Siam surrendered unconditionally and returned the annexed territories in Malaya and in Burma.

The country contains many Chinese (largely engaged in trade and industry), besides Shans, Laos, Malays, Burmese, and Cambodians, and about 1,300 Europeans and Americans.

The northern part of Siam is mountainous, the lower flat. About 30 per cent. of the sea-borne trade, which centred at Bangkok, was with the British Empire, and in the hands of British firms, or of Chinese trading from Singapore and Hong Kong. Norwegian shipping held the lead in tonnage, followed closely by British. The chief

products of the country are rice, teak, and tin. The area under rice is being enlarged by irrigation and by rail and road extensions, bringing the provinces into closer touch with the capital. There is a large number of rice mills, mostly in or near Bangkok. Other products are rubber, coconuts, tobacco, cotton and pepper. Metalwork, especially *niello* (engraved silver with interstices filled with black metallic compound) is one of the principal industries. The forests are extensive and several British companies hold leases for the exploitation of teak in Northern Siam.

The live stock in 1938 included nearly 6,000,000 cattle, 5,500,000 buffaloes, 11,000 elephants and about 400,000 horses.

Except tin, wolfram, rubies and sapphires, there are no important mineral products as yet. About 2,000 miles of State-owned railways are open for traffic (1940). Railways from Bangkok run to Varindr (357 miles N.E.), Chiangmai (462 miles N. of Bangkok), Aranya Prades (159 miles E.) and Padang Besar (618 miles S.); there are branch lines to Khonkaen (N.E.), Kantang (S.W.), and Sungai Golok (S.E.), totalling a farther 309 miles. At Padang Besar and Sungai Golok junction is effected with the F.M.S. West and East Coast systems respectively. The Khonkaen branch line has been extended to Nong Kai and a further extension to Nakorn Panom on the French frontier is nearing completion. There is through railway connexion between Bangkok and Penang and Singapore. An extensive programme of new road construction was planned before the war. On Sept. 30, 1939, there were about 920 miles of State highways. There are internal air lines with a total length of 1,227 miles, services being maintained between Bangkok—Puket, Pitsanuloke—Meh Sod, Chiangmai—Mehsarieng, Kohkaen—Nakorn Panom and Khonkaen—Wiengchan. There are 5,230 miles of telegraph lines.

Language and Literature.—Siamese is a monosyllabic-toned language, a branch of the Indo-Chinese linguistic family.

Religion and Education.—The principal religion is Buddhism, its followers numbering over 13½ millions in 1937, with about 630,000 Muhammadans and 70,000 Christians. There are 428 Government schools and 9,270 schools of all kinds, attended by 1,104,395 children. There are 2 Universities and 5 Training and Technical Colleges. In 1940 Siam adopted the Gregorian Calendar, the Buddhist year 2484 beginning on Jan. 1, 1942 (in place of April 1).

FINANCE.		1944.

A National State in the south-west of Europe, between 36°—43° 45' N. lat. and 4° 25' E.—9° 20' W. long, bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees. Continental Spain occupies about eleven-thirteenths of the Iberian peninsula, the remaining portion forming the Republic of Portugal. Its coast-line extends 7,217 miles—712 formed by the Mediterranean and 605 by the

Atlantic—and it comprises a total area of 196,700 English square miles, with an estimated population, on July 1, 1943, of 26,491,166—134 to the square mile. In 1943 there were 602,982 births (22.8 per 1,000 inhabitants), 348,718 deaths (13.2 per 1,000) and 173,768 marriages (6.6 per 1,000). Infant mortality was 99 per 1,000 live births.

The interior of the Iberian peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho.

Phoenician traders visited the peninsula more than a thousand years before the Christian era, but they were traders rather than settlers, although Cadiz (the Phoenician Gades) has preserved its identity and claims to be "the oldest city in the world." The Roman occupation of Spain was completed after the close of the Second Punic War (201 B.C.) and *Hispania* was divided into two provinces. After the decline of the Roman Empire the Italian elements, which had partly displaced the Celts and Iberians, were in turn disturbed by settlers of Germanic origin. In 1944 a Hispano-Roman burial ground, consisting of more than 300 tombs with urns and utensils of the second and third centuries B.C., was excavated in the village of Vedolay, near Murcia.

Government.—After the union of Aragon and Castile in the last quarter of the 15th century, Spain was ruled by sovereigns of the Aragon, Habsburg and Bourbon lines (with the intervention of a Republic 1873-75). Alfonso XIII. succeeding at birth in 1886. On April 14, 1931, following the results of the Municipal Elections, which showed anti-monarchical feeling to be extremely high in all the chief towns of Spain, King Alfonso XIII. left the country, and the Queen and other members of the Royal Family on the following day. A Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. Elections for a Constituent Assembly were held on June 28; the Assembly met on July 14 and passed a vote of confidence in the Provisional Government, and in December a Presidential Election was held. The Republican Assembly (*Cortes*) was a single Chamber Congress of Deputies. Each Province had an Assembly (*Diputación Provincial*), and with the approval of the *Cortes* Provinces might combine to form an Autonomous Region within the Republic. The Basque Provinces (Alava, Guipuzcoa and Vizcaya) formed the *País Vasco*, and the Catalan Provinces (Barcelona, Gerona, Lerida and Tarragona) formed the *Generalidad de Cataluña*, with seat of administration at Barcelona.

In 1936 a General Election resulted in favour of the Coalition of the Left, with a majority of 57 over the Right and Centre Parties. President Zamora resigned in April and on May 10 Don Manuel Azaña, the *Popular Front* Leader, was elected to succeed him.

On July 18, 1936, a counter-revolution broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain. The principal leader was General Francisco Franco Behamonde, formerly Governor of the Canary Islands, from which office he was dismissed by the Azaña Government. The struggle, in its later phases, threatened to embroil some of the European Powers, those of Nazi-Fascist tendency lending aid to General Franco (leader of the Military-Fascist fusion, or *Falange*) while those of Totali-

tarian-Communist views supported the Azaña (*Popular Front*) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 1939, the Civil War was declared to have ended, the *Popular Front* Governments in Madrid and Barcelona surrendering to the *Nationalists* (as General Franco's followers were then named). On June 5, 1939, the Grand Council of the *Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas*, which replaced the former *Cortes*, met at Burgos to legislate for the reorganisation of the country under the Presidency of General Franco, who had assumed the title of *Caudillo (Leader) of the Empire and Chief of the State*.

On July 1, 1942, General Franco announced the reinstitution of the *Cortes de España*, which was composed (March, 1943) of 438 members (*Procuradores*), 13 Ministers, 103 National Counsellors of the *Falange*, 122 Presidents of the State Council and of the Civil and Military Courts, Representatives of the national syndicates, 102 Mayors of Provincial Capitals and of Ceuta and Melilla, 12 Rectors of Universities, 6 Presidents of the Royal Academies, and 7 representatives of the Institutes of Civil Engineers, Lawyers, Doctors, Chemists, Veterinarians and Architects.

On June 16, 1945, General Franco stated that preparations were being made to hold nation-wide municipal elections and that he was planning to hold provincial and national elections thereafter, but a decree issued in Madrid on Oct. 4, 1945, announced that the municipal and provincial elections would be postponed to the spring of 1946 and that only one-third of the members would be elected, the other two-thirds being nominated by the government.

[In Sept. 1945 a *Republican Government of Spain*, with a Cabinet under Señor José Giral, was formed by refugees from *Falangist* Spain resident in Mexico.]

Production.—Although Spain is rich in iron, copper, and lead, its mineral resources are only partially exploited. In 1943 the coal production was 9,592,000 metric tons, and of iron pyrites 881,000 metric tons (against 2,727,000 metric tons in 1938). The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The production of oranges in 1942-43 was about 500,000 metric tons (less than half the normal yield in pre-civil war days). The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry, and ten wines are made; in the south-east, the Malaga and Alicante.

The live stock in 1940 included about 3,000,000 cattle, 600,000 horses, 900,000 asses, 1,200,000 mules, 25,000,000 sheep, 6,000,000 goats and 5,500,000 swine.

The fishing industry, mainly sardines, tunny and cod, is of importance and there were over 1,600 canning factories in 1942.

The principal manufactures are cotton and woollen goods, paper of all kinds and cork.

Communications.—In 1940 there were 10,500 miles of railway open. The sea-going mercantile marine, on Jan. 1, 1942, consisted of 1,030 vessels of 1,200,000 gross tons.

Defence.—Army—Spain is divided into 8 Military Regions (each the headquarters of an Army Corps) and 2 Independent Commands (Balearics and Canaries). The 8 Army Corps comprise a

total of 19 Infantry Divisions. In addition, there is an independent Cavalry Division. Two further Army Corps, one of 3 Divisions (Ceuta) and one of 2 (Melilla) are based in the Protectorates.

The Navy consists of 6 cruisers, 13 flotilla-leaders, 7 (old) destroyers, 4 mine-layers, 4 gun-boats, 6 torpedo-boats and 5 submarines, with some auxiliary craft.

An independent *Air Force* was formed in 1939. It is divided into 5 Air Regions and 3 Oversea Commands, with a total of 27 Bomber, 24 Fighter and 13 Reconnaissance and Army Co-operation Squadrons.

Education.—Primary education is compulsory and free, but the census of 1940 revealed illiterate figures of over 4½ million males and 5½ million females, about 42 per cent. of the total population. There are secondary schools in each province, but attendances are small. Training colleges have been set up for teachers in elementary schools. There are 12 Universities in continental Spain and 1 at La Laguna in the Canary Islands. The University of Salamanca was founded in 1230, Valencia (1245), Oviedo (1317), Valladolid (1346), Barcelona (1450), Saragossa (1474), Santiago (1501), Seville (1502), Madrid (1508), Granada (1526), Madrid (New foundation, 1836), Murcia (1915).

Language and Literature.—Castilian is the language of more than two-thirds of the population of Spain and is the form of Spanish spoken in Mexico, Central and (except in Brazil) Southern America. Catalan is a dialect in Provençal Spain and Galician, spoken in the north-western provinces, is allied to Portuguese. The literature of Spain is one of the richest in the world, the outstanding writings of its golden age being those of Miguel de Cervantes Saavedra (1547-1616), Lope Felix de Vega Carpio (1562-1635) and Pedro Calderón de la Barca (1600-1681). The Nobel Prize for Literature has twice been awarded to Spanish authors—J. Echegaray (1904) and I. Benavente (1922). In 1940 there were 71 daily newspapers in the country, 6 being published at Madrid, 5 at Barcelona, 4 at Seville, 3 at Bilbao and 3 at San Sebastian.

BRITISH COUNCIL—Representative of the British Council in Spain, Professor Walter Starkie, Litt.D., The British Institute, Calle de Almagro 5, Madrid. There are British Institutes at Madrid, Barcelona, Bilbao and Valencia.

BRITISH CHAMBER OF COMMERCE OF SPAIN, Rambla de los Estudios, 8, Barcelona (Branch, Avenida de José Antonio 31, Madrid); and Santa Catalina Mole, Puerto de la Luz, P.O. Box 72, Las Palmas, Canary Islands.
 Madrid, 1,150 miles; transit, 45 to 50 hours.

THE BALEARIC ISLES are an archipelago off the east coast of Spain. There are four large islands (Majorca, Minorca, Ibiza and Formentera), and seven smaller (Aire, Aucanada, Botafoch, Cabrera, Dragonera, Pinto and El Rey). The islands were occupied by the Romans after the destruction of Carthage and provided contingents of the celebrated Balearic slingers. The total area is 1,935 square miles, with a population (1941) of 420,000. The archipelago forms a province of Spain, the capital being Ψ Palma in Majorca, pop. (1941) 115,346. Ψ Mahon (Minorca) pop. (1940) 20,000.

THE CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population (1941) of 696,982. The Canary Islands form two provinces of Spain.—Las Palmas (Gran Canaria, Lanzarote, Fuerteventura and the islets of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos), with seat of administration at Ψ Las Palmas (pop. 1941, 123,691) in Gran Canaria, where U.S. oil companies have installed tanks for re-fuelling shipping; and Santa Cruz de Tenerife (Tenerife, Palma, Gomera and Hierro), with seat of administration at Ψ Santa Cruz de Tenerife, pop. (1941) 73,120.

ISLA DE LOS FANANES or ILE DE LA CONFERENCE is a Franco-Spanish condominium, under the

Treaty of Bayonne Dec. 2, 1856, and March 27, 1901. It lies at the mouth of the Bidassoa in La Huguera bay. It is uninhabited.

Spanish Colonies.

The Spanish Colonies consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population estimated in 1935 at 951,000.

Ψ CEUTA is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 square miles, with a population of 35,219.

Ψ MELILLA is a town on a rocky promontory of the Rif coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492. The population is 50,170.

SPANISH GUINEA, consisting of the islands of Fernando Poo and Annobon, the Corisco Islands and Rio Muni (mainland). Fernando Poo lies in the Bight of Biafra in 3° 12' N. lat. and 8° 48' E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. With its dependencies it has an area of about 800 square miles, and a population estimated at 34,200. The capital of Spanish Guinea is Ψ Santa Isabel (pop. 9,000) on the island of Fernando Poo. The total area, mainland and islands, is about 10,000 sq. miles, with an estimated population of 170,000, of whom about 1,600 are whites.

Annobon Island (Anno Bom), in the Gulf of Guinea, in 1° 24' S. lat. and 5° 3E. long.; population 1,470.

Corisco Islands, consisting of Corisco, Elobey Grando, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce.

Rio Muni is a coastal settlement between Cameroon and French Congo (1° N.—2° 10' N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Ψ Bata (the principal town) on the coast.

WESTERN SAHARA—Spanish possessions in the Western Sahara extend from N. of Cape Blanco to S. of Cape Ifni, exclusive of Wadi Draa (Treaty with France, Nov. 27, 1912) but including the Ifni enclave. The Colony includes Rio de Oro, La Agueria and Ifni, and lies approximately between 21° 20'–26° N. lat., extending eastwards to about 13° W. long. Total area about 100,000 sq. miles (including part of the waterless Sahara, with a sparse population of wandering Muhammadan Arabs), total population about 32,000. Capital, Ψ Villa Cisneros, pop. about 250.

SPANISH MOROCCO.—In addition to Ceuta and Melilla, Spain also exercises a protectorate over a part of Northern Morocco (see "Morocco"), and on the Moroccan seaboard are certain Spanish settlements:—

Alhucemas, the bay of that name, includes six islands: population 366.

Peñon de la Gomera (or Peñon de Velez) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 450.

The Chafarinas (or Zaffarines) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 620.

THE SUEZ CANAL.

The Suez Canal.—The *Compagnie Universelle du Canal Maritime de Suez* (r Rue d'Astorg, Paris VIII) is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,602 shares (cost £4,000,000, value March 31, 1939, £27,683,262). Since 1924 each 500 franc share has been divided into two 250 franc shares.

The Suez Canal was opened in 1869. The total length of the canal is 101 miles, with a minimum width of 60 metres (196 ft. 10 in.), the maximum draught of water allowed for vessels using the canal is 10.36 metres (34 feet). The average time for the transit through the canal is 21 hours 31 minutes. By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 10 are British (three representing H.M. Government and seven the shipowning interest).

British Commercial Directors, T. Harrison Hughes (Vice-President of the Company); Sir Alan G. Anderson, G.B.E.; Arthur Harold Bibby, D.S.O.; Sir Thomas Royden, Bt., C.H.

Representing H.B.M. Govt., Norman Young; The Earl of Cromer, G.C.B., G.C.I.E., G.C.V.O.; Rt. Hon. Sir Ronald Graham, G.C.B., G.C.M.G., G.C.V.O.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal in the 11-year period 1929-1939, with the percentage of British vessels:—

Year.	No. of Vessels.	Net Tons.	British Tonnage.
			%
1929	6,274	33,466,014	57.2
1930	5,761	31,668,759	55.58
1931	5,366	30,027,966	55.36
1932	5,032	28,340,290	55.47
1933	5,423	30,676,672	54.55
1934	5,663	31,750,802	54.29
1935	5,992	32,810,068	47.96
1936	5,877	32,378,883	46.49
1937	6,635	36,491,332	47.28
1938	6,171	34,418,187	50.43
1939	5,777	29,573,394	51.43
1940	2,460	13,092,620	...

The transit receipts in 1870 were 5,718,756 fr. (gold). In 1938, 1,625,612,100 fr. (paper), and in 1939, £17,852,340.

The rate of transit dues as from Dec. 15, 1938, is 5 shillings and 6d. (or 28 030 piastres) per ton for laden vessels, and 2 shillings and 10d. (or 12 015 piastres) per ton for vessels in ballast.

The net dividends for the year 1939 amounted on the ordinary 250 fr. (gold) shares to 295 francs, 97 centimes and on the Actions de Jouissance to 268 francs 58 centimes.

The 6,171 vessels included in the total 1938 were grouped under the following categories:—

	No.	Net Tonnage.
Merchant vessels (laden)	3,050	15,417,517
Steamers	1,877	13,053,750
Ships and transports	153	698,677
Merchant vessels in ballast	1,091	5,248,243
	6,171	34,418,187

The tonnage of the merchandise carried was 25,776,000 tons in 1913; 17,047,000 tons in 1920; and 28,779,000 tons in 1938. Details of the nationality of the vessels passing through the Canal in 1939 are appended:—

Flag.	No. of Vessels.	Net tons.
British	2,627	15,208,694
Italian	884	4,267,120
Netherlands	413	2,453,870

SWEDEN.

(Sverige.)

King of Sweden, of the Goths and the Vandals, Gustaf V., born June 16, 1858; suc. December 8, 1907; married Sept. 20, 1881, Victoria, dau. of Grand Duke of Baden (born August 7, 1862, died April 4, 1930) and has issue two sons.
Heir Apparent, Gustaf Adolf, Duke of Skåne, Crown Prince, born Nov. 11, 1882; married (1) June 15, 1905, H.R.H. the late Princess Margaret of Connaught (died May 1, 1920).
 (2) Nov. 3, 1923, Lady Louise Mountbatten, Princess of Battenberg, born July 13, 1889.
Children of the Heir Apparent (by 1st marriage), Prince Gustaf Adolf, born April 22, 1906, married Oct. 19, 1932, Princess Sibylle of Saxe-Coburg-Gotha (and has issue Princess Margaretha, born Oct. 31, 1934; Princess Brigitta, born Jan. 19, 1937; Princess Désirée, born June 2, 1938; and Princess Christina, born Aug. 3, 1943); Princess Ingrid, born March 28, 1910, married May 24, 1935, Frederik, Crown Prince of Denmark and Iceland; Prince Bertil, Duke of Halland, born Feb. 28, 1912; Prince Carl Johan, born Oct. 31, 1916, married (morganatically) 1945.
 Prince Wilhelm, Duke of Södermanland, second son of the King, was born June 17, 1884, married May 3, 1908, the Grand Duchess Maria Pavlovna of Russia; marriage dissolved March 17, 1914.

CABINET.

(Formed July 31, 1945.)

Prime Minister, Per Albin Hansson.

Foreign Affairs, Östen Undén.

Justice, Herman Zetterberg.

Finance, Dr. Ernst Wigforss.

Interior, Gustav Möller.

Defence, Allan Vougt.

Communications, Torsten Nilsson.

Public Works and Instruction, Tage Erlander.

Commerce, Gunnar Myrdal.

* This is the official title of the King of Sweden.

Agriculture, Per Edvin Sköld.

National Economy, Axel Gjores.

Ministers without Portfolio, Nils Quensel; Gunnar Danielsson; Elje Mossberg; John Ericsson; Gunnar Strang.

SWEDISH LEGATION IN LONDON.

(27, Portland Place, W.1.)

Envoy Extraordinary and Minister Plenipotentiary in London, His Excellency Bjorn G. Prytz.

Chancellors of Legation, C. C. Gisle; Nils E. Ihre.

1st Secretaries, Baron K. G. Lagerfelt; G. de Petersens.

2nd Secretary, G. Ryding.

Attaches, T. L. Finnmark; W. de Petersens; S. de Aminoff.

Military Attaché, Lt.-Col. Baron C. R. H. W. von Essen.

Assistant Military Attaché, Captain G. A. A. Norinder.

Naval Attaché, Commodore J. E. Gester.

Assistant Naval Attaché, Lt.-Comm. Count C. F. B. Taube.

Air Attaché, Major F. R. Cervell.

Agricultural Counsellor, M. W. F. de Wachenfelt.

Press Attaché, V. Hammarling.

Assistant Press Attaché, C. G. S. Edling.

Shipping Adviser, A. E. Samuelson.

Special Attaché, B. Westerberg.

1st Chancellor, G. Luthman (*Vice-Consul*).

Chaplain, Rev. C. D. Soderberg.

Consulate-General, 329, High Holborn, W.C.1.

Consul-General, Nils E. Ihre.

1st Vice-Consul, G. de Petersens.

2nd Vice-Consul, K. A. Axelsson (*Vice-Consul*).

Chancellors, G. Westin; Lars G. Carlsson.

Swedish Church, Harcourt Street, Marylebone Road, W.1.

Sweden occupies the eastern half of the Scandinavian peninsula in N.W. Europe, and comprises 25 governments, "Län," with an area of 173,345 square miles, and a population, Jan. 1, 1942, of 6,406,474 (5,180,535 males and 3,225,939 females). Of the 28,722 non-Swedish inhabitants (1939) 5,973 were Germans, 2,207 U.S.A., and 1,040 British. In 1943 there were 124,921 births (19.3 per 1,000 inhabitants), 65,799 deaths (10.1 per 1,000) and 61,589 marriages (9.5 per 1,000). In 1943 the infant mortality rate was 29 per 1,000 live births, the lowest rate recorded in that year for any country where infant mortality statistics are published.

Under the Constitution of June 6, 1809 (with amendments in later years) the throne is hereditary in the House of Bernadotte, a Marshal of France, who was invited to accept the title of Prince of Corvo and Crown Prince, with succession to the throne. The Marshal landed at Helsingborg on Oct. 20, 1810, and succeeded Charles XIII in 1818. There is a Diet (*Riksdag*) of two Chambers, *Forsta Kammaren* of 150 members, elected for 8 years; and *Andra Kammaren* of 230 members, elected for 4 years. The Council of Ministers (*Statsråd*) is responsible to the Riksdag.

Sweden contains the great lakes of Vänern, Vättern, Malaren, and Hjälmaren. Nearly 35 per cent. of the population are devoted to agriculture, about 304,000 being owners and 71,000 tenants of the land they cultivate. The country may be divided into three separate districts, the northern, forest; central, mining and agricultural; the southern, agricultural. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, wheat, rye, barley, potatoes, roots and grasses. The forests are very extensive, covering over one-half of the surface

of the country, and consisting chiefly of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and the chief fuel of the country, in addition to sulphate and mechanical wood pulp for the paper-making industry. The mineral products are extremely rich: iron of excellent quality; lead, zinc, sulphur, manganese, arsenic, gold, granite porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gällivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic; coal is being worked in Scania (Skåne).

In 1940 there were 18,690 industrial establishments (including mines and quarries) employing over 400,000 men, 103,000 women and 15,000 girls under 18 years of age. The fishing industry landed catches valued at £1,365,000,000 in 1941.

Railroads 10,330 miles in length (of which 6,527 are the property of the State) were open on Jan. 1, 1943; and 13,273 miles of telegraph (inclusive of 7,296 railroad telegraph), 128 control stations, and 1,837 railroad and 2,275 other telegraph stations. There were at the same date 1,044,288 miles of telephone. The Mercantile Marine (July, 1943), consisted of a total of 2,077 ships of 1,363,746 gross tons.

Defence.—Service in the Army is universal and compulsory, about 35,000 being trained annually; war strength about 500,000 equipped on modern lines and principally mechanised. The Navy consists of 5 cruisers, 7 coast defence ships, 24 destroyers, 27 submarines and some small craft. The naval stations are Stockholm, Karlskrona and Göteborg. The Air Force consists of about 400 fighters and general-purposes aeroplanes.

Religion.—The State religion is Lutheran Protestant, to which over 97 per cent. of the people adhere.

Language and Literature.—Swedish is one of the Teutonic languages spoken by the people of Scandinavia and is closely allied to Icelandic, Danish, Norse and Finnish. Swedish national literature may be dated from the foundation of the University of Upsala in 1477 and reached its golden age under Gustavus III (1746-1792) who founded the Swedish Academy in 1786. Among modern Swedish authors who have achieved worldwide reputations are Johan August Strindberg (1849-1912) dramatist and novelist; Selma Lagerlöf (1858-1940) who was awarded the Nobel Prize for Literature in 1909 on account of her pre-eminence as a novelist; Verner von Heidenstam (born 1859), poet and Nobel Prize-winner (1916); and Erik A. Karlfeldt, Nobel Prize-winner in 1931. In 1940 there were 73 daily newspapers in the country, 8 being published at Stockholm, 6 at Göteborg, 4 at Malmö, 4 at Örebro and 3 at Norrköping.

Education.—(i.) *Primary*: Compulsory and free, illiteracy rare. Maintained by local taxation, with State grants. Attendance good. (ii.) *Secondary*: Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics, commerce and navigation. (iv.) *Universities*: Upsala (founded 1477), Lund (founded 1668) and private faculties in Stockholm and Gothenburg.

FINANCE.		1944-45.
Revenue (Budget).....	Kronor	3,636,300,000
Expenditure (Budget)....		4,865,900,000
Debt:—		
Consolidated Internal ..		8,350,000,000
Internal (Floating).....		2,569,000,000
Total debt.....		10,919,000,000

The Swedish *Krona* (of 100 *Ore*) exchange at par 18.159 *Krona* = £1 sterling. Since 1941 the exchange rate has been stable at 16.90 *Kr.* = £1.

TRADE.

	1942.	1943.
Imports . . .	Kr. 1,780,244,000	Kr. 1,814,000,000
Exports . . .	1,18,826,000	1,172,000,000

The chief imports are coffee, tobacco, and other ordinary colonial produce, coal, motor cars, mineral oils, cloth, cotton, wool, manures, skins, copper, and yarn. The chief articles of export are timber, wood, pulp, paper, machinery, iron ore, pig iron and steel, matches, butter, and pork; exports of wood pulp and paper.

CAPITAL, Ψ Stockholm. Pop. (Jan. 1, 1943) 613,754. Attaché, M. A. Rappard.

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'—47° 48' N. lat. and 5° 58'—10° 30' E. long.

Switzerland celebrated the 650th anniversary of the Confederation on Aug. 1, 1941.

It is composed of 26 Cantons, 3 subdivided, making 25 in all, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,950 square miles, with a population of 4,265,703 in 1941, who are divided between Protestants, 57 per cent., Roman Catholics, 41 per cent., Jews numbering 21,000 and others 43,000. In 1943 there were 83,049 births (19.2 per 1,000 inhabitants), 47,409 deaths (11.0 per 1,000) and 35,694 marriages (8.3 per 1,000). In 1944 the infant mortality rate was 42 per 1,000 live births, the second lowest figure in Europe (Sweden, 29 per 1,000 in 1943).

On Jan. 1, 1944, there were 70,493 foreign refugees in Switzerland, including 39,712 soldiers

* The President is elected in December, and remains in office from Jan. 1 to Dec. 31; he is generally succeeded by the Vice-President.

of whom about 4,000 were British, with their own newspaper *Marking Time*.

Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to 15,217 feet in height, occupy its southern and eastern frontiers, and the chief part of its interior; and the Jura mountains rise in the north-west. The Alps occupy 61 per cent., and the Jura mountains 12 per cent., of the country.

The Alps are a crescent-shaped mountain system situated in France, Italy, Switzerland and Bavaria, covering an area of 80,000 square miles from the Mediterranean to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,732 feet) is partly in France and Italy, and Monte Rosa (15,217 feet) is partly in Switzerland and partly in Italy. The highest Swiss peaks are Finsteraarhorn (14,026), Aletschhorn (13,711), Jungfrau (13,671), Monch (13,453), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,603), Breithorn (13,685), and Matterhorn (14,780 feet) in the Pennine Alps.

The Swiss lakes are famous for their beauty and include Lakes Maggiore, Zurich, Lucerne, Geneva, Constance, Thun, Zug, Lugano, Walensee and Brienz.

Dairying and stock-raising are the principal industries, about 3,000,000 acres being under grass for hay and 2,000,000 acres pasturage.

Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. The forests cover about one-fifth of the whole surface. The chief manufacturing industries comprise silks, artificial silks and silk ribbons, wool, cotton and cotton ribbons, linen, embroideries, straw-plait, machines, paper, chemicals, chocolate, condensed milk, dyestuffs, and tobacco; while the metallurgical, electrical and pharmaceutical industries are also extensive; clocks and watches are the staple products of La Chaux de Fonds. In 1937 there were about 3,660 miles of railway in operation, 22,827 miles of telegraph and telephone lines (285,647 telephone subscribers), and 4,001 post-offices. The total length of first-class roads was 10,500 miles, the number of motor vehicles being 120,844 (71,537 motor cars, 27,472 motor cycles and 21,835 commercial vehicles).

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council (*Nationalrat*) of 194 members, and a Council of States (*Ständerat*) of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (*Bundesrat*) of 7 members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. The President has a salary of 29,750 francs; the Vice-President and other members of the Federal Council 27,020 francs each. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for four years. Not more than one of the same canton may be elected member of the Federal Council.

Defence: *Militia*. Elite (ages 20 to 32), 12 yrs.; initial trng., 60-102 days. Subsequently 11-14 days per ann.; then Landwehr I (32 to 36), II 36 to 40, and Landsturm (40 to 48).

A merchant navy, established in 1940, consisted (1942) of 11 vessels of 50,000 tons in all; the port of registration is Bâle, on the Rhine.

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy practically unknown. (i.) *Primary*: Free and compulsory. School age varies, generally 7 to 14. (ii.) *Secondary*: Ages 12-15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities*: Bâle (founded 1460), Berne (1834), Fribourg (1889), Geneva (1873), Lausanne (1890), Zurich (1832), and Neuchâtel (1909), and technical University of Zurich and commercial University of St. Gall.

Language and Literature.—German is the dominant language in 19 of the 25 cantons; French in Fribourg, Geneva, Neuchâtel, Valais and Vaud; and Italian in Ticino. Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler (1845-1924) was awarded the Nobel Prize for Literature in 1919. In 1940 there were 70 daily newspapers (46 in German, 18 in French and 6 in Italian).

FINANCE.		1945.
Revenue (Budget).....	Swiss Francs	792,500,000
Expenditure do		2,406,800,000
Debt (Dec. 31, 1944):—		
Internal consolidated		6,700,000,000

Prime Minister of Syria and Minister of Foreign Affairs and Defence (Oct. 2, 1945), Saadullah Jabry.

PRESIDENT OF LEBANON, M. Bechara al Khoury, *elected Sept. 27, 1943.*

Prime Minister of Lebanon and Minister for Commerce, Industry, Supplies, Posts and Telegraphs (Aug. 23, 1945), M. Sami Solh.

SYRIAN LEGATION IN LONDON.

Envoy Extraordinary and Minister Plenipotentiary, His Excellency Dr. Najeeb al Almanazi (21.ii.1945).

LEBANON LEGATION IN LONDON.

(Crowley St., S.W.1.)

Envoy Extraordinary and Minister Plenipotentiary, His Excellency M. Camille Chamoun (22.v.1944).
 Counsellors, M. Victor Khoury; M. Jamil Mikasul.

Sec. of Legation, M. Joseph Chedid.
 Commercial Attaché, M. Nadim B. Dimechkie.

The republics of Syria and the Lebanon are states in the Levant, covering a portion of the former Ottoman Empire taken from the Turks by British forces (with a small French detachment and some Arab forces under the Emir Faisal and Colonel Lawrence) in 1928, but following the Anglo-French Convention of September, 1929, Great Britain withdrew in favour of France, to whom a Mandate was granted by the Supreme Council of Allied Powers in 1920. This Mandate was ratified by the League Council in 1922.

France, as Mandatory, partitioned the countries into the States of Greater Lebanon and Syria, including the Jebel Druze, the Hauran and the Territory of the Alawites.

In 1941 hostilities broke out between the French troops in Syria and Lebanon and the Allied Forces

in the Middle East, the latter having been directed to prevent further Nazi penetration into French Mandated Territory. Hostilities ceased on July 11, 1941, and the French High Command agreed to remove the garrison.

In accordance with the undertaking given by the British and Free French Forces, Syria and Lebanon were declared to be independent.

Under an agreement signed by General Catroux (on behalf of the French Committee of National Liberation) and by representatives of Syria and Lebanon "all powers and capacities exercised hitherto by the French under mandate" were transferred to the Syrian and Lebanon governments as from Jan. 1, 1944.

Syria includes the districts of Damascus, Aleppo, the Alawites, the Euphrates and Jezireh, and the Jebel Druze and the Hauran. It is bounded on the north by Turkey, on the east by Iraq, on the south by Transjordan and Palestine, and on the west by the Lebanon and thence northwards by the Mediterranean to the Turkish frontier. There is a mixed Arabic-speaking population, mainly Asiatic and Moslem. A "Greater Syria Plan," which would incorporate Transjordan and other parts of Arabia, has been discussed by the Arab Congress (see p. 868.)

The Lebanon forms a strip, about 120 miles in length and varying in width from 30 to 35 miles, along the Mediterranean littoral, and extending from the Palestine frontier on the south to the Nahr al Kebir (15 miles north of Tripoli) on the north; its eastern boundary runs down the Anti-Lebanon range and then down the Great Central depression, the *Beqaa*, in which flow the rivers Orontes and Litani. It is divided into 5 provinces (Sanjaks) North Lebanon, Mount Lebanon, Beirut, South Lebanon and *Beqaa*. There is a mixed Arabic-speaking population of Druzes, Christians and Moslems.

Area and Population.—The total area of Syria and Lebanon is about 60,000 sq. miles, the population being estimated at:—

Syria (1933).....	1,682,452
Jebel Druze (1933).....	65,365
Lebanon (1932).....	854,644

Production.—Tobacco (latakiah) and cotton are grown in the maritime plain in Sahel, the Sabyoun and the Djebel districts of the Alawites; wheat and barley are also grown, skins and hides, leather goods, wool and silk, and copper and brass utensils are locally produced. In Lebanon fruits, onions, olive oil, citrus fruits, silk and wine. Mineral wealth is small but oil prospecting is in progress in the Deir-es-Zor region of Syria.

Railways.—A narrow-gauge railway runs from Beirut to Damascus, connecting at Rayak with the standard-gauge line which runs from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Aleppo to the Iraq frontier at Tel Kotchek and southwards to Haifa and across the Egyptian border to connect (over the Suez Canal swing bridge) with the Egyptian and Mediterranean coast lines. From Damascus the Helaz railway runs southwards to Transjordan. A narrow gauge railway also runs from Beirut up the coast to Maameltain.

Roads.—All the principal towns in the two countries are connected by roads, for the most part very good. The trans-desert route from Damascus to Bagdad has been much developed and the time between the two shortened to fourteen hours.

Rivers.—The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch (Hatay). The Euphrates crosses the

northern boundary near Djerablus and flows through north-eastern Syria to the boundary of Iraq.

Archæology, &c.—Both Syria and the Lebanon are rich in historical remains. Damascus (*Esh Shems*—The Sun) is the most ancient city in the world, having an existence as a city for over 4,000 years. It is situated on the river Abana at the foot of the barren mountains that form the eastern termination of Anti-Lebanus, and at the edge of the wide sandy desert that stretches to the Euphrates. The city contains the Omayyad Mosque, the Tomb of Saladin, and the "Street Called Straight" (Acts ix, 12), while at the edge of the Syrian desert is the Roman outpost-city of Palmyra. Baalbek (Heliopolis), 35 miles N.N.W. of Damascus, contains the ruins of I-III century Roman temples (the Circular Temple, the Great Temple, and the Temple of Bacchus) and nearby is the largest cut stone in the world (60 by 17 by 24 ft.), weighing 1,500 tons.

On the Alawite coast at Amrit are colossal ruins of the VII century B.C. Phœnician town of Marath, and also ruins of Crusader's fortresses at Markab, Sahyoun, and Krac des Chevaliers. At Tartous (also on the Alawite coast) are ruins of the XII-XIII century cathedral of Our Lady of Syria and of a castle built by the Knight Templars in late XII century.

Hittite cities, dating from 2,000 to 1,500 B.C., have recently been explored on the west bank of the Euphrates at Djerablus and Cadesh and also on the Orontes at Atchara, near Antioch, in Hatay (Turkey).

Language and Literature.—Arabic is the principal language (see Arabia). In 1940 there were 6 daily newspapers in Syria and Lebanon, 5 (3 in Arabic, 2 in French) being published at Beirut and 1 (Arabic) at Damascus.

Education.—Although the population of Syria and Lebanon is mainly Moslem the 3,500 elementary, technical and secondary schools had (1940) over 160,000 Christian pupils (out of a total Christian population of 550,000) against 120,000 Moslem pupils (out of a total Moslem population of 2,000,000). There is a Syrian University at Damascus, a French (R.C.) University and an American (undenominational) University at Beirut; also an Arab academy at Damascus and agricultural colleges at Beqaa and Selemiyeh.

CHIEF TOWNS.— Ψ Beirut (population 160,000) is the capital of the Lebanon and the chief port of both states. Ψ Tripoli (40,000), Ψ Sidon (20,000), Ψ Tyre (6,000) are other towns of importance. DAMASCUS (population 230,000) is the capital of Syria, other important towns being Aleppo (population 298,000), Homs (60,000) and Hama (40,000), the principal port of the Syrian Republic is Ψ Latakiah (25,000). The seat of government of Jebel Druze is Soueida (Black City), built in mid-19th century by refugees from Lebanon from stones of the ruined Nabatean city of Soada and of blocks of local black basalt.

FINANCE.

Receipts and Expenditure,
1943 (Balanced).

Syria.....	£36,680,500
Lebanon.....	£21,420,000

Currency: The monetary unit is the Syrian Paper Pound (£s) of 100 piastres (1 piastre=20 French centimes) exchangeable in Paris at the fixed rate of 20 Francs=1 Syrian pound: £1=8-83 Syrian pounds.

TRADE OF SYRIA AND THE LEBANON, 1943.

Syrian Paper Pounds.

Total imports.....	92,000,000

Financial Attaché, Hüseyin Kunter.
Consulate-General, 18 Cadogan Gardens, S.W.1.
Consul-General, N. S. Aksher.
Vice-Consul, A. Taluy.

The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turks of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only a small part of the area inhabited by the Turkish Race, the remainder being in Soviet Russia, China, Afghanistan and Persia. Under the Seljuks (Turkish rulers in Anatolia) the conquest of Asia Minor was completed in the 12th century. The Seljuks were succeeded, early in the 14th century, by the Osmanlı dynasty, which remained in power until the War of 1914-18.

During the 15th, 16th and 17th centuries the Ottoman Empire was one of the strongest Powers in the world, extending from the Caspian Sea to the Adriatic and Hungary, and from the Indian Ocean to Morocco and the Sudan. It comprised Asia Minor, part of Russia, the Ukraine, the Crimea, the Balkan States and the whole of Arabia. The Black Sea, the Mediterranean, the Red Sea and the Aegean were dominated by Turkish ships, and the Ottoman dominions included not only the Byzantine Empire, but the greater part of the whole Roman Empire.

For two centuries preceding the War of 1914-18 disintegration had reduced the power and extent of the Turkish Empire, and after that War its boundaries were still further restricted, Iraq, Syria and Arabia passing into other hands. Attempts to wrest further territory were defeated by Gazi Mustafa Kemal, who won a decisive battle over the Greeks at Afyon Karahisar. In August, 1944, Turkey severed diplomatic relations with Germany and on Feb. 23, 1945, declared war on Germany and Japan.

Turkey now extends over an area of 470,000 sq. miles, from Adrianople to Transcaucasia and Persia, and from the Black Sea to the Mediterranean, Syria and Iraq.

Turkey in Europe (9,256 sq. miles, population 1,065,132) consists of Eastern Thrace, including the cities of Istanbul (Constantinople) and Edirne (Adrianople), and is separated from Asia by the Bosphorus at Constantinople and by the Dardanelles (Gibralter) about 40 miles in length with a width varying from 2 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (285,246 sq. miles, population 1,065,132), comprises the whole of Asia Minor or Anatolia ("Land of the Rising Sun" or Orient), and extends from the Aegean Sea to the western

boundaries of Georgia, Soviet Armenia and Persia, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq. The former Turkish sanjak of Alexandretta (latterly known as the Republic of Hatay), was ceded by France on July 23, 1939, having formed part of Mandated Syria since 1922.

Population.—The fourth general census of population was held on Oct. 21, 1945. The results of the four counts are:—

Year.	Population.
Oct. 28, 1927	13,648,000
Oct. 20, 1925	16,150,000
Oct. 20, 1940	17,821,000
Oct. 21, 1945	19,000,000

At the census of 1940 there were 8,889,000 males and 8,932,000 females.

Government.—Sultan Mehmed VI., the last of the Osmanlı rulers, fled from Constantinople to Malta on Nov. 20, 1922, and the Sultanate was abolished by the National Assembly. On Oct. 29, 1923,* the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (since known as Kemal Atatürk) President. Kemal Atatürk, the maker of modern Turkey, died after a prolonged illness in Nov. 1938, and was succeeded by President İnönü. On March 3, 1924, the Assembly passed a law abolishing the office of Caliph and ordering all members of the Ottoman dynasty to leave Turkish territory. The Grand National Assembly (*Buyuk Millet Meclisi* or *Kamulay*) is a single-chamber legislature of 455 members (1943), elected for four years by universal adult suffrage, and delegates its executive power to ministers acting in its name and responsible to it for their actions.

Local Government.—Turkey is divided for administrative purposes into 62 *vilayet*, with sub-divisions into *kaza* and *mahıye*. Vilayet have each a governor (*vahid*) and elective council.

Religion and Education.—The majority of the inhabitants are Moslems. There are numerous Christians (of the Latin and Eastern rites) in Istanbul (Constantinople) and a considerable number of Jews. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. "Summer Time" was introduced from mid-April to mid-October in 1941. Education is compulsory, free, and secular. There are primary, intermediate, secondary and vocational schools. In 1939-40 there were over 9,000 primary schools, with about 905,000 pupils (including 300,000 girls). There are universities at Istanbul (founded 1900), with 7,000 students (1,600 women), and Ankara (founded 1934). The expenditure on public education in 1943-44 was £143,130,000.

Language and Literature.—Osmanlı or Ottoman Turkish is one of the Turanian languages spoken from Macedonia to Siberia. Until 1926 this language was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals as used throughout Europe. Mainly as a consequence of this change the percentage of Turks who can read and write rose from 22 per cent. in 1928 to 45 per cent. in 1934 and had further risen in the ten years to 1944. Ancient Turkish literature aped the Persian manner but the revolution of 1908 was followed by a popular reaction against the writings of the past (which appealed only to a small class) and led to

* TURKISH NATIONAL HOLIDAY.—Oct. 29 is observed throughout the Republic as a National Holiday.

the introduction of a native literature free from foreign influences and adapted to the understanding of the people. The vehicle first employed was the newspaper, printed in the neo-Latin alphabet with supplements for prose and dramatic fiction, poetry and literary criticism. There were (1910) about 30 daily newspapers, mainly in the Turkish language, some of them having editions in French, and numerous magazines devoted to feminine fashions or literary criticism.

Social Services.—The Turkish Minister of Health has prepared a 10-year plan providing, in the capital and chief provincial cities, at a cost of £T75,000,000 (£1,000,000) hospitals, sanatoria, maternity homes, *orphan* and mental hospitals.

Production.—Although the soil of Asia Minor is generally fertile, agriculture is still primitive in centres that are not served by railways. The peasant is, however, gradually adapting himself to the more modern methods, particularly in the vilayet of Aydin, Adana, and Mersin. Under a Land Reform Act (June 7, 1945) large tracts were distributed to peasants formerly landless or without sufficient land for subsistence. About 5,000,000 peasants, or one-third of the agricultural population, benefitted.

Live stock (1940): sheep, 26,250,000; goats, 11,500,000 (and Ankara goats, 5,500,000); oxen, 10,000,000; buffaloes, 950,000; camels, 110,000; horses, 900,000; mules, 70,000; donkeys, 1,500,000. Cereals are abundantly produced, as well as tobacco, raisins, figs, cotton, opium, beet-sugar, nuts, olives, valonea and liquorice root, and many varieties of fruit are grown. Samsun is the chief centre of the tobacco-growing industry, which is also of importance at Izmir (Smyrna), Ismir and Bursa (Brusa); the tobacco crop in 1942 was estimated at approximately 138,000,000 lb. Animal by-products (1942): wool 61,000,000 lb., mohair 15,000,000 lb. and other goat hair 13,500,000 lb.

Forests etc. The forests have now begun to be scientifically exploited: beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple are among the chief varieties of trees. The mulberry is planted for the silk-worm industry, which centres round Bursa and Ismir, and this industry, which declined after the war of 1914-18, has revived. The mineral wealth of Asia Minor is stated to be considerable and is being developed. Chrome ore, zinc, manganese, antimony, copper, borax, corundum (emery), coal and lignite, silver and arsenic, are among the minerals produced.

COMMUNICATIONS.

Turkish State Railways Administration.

(a) Lines transferred to the State by Conventions and Treaties:—

Line.	Kilometres.
Erzerum-Sarikamis (narrow gauge)	232
Sirakamis-Russian frontier (wide gauge) ..	123
Konya-Yenice (Bagdad) normal gauge ..	346
Adana-Fevzipasa (normal gauge)	142
Toprakale-Payas (normal gauge)	40
Fevzipasa-Meydanickbez (normal gauge) ..	35

Total 918

(b) Lines bought from Foreign Companies:—

Anatolian (normal gauge)	1,032
Mersin-Adana (normal gauge)	67
Mudanya-Bursa (narrow gauge)	41
Izmir-Kasaba (normal gauge)	703
Izmir-Aydin (normal gauge)	609
Oriental Railways (Thrace) (normal) ..	337

Total 2,789

(c) New railways bought from a Turkish Company—Samsun-Carjamba (narrow gauge)

37

(d) Newly constructed lines (all normal gauge):—

Line.	Kilometres.
Samsun-Kalin (Sivas)	380
Ankara-Kavirli-Sivas	602
Kutahya-Bahcesir	253
Fevzipasa-Elaziz-Diyarbakir ..	528
Irmak-Filyos	390
Bokaz Kupri. (Kavirli) (Cukuk'a)	172
Ayton-Kayakuvu and branch lines ..	152
Filyos-Zonguldak	26
Cetinkaya-Malatya	140

Total 3,015

Total 6,722

(e) Lines still exploited by Foreign Companies:—

Cobanbey - Mardin - Nusaybin (normal gauge)	407
Ilca-Palamutluk (narrow gauge)	29

Total 436

Grand Total 7,158

The total length in operation on Jan. 1, 1943, was 4,610 miles, of which 4,340 were state owned and worked. In 1940 full traffic was opened on the trunk line linking Iraq to the Turkish frontier and the Ministry of Public Works has commenced construction to reduce the Istanbul-Ankara route and to link Istanbul to the coal basin of Zonguldak and the blast furnaces of Karabuh. In 1943 a bridge to carry the Turco-Persian line across the Batman river was opened, but some 200 miles of line will have to be laid before the Persian frontier is reached.

The construction by British military forces of a railway 175 miles in length from Haifa (Palestine) to Tripoli (Syria) affords through traffic from Istanbul to Syria, Palestine and Egypt, and across the Suez Canal swing bridge to the Mediterranean coast lines as far as Tobruk in Libya.

There are electric trams in Istanbul and its suburbs and in Izmir.

Shipping.—The Turkish Merchant Navy had a total tonnage of 220,000 gross (300 vessels) in 1940. In 1938 96,988 vessels (23,804,509 gross tons) called at Turkish ports.

FINANCE.

Revenue (Budget)	£T901,500,000
Expenditure (Budget)	£T952,400,000
Debt (April 22, 1944):—	
Internal funded	£T265,000,000
Internal floating	819,000,000
External	396,000,000
Total	£T1,480,000,000

The Ottoman Public Debt, as repartitioned with the approval of the Grand National Assembly on Nov. 30, 1928, was administered by a Council, which met (in Peace Time) in Paris. On Oct. 22, 1940, the Turkish Government took over the liabilities of the Council and transferred its administration to the Ottoman Bank.

The Turkish Lira, or £T. (of 100 Piastres, each of 40 Paras) has a nominal value of 28s. In 1941 the official exchange rate in London was 500 Piastres=£1 sterling.

TRADE.

	1942.	1943.
Total imports . . .	£147,000,000	£203,000,000
Total exports . . .	165,000,000	257,000,000
Imports from U.K. (1942)	7,500,000	7,500,000
Exports to U.K. (1942)	8,000,000	8,000,000

The imports include mineral oils, coal, machinery, iron and steel manufactures, cotton piece-goods, paper and paper manufactures, tea, coffee and cocoa and chemicals; the exports include loaf tobacco, cotton, mohair, hazelnuts, olive oil, dried raisins, opium, wool, chrome and dried figs.

The principal imports from United Kingdom are machinery, iron and steel, aeroplanes, cottons and woollens; the principal exports to United Kingdom are nuts and figs, raisins, mohair and tobacco.

There are great possibilities of expansion of Anglo-Turkish trade when shipping is available and facilities at Alexandretta and Mersina are increased.

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asia Minor, about 200 miles E.S.E. of Istanbul, with a population (Census 1940) of 157,242. Ankara (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple (now in ruins), dedicated to Augustus, contains the *Monumentum (Marmor) Ancyranum*, inscribed with a record of the reign of Augustus Caesar. A new city is being laid out on modern lines, with parks, statues and avenues. ISTANBUL (Constantinople), the former capital was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire A.D. 364; population (Census of 1940) 800,980. Istanbul contains the celebrated Mosque of St. Sophia, since 1934 a museum of Byzantine and Turkish art. Other cities are Ψ Izmir (Smyrna) 184,362, Adana 89,990, Bursa (Brusa) 77,348, Eskiehir 60,614, Gaziantep 57,000, Konya 56,698, Kayseri (Caesarea) 53,908, Erzurum 48,000, Edirne (Adrianople) 45,188, Diarbekir (now Biarbekir) 43,264, Sivas 42,000, Ψ Samsun 36,917, Urfa 34,829, Ψ Trabzon (Trebizond) 33,000, Mansia 37,701, Ψ Mersine 30,000, and in Hatay, Antioch (on the Orontes) 30,000 and Ψ Iskenderun, formerly Alexandretta 15,000.

FLAG: Red, with white crescent and star.

Consul-General, Señor Don Arturo Prats, 55 Har-

lington Gdns., S.W.7. [Ken. 7268].

Consul, Señor Don Antonio Lacarte.

The smallest Republic in South America, on the

east coast of the Rio de la Plata, situate in lat.

30°-35° S. and long. 53° 25'-57° 42' W., con-

taining an area of 72,180 square miles, and a

population on Jan. 1, 1941, of 2,185,626. In

1942 there were 42,670 births (19.4 per 1,000 inhabitants), 20,646 deaths (9.4 per 1,000) and 15,827 marriages (7.2 per 1,000). Infant mortality was 93 per 1,000 live births in 1942.

Uruguay resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 200 years later the Portuguese settlements were captured by the Spaniards. From 1726-1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. On Aug. 25, 1825, through the heroism of the 33 liberators (whose memory is perpetuated in the name of the province of *Trenta y Tres*), the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

Under the Constitution approved by the Constituent Assembly on May 18, 1934, the President is elected by the legislature for a term of 4 years, and is eligible for re-election for 4 years. The executive power is discharged by the President, assisted by a Council of Ministers, over which he presides. The Council of Ministers is composed of 9 members chosen from the two political parties which have obtained the highest number of votes in presidential elections, the majority party being represented by 5 (or 6) members. The Legislature consists of a Chamber of 99 Deputies and of a Senate of 30 members, elected for 4 years by all adult male and female citizens who can read and write.

On Feb. 27, 1942, President Baldomir dissolved the Chamber of Deputies and the Senate, and on Feb. 22 he created a State Council of 28 members to replace Parliament until the election of a new legislature, the election being postponed to November, 1942.

The Republic is divided into 19 Departments, each with a Chief of Police and a Mayor. The most important cities of the interior are Salto and Paysandu, both situated on the River Uruguay, which forms the main line of division from Argentina.

The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which crosses the Brazilian boundary and extends southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Río Negro* (with its tributary the *Yí*), flowing from north-east to south-west into the *Río de la Plata*. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the *Negro* is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Quequay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merim. The climate is extraordinarily healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but very cold spells, characterised by icy winds from the South Polar regions, are experienced in June, July and August.

Wheat, barley, and maize are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of cattle and sheep, the wool of which is of excellent quality. The livestock (at the 1937 census) included 8,297,000 cattle

and 18,000,000 sheep. In addition to the meat exporting industry, textiles and wine and beer are of importance.

Gold mines exist at Cunapiru, but recent exploitation both of gold and of iron ore deposits has not proved successful commercially. There are 1,874 miles of railway open (1939), of which 1,490 miles are in British hands, and three short lines owned by the State; 45 kilometres of the State line from San Carlos to Garzón have been opened and 73 kilometres from San Carlos to Rocha are now open to traffic; and (in 1939) 7,508 miles of telegraph, with 48,375 miles of telephones. There were 995 post-offices, dealing with 136,053,700 letters and packets.

Education and Social Services.—Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, with about 200,000 pupils in 1,600 state schools and technical and trade schools, and evening courses for adult education. The University at Montevideo (founded in 1849) had about 20,000 students in 1943.

Language and Literature.—Spanish is the language of the republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in public libraries. Over one-third of the nation live in the capital and more than half the daily newspapers are published there.

FINANCE.

1944.

Revenue (Budget).....	\$136,900,000
Expenditure (Do.).....	136,900,000

State Control, Lev Zakharovich Mekhlis.
Health Protection, Georgii Andreyevich Miterev.
Machine Tool Industry, A. I. Efremov.
Chairman, State Planning Commission, N. M. Voznessensky.
Chairman, State Bank of the U.S.S.R., J. I. Golev.
Chairman, Committee for Art, M. B. Khrapchenko.
Chairman, Higher Education, S. B. Kaftanov.

THE PRESIDUM OF THE SUPREME SOVIET OF THE U.S.S.R.

The Kremlin, Moscow.

Chairman, Mikhail Ivanovich Kalinin.
Vice-Chairmen, Nikolai Mikhailovich Shvernuk, Demyan Sergeyevich Korotchenko, Nikifor Yakovlevich Natulevich, Mir Bashir Fadakh Ogly Kassumov, Filipp Yersevich Makharadze, Matsak Petrovich Papyan, Khivai Babayev, Yuldas Akkumabayev, Munavar Shagadayev, Abdismet Kazakpayev, Otto Vilgelmovich Kuusinen, Fedor Grigoryevich Brovko, Justas Ignovich Paleckis, August Martynovich Kirchenstein, Johannes Yakovich Vares.
Secretary, Alexandr Fedorovich Gorkin.
Members, Mir Djafar Bagirov, Semen Mikhailovich Budenny, Galei Afzaletdinovich Dinmukhmetov, Andrei Alexandrovich Zhdanov, Rakhim Kireyevich Ibragimov, Yulii Moiseyevich Kaganovich, Georgii Maximilianovich Malenkov, Petr Georgiyevich Moskatov, Panteleimon Kondratyevich Ponomarenko, Ivan Ivanovich Sidorov, Marshal Joseph Vyssarionovich Stalin, Adil Girei Takhirarov, Nikita Sergeyevich Khrushchev, Matvei Fedorovich Shkiryatov, Usman Yussupov.

THE SUPREME COURT OF THE U.S.S.R.

Pushkinskaya, 15A, Moscow.
Prosecutor of the U.S.S.R., Konstantin Petrovich Gorshenin.
Chairman of the Supreme Court of the U.S.S.R., Ivan Terentyevich Golyakov.
Vice-Chairmen of the Supreme Court, Iona Timofeyevich Nikitchenko, Andrei Petrovich Soldilov, Vassili Vassilyevich Uliikh.
Chairmen of the Judicial Collegium, Anna Alexandrovna Romanova, Nikolai Alexandrovich Naumov, Petr Alexeyevich Kameron, Vassili Vassilyevich Uliikh, Petr Nikitchenko.

EMBASSY OF THE U.S.S.R. IN LONDON.

23, Kensington Palace Gardens, W.8.
Ambassador in London, His Excellency Monsieur Fedor Tarasovitch Goussev (Oct. 15, 1943).

Counsellors, M. Constantine Koukin; M. Georgii Saksin; M. Alexei Roshin; M. Nikolai Ivanov.
 1st Secretaries, M. Boris Karavaev; M. Alexandr Stetsenko; M. Constantine Kudrov; M. Sergei Koudryavtsev; M. Nikolai Kaktimov.

2nd Secretaries, M. Dmitri Doroshenko; M. Nikolai Abramkin; M. Yuri Milovzorov; M. Mikhail Cherkasov.

3rd Secretaries, M. Boris Krotov; M. Vladimir Barkovsky.

Attaches, M. Sergei Nekrasov; M. Georgii Sinitzin; M. Mikhail Orchinikov; M. Pavel Erzin; M. Mikhail Svirin; M. Mikhail Shskin; M. Oleg Troyanovsky.

Head of Soviet Military Mission, Maj.-Gen. of the Air Force Andrei Sharapov (*acting*).

Naval Attaché, Commodore Vassili Yakovlev.

Military and Air Attache, Maj.-Gen. Ivan Skilarov.

Deputy Head of Soviet Military Mission, Eng. Rear-Adm. Alexandr Brykin.

Asst. Mil. Attaches, Lt.-Col. Ivan Kozlov; Engineer Major Timofei Samarin (*Air Force*).

Asst. Naval Attaché, Lt.-Col. Pavel Meshchaninov (*Air Force*).

Trade Representative (32 West Hill, Highgate, N.6.—Mount View 1907), M. Dmitri Borisenko.

Deputy Trade Representatives, M. Pavel Solov'yev; M. Ivan Kochurov.

The Union of Soviet Socialist Republics.—On March 12, 1917, following a revolution in Russia (March 12, 1917), Nicolas II, Tsar of All the Russias, abdicated the throne. A Republic was declared, and on November 7, 1917, a military revolutionary committee seized control and transferred the government authority to the All Russia Congress of Soviets. The federal system was adopted by the 10th All-Russian Congress of Soviets on Dec. 31, 1922, the Federation consisting of 11 States, five others having since been admitted to the Union. On February 4, 1922, Great Britain recognised the government of the U.S.S.R. Prior to the War of 1914-18 the Russian Empire of the Tsar Nicholas II covered more than 8,500,000 square miles, with a population of about 183,000,000.

The Soviet Union covers the greater part of the area of the former Russian Empire, from which the independent states of Finland, Poland, Estonia, Latvia and Lithuania were formed. The greater part of the remaining territory formed the Russian Socialist Federal Soviet Republic (R.S.F.S.R.), which is in union with other Soviet Republics in Russian territory to form the Soviet Union.

In May, 1937, it was announced that the U.S.S.R. had annexed certain uninhabited regions round the North Pole, with effective occupation of Prince Rudolph Land.

In Sept., 1939, Soviet forces invaded Poland, which had already been overrun by German troops, and by the Treaty of Brest-Litovsk (Sept. 21, 1939) the Governments of Germany and U.S.S.R. divided Poland as to five-eighths of territory and half the population to U.S.S.R., the remainder to Germany (*see* Poland).

On Dec. 1, 1939, Soviet forces invaded Finland, and after initial reverses, imposed terms in a treaty signed March 15, 1940, the ceded territory forming the Karelo-Finnish State, admitted to the Union in 1940 (*see* Finland). On June 23-26, 1940, Soviet forces occupied the Baltic States of Estonia, Latvia and Lithuania, which joined the Union in 1940.

On June 27, 1940, an ultimatum to Roumania caused the cession of Bessarabia and Northern Bukovina, which form the Moldavian State, admitted to the Union in 1940.

On June 22, 1941, Germany invaded U.S.S.R. and the governments of the British Empire and

Allied countries undertook to assist the U.S.S.R. to the utmost of their ability.

On May 26, 1942, Gt. Britain and U.S.S.R. concluded a treaty confirming the alliance during the war against Germany and her associates in Europe; providing for mutual assistance after the war against any further attack by Germany or her associates; and providing for collaboration with one another and with the other United Nations in the peace settlement, and during the period of reconstruction, on the basis of the principles set out in the Atlantic Charter.

AREA AND POPULATION.

The final boundaries of U.S.S.R. in Europe will be determined by agreement with the other members of the United Nations, but certain changes have already taken place. As foreshadowed at the Tehran Conference (Nov. 28-Dec. 1, 1943), the Western boundary extends (1945) to the Curzon Line, the proposed eastern boundary of 1918 Poland, and takes in the north-eastern part of East Prussia, including the capital and seaport of Königsberg; and in the south crosses the Carpathians to include Ruthenia, ceded by Czechoslovakia in 1945. After the surrender of Japan the whole island of Sakhalin was occupied by U.S.S.R.

Area (1942) and estimated population (Jan. 1, 1939) of the constituent Republics of the Soviet Union:—

Republic.	Sq. miles.	Population
I. R.S.F.S.R.		
(Moscow)	6,372,860	109,280,000
From Poland	77,700	13,000,000
II. Ukraine (Kiev)	170,770	30,960,000
III. Belorussia (Minsk)	49,000	5,570,000
IV. Armenia (Erivan) ..	11,580	1,282,000
V. Azerbaijan (Baku) ..	33,200	3,210,000
VI. Georgia (Tiflis)	27,000	3,540,000
VII. Turkmenistan		
(Poltorsk)	171,400	1,250,000
VIII. Uzbekistan		
(Tashkent)	146,000	6,300,000
IX. Tajikistan		
(Stalinabad)	56,000	1,500,000
X. Kazakhstan (Alma Ata)	1,048,000	6,000,000
XI. Kirgizistan (Frunze) ..	76,000	1,500,000
XII. Karelo-Finnish		
(Viipuri)	16,000	470,000
XIII. Moldavia (Kishinev) ..	20,000	3,500,000
XIV. Lithuania (Kovno) ..	23,000	3,000,000
XV. Latvia (Riga) ..	20,000	2,000,000
XVI. Estonia (Tallinn) ..	18,000	1,150,000
	8,336,510	193,710,000

The rural population forms 80 per cent. of the whole.

According to the census returns (Jan. 1, 1939) the population of U.S.S.R. was 170,467,185 (exclusive of Eastern Poland, parts of Finland and Roumania and the Baltic States—Estonia, Latvia and Lithuania) as compared with 123,651,000 in 1923. At the census of 1923 there were 81,665,000 males and 88,802,000 females. The 1928 returns included 29,498 persons over 100 years of age (12,340 men, 17,158 women).

GOVERNMENT.

The Union of Soviet Socialist Republics is governed by the Supreme Council of the U.S.S.R., elected by universal adult direct and secret suffrage and divided according to the Constitution adopted Nov. 25, 1936, into two Chambers—The Council of the Union, consisting of 569 members, in proportion

to the population of the various Republics of the Union, and *The Council of Nationalities*, consisting of 574 members, elected in equal numbers by the Federal Republics, the Autonomous Republics, and the Autonomous Regions respectively.

The Council of Labour and Defence (*Soviet Trudovoi Oborony*, or *S.T.O.*) is attached and subordinate to the *Sovnarkom*, and in addition to a general direction of commissariats in their economic and military activity, has the power to ratify statutes of joint-stock companies and trusts.

The Supreme Court of the Union is attached to the Central Executive Committee, and has power and jurisdiction (1) to promulgate authoritative opinions on questions concerning general Federal legislation to the constituent republics, (2) to adjudicate controversies between the constituent republics, (3) to try charges against high officials of the Union for offences committed in the discharge of their duties.

To the Council of People's Commissars of the Union (*Sovnarkom*) there was formerly attached a Joint State Political Department, originally known as the *Cheka*, and from 1922 to 1935 as the *O.G.P.U.* (*Obyedinnonnoye Gosudarstvennoye Politicheskoye Upravleniye*). The police functions of this Department have since been handed over to the People's Commissariat of the Interior and its judicial functions to the ordinary courts.

The Comintern.—The Third Communist International, or *Comintern*, was founded at Moscow in March, 1919. It was formally dissolved June 10, 1943.

Foreign Relations.—Each of the 16 constituent Republics has the right, accorded by the Supreme Soviet of the Union on Feb. 1, 1944, to enter into direct relations with foreign states, conclude agreements with them and exchange diplomatic and consular representatives with them.

Local Government.—The villages in Imperial Russia had assemblies (*skhod*) under the presidency of a mayor (*starosta*); they were grouped into "volosts," the latter into districts (*uyezd*), and these into governments (*guberniya*). The districts and governments had their elective councils (*zemstvos*) for the administration of local affairs. Combined with this system of village communities was a highly organised system of co-operative trading, the population being grouped into voluntary local associations usually corresponding with local government areas. The produce of the soil was exchanged for manufactures obtained by the society and distributed at the co-operative shops. Municipalities were also administered by elective councils (*dumas*) under the presidency of a mayor (*golova*); but in many cases the local authority of such municipalities and local land councils (*zemstvos*) was overshadowed by the superior authority of the bureaucratic governor.

Under the Constitution of the U.S.S.R. villages, districts, regions, autonomous and Union Republics all elect Councils (*Soviets*) by direct vote of the people. Each of the Union Republics has within its territories its own Supreme Council (consisting of one chamber only) with its own Presidium and its own Council of Commissars.

Religion.—Article 124 of the Stalin Constitution ordains that in order to ensure to citizens freedom of conscience the Church in the U.S.S.R. is separated from the State and the school from the Church. Freedom of religious worship and freedom of anti-religious propaganda is recognised for all citizens. This Article does not forbid the exercise of religion, and churches have remained open in virtue of contracts concluded between the congregations and the local authorities. The

clergy live on voluntary donations from their parishioners. On Aug. 23, 1941, there were 8,338 churches, mosques and synagogues in the U.S.S.R.

In September, 1943, Marshal Stalin agreed to the appointment of a Patriarch and Holy Synod for the Orthodox Church in Russia.

Education.—Under the Constitution of Dec. 5, 1936, Elementary Education throughout the U.S.S.R. is secular, compulsory and free, certain classes of private schools being also permitted. Compulsory education is from the age of 7 years. Facilities for University Education are freely provided and the high illiteracy figure of Imperial Russia has already been reduced below 10 per cent. for males above the age of 9 years, and below 25 per cent. for females of similar age.

State education is administered by a commissar, in whose charge have been placed all educational institutions, theatres, museums, and galleries. Beyond this, the State has monopolised the photo-cinematographic industry and the publishing of manuals for schools of all types; and as the Government possesses almost all the printing houses, it practically controls the printing and publishing trades. The education of the workers in the towns is facilitated by lectures and school teaching. In 1941 there were stated to be 36,200,000 pupils in the primary and secondary schools as compared with 8,000,000 in 1914; the number of students attending higher educational centres was about 1,000,000 in 1942, compared with 112,000 in 1914; there are two universities in Moscow and 21 in other large centres, conservatoires of music, colleges of art, dramatic schools and scientific and research institutes.

Language and Literature.—Russian is a branch of the Slavonic family of languages which is divided into the following groups:—*Eastern*, including Russian, Ukrainian and White Russian; *Western*, including Polish (with Kashubish and Masurian), Czech (Bohemian), Slovak and Sorbish (or Lusatian Wendish); and *Southern*, including Serbo-Croatian, Slovenish and Bulgarian. The Western group is written in the Latin alphabet, the others in the Cyrillic, said to have been instituted by St. Cyril in ninth century, and bearing a close resemblance to ancient Greek. Russian, Polish and Czech literature is richer than that of other Slavonic countries. Poetry, especially old ballads, dramatic works in prose and verse, prose chronicles and (after the foundation of the Academy of St. Petersburg by Peter the Great) a national comedy. Romantic poetry reached its zenith with Alexander Pushkin (1799–1837); realistic fiction is associated in its first period with the names of Gogol (1809–1852), Turgenyev (1818–1883), Dostoevsky (1821–1882) and Leo Tolstoy (1828–1910) and later with Tchekhov (1860–1904), Gorky (1868–1936), Kuprin (1870–1938), Ivan Bunin (b. 1870), Nobel Prize-winner for Literature in 1933, and Andreyev (1871–1919). In art and science there are many famous names and in music the St. Petersburg group of five (Cui, Balakirev, Borodin, Mussorgsky and Rimsky-Korsakov), the Moscow pair (Rubinstein and Tchaikovsky), and the independents (Rachmaninov, Scriabin and Stravinsky).

There are about 9,000 newspapers published in the U.S.S.R. The first foreign newspaper to appear in the country since 1917 was issued in Kuibyshev, Moscow and other cities on Aug. 15, 1942, under the title *Britanski Soyuznik* (The British Ally). There were 245,000 public libraries in 1941, containing 1,500,000,000 volumes, and 144,000 travelling libraries for rural districts,

which delivered 30,000,000 books (and magazines) to their readers. Over 44,000 books were published (in more than 100 languages) in 1940. The jubilee of the Academy of Sciences of the U.S.S.R. was celebrated in the Bolshoi Theatre, Moscow, on June 17, 1945.

On Feb. 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar, and by a decree dated June 16, 1930, the Soviet Union advanced all the clocks in the Union by one hour, thus adopting permanent Summer Time.

The Russian Rouble (of 100 *Kopeks*) has a nominal value 2s. 1½d. (9·46 = £1) 10 Roubles = 1 *Tchervonetz*. In 1939 the exchange in London was 25·8 to 24·87 Roubles = £1 sterling.

Debt.—The outstanding Foreign Debt of Russia was repudiated by the U.S.S.R. by decree of Jan. 28, 1918.

Since the revolution various loans have been raised, and these were stated to amount on Jan. 1, 1934, to Roubles 13,955,000,000; the service of the U.S.S.R. debt appeared at Roubles 2,579,000,000 in the 1937 accounts for Sinking Fund and Interest.

War loans have been raised internally, with redemption dated within 20 years by means of lotteries.

On Nov. 6, 1941, it was announced in Washington that a loan of \$1,000,000,000 (£250,000,000), to be repaid in 10 years (commencing 5 years after the conclusion of the present war), had been made by U.S.A. to U.S.S.R. under the Lend-Lease Act.

DEFENCE.

Defence.—The military law announced Feb. 1, 1944, gives the supreme government of the Union full jurisdiction in the organisation of the defence of U.S.S.R., the direction of all the armed forces of U.S.S.R., and the establishment of the directing principles of military formations in the U.S.S.R. Each of the Union Republics has its republican military formations. No returns concerning the Fighting Services have been made to the League of Nations for some years. On a war footing all fit males of 18 to 40 years are liable to serve. The annual intake in peace time exceeds 1,250,000.

The Red Air Fleet was stated to comprise an organisation of 4,000 aeroplanes in 1939. The Red Navy is believed to consist of 4 battleships, 7 cruisers, 35 destroyers, 170 submarines, and 150 minor craft.

After the German invasion of the U.S.S.R. (June 22, 1941), the governments of the British Empire and Allied countries undertook to assist the U.S.S.R. on land and sea and in the air to the utmost of their ability. The President of the United States of America also offered wholehearted support, and at a Conference in Moscow (Sept. 30, 1941), Lord Beaverbrook, on behalf of the British Mission, and Mr. Averell Harriman, on behalf of the American Mission, assured Mr. Stalin that every effort would be made to supply the fighting forces of the U.S.S.R. with tanks, guns, munitions, petrol, and aeroplanes, and all their other needs for the prosecution of the war, to the utmost ability of their respective countries.

The Soviet Forces bore the brunt of resistance to Germany from June, 1941, until the Allied Expeditionary Force landed in North Africa in November, 1942. German attacks, aimed at the capture of Moscow and Leningrad before the winter of 1941-42, were successfully resisted and the German "Spring Offensive" of 1942 was met with heroic determination. The "Defence of Stalingrad" (Aug.-Nov., 1942) will rank in military history among the "Decisive Battles of the World." A sword of honour, with blade of the hardest tempered steel, was presented to Stalingrad in 1943. It bears the following inscription:—

"To the steel-hearted citizens of Stalingrad, the gift of King George VI, in token of the homage of the British people."

During the celebration of the 26th Anniversary of the U.S.S.R. (Nov. 7, 1943) Marshal Stalin was able to announce that Soviet forces were driving for the Polish and Bessarabian frontiers, after the recapture of Kiev, "the greatest triumph of the summer and autumn offensive," which had cost the Germans 4,000,000 men (including 1,800,000 killed), 25,000 tanks and 40,000 guns.

The triumphal progress of Soviet and Allied Armies resulted in the unconditional surrender of Germany on May 8, 1945. Berlin had previously (May 2) capitulated to Marshal Zuhov and is now occupied by Soviet, British, American and French armed forces. A Three Power Conference was inaugurated at Potsdam on July 16, 1945, Marshal Stalin representing U.S.S.R., President Truman the U.S.A. and Mr. Churchill (with Mr. Attlee) representing Great Britain.

PRODUCTION.

Agriculture.—Agriculture and stock raising are the principal industries and employ over 75 per cent. of the population. All kinds of cereals and non-tropical fruits are produced.

The Live Stock in 1938 included 63,200,000 cattle, 17,500,000 horses, 102,500,000 sheep and goats and 30,600,000 swine.

Under a credit arrangement with the Dominion of Canada, signed in London (Sept. 8, 1942), the U.S.S.R. was enabled to draw approximately 9,000,000 bushels of hard spring wheat or equivalent measures of flour from Canada during the ensuing harvest. Mr. Malysky explained that the U.S.S.R. was not a wheat importer before the war, but the overrunning of the Kuban had altered the position.

Industries.—The natural resources of Russia in coal, iron ores, copper, manganese, gold, platinum, timber, naphtha, and so on, are enormous. These resources have been developed since 1928 under Five Year Plans designed to increase the industrial and agricultural production of the U.S.S.R. so that it might overtake and outstrip all other nations. For this purpose the territory was equipped with factories, railroads, steamships,

telegraphs, motor vehicles and tractors. The land was to be made to produce food, houses were to be built, and opportunities for recreation provided, so that the population might have these amenities in the greatest abundance. The principal industries undergoing development up to the outbreak of the war were *asbestos* (at Azbest), *steel* (at Magnitogorsk), *manganese* (at Chiatui), *timber* (at Chelabinsk, Stalingrad and Kharkoff), *wheat* (at Gigant and Verblud), *petroleum* and *crude oil* (at Baku), and *tea and oranges* (at Chakwa). Many of the factories were provided with electric energy from the Dneprostrov dam, which was sacrificed during the German advance in 1941 and re-captured in 1943.

The output of crude petroleum in 1941 was 238,100,000 barrels (42 gallon); (1942) 227,500,000 barrels; and (1943) 200,700,000 barrels. On Jan. 1, 1939, there were nearly 3,000 miles of oil pipe line, the principal lines being—Baku-Batum 1,200 miles; Gurev-Orsk 540; Grozny-Taupse 400; Armevir-Trudovaya 320.

TRADE.

External Trade.—The external trade of the U.S.S.R. is organised as a State Monopoly. The value (Merchandise only) is stated as under, in new roubles:

Year.	Imports.	Exports.
1934.....	1,018,000,000	1,832,400,000
1935.....	1,057,200,000	1,609,300,000
1936.....	1,352,500,000	1,359,100,000
1937.....	1,341,300,000	1,728,600,000
1938.....	1,423,300,000	1,332,000,000

The Foreign Trade of U.S.S.R. was principally with the following Countries in 1938:—

Country	To U.S.S.R.	From U.S.S.R.
Australia.....	R.51,000,000	R.100,000,000
Belgium.....	64,300,000	117,000,000
Canada.....	31,000,000	1,600,000
China.....	68,500,000	44,150,000
Mongolia.....	40,000,000	70,000,000
Czechoslovakia.....	19,500,000	13,250,000
Denmark.....	6,150,000	27,400,000
France.....	39,500,000	60,000,000
Germany.....	67,000,000	88,000,000
Gr. Britain.....	240,000,000	375,000,000
Iran.....	64,000,000	58,000,000
Japan.....	17,600,000	7,000,000
Netherlands.....	102,600,000	93,000,000
Norway.....	10,000,000	22,000,000
Spain.....	26,500,000	52,500,000
Sweden.....	27,500,000	13,500,000
Switzerland.....	12,000,000	12,200,000
Turkey.....	23,000,000	23,000,000
U.S.A.....	406,000,000	100,000,000

The principal imports in 1938 were machinery and industrial equipment, iron and steel, wool, electrical goods, rubber, ships and machinery, live animals, cotton, chemicals and machine tools. The principal exports in 1938 were wheat and other grain, lumber, furs, petroleum, sugar, fertilizers and pulpwood.

The imports from U.K. were principally machinery, iron and steel and electrical goods. The chief exports from the U.S.S.R. to U.K. were sawn timber and pit props, hides and skins, wheat, fish, petroleum and barley.

COMMUNICATIONS.

Railways.—Length of railroads in use:

Miles.	Years.	Miles.
46,255	1935.....	53,187
47,022	1940.....	59,375

By Dec. 31, 1940, about 1,150 miles had been electrified.

The principal railway lines are the main European network from Leningrad, through Moscow to Astrakhan and across the Urals via Perm, Ufa, Samara and Saratov with northern extensions to the Kola Peninsula and to Archangel and running southwards to the Baltic, the Crimea and the Caucasus; the *Trans-Siberian Line* from Chelyabinsk, on the Ural frontier, to Omsk, and round Lake Baikal to Chita and Stryetensk. From Chita the line crosses the Manchurian frontier (as the Eastern China Railway) to Harbin and Vladivostok, where a northward extension runs to Khabarovsk. The *Amur Railway* connects Stryetensk with Khabarovsk, and the Trans-Siberian line thus connects the western and eastern limits of Russia on Russian territory. The *Trans-Caspian Railway* runs from Krasnovodsk (opposite Baku) to Askabad, Merv, Bokhara, Samarkand, Khokand and Andijan, with a 200-mile branch from Merv to Kushk (near Herat) on the Afghanistan border. The *Orenburg-Tashkent Line*, from the European boundary, across the Kirghiz Steppe to Kazalinsk, Perovsk and Tashkent, whence a short line connects with the Trans-Caspian system. The *Trans-Caucasian Line* runs through Georgia, Azerbaijan and Armenia, from Batum and Poti, on the Black Sea, via Tiflis, to Baku, on the Caspian, where it is met by the European system of Rostov on the Don. From Tiflis branches run to Kars, and via Erivan to Mount Ararat on the Armenian frontier, and to the Persian frontier at Julfa. There were in the Soviet Union (1927) 228,600 miles of inland waterways, of which 54,500 are navigable by steam vessels, and nearly 110,000 miles by rafts. The principal seaports are Leningrad and Kronstadt on the Gulf of Finland, Odessa, Nikolaielf, Batum, Taganrog, Rostov, Kertch, Sevastopol and Novorossisk (Black Sea and Sea of Azov), Astrakhan and Baku (Caspian), Archangel on the White Sea, and Ekaterininsk on the Kola River (Murmansk), Vladivostok (Sea of Japan), and Petropaulovsk in Kamchatka. Under the *Four Sea Ship Canal System* Moscow will be linked up with the Baltic, White, Black and Caspian Seas; in 1933 the Stalin Canal linked Leningrad with the White Sea, and in 1937 the Volga Moscow Ship Canal made Moscow accessible from the White and Baltic Seas. The Volga Don Canal, commenced in 1938, will complete the system and connect with the Black and Caspian Seas.

The Black Sea (*Pontus Euxinus*) lies between the S.W. States of U.S.S.R., Roumania, Bulgaria and Asia Minor. It is connected via the Dardanelles, with the Mediterranean.

Merchant Navy.—There were 560 steamships of 960,261 gross tons, and 139 motor vessels of 345,698 gross tons, flying the flag of the U.S.S.R. in July, 1939.

Posts and Telegraphs.—In 1935 the post offices handled about 1,600,000,000 letters and post-cards; the length of telegraph (and telephone) lines was stated at 826,500 miles.

CAPITAL OF U.S.S.R., MOSCOW (see p. 973). For other cities see following articles.

FLAG OF THE U.S.S.R.—Red, with star above hammer and sickle.

[Ivan the Great, A.D. 1462–1505, upon adopting the title of Tsar (Cesar), added the two headed eagle of the Holy Roman Empire to the escutcheon of Muscovy, which was abandoned after the abdication of Nicolas II in 1917.]

NATIONAL DAY OF U.S.S.R.—November 7.

BRITISH EMBASSY.

(Sofitskaya Naberezhnaya 14, Moscow.)

British Ambassador, His Excellency Rt. Hon. Sir Archibald John Kerr Clark-Kerr, G.C.M.G. (1942)..... £6,650
 Counsellor (with local rank of Minister), F. K. Roberts (acting).
 1st Secretaries, P. M. Crosthwaite; S. L. Burdett, M.C.
 2nd Secretaries, J. H. Watson; E. E. Tomkins; G. W. Berry (local rank).
 3rd Secretary, T. Brimlow.
 Commercial Secretary (with local rank of 1st S.C.) C. H. V. Gifford.
 Military Attaché, Col. E. R. Greer.
 Air Attaché, Group Capt. D. N. Roberts, O.B.E., A.I.C., P.I.F.
 Press Attaché, J. W. Lawrence, O.B.E.
 Archivist, Miss H. M. Bird, M.B.E.
 Accountant, W. Heir.
 Clerical Officer, C. G. F. James, M.B.E.
 Translator (with local rank of 2nd Sec.), A. H. Birse, C.B.E.

I. R. S.F.S.R.

Rossiiskaya Sotsialisticheskaya Federativnaya Sovetskaya Respublika—The Russian Socialist Federal Soviet Republic.

The R.S.F.S.R., the largest and most important of the Republics, occupying 92.7 per cent. of the total area of the Union, is a federation of Autonomous Republics and Autonomous Provinces. *Autonomous Republics*: Bashkir, Tartar, Mountain, Daghestan, Crimea, Yakut, Karelia, Buriat-Mongol and Volga Germans. *Autonomous Provinces*: Chuvash, Kalmyck, Mari, Votjak, Zyrian (Komi), Qirad, Kabardin-Balkarsk, Karachai-Circassian, Adighe-Circassian, Chetchen. From the economic point of view this vast territory is usually divided into "Black Soil" and "Other Zones," the *Black Soil Zone* being subdivided into (1) Central Agricultural Region, (2) Middle Volga Region, (3) Lower Volga Region, (4) Northern Caucasus, (5) Siberia, (6) Crimea; while the *Other Zones* are (1) Western Region, (2) North-Western Region, (3) Central Industrial Region, (4) North-Eastern Region, (5) Basins of the rivers Viatka and Votuga, (6) Ural.

The R.S.F.S.R. occupies over three-quarters of the total area of the U.S.S.R. and contains more than half its population. In addition to the mainland area in Europe and Asia it includes islands in the Gulf of Bothnia, the Baltic and Barents Seas, in the Arctic Ocean and in the Sea of Okhotsk.

The European territory consist largely of a vast plain, the eastern Lowland of Europe between the Ural Mountains and the Caucasus of the East and South and the Carpathians of the south-west. The Ural Mountains culminate in Tolpiss (5,400 feet), but the Caucasus reach to 18,526 feet in Mount Elburz and 26,546 feet in Mount Kazbek. The Asiatic territory includes the vast plain of Siberia, with mountain ranges on its eastern and southern border; its northern border is covered by *tundra*, the subsoil being permanently frozen and a few inches thawing in summer to form extensive marshes.

The principal rivers in the European territory are the Volga (2,400 miles), Don, Dnieper (1,200 miles), Bug and Dniester, Vistula, Niemen and Duna, Neva, Onega, Dvina and Mezen, and the Pechora; in Asiatic territory are the Ob (2,700 miles), Yenisei (3,400 miles), Lena (3,000 miles) and Amur.

The climate of European Russia is typical of the most extreme Continental conditions, Moscow

having a winter temperature of 12° F., while the summer temperature of the eastern portion is above 68° F. In Asiatic Russia the extremes are even greater. At Verkhoyansk, in North-Eastern Siberia, the mean January temperature is -49° F. (81 degrees of frost) and the mean July temperature 70° F., a range of nearly 120 degrees. Verkhoyansk is in the *tundra* region of the Arctic coastlands and the soil there has been found to be permanently frozen to a depth of nearly 400 feet, although the mean summer temperature is higher than that of Paris. The principal industry is agriculture and stock raising, which engages nearly 30 per cent. of the inhabitants. Rye, wheat, oats, barley, millet, maize, buckwheat, beans, peas and lentils are abundantly grown, together with flax for the peasant industries. Agricultural methods have been very greatly improved under the Soviet regime. Manufacturing establishments have also been increased and modernised and the output encouraged to keep pace with the standard of the Five Year Plans.

The R.S.F.S.R. contains great mineral riches, including platinum, gold and silver, iron of very superior quality, quick-silver and lead. Among the non-metallic minerals are petroleum, in apparently inexhaustible quantity, coal, asbestos, rock-salt, marble and kaolin. The oilfields in the Urals provided a welcome reserve after the temporary loss of Baku; and the Kuznetsk coal basin, in Western Siberia, served a similar end between the loss and recovery of the Donetz basin. To assist the manufacturing and mining industries vast hydro-electric plants have been erected, some of which were sacrificed to deny their use to the invaders in the war of 1939-45.

Near Kazan, and below the confluence of the Kama with the Volga, are the remains of the Moslem town of Bolgary, which was destroyed by the Mongols in the XIVth Century. Bolgary was the most northerly outpost of Islam.

There are Universities at Moscow (2), Leningrad, Rostov, Saratov, Tomsk, Gorki, Kazan, Perm, Voronezh and Sverdlovsk.

CAPITAL, Moscow. Population (1939) 4,137,018. Moscow, founded about A.D. 1247 by Dolgorouki, became the capital of Russia in 1240 and the seat of the Metropolitan bishop in 1325. In 1703 Peter the Great transferred the capital to St. Petersburg (Leningrad), but on March 14, 1918, Moscow was again designated as the capital. The Palace of Soviets, under erection in Moscow, will be the highest building in the world, rising to 1,365 feet, including a stainless steel statue of Lenin 325 feet in height. On October, 1941, part of the administration was temporarily removed to Kuibyshev, the triumphal advance of Soviet armies in 1943 causing a return to Moscow. (Leningrad (before the revolution "St. Petersburg," and from 1917-24 "Petrograd") had a population (1939) of 3,191,304.

Other cities with populations exceeding 100,000 are:—

Gorki, formerly Nijni Novgorod	650,000
St. Rostov on Don	510,000
Stalingrad	450,000
Kuibyshev, formerly Samara	400,000
Kazan	400,000
Sverdlovsk	400,000
Novosibirsk	400,000
Saratov	370,000
Voronezh	347,000
Omsk	281,000
Changel	280,000
Ashtaran	260,000
Ufa	250,000

Irkutsk	250,000
Perm	240,000
Stalin	220,000
Voronezh	220,000
Magnitogorsk	220,000
Yanovo	210,000
Yakovlev	210,000
Yakovlev	205,000
Krasnodar	200,000
Cheliabinsk	200,000
Grozny	200,000
Tula	200,000
Nijni Tagil	175,000
Yakovlev	160,000
Kalinin	160,000
Toms	150,000
Orsk	150,000
Krasnoyarsk	150,000
Kharkov	140,000
Krasnodar	140,000
Kemerovo	135,000
Izhevsk	130,000
Smolensk	130,000
Prokopyevsk	125,000
Murmansk	120,000
Orsk	120,000
Peza	120,000
Zlatoust	110,000
Sverdlovsk	105,000
Kirov, formerly Viatka	103,000
Kerch	103,000
Tambov	102,000
Anzhero-Sudzhensk	101,000
Yakovlev	101,000

ψ Seaport.

II.—THE UKRAINE.

(Ukraine.)

A Soviet Republic, embracing all the unoccupied areas of the Ukraine, was proclaimed at Kharkov after the November Revolution (Nov. 21, 1917). The provinces of the Ukraine are Vinnitsa, Dniepropetrovsk, Donetsk, Kiev, Odessa, Kharkov and Chernigov. By Treaty (June 29, 1945), Czechoslovakia ceded to U.S.S.R. the territory of Ruthenia (sub-Carpathian Ukraine) containing an area of 5,000 sq. miles and a population of about 800,000; further enlargement may take place through the extension of the western boundary of U.S.S.R. to the Curzon Line. The Ukraine is the great cereal-growing district of the U.S.S.R., and large areas are under sugar-beet. The Ukraine contains large deposits of coal (in the Donetsk basin), iron ore (at Krivoi Rog), manganese (at Nikopol), and is the principal source of the European supply of quicksilver.

There are Universities at Kiev, Kharkov and Odessa.

CAPITAL (since 1934) Kiev. Population (1939), 846,293. Kiev, a Christian city under Vladimir the Great (A.D. 980-1015), was the capital of Russia from 865-1240. It was recaptured from the Nazi invaders on Nov. 6, 1943. Other towns: Kharkov (the former capital), 835,432; Dniepropetrovsk, 500,662; Nikolaiev, 141,000; Zaporozhe, formerly Alexandrovsk, 200,000; ψ Odessa (Black Sea port), 604,223; Stalino, 240,000; Dnieprodzerzhinsk, 160,000; Makeevka, 120,000; ψ Mariopol, 220,000; Poltava, 105,000 and ψ Kherson (Black Sea port), 100,000.

III.—BELORUSSIA.

(White Russia.)

The independence of White Russia was recognized by the U.S.S.R. in 1919, and on Dec. 30,

1922, the State was admitted to the U.S.S.R. The republic covers the former government of Minsk and parts of Vitebsk and Moghilev with an estimated area of 49,000 sq. miles and a population estimated at 5,570,000. Considerable enlargement may take place by the incorporation of territory gained by U.S.S.R. through the extension of the western boundary to the Curzon Line. There is a University, founded in 1922 at Minsk.

CAPITAL, Minsk. Population (1939), 240,000; Vitebsk (1933), 127,300; Gomel, 121,200; Bobruisk, 70,000; Moghilev, 52,000.

IV.—ARMENIA.

(Hyastan.)

Armenia occupies the uplands between the Iranian plateau and Asia Minor, and is bounded by the Black Sea on the N., by Kurdistan on the S., by Azerbaijan on the E., and by Turkey on the W. Until the outbreak of the 1914-18 War it was shared between Turkey (35,600 sq. miles), Russia (20,587 sq. miles), and Persia (6,518 sq. miles). The rivers Euphrates, Tigris, Aras, Kur, and Chorokh take their rise within its boundaries, and at the meeting of the former Turkish, Persian, and Russian boundaries is Mount Ararat (17,160 feet), the traditional resting place of "Noah's Ark." In the uplands the climate is severe, but in the valleys and plains the soil is fertile, producing all kinds of cereals, cotton, rice, sesame, hemp, flax, and tobacco. Sericulture (silkworm breeding), sheep-breeding, and fruit-growing are capable of great development. Armenia has great mineral resources hardly, as yet, developed. Naphtha, sulphur, bitumen, and nitre abound, while the mountains yield salt (mineral and in solution), gold, silver, copper, lead, iron and valuable marbles; there are also numerous hot and cold mineral springs (similar in nature to those of Vichy); carpet-manufacture is the principal native industry. The Armenian Church is the oldest established Christian church, Christianity having been recognised as the State religion in 300, and since the 5th century there has been a national language and literature.

There is a University at Erivan, founded in 1921.

CAPITAL, Erivan; population (1939) 200,000. Leninakan (formerly Alexandropol) 65,800.

V.—AZERBAIJAN.

Azerbaijan, on the south-western shore of the Caspian Sea, extends from the Caucasus in the north to Persia in the south, and from the Caspian on the east to Armenia and Georgia. It includes the provinces of Baku, Hanjin (Elisavetpol), the district of Zakatala and the autonomous territories of Nakhichevan and Nagorni-Karabach. The Republic is very rich in minerals (naphtha, magnetic ironstone, and manganese), but oil is the principal industry, concentrated in the Baku region, the production being 8,802,000 tons in 1928-29 and 22,000,000 tons in 1938. Fishing is also important, and 15,000,000 pounds of caviare were produced in 1922. The principal crop is cotton.

There is a University at Baku, founded in 1919.

The **CAPITAL** is Baku, population (1939) 809,347, on the shore of the Caspian Sea, the centre of the petroleum industry. Baku is connected by railway with Batumi (Georgia) on the Black Sea, via Tiflis, and with Moscow, via Rostov. Other towns are Hanjin (75,000), Kuba (15,000) and Nucha (26,000).

VI.—GEORGIA.

(Sakartvelo.)

The Socialist Soviet Republic of Georgia includes two autonomous Republics (Abkhazia and Adjara), and one autonomous Province (South-eastern Ossetia).

The area is about 27,000 sq. miles with a population estimated at 3,540,000.

Georgia, a former Kingdom in Transcaucasia with a history of more than 2,000 years as a State, was annexed by Russia in 1801 in violation of the Treaty of Alliance of 1783. At the beginning of 1918 it regained its independence and in 1922 became a member of the Transcaucasian Federation. On Dec. 5, 1936, the Republic was admitted to the U.S.S.R. Georgia is bounded on the N. by the Caucasian Mountains, on the S. by Armenia, on the E. by the Republic of Azerbaijan, and on the W. by the Black Sea. There are 970 miles of railway, the trunk line connecting the Black Sea ports of Poti and Batoum with Baku, on the Caspian. Batoum and Baku are also connected by a petroleum pipe-line. The manganese ore beds are the richest in the world, more than one-half of the world's supply being derived from the Chiaturi mines (in the district of Sharopausky). There are also abundant seams of coal (at Tkvalgelskoe and Tkvibulskoe), and over 500 mineral springs partly unexploited. Wine is produced in considerable quantities, and of the tobacco produced (chiefly in Abkhazia) a great deal is imported by Egypt and produced as local grown. Timber (especially box) is an important industry. Oil wells with unproved quantities of crude oil have been discovered in many places, particularly in the Shirak Steppe.

There is a University at Tiflis, founded in 1917.

CAPITAL, Tiflis (Tbilisi). Population (1939) 519,175. Kutais (70,000); Poti (17,000).

VII.—TURKMENISTAN.

Turkmenistan is bounded on the west by the Caspian Sea and on the south by Persia, with Afghanistan as a south-eastern neighbour. Total area 188,610 sq. miles; estimated population 1,270,000. The seat of administration is temporarily at Poltarask (formerly Achabad). Agriculture and stock raising are the principal industries, cotton, wool, astrakhan fur, carpets and horses being the principal products. Minerals include ozokerite and sulphur. The Kara Kum desert occupies about four-fifths of the territory. Krasnovodsk is a port on the Caspian and a railway terminus on the Trans-Caspian line. There is a motor service between Poltarask and Meshed (Persia).

CAPITAL, Poltarask, 80,000; Merv, 31,000; Krasnovodsk, 30,000.

VIII.—UZBEKISTAN.

Uzbekistan comprises the former feudal states of Bokhara and Khiva and the Kara Kalpak S.S.R. (formerly part of R.S.F.S.R.). The total area is 66,400 sq. miles with a population estimated at 6,282,450.

Bokhara lies between Turkmenistan (on the W.), and the R.S.F.S.R. (on the N.), and is bounded on the south by Afghanistan. The majority of the inhabitants are Muhammadan Uzbeks. The former capital (Old Bokhara) is a station on the Russian Trans-Caspian Railway. The principal products are rice, wheat, fruit, hemp, cotton, silk, and carpets. Exports (mainly to Russia) are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar. The Emirate was abolished in 1920 and the Emir fled to Afghanistan.

Khiva, or Khorezm, formerly the Khanate of Khiva, lies between Bokhara and the R.S.F.S.R., and has a population of whom about half are nomads, and nearly all Muhammadans. The country occupies the fertile delta of the Oxus; it contains the finest cotton lands in the Union and is highly productive (cotton, rice, wheat, silk, fruit, hemp).

The highest point in the U.S.S.R. is Mount Stalin, in the Western Pamirs, 24,600 feet.

In 1939, during excavations for the Great Ferghana Canal, the site was revealed of a city covering about 50 acres and dating from about 2000 B.C.

The University of Central Asia at Tashkent was founded in 1923.

Kara Kalpak Territory was transferred to Uzbekistan in 1936, having formed part of Kazakhstan from 1925-1930, with a separate existence as a republic from 1930-1936. The chief town is Nukus (pop. 7,500), other centres being Turtkel (formerly Petro-Alexandrovsk), 17,000 and Chimbai, 6,300.

CAPITAL OF UZBEKISTAN, Tashkent, population (1939) 585,005. Samarkand (pop. about 155,000) contains the Gur-Emir (Tamerlane's mausoleum), completed A.D. 1400, by Ulug-bek, Tamerlane's astronomer grandson, and a XV century observatory, recently restored. Other towns are Andijan (98,000), Bokhara (50,000), Kokand (85,000), Hamagan (91,000), Ferghana (40,000). Khiva has about 20,000 inhabitants.

IX.—TAJKISTAN.

Tadzhik lies between Bokhara (on the W.) and the Kara Kirghiz territory of the R.S.F.S.R., with Afghanistan as a southern neighbour. The estimated area is 56,208 square miles, with a population of about 2,000,000.

CAPITAL, Stalinabad, population (1935) 60,000. Other centres, Kojent 41,000, and Dura-Tube 25,000.

X.—KAZAKHSTAN.

The Kazakh S.S.R., with parts of the former Governorship of Turkestan, was admitted to the U.S.S.R. Dec. 5, 1936. It comprises an area of about 1,048,000 sq. miles with a population estimated at 6,000,000, of whom about 60 per cent. are Kazakhs. Until 1925 it was known as the Kirghiz Republic and from 1920 to 1936 it formed part of R.S.F.S.R.

Agriculture and stock raising is the most important industry, the crops including wheat, rice, sugar-beet and tobacco. The country is rich in minerals (lead, zinc, copper, gold, silver and tin) and has vast oil deposits in the Ural-Emba districts, while the coal deposits in the Karaganda basin are third largest in U.S.S.R. There is a University at the capital.

CAPITAL, Alma Ata, formerly Vierny, population 200,000. Other centres are Karaganda (170,000), Semipalatinsk (140,000) and Petropaulovsk (70,000).

XI.—KIRGHIZSTAN.

The Kirghizstan S.S.R. (formerly a part of R.S.F.S.R. under the name of Karakirghistan) was admitted to the U.S.S.R. Dec. 5, 1936. The area is estimated at 76,000 sq. miles with an estimated population of 1,500,000, of whom 70 per cent. are Kirghiz and about 15 per cent. Uzbeks.

CAPITAL, Frounze, formerly Pishpek (population 80,000). Other centres are Osh (50,000) and Tokmak (30,000).

XII.—KARELO-FINNISH S.S.R.

The Karelo-Finnish S.S.R. was formed from territory ceded by Finland at the close of the Russo-Finnish war in 1940. The area is about 26,000 sq. miles with a population estimated at 470,000. The territory is mainly forest-covered but includes Ladoga and Onega, two of the largest lakes in Europe. The mineral resources (copper, lead, zinc, iron and silver) are considerable.

CAPITAL, Viipuri, population (1937) 80,000. Ψ Hango (pop. 10,000) was leased to U.S.S.R. for 30 years under the treaty of March 15, 1940.

XIII.—MOLDAVIA.

The Moldavian S.S.R. was formed in 1940 from territory in Moldavia and Bessarabia, formerly part of the Russian Empire, retroceded to U.S.S.R. by Roumania in June, 1940.

CAPITAL, Kishinev, population (1939) 120,000.

XIV.—LITHUANIA.

(Lietuva.)

Lithuania, formerly a Baltic Province of the Russian Empire, was declared an independent Republic at Vilna on Feb. 16, 1918, and was admitted to the U.S.S.R. Aug. 3, 1940. The area is about 20,000 sq. miles, with a population estimated at 2,442,000.

Lithuania was occupied by German forces from June, 1941, until relieved by the advance of the Soviet armies in the autumn of 1944. At the time of the unconditional surrender of Germany (May 8, 1945), Soviet armies were also in occupation of East Prussia, the north-eastern portion of which, including Königsberg, the seaport capital, has been incorporated in Lithuania, which may be further enlarged by the incorporation of Polish territory up to the Curzon Line.

The chief industries are agriculture and forestry, the chief products being rye, wheat, barley, oats and potatoes; the exports are bacon, dairy produce, cellulose, timber, flax and live-stock; the chief imports are herrings, cement, coal, metals, textiles and machinery.

CAPITAL, Kaunas (Kovno), on the Niemen (pop. 125,000); Šavli (17,000) Vilna (restored to Lithuania by U.S.S.R., after invasion of Poland and recaptured by Soviet forces, July 8, 1944) has a population of about 200,000; Ψ Memel 50,000.

XV.—LATVIA.

Latvia at the eastern and southern shore of the Gulf of Riga, has an area of about 25,000 sq. miles, with a population of about 2,000,000. Latvia, formerly a Baltic Province of the Russian Empire, was proclaimed an independent state on Nov. 18, 1918, and was admitted to the U.S.S.R. Aug. 5, 1940.

Latvia was occupied by German forces from June, 1941, until relieved by the Soviet advance, Riga being freed on Oct. 13, 1944.

The surface of the country is generally flat with marshy areas, interspersed with many lakes. Agriculture and dairy farming are the principal occupations of the people, and there are many flourishing industries. The fisheries are also of importance. The chief exports are flax, timber, butter, paper and glass; chief imports are agricultural machinery and implements and wood and metal machinery. The tonnage of ships entered in 1938 was 1,246,398. The chief ports are Riga, Liepaja (Libau) and Ventspils (Windau).

There is a University at Riga, established in

1862. Ψ Riga, at the mouth of the Daugava River, population 400,000; other centres

being Ψ Liepaja (Libau) 57,098, Daugavpils (Dvinsk) 46,160, Jelgava (Mitau) 34,099, and Ψ Ventspils (Windau) 15,672.

XVI.—ESTONIA.

(Eesti Vabariik.)

Estonia, formerly a part of the Russian Empire, was proclaimed an independent Republic Feb. 24, 1918, and was admitted to the U.S.S.R., Aug. 6, 1940. The islands of Dago, Osel and other smaller islands in the Baltic form part of the territory. The total area is about 18,632 sq. miles, with a population (Dec. 31, 1939) of 1,122,100.

In 1941 Estonia was occupied by German forces, but the capture of Tallinn by Soviet forces on September 22, 1944, and the subsequent fall of Baltiski and Parnu led to the evacuation of the country by Nazi troops.

Agriculture and dairy farming are the chief industries, engaging 60 per cent. of the population, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon, and eggs the chief products of dairy farming. There are important manufactures, including cotton, woollens, paper, timber, matches and distilling.

There is a University at Tartu, founded in 1632 and enlarged in 1802, and a Technical University at Tallinn (1936).

CAPITAL, Ψ Tallinn (Reval), pop. (1938) 146,388, an important Baltic port, connected by railway with Leningrad; other towns are Tartu (59,643), Narva (24,444); and Ψ Parnu (21,199), on the Gulf of Riga.

VENEZUELA.

(Estados Unidos de Venezuela.)

President, Don Romulo Betancourt (Leader of Socialist *Acción Democrática*), assumed office, Oct. 22, 1945.

Foreign Affairs, Señor Dr. Don C. los Morales.

[On Oct. 18, 1945, a revolt broke out against the Conservative government of General Isaías Medina, who was elected President (for 5 years) on May 5, 1941. The leader of the revolt was Señor Romulo Betancourt, who gained control of the country in three days and assumed the Presidency and the post of Minister of the Interior. The new government has been recognized (Oct. 30) by U.S.A., Gt. Britain and France, and by many of the Latin American Republics. The Betancourt administration has recognized the *Spanish Republican Government*, set up in exile by Señor Giral, in Mexico City.]

EMBASSY IN LONDON.

96, Park Lane, W.1.

[Mayfair 3993]

Ambassador in London, His Excellency Señor Dr.

Don Andrés Rodríguez Azpurua.

Counsellor, Señor Don Alberto Posse Rivas.

Secretary, Señor Don Julio Pocarrera.

Consul-General in Liverpool (19, Sefton Drive, Liverpool 8), Señor Dr. Don Alirio Parra-Marquez.

Consulates at Cardiff and Glasgow.

The most northerly Confederation of South America, situated approximately between 2° 40' S. lat. and 12° 26' N. lat. and 59° 52'— 73° 15' W. long. It consists of 20 States and 2 federal territories. The best authorities calculate the actual present area to be approximately 353,728 square miles. The population at the census of Dec. 31, 1941, was 3,851,000; estimated (June 30, 1943) at 4,104,000 exclusive of unrecorded Indians, (about 100,000),

In 1943 births numbered 145,329 (36.3 per 1,000 inhabitants), deaths 64,131 (16.0 per 1,000). Infant mortality (1943) was 109 per 1,000 live births.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia (with which Republic the boundary is in dispute), east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being Margarita, which is politically associated with Tortuga, Cubagua and Coche to form the State of Nueva Esparta. Margarita has an area of about 400 square miles. In 1942 Gt. Britain ceded to Venezuela the small island of Palas (170 acres) about 3 miles from the mainland.

Venezuela was visited by Columbus in 1498, and in 1499 by Alonso de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Caracas, and the country remained under Spanish rule until the revolt under Simon Bolivar, a native of Caracas, who defeated the Spanish forces in the battles of Lastoguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia (Upper Peru) achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47, and his remains were re-interred at Caracas in 1842. Venezuela formed part of the Federal Republic of Colombia from 1822-30, since which time it has been independent. There have been many revolutions since 1846, particularly in 1849, 1858, 1889, 1891, 1900 and 1908. In 1854 President Monagas liberated the African slaves, and in 1864 President Falcon divided the country into States and formed them into a Federal Republic. Under the constitution of July 9, 1931, the government is that of a Federal Republic of twenty autonomous States, a Federal District, and two Territories, with a President elected by the Federal Congress for 7 years, and a Congress of 2 Chambers, a Senate of 40 members, and a Chamber of 85 Deputies, elected for 4 years by adult male suffrage.

The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima, and on the eastern border the Sierras de Rincoite and de Usupamo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yaparana (7,775 feet) and Duida (8,220 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (8,530 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly llanos, or level stretches of open prairie, with occasional woodlands.

The principal river of Venezuela is the Orinoco,

with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the north-western mountains of the republic to its outflow in the deltaic region of the north-east.

On Feb. 26, 1944 it was announced that U.S. aviators had discovered the source of the Orinoco, hitherto unknown, in a mountainous gorge separating Brazil and Venezuela.

The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Mapures Cataract, some 200 miles farther up stream. Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the Casiquiare. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which Maracaibo, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are Zulia (250 square miles), south-west of Maracaibo, and Valencia (216 square miles), about 2,400 feet above sea-level in the Maritime Andes. The llanos also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October, the dry, cooler season from November to March.

The products of the agricultural zone are cocoa, coffee, rice, wheat, sugar-cane, maize, tobacco and cotton. The pastoral zone supports live stock, estimated in 1940 at 4,250,000 cattle, 200,000 horses, 100,000 sheep, 1,250,000 goats, and 400,000 swine. Products of the tropical forest region are wild rubber and balata gum and tonka beans.

The principal industry is that of Petroleum, followed by gold mining, agriculture and cattle raising. The production of the oilfields is continually increasing, as shown below (in barrels of 42 gallons):—

Year.	Barrels.	Year.	Barrels.
1930.....	136,700,000	1937.....	186,200,000
1931.....	176,600,000	1938.....	188,200,000
1932.....	176,500,000	1939.....	205,800,000
1933.....	177,700,000	1940.....	185,600,000
1934.....	136,100,000	1941.....	223,800,000
1935.....	198,200,000	1942.....	147,000,000
1936.....	154,800,000	1943.....	177,600,000

Before the war of 1939-44 over 80 per cent. of the crude oil was exported to Netherlands' India refineries. In 1942 refineries were established in Venezuela, capable of handling about 200,000 barrels daily.

There are about 680 miles of railway in operation.

Language and Literature.—Spanish is the language of the country. Indigenous literature has not yet produced work of international repute. In 1940 there were 3 daily newspapers at Caracas and 14 at other urban centres.

Education (Primary) is free and compulsory from the age of 7 years. There were (1941) about 5,000 primary schools, with 260,000 pupils (140,000 boys, 120,000 girls), and about 80 secondary schools, with 5,000 pupils. There are Universities at Caracas and Merida, and a Technical College (mainly geology) at Maracaibo.

FINANCE.

	1944-45.
Revenue (Budget)	Bolivares 370,000,000.
Expenditure "	370,000,000
Internal Debt (Dec. 31, 1943) ..	5,500,000
External Debt (do.)	Nil

On June 30, 1930, Venezuela paid off its entire External debt (23,757,634 Bolivars) in gold, as a token of homage to Simon Bolivar, the Liberator, and on May 31, 1935, President Gomez requested Congress to vote the sum of Bs. 12,337,994 for the redemption of the whole of the Internal Debt. Venezuela was thus entirely free from debt. In 1942 an internal loan of Bs. 25,000,000 was raised for public works; this has been partly redeemed.

The exchange at Par of the Bolivar, of 100 Centimos, is 25.25 Bs = £1 sterling: official rate of Exchange, 1941, Bs. 13.59 = £1; Sept., 1943, Bs. 13.56 = £1.

TRADE.

Venezuela's Trade Balance 1932-43 was (including bullion and specie) :—

Year.	Imports.	Exports.
1932	Bs. 210,758,492	651,618,047
1933	153,458,001	628,259,172
1934	143,587,574	617,546,684
1935	215,933,711	711,739,501
1936	211,590,300	768,462,568
1937	304,633,681	871,462,781
1938	310,049,240	887,275,955
1939	328,648,050	953,340,108
1940	311,170,800	801,030,700
1941	287,850,903	1,045,600,000
1942	215,700,000	696,600,000
1943	222,000,000	853,300,000

The principal imports are machinery, textiles, foodstuffs, steel and iron. The principal exports are petroleum (over 90 per cent. of the total in 1943), coffee, gold and cocoa.

	1942.	1943.
Imports from U.K.	£1,400,000	£1,061,000
Exports to U.K. (1938-39) ..	£1,359,399	£1,720,421

CAPITAL Caracás (3,000 ft.). Population (1943) 267,000 (with suburbs, 377,434); other principal towns (1936) are Maracaibo (110,010), Valencia (49,214), Barquisimeto (36,429), Puerto Caribe (26,000), Carupano (26,000), Puerto Cabello (15,000) and La Guayra (8,000).

FLAG : Three horizontal bands, yellow, blue, red (with seven white stars on blue band).

On Nov. 29, 1945, the Constituent Assembly of Yugoslavia, at a joint session of the Skupština and the House of Nationalities, resolved:—

(1) That Yugoslavia is proclaimed a people's republic under the name of the Federal People's Republic of Yugoslavia. (2) That the monarchy has been finally abolished in Yugoslavia by this decision and that Peter II Karageorgevitch, together with the entire Karageorgevitch dynasty, is deprived of all rights previously vested in him and the Karageorgevitch dynasty.

Yugoslavia comprises Serbia, Montenegro, Croatia, Slavonia, the Banat, Bosnia-Herzegovina, most of Dalmatia, Bačka and Baranja regions, a part of Carniola and of Carinthia (Slovenia). The estimated area is 248,987 square kilometres (96,135 square miles), with a population (1940) of 16,000,000. For the purposes of local administration the country is divided into 8 *Banovinas*, each under a *Ban*, or provincial governor. The towns of Belgrade, Zemun and Pančovo form a separate unit.

The formation of the Kingdom after the War (1914-18) represented the culmination of a movement, which began early in the nineteenth century, for the union in a single nation of the Southern Slavs. In 1917 the Yugoslav Committee and the Serbian Government issued a manifesto from Corfu announcing a projected kingdom of the Serbs, Croats and Slovenes under the Serbian dynasty of Karadjordjević. In October, 1918, a Yugoslav National Council, representing the Yugoslav lands of the Austro-Hungarian monarchy, declared for a state of the Slovenes, Croats and Serbs. A few weeks later a union with Serbia was announced and the *Kingdom of the Serbs, Croats and Slovenes* was proclaimed at the beginning of December 1, 1918.

Montenegro (*Crna-Gora*) was united to Serbia by a decision of the Montenegrin Parliament in November, 1918, when King Nicholas was deposed.

Stretching from Central Europe to the Balkans, different parts of the country have been subjected to different historical religious, cultural and geographical influences. Serbia came early under the Orthodox Church and then passed 500 fallow years of subjection to the Turkish Empire. In Bosnia, an outpost of the Turkish Empire, large numbers of the population were forcibly converted to Mohammedanism. Croatia and Slovenia, on the other hand, came under the Roman Catholic Church, and in later years were subjected to the civilising influence of the Austro-Hungarian Empire. Such factors have, despite community of race, hampered the process of fusion into a united nation.

Yugoslavia has common frontiers with seven states, Italy, Germany, Hungary, Roumania, Bulgaria, Greece and Italy (Albania). Most of these frontiers were laid down by the Peace Treaties after the war of 1914-18. The north-western frontier with Italy was settled by the Treaty of Rapallo, 1920.

Yugoslavia has a long seaboard on the Adriatic coast. The principal Yugoslav ports are Split, Sušak, Dubrovnik and Kotor (Cattaro) and, by

an agreement with the Greek Government Yugoslavia has a free zone at the port of Thessaloniki. In 1939 there were 4,593 miles of normal gauge and 2,061 miles of narrow gauge railway, total—6,654 miles. The Danube forms a great commercial highway, and the tributary rivers Sava and Tisa provide other important shipping routes; the port of Belgrade was the second busiest on the Danube.

Government.—On Nov. 1, 1944, the Yugoslav Prime Minister (Dr. Ivan Subasic) signed an agreement with the leader of the National Liberation Committee (Marshal Josip Broz, commonly known as Marshal Tito) recognizing the provisional parliament. On March 7, 1945, the agreement was confirmed by the Royal Yugoslav government in London, and a provisional government was set up in Belgrade. On Nov. 29, 1945, the Constituent Assembly proclaimed a republic, as stated in column (1).

Defence.—The Army, Navy and Air Force on a peace footing consist of 130,000 officers and men, the war strength being about 1,250,000. German forces invaded Yugoslavia on April 6, 1941, and occupied the country, allotting Slovenia to Italy and setting up Fascist republics in Montenegro and Croatia; parts of the country were also seized by Hungary and Bulgaria. Patriot forces disputed possession of the country and harassed the invaders, who were compelled to withdraw in consequence of the successive capitulations of Italy and Germany to the forces of the United Nations, in 1945.

Production.—The principal industry is agriculture, over 75 per cent. of the population being engaged therein. The livestock in 1939 included 1,273,503 horses, 123,699 asses, 19,475 mules, 4,224,596 oxen, 38,004 buffaloes, 3,503,564 pigs, 10,153,831 sheep, 1,866,132 goats.

Minerals.—The mineral production in 1940 included hard coal, 421,000 metric tons, lignite 6,888,000, copper ore 43,000, lead-zinc ore 68,800, pyrites 138,000, bauxite 282,500, iron ore 300,000.

Language and Literature.—Under the constitution of 1918 the language of the country is Serbo-Croat-Slovene. Serbian is a South Slav tongue and in writing employs the Cyrillic alphabet, similar to ancient Greek, as in Russia, Croats and Slovenes use the Latin alphabet. The cultural life of the nations comprising the modern kingdom was suppressed under three centuries of Turkish domination, but revived with the rebirth of freedom. The desire for the political union of the South Slavs led to a cultural unity and a revival of Slav literature. At the outbreak of war in 1939 there were 6 Serbian daily newspapers in Belgrade, 3 Slovene dailies in Ljubljana (Laibach) and 6 Croat dailies in Sarajevo and Agram.

Religion and Education.—The Orthodox, Roman Catholic, Protestant, Muhammadan and Judaic faiths are recognised by the State; nearly 50 per cent. of the population is of the Orthodox faith. Education is compulsory and elementary education is free. In 1939 there were 8,956 elementary schools, with 32,150 teachers and 1,428,000 pupils; about 43,000 attended continuation schools, and 80,000 received instruction at technical and commercial colleges. In 1939 there were also 205 secondary schools, with 5,700 teachers and 125,000 pupils and 34 training colleges for teachers. There are Universities at Belgrade (with faculties at Subotica and Skopljic), Zagreb and Ljubljana, with 1,270 professors and 18,000 students in 1939.

FINANCE.

	1939 G. Dinars.	1940-41. Dinars.
Revenue ..	12,786,000,000	15,116,000,000
Expenditure ..	11,920,000,000	14,708,000,000

National Debt Dec. 31, 1938) :—

Internal	Dinars 10,420,000,000
External	12,000,000,000
Floating Debt	2,200,000,000

The Yugoslav Dinar (of 100 Paras) has a nominal value of nine-tenths of a penny, Dinars 276 3/4 = £1 sterling. In 1941 the Exchange rate was 200 D = £1.

TRADE.

	1939. Dinars.	1940. Dinars.
Total Imports	4,757,382,000	6,018,582,000
Total Exports	5,521,187,000	6,680,300,000
Imports from U.K. (1939)	£1,092,784	
Exports to U.K. (1939)	£1,882,682	

The principal exports are cereals, timber, ores, cattle, pigs, poultry, skins and fruit. The imports are chiefly textile manufactures, textile raw materials, machinery, and manufactured goods.

The chief imports from U.K. are machinery, cottons and woollens; the chief exports to U.K. are maize, sawn timber, and poultry.

CAPITAL, Belgrade (*Beograd*=White Fortress), developed from the old citadel on the promontory formed by the confluence of the Danube and Sava. The city has grown rapidly since the War of 1914-1918, spreading east and south-east. It contains the university, museums, national library and national theatre; population (Dec. 1938) 250,000. Other towns are Zagreb or Agram (185,581), Ljubljana or Laibach (60,000), Subotica (100,000), Sarajevo (80,000), Novi Sad (64,000), Skopje

(65,000), Ψ Split (45,000), Ψ Sibenik (38,000), Ψ Dubrovnik (19,000) and Ψ Susak (17,000).
NATIONAL FLAG: Blue, white, red.

NATIONAL DAYS: Kosovo Day (June 28) ; and Union Day (December 1).

(1) Including non-alcoholic beverages. The changes shown represent those in the value of food consumption rather than of purchases. (2) Rents, rates (in the United Kingdom), and water charges. (3) Housing, other personal effects, and communication services are included with miscellaneous services; as are some household goods, some amusements, and the value of room and board-furnished commercial premises. The per cent. changes is to 1943. (4) The change is to 1943. (5) The pre-war year is 1935. Values of household metal products and electrical equipment were sharply curtailed in all three years; these items, like motor-cars, competed closely with war production.

VOLCANOES OF THE WORLD.

Volcano.	Active.	Height in Feet

§ THE NOBEL PRIZES

THE Nobel Prizes are awarded from the income of a fund bequeathed to trustees by the Swedish scientist, Alfred Nobel, the inventor of dynamite, who died December 10, 1896, leaving a fortune of about £1,750,000. The first awards were dis-

tributed on the fifth anniversary of Nobel's death, Dec. 10, 1901. Particulars concerning conditions, etc., can be obtained from Nobelstiftelsens Styrelse, Sturegatan 14, Stockholm, Sweden.

(Value, 1945, approx. £7,160.)

Year.	(a) PHYSICS.	(b) CHEMISTRY.	(c) MEDICINE OR PHYSIOLOGY.	(d) LITERATURE.	(e) PEACE.
1917	Ch. G. Barkla	No award	No award	K. Gjellerup H. Pontoppidan	Comite International de la Croix Rouge.
1918	M. Planck	F. Haber	No award	No award	No award.
1919	J. Stark	No award	J. Bordet	C. Spitteler	Woodrow Wilson.
1920	Ch. E. Guillaume	W. Nernst	A. Krogh	Knut Hamsun	Leon Bourgeois.
1921	Albert Einstein	F. Soddy	No award	Anatole France	K. H. Bianting. Chr. L. Lange. F. Nansen.
1922	Niels Bohr	F. W. Aston	A. V. Hill O. Meyerhof	J. Benavente	No award.
1923	R. A. Millikan	F. Pregl	F. G. Banting J. J. R. Macleod	W. B. Yeats	No award.
1924	K. M. G. Siegbahn	No award	W. Einthoven	W. Reymont	No award.
1925	J. Franck	R. Zsigmendi	No award	G. Bernard Shaw	A. Chamberlain.
1926	G. Hertz Jean Perrin	Theo. Svedberg	J. Fibiger	Grazia Deledda	G. Dawes. A. Briand. G. Stresemann. Ferdinand Buisson.
1927	A. H. Compton C. T. R. Wilson	H. Wieland	J. Wagner-Jauregg	Henri Bergson	Ludwig Quidde. No award.
1928	O. W. Richardson	A. Windaus	C. J. H. Nicolle	Sigrid Undset	F. B. Kellogg.
1929	Duc de Broglie	A. Harden H. K. A. S. von Euler	Sir F. G. Hopkins Pf. Chr. Ehkman	Thomas Mann	
1930	Sir C. V. Raman	Prof. H. Fischer	Dr. Karl Landsteiner	Sinclair Lewis	Archbishop N. Soderblom.
1931	No award	C. Bosch F. Bergius	Prof. Otto Warburg	Eric Axel Karlfeldt	Jane Addams. N. M. Butler.
1932	Prof. W. Heisenberg	Irving Langmuir	Sir Charles Sherrington	J. Galsworthy	No award.
1933	Pf. P. A. M. Dirac Prof. Erwin Schrodinger	No award	Prof. E. D. Adrian Prof. Thomas H. Morgan	Ivan Bunin	Sir N. Angell.
1934	No award	Prof. H. C. Urey	G. Minot W. P. Murphy G. H. Whipple	Luigi Pirandello	A. Henderson.
1935	Prof. J. Chadwick	F. Joliot Mme. I. Joliot-Curie	Prof. Hans Spemann	No award	Carl von Ossietzky.
1936	Prof. Victor F. Hess Dr. C. D. Anderson	Prof. Peter Debye	Prof. Sir Henry H. Dale Prof. Otto Loewi	Eugene O'Neil	Dr. Carlos Saavedra Lamas.
1937	C. J. Davison G. P. Thomson	W. N. Haworth Paul Karrer	Prof. Albert von Szent-Gyorgyi	R. M. du Gard	Viscount Cecil.
1938	Enrico Fermi	*Prof. R. Kuhn	Prof. C. Heymans	Pearl Buck	The Nansen Office.
1939	Prof. E. O. Lawrence	*Prof. A. F. J. Butenandt Prof. L. Ruzicka Prof. G. Hevesy	Prof. G. Domagk	F. E. Silanpaa	No award.
1943	Prof. O. Stern		Prof. Henrik Dam Prof. E. A. Doisy	..	No Award
1944	Prof. I. I. Rabi	Prof. Otto Hahn	Prof. E. J. Erlanger Prof. H. S. Gasser	Dr. J. V. Jensen	No Award
1945	Prof. Wolfgang Pauli	Prof. Artturi Virtanen	Sir A. Fleming Sir H. Florey Dr. E. B. Chain	Gabriela Mistral	Cordell Hull

§ A complete list of Nobel Prize Winners appeared on p. 2005 of "Whitaker" for 1933.

* Professors Kuhn and Butenandt were unable to accept the awards in view of the decision of the German Government forbidding Germans to accept such Prizes.

AWARDS POSTPONED

There were no awards in 1940, 1941 or 1942. The Peace Prize, which is awarded by the Norwegian Storting, was dormant from 1939-1944.

ACONITE POISON WHALING.—In a bulletin of the Bureau of American Ethnology, Mr. Robert F. Heizer gives a survey of whaling along the North Pacific coasts from Japan to Vancouver Island. Three basic methods were practised. Netting is found mainly in Japan, the harpoon-line-float method is practised by the Eskimo and Chukchee in the Far North and is also found in the Vancouver-West Washington area, and spearing with a lance dipped in aconite poison predominates in the intermediate regions of both Asia and America. It is concluded that the poisoning method was used first by the Ainu and by the Kamchadal of Kamchatka, whence it spread to the Aleutian Islands and the neighbouring part of the mainland of Alaska. It is probable that the movement was in this direction, but it is pointed out that the link between the two areas is weak at its western end, as evidence for the ancient occupation of the Commander Islands is lacking.

AGRICULTURE IN RUSSIA.—The party of 20 British scientists who visited Moscow and Leningrad as guests of the Soviet Government for the 250th Anniversary of the Academy of Sciences included four members of the governing body and staff of the Rothamsted Experimental Station—Lord Radnor, Dr. Ogg, Dr. Crowther and Dr. Muir. The number of soil workers in the party was an indication of the importance the Soviet Government attach to agricultural science, and especially to soil science. This attitude was abundantly demonstrated by the work in the institutes and colleges the agricultural party was able to visit. The Dokuchaev Institute for Soil Research has laboratories in Moscow, a soil museum in Leningrad, and field parties in different parts of the Union. It extends the classical Russian work in soil classifications, applying it to individual collective farms and attempting a general synthesis by making new soil maps of other continents. Although the war checked the use of fertilisers, the experimental work went on, and plans are well advanced for utilising the reserves of potash and the newly discovered reserves of mineral phosphate, both of which are stated to be the largest in the world. This is expected to result in a great increase in the production of food and raw materials. A special effort is being made in developing agriculture and horticulture in the sub-Arctic region where the subsoil is permanently frozen.

AIR PHOTOGRAPHY AND ARCHEOLOGY.—Dr. J. K. St. Joseph, of Cambridge, described at the Royal Geographical Society the great services rendered by air photographs to the study of archaeology. In taking pictures from the air, he said, ordinary landscapes acquired new significance, and this was especially so with archaeological monuments such as Maiden Castle, Dorset. The intricate design of the fortifications disclosed, viewed from the air, a much more ancient fortress than the one previously known. Whereas ordinary maps give only the conventional landmarks, an aerial photograph presents the entire picture with all its details. Not only rivers and hills are depicted, but also hedges and ditches. To the untrained eye they were of little significance, but to the strategist in war-time and to the scientist in peace they told an important story. Often, by the looks of crops, it was possible to tell if any ancient ravines and fortifications had existed in place of the present arable lands. The South Downs were the happy hunting-ground of the archaeologist, but Wales, Northumberland, and the Fens were among the many places offering undreamt-of scope to the

aerial photographer at the service of the archaeologist. Britain was unique in its variety of ancient monuments, and aerial photography had opened a new era in the study of our historical and prehistoric past.

APPLE-GROWING DISCOVERY.—A discovery of great importance to apple-growers and fruitarians has been made by Dr. J. Swarbrick, plant physiologist, who is the head of the Bristol University's research centre at Long Ashton, Somerset. Dr. Swarbrick has found a chemical method to "set" apple fruit and so prevent the June and pre-harvest fall which each season greatly reduces the quantity of fruit that ripens for picking. Even the ravages of frost in stripping the bloom from the trees, he claims, can be partly remedied. He began by trying to find a way to combat the early drop of apples, but the fact that only one crop is possible in a season cramped his investigation, and as a quicker medium he turned to tomatoes. Hundreds of chemical compounds were tried during six years experiment before the right combination was found. The method used is to pick off the flowers from a truss of tomatoes and to spray the green calyx once with the chemical compound. That sets the fruit instantly. The result is that all the fruit on the truss ripens at the same time and the only difference from tomatoes grown in the normal way is that his are seedless. He continued his experiments along similar lines with apples, and has had a considerable measure of success, but the apple experiment has not reached the stage where the process is a commercial proposition. On the question of resistance to frost in stripping the bloom from the tree Dr. Swarbrick states that sufficient success has been achieved to indicate he is on the right lines. He is sanguine of ultimately producing seedless raspberries and strawberries (partial success has been achieved with these) and all other soft fruits.

ARAB PALACE NEAR JERICHO.—Some remarkably rich and beautiful examples of architectural decoration in the early years of Arab rule in Palestine have been discovered during excavations carried out by the Government Department of Antiquities at the Khirbet el Maffar Palace near Jericho. They comprise the monumental gateway with colonnaded porticos on each side looking northward across the forecourt; part of a mosaic pavement with carved stucco or plaster behind; and part of an elaborately carved lintel of the main gateway. The Greco-Roman style of carving is carried to a new pitch of originality and skill. It has been concluded that the palace was a winter residence of one of the Ummayyad caliphs.

ASTRONOMY IN RUSSIA.—The Astronomical Council of the Academy of Sciences of the U.S.S.R. has begun the work of rebuilding the Russian astronomical institutes which suffered at German hands. Plans have been laid down for the reconstruction of wrecked observatories and for the design of new ones. A workshop under the direction of Prof. D. D. Midsutov, builder of the telescope with all-spherical surfaces, has been organised for the design of instruments and construction of scale models. The rebuilding of Poulkovo Observatory will be undertaken; the new buildings, especially that which will house the great refractor, are designed to meet all the requirements of modern astronomical technique. A site has been selected for the projected Central Asiatic Observatory on Zaili, a spur of the Ala Tau Mountains near Alma Ata. This observatory is not

to be confused with the new astrophysical one, which in scope and equipment is to be on a level with the best modern observatories. The site will probably be in the Crimea. The Ukrainian Academy of Sciences will build a new observatory near Kiev. Simeiz Observatory is already being rebuilt. In Moscow an astronomical laboratory is to be established where visiting astronomers will be able to calibrate their photometric apparatus. The Leningrad Astronomical Institute will engage in purely theoretical work, including an attack on problems in celestial mechanics.

ATOMIC BOMB COST £500,000,000.—On Monday, August 6, 1945, the first atomic bomb was dropped on Hiroshima, a Japanese war base, and on August 9 the second atomic bomb fell on Nagasaki. Each bomb was more powerful than 20,000 tons of T.N.T. and had more than 2,000 times the blast power of the largest bomb ever used in warfare. The atomic bomb had at last harnessed the basic power of the universe, and the force from which the sun draws its power had been loosed against those who brought war to the Far East. It ensured a speedier end to the war than any one, not knowing the secret of the bomb, had reason to anticipate. The atomic bomb was not the invention of one man, but the outcome of a sequence of discoveries in pure science by British, American, French, Danish, Italian and German workers on the problem of turning matter into energy. The late Lord Rutherford first showed that the atom contained relatively large spaces, and that the really characteristic thing was its heart. The nucleus in an atom must look something roughly like a pellet of shot in the centre of the Albert Hall. In 1932 Sir James Chadwick identified the ideal projectile for breaking atoms, the neutron, and in 1938 German workers showed that the result of the entry of the neutron into the uranium atom was the violent explosion of the nucleus. But it was a band of British and American scientists, working all through the war, who beat the German scientists in a feverish race to find some way of harnessing and releasing atomic energy. By the year 1940 physics had reached the stage in the production of nuclear fission, or atom-splitting, by which enormous energy could be explosively produced, and it was known that the nucleus of the uranium atom could be split by bombarding it with rays from certain other radio-active elements. The energy liberated in uranium fission is millions of times greater than that set free in the combustion of an equal weight of oil or coal. The problems to be solved then included the quantity production of material and the control of the explosive effect. The "slowing down" medium used in splitting the atoms of uranium was "heavy water," a compound of oxygen and "heavy hydrogen" (or "deuterium") in which the nuclear portion of each atom has double the weight of ordinary hydrogen. By this method uranium was split into its two different forms, known as U₂₃₈ and U₂₃₅. Further research showed that U₂₃₅ could be separated from U₂₃₈; and by further nuclear fission, brought about by neutrons of low energy, fast neutrons could be thrown off from it with enormous force. British and American scientists, in university laboratories in Cambridge, Birmingham, Liverpool, Bristol, and Manchester, and at the National Physical Laboratory, worked harmoniously with American scientists until the atomic bomb was produced, and ready to be discharged on the enemies of the Allied nations. Their experiments alone were made at the cost of £500,000,000. In 1943 a large research establishment was set up in Montreal and a British-

Canadian-American project was in operation near Petawawa, Ontario. Other centres of production were at Oakridge (Tennessee), Richland (Washington), and Santa Fe (New Mexico). The number of people employed at one time on these projects was 125,000, and so great was the secrecy observed that very few knew what was the ultimate object in view. The action of the atomic bomb may be gauged from the official account of the first testing, which was carried out at 5.30 a.m. on July 16 in torrential rain in a remote area in New Mexico. At the appointed time there was a blinding flash, lighting up the whole area brighter than the brightest daylight. Then came a tremendous sustained roar and a heavy pressure wave, knocking down two men outside the control tower, which was 10,000 yards from the scene of the explosion. Immediately afterwards a huge multi-coloured surging cloud boiled to an altitude of over 40,000 feet. Clouds in its path disappeared. Soon shifting sub-stratosphere winds dispersed the narrow grey mass. The steel tower from which the bomb had been suspended had been entirely vapourised. Where the tower stood there was a huge sloping crater. The effect was far more terrible when the atomic bomb was loosed on Japan. A Japanese technical expert estimated that at Hiroshima 60,000 people were killed and 100,000 injured. Practically all the houses in a radius of nine miles were blown up or destroyed by fire. In Nagasaki the entire city was affected by blast; 10,000 people were killed and 20,000 injured. In each city those out of doors were burned to death, and those indoors were killed by the indescribable pressure and enormous heat.

AUSTRALIAN ABORIGINES' MENTAL MAKE-UP.—At a conference called by the Anthropological Society of South Australia, Prof. J. B. Cleland contributed a valuable address on racial problems in Australia. The Australian aborigines, contrary to popular belief, he said, present a high order of intelligence, and had they not settled in a country which provided very few amenities, they would probably have reached a much higher stage of civilisation. But in a country with no animal life higher than the marsupial, and practically no cultivable plants, they were forced to remain nomads, and with the arid conditions could make no permanent habitations. Judging by a complex language and by the attainments of certain individuals, the Australian aborigine has a mental make-up not appreciably below that of the white man. There was nothing to show that crosses between them and good-class whites are likely to produce undesirable half-breeds; the fact that many half-castes are inferior being probably due to the low-class and often vicious white men of whom they are the offspring. Attempts to guide the aborigines into European ways have heretofore led to rapid decline and death, owing in great part to lack of interest in living when removed from their native mode of life with its frequent ceremonies. It seems impossible for the full bloods to maintain themselves in a white community, and the only hope for them is to make the few places they can call their own, inaccessible to the white man. Adventurous spirits will always roam away, and, through contact with the whites, lose touch with the old life. These derelictised men should be assisted to maintain themselves as respectable members of the community and to do suitable work on the cattle and sheep stations, and be encouraged to keep up their tribal customs and corroborrees. Prof. Cleland considers that the completely derelictised aborigines of long-standing separation from their own communities should not be

segregated from the whites and regarded as inferiors, but should be educated to become good citizens and take their share of community life.

BALL LIGHTNING.—The *Ayrshire Post* of August 10 gave an account of a fireball, which caused considerable damage on the night of Sunday, August 5. The so-called fireball was associated with a thunderstorm which reached Ayr from the north shortly before 8.30 and passed quickly away, after doing serious damage to a house. As it accompanied a flash of lightning, it was not the fireball familiar to the astronomer but a case of ball lightning. Ball lightning, it may be recalled, was photographed before the War on at least one occasion, and was included by Sir George Simpson, former director of the Meteorological Office, in his studies of atmospheric electricity.

BEES FLEW 60 MILES IN A DAY.—Dr. Colin Butler, head of the Bee Department of the Rothamsted Experimental Station, has made a number of observations and experiments on the life-history and habits of these insects. He has found how bees use colour and scent to guide them to and from their hive. He and his colleagues carried out an experiment with glass dishes containing syrup serving as flowers. They marked with paint two of the bees that visited a dish 360 yards from the apiary. For just over an hour the two bees each paid about 15 visits to it, spending on the average 36 seconds at the dish on each visit. The young honey bee, having made her first orientation flights to establish the location of the hive in relation to landmarks, then establishes her "fixation" or working area. To this she returns again and again, always beginning and ending with the same plant. News of fresh pollen areas is conveyed by means of a "round dance" and a "wagtail dance." In the course of one experiment he discovered that two bees flew more than 60 miles in a day—150 journeys each of 720 yards long—gathering honey.

BITTERN'S BOOM RECORDED.—When a great deal of England was covered with swamp the bittern (*Botaurus stellaris*) bred here regularly, and it was not until the Fens were cultivated and its natural habitat was gone that this bird left this island. About 200 years ago the bittern, as a breeding bird, was very rare, and still later was regarded as extinct. Strict protection, it is pointed out by Mr. Ludwig Koch, has very slowly brought back the bittern to its old haunts, and during the last 30 years the "butterbump," as country folk call it, has been heard again in Norfolk and Suffolk. The return has given Mr. Koch an opportunity of hearing on the Fens the strange noise of the call of the bittern, which 40 years ago he had heard, at remote distances, on the Continent. He tells the story in "The Times." Accompanied by Mr. Eric Hough, the B.B.C. recording engineer, he spent a long vigil on the Norfolk Broads, on an enormous area of reed with enough living space for three pairs of bitterns, and set up a microphone and recording instruments. Rambling in the dark through the swampy reeds, he says, he distinguished a sort of prelude before the booming, four very low clicks not carrying farther than 20 to 20 yards, followed by an intake of sound and booming, three, four, five and six times repeated. On a following evening the weather was again favourable, and without interference he was finally successful in getting a fairly good recording of the full performance of the bittern. To get this 10 to 15-second booming he had to be on the alert 200 hours, using disks running for 230 minutes together.

BLIND FISHES.—Mr. George Sprague Myers has described two remarkable small blind fishes from the Rio Negro, Brazil. These two blind fishes, *Pygdanopis eugenmanni* and *Typhichelbus ternetzi* (both new genus and species), have no cheek spines. *Pygdanopis* has no eyes, and in *Typhichelbus* the eyes are rudimentary. They resemble one another closely, but differ sufficiently to warrant the separate genera. They form a series with *Glanapteryx anguilla* Myers, from the same locality, rock pools below Sao Gabriel Rapids, Rio Negro, which possesses eyes and in many ways resembles the other two. It is probable that the two blind fishes live buried in the sand.

BLIND WORKERS DURING THE WAR.—Owing to the need for labour during the war many firms experimented with blind workers, and it was found that they were not unsuitable for normal factory environment and capable of taking up other occupations than basket-making, massage, and telephone-exchange operations. A study of 215 blind workers was made by Dr. K. G. Fencion, of the University of Manchester. The industries included general electrical engineering, aircraft, metal ware, wood-working. 104 of the workers were trained by the firms themselves on the factory premises, 53 by the Institute for the Blind, 2 by an education committee, and 8 in their own homes, and 48 had no specific training but obtained their experience on the job. The firms who have experimented with blind workers report that, while some fall short of the production by the fully sighted, yet some are quite up to normal standards and are no more liable to accidents than other workers. They are particularly successful in work where delicacy of touch compensates for ability to see, and it is therefore important that their jobs should be suited to their particular abilities. Concentration on the job in hand is good, and they are keen and industrious. One difficulty was that they are apt to get irritated by any hold-up of material.

COD MIGRATION.—A detailed account of the biology and economy of the cod is to be found in a Bulletin issued by the Newfoundland Department of Natural Resources. Newfoundland, with Norway and Iceland, is one of the three great centres of cod stocks, and the vast area of Grand Bank is the outstanding important portion for study. With regard to the Newfoundland tagging experiments, the main object of which was to obtain direct evidence of migration, Dr. Harold Thompson states in the Bulletin that the cod tagged on the Grand Bank were much larger than those tagged elsewhere, the latter being mostly immature fish; 95.2 per cent. of the inshore cod tagged were recaptured locally within 100 miles (and more than half of these within 20 miles), and only 8.8 per cent. travelled distances of upwards of 200 miles. Only 1.5 per cent. travelled more than 250 miles, a distance which might take the cod into a different hydrographical zone. With the Bank cod only 68.9 per cent. were recaptured within 100 miles, and 31.1 per cent. carried out migrations of more than 100 miles. Only 6.8 per cent. exceeded 250 miles. Thus the Bank cod carried on rather more extensive migrations than those from the inshore. The fish up to about three years old are practically stationary, and up to six or seven years, or even more, the average movement from the location would probably not exceed 200 miles. After maturity there appear to be increased migrations and intermingling. The maximum distance travelled by any recaptured cod was 560 miles, from Fortune, in the south of Newfoundland, to White Bay, in the north east.

COSMIC RAYS.—Some results of the observations for the study of cosmic rays, made since 1942 from a camp on Mount Alagez in Armenia, have been published in the U.S.S.R. The camp was at a height of about 10,000 ft. above sea-level. All instruments, supplies and camp equipment had to be carried on pack animals. As conditions are extremely favourable for the study of cosmic rays, it has now been decided to build a permanent station there, with an observation post at about 13,000 ft. It is widely believed that cosmic rays contain a third element in addition to mesotrons and electrons, and that the particles which make up this third element have a greater ionising effect on air than either mesotrons or electrons. The latest expedition spent three months in attempting to discover the nature of this third component, especially the mass of the particles of which it is composed. The difficulty was to separate them from the other known components. New methods were evolved, and some new and extremely sensitive instruments built. The particles were found to have properties very similar to those of protons. The expedition made several thousand observations during great cosmic ray showers for the purpose of determining the energy of the cosmic particles which cause the showers. It was found to be enormous. A special kind of shower, occurring over a very small area, but including a tremendous number of particles, was also discovered.

COTTON NATURALLY COLOURED.—The Dean of Canterbury, writing in the "Manchester Guardian" gives a long account of the work carried out at the All-Union Cotton Institute at Tashkent, U.S.S.R. Entirely new varieties of cotton, he states, are being issued therefrom, long-fibred cotton in steady demand at the textile mills, disease-resisting cottons, early-ripening cottons, and natural-coloured cottons, with a range from brown to green. Here is a fast and natural dye, and the whole process of artificial dyeing is eliminated. The greatest changes are made in the hybridisation of seeds, through the effect of soil, of nourishment, of light and heat, and of different modes of irrigation. A high-yielding long-fibred variety abroad may be made tough and disease-resistant yet retain its good qualities by crossing it with a low-yielding but hardy local variety. It was in this sphere that Mr. Sturmal made his sensational discoveries and produced a wide range of cottons of natural colour. Green was the first colour to be produced. This green was the result, in 1940, of the hybridisation of three varieties of white cotton. The tints so far evolved are green, grey-brown, or coffee-coloured ("coffee with milk or without it"). Brown is the colour which gives the heaviest yield, and it is also extremely tough. The brown filaments will suspend a weight of six grammes as against an average of four. Great work in green cotton is being carried out in Turkmenistan. 2,500 hectares (one hectare = 2½ acres) of land were under the cultivation of coloured cotton in 1944, and the area was increased to 25,000 hectares in 1945.

D.D.T. FATAL TO MOTHS.—The new insect powder D.D.T., which saved our armies from typhus by killing lice, has been found to be useful in saving our clothes by killing moths. The Wool Industries Research Association finds that a minute quantity—0.1 per cent. of the weight of wool treated—makes cloth mothproof, however many times it is washed or cleaned. The D.D.T. is dissolved in oil applied to the wool during manufacture, and becomes a permanent part of the wool's

structure. D.D.T. can also be mixed with the solvents used in dry cleaning and so make any garment temporarily mothproof. Clothing cleaned regularly in this way would be nearly 100 per cent. mothproof. The powder, in fact, promises to be the perfect moth-killer.

DIAMOND OF LARGEST SIZE.—The Imperial Institute has announced that a gem diamond weighing 770 carats was found in Sierra Leone, West Africa, in January, 1945. The stone is of exceptionally fine colour and quality and may well be the largest gem diamond ever found in an alluvial deposit. It is certainly the largest diamond of gem quality in the world to-day. Little authentic information is available about the original weights of one or two ancient Indian stones, which according to legend may have been slightly larger, but so far as definite records go this stone has only been exceeded in size by the Cullinan and the Excelsior, both of which came from South African pipe mines. The new stone weighs about 44 carats more than the President Vargas, found in Brazil in 1938, and the Jonker, found in the Transvaal in 1934. A diamond of 770 carats weighs about 5½ oz. and would therefore be about the size of a hen's egg.

DUST-STORMS AND BAD FARMING.—The dust-storms which swept over wide areas in Victoria, New South Wales and South Australia in 1944 did widespread damage. In Northern Victoria they left a deep layer of sand, blocked the irrigation channels, damaged grapes forming on the vines along the Murray River and intensified the devastation wrought by the long drought. In the far west of New South Wales, experts say, it will take many years to restore the pastures, particularly where the constant wind-storms have eroded inches of the topsoil. The holding capacity of many sheep runs will be greatly impaired. It is being increasingly appreciated that these dust-storms are warnings of disaster which will overtake thousands of Australian producers if the lesson of the storms is not heeded. They are the results of the careless use of the soil, reckless destruction of timber, excessive grazing, overcropping, and unskilful ploughing.

EARTHQUAKES IN CALIFORNIA.—After a prolonged study of earthquakes in California, Mr. B. Gutenberg and Mr. C. F. Richter have come to the conclusion that the southern Californian area, including the Owens Valley, has about one-half of 1 per cent. of the seismic activity of the globe, and the California-Nevada region about 90 per cent. of the seismic activity of the United States. The expected occurrence of about four great earthquakes per century in the California region does not exclude the possibility that double that number might occur in a given century, or that a whole century might pass without even one. The events are not strictly independent. A great shock, such as that of 1906, represents a regional release of strain; after the immediate after-shocks have subsided, it may be followed by a period of abnormal quiet, as is probably now the condition in central California. Great shocks are to be looked for only in association with the major active faults and structures, such as the San Andreas fault zone and the trough of the Owens Valley. The other faults and active structures are characterised at most by moderately destructive earthquakes like those at Santa Barbara and Long Beach.

ECLIPSE OF THE SUN.—On July 9, 1945, there was an eclipse of the sun, the partial phases of which

were observable over the greater part of North America, the whole of Europe, and parts of North Africa and Western Asia. The true shadow of the moon first struck the earth at sunrise in the State of Idaho and, passing north-eastwards over Montana, Central Canada, and Hudson's Bay, crossed Baffin Land and Greenland to reach the European mainland near the town of Mo in Norway. From this point the track of totality, rather more than 50 miles in width, passed south-eastwards over Sweden, the Gulf of Bothnia, and Finland, and then crossed the U.S.S.R. Finally the moon's shadow left the earth at sunset in south-eastern Turkistan. In the British Isles only a partial eclipse was visible. At Plymouth 55 per cent. of the sun's diameter was due to be obscured at the maximum phase, at Edinburgh 71 per cent. At Greenwich, where the maximum, amounting to 61 per cent., was reached at 4.1 p.m. D.B.S.T., the eclipse began at 2.45 p.m. and ended at 5.11 p.m. In Britain high clouds interrupted observation in many localities. Radar, which played a large part in locating enemy bombers over Britain, was used in the observations organised by the Department of Scientific and Industrial Research. The preliminary results indicate that a decision can now be made between the rival theories advanced to explain the formation of the Appleton Layer in the upper atmosphere, which—as millions of wireless listeners may like to know—has a great influence on the travel of radio waves to long distances. Scientists believe that the two main electrified layers in the upper atmosphere are due to radiation from the sun. They cannot agree, however, on the nature of the Appleton Layer. Some say that it is due to ultra-violet light, but others are inclined to think that it is due to minute particles shot out by the sun. A decrease in the electrification of this layer occurred at the time of the optical eclipse, indicating that the formation of the layer is due to ultra-violet light from the sun. No significant effects have yet been found at times which would suggest that the layer was formed by the arrival of particles, expelled from the sun, in the earth's atmosphere. Results of measurements on the Heaviside Layer and the lower part of the Appleton Layer confirm the well-known solar control of these regions. Radio signals during the eclipse showed that the electrification of the lower part of the Heaviside Layer is also controlled by ultra-violet light. Practically nothing happened until a few minutes before the maximum time of the eclipse, when the signals increased enormously in strength. This, it is said, was probably due to a group of sun-spots seen on the sun's surface passing behind the moon. The matter is under further investigation.

ELECTRON MICROSCOPES IN CANADA.—The latest type of electron microscope has been installed in the Ottawa laboratories of the National Research Council of Canada. This instrument and one developed in the Physics Department of the University of Toronto, are the first electron microscopes to be used in the Dominion. It is hoped to make the electron microscope as widely available in Canada as possible to all Government laboratories and to those industries having suitable problems.

EMANATION FROM RIPE FRUITS.—It is well known that the emanation from ripe fruits will hasten the ripening of unripe fruits, and it is therefore undesirable to store together fruits of many varieties which have different rates of ripening, as those which ripen early may induce an undesirable hastening of the ripening process in types that keep longer. Mr. R. M. Smock, writing in the

Proceedings of the American Society of Horticultural Science states that the stimulating effects are greatest with emanations from apples past their climacteric, while post-climacteric apples are almost unaffected by emanations from ripe apples. Sometimes the emanation induces in adjacent fruits well-defined symptoms of ethylene injury, but *Penicillium expansum* growing in the store does not produce sufficient ethylene, or other stimulating substance, to affect the ripening of apple fruits. Immature pears put into store straight after picking produce only small amounts of ethylene, but their ripening and respiration can be stimulated by ethylene, when they themselves produce ethylene. So great can the stimulating effect of these emanations from ripe fruit be that in order to prevent accelerated ripening of the main bulk of fruit in a store, isolated early ripening individuals are frequently removed from store by hand picking. Mr. Smock finds, however, that oiled paper wraps are helpful in protecting apples against emanations of other apples, but that this procedure is not so effective as the removal of ethylene from the air of the store; which can be effected by the use of brominated active charcoal, prepared by fixing 5 c.c. bromine on 40 gm. of coconut shell charcoal.

FLASH COLORATION ON SPIDERS.—The momentary display of colours by animals and insects has long been noted by observers. So long ago as 1869 Jenner Weir directed attention to the conspicuous hind wings shown in flight by many moths and grasshoppers, and Lord Walsingham at a later date suggested that the sudden change when such insects come to rest serves to confuse the vision of a pursuing enemy. A further interesting example has been noted by Staff-Sergt. J. E. Marson (6th (East Africa) Infantry Brigade Workshops, E.A.E.M.E., South-East Asia Command). "In Ceylon," he says, "I have noted the effectiveness of the same principle as applied to certain species of spiders. The female of *Herennia ornaticollis* (Dolleschall) is a medium-sized spider, grey and brown above, with the underside of the abdomen and cephalothorax having brilliant yellow, orange or red markings, according to the maturity of the spider. It spins its web on rubber trees, from stumps of branches to the main trunk. The web is nine inches to a foot in length, and is very close to the trunk at all parts. The centre of the web is tubular and is fastened to the trunk by the tip of the tube. In this tubular depression, the female rests, almost perfectly camouflaged by the similarity of colour to the lichens which grow on the tree. If the spider is disturbed, however, a vivid red streak shoots down the trunk, as it jumps and lowers itself on a thread. The red streak stops as it alights farther down the trunk with the underside of the abdomen covered. It is very difficult to follow the later part of this movement, owing to the rapid colour change. Many members of the *Eresidae*, which retreat into their tube-like web endings when disturbed, jump when further attacked, and the same effect is produced by the highly-coloured underside of the abdomen. It would appear that this colour change would once again offer protection against a foe attacking at close range."

FLOWERS ON BOMBED LONDON SITES.—Prof. E. J. Salisbury, Director of Kew Gardens, in a further discussion on the flowers on bombed London sites (see *WHITAKER'S ALMANACK*, 1944) said that some of these wild flowers were wind-carried, some had been long buried and were now springing to life, some had been brought to

London on muddy boots or motor tyres, some in horse's nosebags or on people's clothing, and some had "escaped" from Kew or other gardens. All the wind-born plants are furnished as parachutes which, as in the case of the commonest, the rosebay willow-herb, enabled it to be carried long distances. In the autumn, on the Cotswolds, he said, a flight of the seeds resembled a snowstorm. The second commonest in bombed London is the coltsfoot, whose parachutes close up in damp weather and open in the fine weather favourable to flight, and the plant spreads by vegetation as well as by flight. The Oxford ragwort (*Senecio Squalidus*) is a native of Sicily, was naturalised in the Oxford Botanic Garden, and although now frequently found on bombed sites in London was hardly known in London before the war. Another traveller, the Canadian fleabane (*Erigeron Canadensis*) has come from across the Atlantic, and is said to have been introduced into Europe in the stuffing of a parrot sent to Germany. Twenty years later it appeared in England, and had come to London by its own parachute. A horse's nose-bag brought the seed of the Thanes Cress (*Lepidium Draba*) with its tall white clusters of blossoms; it came to England in 1809 with the troops returning from the Walcheren expedition.

FOOD IN HOSPITALS.—In a series of articles in the "Lancet" the problem of food in hospitals—which is often monotonous, badly cooked, and deficient in quantity—is discussed. The fault lies, the writer concludes, not only with the hospitals, which fail to appreciate the importance of correct feeding and, in most instances, to employ a single experienced food officer with sufficient influence over the hospital's income, but also with the medical staff who do not insist that their patients' needs are properly met. The quantity of food in hospitals is often insufficient it is stated, and it has to be eaten in a hurry, for the nurses have to be getting on with the next job. The medical staff should criticise the arrangements on all these grounds, paying special attention to the quality of "light diet." The blame has to be distributed between the hospital steward, the matron, the cooks, the out-of-date kitchen equipment, the methods of preparing, carving and serving the food, its transport along draughty corridors on unheated trolleys with delays on the way. The prescription of diets, it is suggested, must remain part of the treatment; the ward sister, who knows her individual patients' likes and dislikes, should interpret the prescriptions; but the buying, cooking and distribution of the food should not be done by three separate officers. Further, adequate meals should be provided throughout the day, inexpert buying and failure to use the open market should be eliminated, sufficient skilled kitchen staff should be provided, and the kitchen should have modern equipment and labour-saving devices. What is good feeding? asks the writer in the "Lancet." The hospital should construe scientific knowledge of food values with the caterer's art of producing appetising meals. Enough food of the right kind should be economically bought, properly stored and wisely cooked. Individual appetites vary, and those of sick people need special consideration. The lack of the important effects of the sights, smells and talk of the dining table can be counteracted by serving the food attractively.

FRUIT AND CARBON DIOXIDE.—A number of methods in the use of carbon dioxide in the transport and storage of fruit are described in the "Proceedings of the American Society of Horticultural Science." It has been found by a number of experiments that in an atmosphere containing

carbon dioxide the ripening of apricots is retarded. The effect is almost as great with 5 per cent. as with 20 per cent. carbon dioxide; but if the ripening period exceeds 20 days, meanness, a pale colour and insipid flavour and discoloration near the stone may result, but the ill-effects of the carbon dioxide are much less noticeable at low (30° F.) than at higher (45° F.) temperatures. Peaches do not deteriorate if the carbon dioxide reaches 20 per cent. Fifteen per cent. of carbon dioxide in the atmosphere will maintain strawberries in good condition for three to four days at 50° F., the colour being retained better at this temperature than at 32° F. Sweet cherries may be kept for three weeks at 40° F. in air containing 20 per cent. of carbon dioxide, and with this concentration of carbon dioxide, brown rot and other decays are checked. Ten per cent. of carbon dioxide and a temperature of 42° F. retard the ripening of plums as effectively at a temperature of 32° F. in ordinary air. Carbon dioxide permits the storage of plums at a higher temperature than would otherwise be possible, and this is important as with some varieties breakdown occurs unless the storage temperature is above 40° F.

GEOLOGICAL RESERVES.—The report on national geological reserves in England and Wales is the first part of a survey of the natural history resources of the country conducted under the chairmanship of Sir Lawrence Chubb. The aim of the survey is to complete a list of all areas which it is specially important to preserve from a scientific point of view. The sites selected number 390, and they vary from stretches of mountain or coastline to single quarries and even isolated erratic boulders. The areas are grouped in four categories—(a) Large-scale physiographic features and areas containing many items of geological interest, to be maintained in their present state. Working quarries in such areas to be registered, and new quarrying to be done only after approval. (b) Small geological features of outstanding interest, to be protected permanently. These are selected with an eye on their educational value, location, striking appearance, or fame. (c) Natural sections of rock, or disused artificial sections, to be subject to control because of their scientific value, in order to prevent their being destroyed by building or dumping of refuse, or being rendered inaccessible. (d) Sections of exceptional geological importance now being worked should be kept under observation, and their owners required to notify their intention of ceasing to work them, whereupon they should be transferred to category (c). The various sites chosen for preservation include many famous stretches of scenery, such as the Lizard Peninsula; Dovedale and the Castleton area; South Haven Peninsula and Studland Heath; Lulworth Cove; the Avon Gorge; the Lower Wye and Forest of Dean; Malvern Hills; Dungeness; Charnwood Forest; parts of the Northumbrian coast and the Roman Wall; the Wrekin and Wenlock Edge; Cheddar Gorge, Burringtoncombe and Ebbor Gorge; the Manifold Valley; Ingleborough, Malham Cove; the Vale of Neath; Snowdonia; and the Cader Idris region.

GULF STREAM: NEW THEORY.—It is more than fifty years since an eminent astronomer raised the question, "Is the Gulf Stream a Myth?" and the question, at least as to the influence of the Gulf Stream on the weather in Europe, is by no means settled. It has been generally assumed that heat from the Gulf Stream is disseminated to the surrounding land by winds that have blown over it and are warmed. Mr. J. W. Sandström, writing

in "Arkives for Mathematics and Astro-physics" points out that as the winds are mainly directed towards the Gulf Stream, the warmed ascending air over it being replaced by cooler air blowing from both sides of it, they cannot disseminate heat from it. The winds directed towards the Gulf Stream are deflected about 60° to the right by the rotation of the earth, their direction being from the south or south-south-west over Europe, and from the north or north-north-east over Greenland. Hence the heat produced in Europe and the cold produced in Greenland by the Gulf Stream are greater the warmer the Gulf Stream is. On the way from the tropics to the Arctic, the Gulf Stream loses a considerable amount of heat to the air and colder waters, and in order to transport any heat to the Arctic it must convey a certain mass of water per second. The speed of the Gulf Stream was probably reduced in 1939, and hence it lost its power to produce low air pressures in the North Atlantic and southerly winds over Europe; hence the winter of 1939-40 was just as cold in Europe as in Siberia, Alaska and Greenland. The cooling of water in the Arctic, increasing its specific gravity, would cause it to sink and the surface water to set in from warmer regions, thus re-establishing the propelling force of the Gulf Stream and increasing its speed. Its waters advance rather slowly. In the winter of 1941-42 its warm front may not have reached farther than the south-west coast of Norway. This winter was, therefore, cold; but by the winter of 1942-43 the warm front had passed Scandinavia on its way to the Arctic, the direction of the winds over Europe became more southerly, and the winter was warm over Europe and cold over Greenland.

HEAT EFFECT ON HUMAN BEINGS.—An important series of observations on the effect on human beings of the desert climate of Shaibah, Southern Iraq, has been contributed to the "Lancet" by W. S. S. Ladell, J. C. Waterlow, and M. F. Hudson. Both fit soldiers and patients suffering from the heat were studied. All the fit men lost weight in the hot weather, especially those who had the highest chloride concentration in their sweat. The measured rate of sweating and the estimated salt intake indicated that men with a high concentration of chloride in their sweat (more than 0.3 per cent. of sodium chloride) may not always have been in salt balance. Low output of urine, in spite of high water intake, low urinary chloride and raised blood urea, suggested salt-deficiency dehydration. Two types of heat exhaustion were recorded. The first type occurs in persons who secrete sweat containing much higher chloride concentrations than the average; their salt intake is insufficient and they become salt-deficient; extra salt might prevent the occurrence of heat exhaustion in these persons. The second type was seen only in the second half of the summer in men unaffected by the heat of the first half. Prickly heat accompanied the heat exhaustion, but this type did not have the vomiting and cramps suffered by the first type. The condition of the second type suggested a breakdown of the body's defences against heat. There was salt-deficiency, but no dehydration.

HELIUM GIFT FOR THE ROYAL SOCIETY MOND LABORATORY.—The National Research Council of Canada made a gift of 2,000 cubic feet of helium gas to the Royal Society Mond Laboratory at Cambridge, which will enable it to recommence research on very low temperature problems on a scale allowing the full resources of the Laboratory to be employed. In the whole field of physics, the temperature region close to the absolute zero

remains one of the most fruitful for investigation. The low-temperature problems which received most attention before the War were those of superconductivity, magnetic cooling and the properties of liquid helium itself. These are only the more prominent aspects of a wider field of investigation. Many mechanical, electrical, magnetic and optical phenomena, either partially or completely obscured by thermal agitation at room temperature, stand out clearly and undisturbed in the quiet region from 5° absolute down to 0.01° absolute which is attainable with liquid helium.

HISSING SOUNDS FROM FIREBALLS.—Responsible eye-witnesses of fireballs have often stated that they have heard a hissing sound simultaneously with the flight of a meteor. Mohammed A. R. Khan, of the Hyderabad Academy, Begumpet, writes in "Nature" that from personal observation he can testify to the validity of these statements. Three recent cases connected with fireballs seen at Hyderabad, on October 23, 1936, on March 25, 1944, and on August 6, 1944, respectively have placed the matter beyond doubt. The obvious difficulty is about the simultaneity of the light and sound phenomena noticed by observers fifty to a hundred miles distant from the meteor. But it must be remembered that the fireball rushes through the upper atmosphere at a parabolic speed of about 26 miles per second; its duration of visible flight is generally 6-8 seconds. Assuming its height to be roughly 75 miles, matter from a *frangible* aerolite can issue in a regular stream along its entire path, into the lower atmosphere, with velocity enough to bring it in the vicinity of an observer while the meteor is still in sight. For the height assumed, four or five seconds may suffice (even allowing for air resistance) for the matter from the meteor to reach the air in the neighbourhood of the observer, and thus give rise to sounds variously described as like the swish of a whip, the hissing noticed while a cutler sharpens a knife on a grindstone, or a hot iron being suddenly plunged into cold water.

HONEY BEE COLONIES.—The United States Department of Agriculture has issued a circular on the management of honey bee colonies in the northern States. It would appear that the trend in bee-keeping practice in recent years has been to increase the number of hives in an apiary, with less attention to individual colonies. As a consequence, there have been average yields of about one-third of those obtained from maximum-producing colonies. The most effective way to lower production costs is through increased colony yields. The Circular gives information on practices that will yield the best returns from each colony. In the northern States the equivalent of not less than two ten-frame hive bodies should be used to house the colony during the winter, and not fewer than five during the active season. The colony to be overwintered should have a gross weight of not less than 130 lb. and consist of a laying queen along with 8-10 lb. of bees that emerged after August 20. The hive should contain not less than 40 lb. of honey in the upper body with pollen and some empty cells in the centre, and 20-30 lb. of honey and as much pollen as possible in the lower body. The development of colonies inadequately provisioned with pollen can be increased by feeding pollen supplemented with 75 per cent. of soya-bean flour. The object is to build maximum populations for the honey flow and maintain them throughout the season. The most populous colonies produce not only the most honey per hive but also the most honey per

bee. Brood-rearing is the basis of colony development and the maintenance of maximum populations during the flow.

INFLUENZA IN THE UNITED STATES.—Mr. Selwyn D. Collins, head statistician of the United States Public Health Service, has found that there was great variability in the age curve in the eighteen epidemics of influenza that have occurred in the United States since the beginning of 1918. In the latest outbreak the curve was in general similar to that of 1928-29 except for a very high incidence among children less than ten years of age. Pneumonic incidence was far below that of 1918-19. Among persons less than twenty-five years of age the pneumonic rate was less in the latest epidemic than in any of the others, but above twenty-five the rates corresponded closely to those recorded for the epidemic of 1928-29. The percentage of the total cases which were complicated by pneumonia in the 1943-44 epidemic was far below the figure for any other epidemic for which figures were available. In most of the epidemics the rates for influenza were consistently higher for females than for males, particularly adult females, with the exception of the 1918-19 epidemic and the minor outbreak of 1940-41, in which there were no obvious sex differences.

ISOVOL MAP OF SOUTH WALES COALFIELD.—Through the Department of Scientific and Industrial Research comes an isovol map of the coal-fields of South Wales and an explanatory booklet, both of which make an important contribution to our knowledge of the coal in that part of Britain. The "isovols" plotted on the map are lines of equal volatile content and show graphically the results of the determinations of volatile matter in samples of all the seams so far examined. Since volatile matter constitutes, especially in South Wales, a valuable index of the physical and chemical nature of the coal, the map summarises much of the work of the coal survey in this area up to date, and shows where each of the widely differing types of coal occurs. The booklet describes methods of analysis and contains a discussion of the relationships between volatile percentages, carbon percentages, calorific value and caking properties—all important factors in assessing the value of the coals.

MAPPING FROM AIR PHOTOGRAPHS.—The Government of Victoria, Australia, has undertaken to have the whole State mapped by aerial photography as the best and quickest means of surveying vast areas which have not been accurately surveyed before. Of the 80,000 square miles in Victoria, 60,000 square miles will have to be photographed from the air to complete the cartography. The first maps to be obtained from this air survey will be produced on the scale of one inch to a mile, but larger scales will be adopted when required. Special instruction in the interpretation of the air photographs has been given to survey personnel selected for the work, as well as to engineers and agricultural specialists. A high degree of skill is needed to carry out an aerial survey which, unless it is to be merely rough and approximate, requires co-operation between the flying personnel and ground surveyors. The principle of stereoscopy is applied and the skilled observer, by the study of vertical photographs, can deduce more than that which is gathered from direct observation. Therefore stereoscopic plotting instruments form part of the equipment used in aerial surveying. Oblique photographs aid in contour control, and in the air survey of Victoria one oblique is being taken with every vertical photograph. The value of surveying

land from the air was revealed in a striking manner when an air survey of the Irrawaddy was accomplished in 1924. Flying at a height of 9,400 feet, British airmen photographed 1,000 square miles, which gave a photographic scale of 3.4 inches to the mile. A large proportion of the area could not have been surveyed from the ground, as it consisted of unclassified forests and difficult waterways.

MEN OF SCIENCE IN THE MODERN STATE.—An address on the position and future of men of science in the modern state was given by Lord Winster (then) Minister of Civil Aviation to the Commonwealth and Empire Conference on radio for civil aviation. He pointed out that among several myths destroyed during the War has been that of the superiority of German men of science and of the degree of co-ordination in Germany between science and industrial and war production. The War, he said, showed not only that the United Nations have men of science second to none, but also that we have been far more successful in marrying their knowledge and their labours into the national war effort. Furthermore, it was now acknowledged that provision must be made in Britain for the training in its colleges and universities of far more scientific and technical workers than in the past, and the pursuit of a scientific career must be made much more attractive in status and salary. We have seen, he said, in the field of research what teamwork backed by unlimited funds can do and entered into a field where the man of science will bring us knowledge which enriches and facilitates the progress of the world. We must alter our outlook on the man of science. Even in the War of 1914-18 he did not achieve any very tangible recognition; in this War, thanks largely to Mr. Churchill, he has been coming into his own, and from now on he will be part of the warp and woof of the national life. The scientific worker must be brought out of the "backroom" and brought in at the very highest level, not only for consultation, but direction, about national affairs.

METCHNIKOFF CENTENARY.—The centenary of the birth of Ilya Metchnikoff, the great Russian man of science and philosopher, was celebrated in Moscow in May at a conference of representatives of the medical profession and of bacteriology, at which papers were read on Metchnikoff's philosophical views and his work in the fields of Darwinism, embryology, immunity, epidemiology, parasitology, microbiology, and zoology. Metchnikoff was one of the first Russian Darwinists, and proved by experiment the existence of general laws of evolution applying to all animal organisms. His biological research on comparative embryology led him to problems of pathology and medicine, in which he obtained epoch-making results, formulating a theory of phagocytosis. After working at the Pasteur Institute in Paris, he became head of a new school of microbiology investigating especially problems of immunity as it affects medical practice, particularly vaccination. Later in life Metchnikoff gave much attention to the study of old age, longevity and death. His view was that people do not live so long as they should do, and that, by appropriate modes of living, life could be considerably lengthened. To mark the centenary, the Soviet Government decided to erect a monument to Metchnikoff in Moscow and to put memorial tablets in the University of Kharkov, where he was a student, and in the University of Leningrad, where he lectured. The University of Odessa, where he occupied a professorial chair, will bear his name. Metchnikoff

gold medals and prizes are to be awarded by the Moscow Academy of Sciences, and Metchnikoff scholarships for students and research workers are to be founded by the Academy of Medicine and by the Medical Institutes of Kharkov, Moscow, Leningrad and Odessa.

METEOROLOGICAL STATION ON TRISTAN DA CUNHA.—During the last three years of the war the South African Government operated a meteorological station on Tristan da Cunha, the loneliest island in the world. It was established in response to repeated requests for long-range weather forecasts covering a period of a week. The South African Air Force and the Royal Navy played prominent parts in setting up the observation station, which is regarded as being most important and its operation, it is stated, has already revolutionised weather forecasting in South Africa. The station was built on Tristan da Cunha after a survey partly visited this and two other islands—inaccessible and Nightingale—which are within twenty miles of each other, 1,500 miles south-west of St. Helena.

NARCISSUS BULBS.—The practice of treating narcissus bulbs with hot water at 110° F. for three hours is now a standard control for internal pests. Occasional subsequent damage to the flowers has been reported, however, and J. Wood in the "Journal of the Royal Horticultural Society," has investigated the difficulty. Splitting of the corolla, it is stated, can be minimised by storage at 80° F. instead of 60° F. after lifting and before treatment with hot water. Early lifted bulbs are also more susceptible to trumpet splitting, whereas late lifting may bring damage to the roots. Storage after treatment should be at a cool temperature of 48° F.

NEWTON LETTER FOR THE ROYAL SOCIETY.—The Royal Society has received on indefinite loan from its owner, Mr. Roger North, of King's Lynn, a hitherto unrecorded letter of Isaac Newton. It was written in 1677 from Cambridge, and addressed "For the Rnd & Honble Dr. North, to be left at Mr. Pawley's at the Bible in Chancery Lane, London." Dr. North was later Master of Trinity College, Cambridge, and from him the letter passed to the present owner, one of his descendants. The subject of the letter is on "this new Treatise of Musick," which, Mr. Roger North suggests, was "A Philosophical Essay on Music," by Francis North, Lord Guilford, to whose brother the letter was addressed.

NEW ZEALAND TERMITES.—Mr. J. M. Kelsey, writing in the "New Zealand Journal of Science and Technology" gives an account of the termites in the country and their identification. It appears that there are only two species indigenous to the Dominion, namely, *Calotermes browni* Frogg. and *Stolotermes ruficeps* Brauer. In addition, there are eight species of Australian termites that have been accidentally introduced. Of the native species, *C. browni* does extensive damage to wooden buildings, posts, poles and trees, and attempts are now being made to find an effective means for its control. The other species, *S. ruficeps*, is invariably found in decaying timber and has not so far been known to attack buildings. Of the Australian species, three kinds belong to the family Rhinotermitidae and are members of the genus *Coptotermes*, and four species are members of the *Calotermidae*, and of these three belong to the genus *Calotermes* and one to *Porotermes*. The Termitidae are represented by a single species of *Eutermes*.

NORTH MAGNETIC POLE LOCATED.—When the R.A.F. Lancaster Aries returned to the Empire Air Navigation School at Shawbury, near Shrewsbury, on May 26, 1945, at the end of her North Polar investigation flight, it was announced that the true position of the Magnetic Pole had been located. For many years the Magnetic Pole was believed to have been in Boothia Peninsula, on the Franklin Strait, in Northern Canada. Investigations in the Arctic, however, suggest that it is really in the Sverdrup Islands, between 200 and 300 miles north-north-west of the Boothia position. It is within seventy-five miles of the spot estimated by the Astronomer Royal and 1,500 miles from the geographic North Pole. The Astronomer Royal, Sir Harold Spencer Jones, says that the discovery confirms his view that the true position of the Magnetic Pole is hundreds of miles from the position hitherto assigned to it. It will be of great importance in North Polar navigation, because flying over the Pole can shorten the distance to many places in West and North America, and it is essential that the pilot must be certain where his compass is pointing. By analysing observations from between 60 degrees north and 60 degrees south, one could draw conclusions about the earth's magnetic field over the Polar caps. Those were regions about which there was not much observational data, so he used the analyses of the earth's magnetism in middle latitudes in order to construct magnetic charts for the Polar regions. The position which he derived for the South Magnetic Pole was in good agreement with the observed position. Sir Harold estimated the position of the North Magnetic Pole to be about six degrees in latitude north and slightly west of the position generally accepted. He was puzzled by the discrepancy, though he realised that the observed position might be affected by regional anomalies. A mass of magnetic material near the earth's surface would upset observations, and in the absence of a detailed magnetic survey over the regions embracing what had been taken as the position of the Magnetic Pole, it would not be possible to say whether that was so or not. Any localised effect of that sort would have a much reduced effect in observations from an aircraft flying at 10,000 or 20,000 feet.

PALUDRINE: NEW ANTI-MALARIAL DRUG.—Paludrine is a new compound for the treatment of malaria which has been discovered by I.C.I. chemists and biologists, who have been working on the problem since 1942. There are three requirements of the anti-malarial drug—it should act as a preventive against infection; it should control the symptoms of the malaria patient; and it should prevent relapses. Paludrine was first administered to human patients by the Liverpool School of Tropical Medicine, to whose co-operation the development of the drug is largely due, and more than 100 cases were successfully treated. Supplies of the drug were flown to Australia for extensive clinical trials, the result of which confirmed the view that paludrine is more effective and considerably less toxic than either mepacrine or quinine. It has been found to be most remarkable in its protective action against infection from the bite of the mosquito. Paludrine is colourless, and does not produce the yellowing effect encountered in most cases treated with mepacrine. It is much more powerful in its action, one part of paludrine being equivalent to three parts of mepacrine or ten parts of quinine.

PLANETS' ORIGIN.—A new theory of the origin of the planets has been communicated to the Academy of Science of the U.S.S.R. by O. I.

Schmidt, the distinguished mathematician and geophysicist. The theory is based on the rotation of the galaxy, as a result of which two stars sometimes approach so closely that by the capture of one by the other a stable system—a binary—is formed. A star—our sun, for example—passing through one of the meteorite clouds in the Milky Way captures part of the meteorites, and this capture leads to the formation of planets revolving round the sun. It is stated that Schmidt's theory leads to mathematical formulæ which agree with astronomical observation.

POWDERPOST BEETLES.—The destruction caused by powderpost beetles, of the family Bostrychidae, is known to all who have business with timber in tropical or semi-tropical countries. Posts and sawn timber of most broad-leaved trees are liable to severe damage from these boring pests. The principal damage is done by the larvæ feeding on the sap wood. Research and experiments have been carried out in many parts of the world, with the view of discovering a cheap and practical method of protecting wood from this type of pest. In a leaflet issued by the Forest Research Institute, Dehra Dun, preliminary tests of two methods of protecting timber are described. They are intended to give temporary protection when more standard treatment such as impregnation with preservatives cannot be applied because of lack of plant or material. A mixture of creosote and fuel oil, applied externally, definitely prevents attack for at least nine months and probably longer. A coating of lime gave complete protection over a period of three months when liability to attack was most serious. It is expected that, provided the coating is kept intact, protection will be permanent. Treatment must be applied within a short period of cutting or sawing.

RADAR IN DEFENCE AND VICTORY.—Flying miles high a British night-fighter pilot watched little dancing blobs of light form on a glass screen beside his instrument panel. He pressed a button, a stream of bullets flew out, and the flight of a German bomber to London was fatally interrupted. The pilot was using radar. Radar was an astonishing secret of the war, and in many different forms was one of the greatest war-winning weapons by which the enemy bomber, U-boat, and warship were defeated. What is radar? It has been explained as a technique using high-powered wireless pulses, or brief, rapidly recurring bursts of radio energy, which in most applications of the system are reflected from solid objects. The direction of the echo is normally used for locating such objects, and the time taken for the echo to return to the transmitting point is measured, usually visually, by causing variations in the appearance of a pattern of greenish-blue light on a cathode ray tube, similar to the screen in a television set—and thus to find the distance of the solid object. It was in 1934 that British scientists began their research into methods of locating aircraft by radio, and when the Battle of Britain opened the United Kingdom was ringed by a chain of radar stations. As the war went on it became necessary to devise short-wave transmission with tremendous power, and in 1940, at Birmingham University, the magnetron valve was evolved—the first high-power generator of centimetric waves in the world. The magnetron is the heart of every modern radar equipment. Centimetric sets enabled the night-fighter pilot to detect himself straight on to the enemy bombers, and the same technique directed patrols to surfaced. The three latest devices in radar are

known as Gee, Oboe, and Rebecca-Eureka. Gee, the navigational system, told pilots in the 1,000 bomber raids exactly where they were at any time and increased our bombing efficiency five-fold. On D-Day it was used at sea and in the air. Oboe gives the bomber its position even more exactly than Gee, and also makes it possible for the signal to drop its bombs to be given from the ground base in England. It helped to destroy the factories in the Ruhr and German coastal guns in Normandy. Rebecca-Eureka, the secret of the airborne forces, grew out of automatic beacons, or radar "signposts," which work only when a coded radar signal reaches them. Eureka marks the spot. Rebecca leads the other aircraft to the point of concentration. Radar in fact revolutionised naval and anti-aircraft gunnery, enabling guns to aim at and hit targets they could not see. Invisible surfaced U-boats were located at night. The Scharnhorst was first detected by radio, and shadowed by our destroyers, and but for radar the Bismarck's final dash to Brest might have succeeded. In these ways radar was a decisive contribution to defence and victory.

RHUBARB CULTIVATION.—The Ministry of Agriculture has issued an illustrated bulletin on the cultivation of rhubarb. Rhubarb is one of the oldest cultivated plants, for its history in China, its native home, dates back to almost 3000 B.C. At first it was grown solely for the medicinal properties of its roots and was introduced into England from Siberia on that account three hundred years ago. Later, interest developed in the edible properties of the leaf stalks, but it was not until the nineteenth century that plantings of rhubarb for culinary purposes became widespread. Only a limited number of varieties are grown for commercial purposes; each is described in the Bulletin in some detail and attention directed to the fact that all are growing in the gardens of the Royal Horticultural Society at Wisley, Surrey. The chief area of production is the West Riding of Yorkshire, though in Essex, Lancashire and Cheshire a considerable acreage is devoted to the crop. The high rainfall, acid soil and the capacity of the plant to withstand smoke pollution contribute to the success of the crop in the Leeds district; in fact the contaminated atmosphere is an asset for forcing purposes, as it induces premature leaf shedding and early dormancy. As regards diseases, that termed "crown rot" appears to cause most trouble. Eelworm infection is now thought to be largely responsible for this, though it is not yet clear whether other factors do not contribute to this condition.

ROMAN FINDS IN LONDON.—First-century pottery and other objects covering the whole period of the Roman occupation have been brought to light at Western Union House, Great Winchester Street, E.C. The site is close to London Wall and partly over a northern branch of the Wallbrook, the stream which separated the two hills on which the earliest London was built. The discoveries were made during the sinking of shafts for the reinforcement of the basement against air raid damage, at a depth of 14 ft. below the basement floor and 24 ft. below the street level. Piles of blackened oak were found at the bottom of the shafts in the course of the stream; and in the blue clay was a mass of grasses and plants from "the roots of London." The pottery finds include parts of basins and dishes of red Samian ware, two of which are stamped with the marks of potters who worked at La Graufesenque, in Gaul, in A.D. 70-90, and one of a third-century potter at Trèves. The

earliest fragment was a black rim of Belgic (pre-Roman) type, some pieces of mica-coated ware similar to those made in a Roman potter's kiln nearer the mouth of the Wallbrook, and remains of several large amphorae—one of which still bears the mark of the potter's thumb. A roof-tile carries the marks of the feet of a dog and a cat—the dog was chasing the cat while the tile was laid out to dry in second-century London. The finial of a votive lamp and the rim of an incense-burner suggest a household shrine. A woman's long hairpin in gold-bronze alloy was also found. Another domestic object was part of an engraved iron stylus, with one end pointed for writing on wax. A Saxon dagger blade was found near a Roman roof-tile.

ROMAN REMAINS IN HAMPSHIRE.—After it had lain untouched by man for nearly two thousand years a large collection of Roman pottery has been unearthed near Bentley, in the forest country of north-east Hampshire. The excavation made by Major A. G. Wade, of Bentley, as the result of a communication from a Home Guard, is a single trench about 6 ft. by 2 ft., and 5 ft. deep. It is in the middle of a wood known as Goose Green Inclosure, part of Alice Holt Forest, which has been Crown land since the Conquest. The trench is dug into a pottery waste heap apparently covering about two acres. That a kiln existed close at hand is suggested by the quantity of pottery sherds and by the extent of the mound, which is thought to be at least 10 ft. deep. Further interest is derived from the existence of two known Roman pottery kilns within a mile of Goose Green Inclosure, a Roman lime-kiln, and five ascertained sites of Roman homesteads within a four-mile radius of Bentley. The pottery now unearthed consists mainly of dark grey ware provisionally assigned to the third century. Some have a white slip and a few are of brown ware. Though of interest as showing the type of household utensils produced during the Roman occupation for local use, they are not new to the large museums and bear no relation to the beautiful Samian ware imported from Gaul in large quantities during this period. Ornament is confined to simple forms such as cable moulding, herring-bone, and scroll work, inscribed with a comb; but the shapes of the assembled vessels are well proportioned along classical lines. A large lump of crude clay, bearing finger marks, may be said to be part of a Roman potter's raw material. More conjectural is the inference that a small pond near a forester's cottage close by supplied the water for mixing the clay. The site has been known since 1839, though never excavated. It was described in *Archæologia*, where there is a fairly long reference to "most extensive ancient potteries covering many acres with fragments of different sorts, more or less thickly deposited, just below the surface." No town or village has occupied the site during historical times, and it has only been disturbed from time to time by the felling and replanting of timber. The record of 1839 was read and forgotten, and the area again buried by the leaves of many winters until a Home Guard's tale of a grandfather, who had spoken of a pottery in the Forest, brought the Roman remains to light again.

SCIENTIFIC INSTRUMENT MAKING.—Mr. W. Bowen, governing director of the Bowen Instrument Co., Ltd., Cables and Plastics, Ltd., and Bowen Research, has presented to the Scientific Instrument Manufacturers' Association a substantial capital sum, the income of which is to be devoted

towards the encouragement and development of invention, design, research, processes and manufacturing technique in the manufacture of scientific instruments. The Council of the Association has drawn up a deed of trust under which the income from the fund is to be devoted each year to prizes to be awarded to the employees of members submitting papers fulfilling the objects of the trust. There will be five prizes to the value of £25 each for (a) a new invention; (b) an improvement of design; (c) an improvement in manufacturing technique; (d) a new development or new process arising from research. A list of topics defining the subjects or instruments admissible has been drawn up. Candidates must be employees of members of the Association and are required to furnish a short description of one of the above subjects not exceeding 3,000 words with relevant sketches or diagrams.

SCIENTIFIC VOCATIONAL GUIDANCE.—The City of Birmingham Education Committee has conducted a research on Scientific Vocational Guidance and its value to the choice of employment work of a Local Education Authority. The research has extended over eighteen years, its general object being to ascertain what value there is in using psychological methods in aiding young entrants into industry, commerce and the professions, by showing clearly at the outset the likelihood of success or failure in certain branches of employment. The report on the research suggests that on the staff of a secondary school there should be at least one teacher competent to apply psychological tests, and that he or she should work in close co-operation with a specially qualified officer. The resulting records should be used from time to time in deciding on the course of a child's instruction, and towards the end of the child's school life to enable the juvenile employment officer, co-operating with the head and with the trained teacher, to give reliable vocational guidance.

SEA WATER TURNED INTO DRINKING WATER.—Even a weak or wounded airman when "ditched" can easily turn sea water into drinking water. All he has to do is to take out a collapsible bag from a box, about the size of a half-pound packet of tea, put in some sea water, drop in some cubes, close the bag and after a period squeeze fresh water through a spout at the bottom into the box. When all the fresh water has been squeezed out the bag is rinsed in the sea and is ready to produce another supply. More than 20,000 boxes containing this simple de-salting apparatus were sent to Eastern Air Command, South-east Asia. Each was capable of producing 4½ pints of water.

SEVERN BARRAGE IS "PRACTICABLE."—The Severn barrage hydro-electric scheme is "practicable and economically justified," in the view of three experts who reported to the Minister of Fuel and Power on the subject. The authors, Mr. A. G. Vaughan-Lee, Sir William Halcrow, and Mr. S. B. Donkin, approved of the general principles of the 1933 report, but, with an increase in prices of 65 per cent., estimate the cost of the barrage at £40,216,700 and with transmission at £47,006,700, against the pre-war figures (1936) of £24,454,000 and £28,640,000 respectively. The best site is considered to be at the English Stones, a reef in the river between Gloucestershire and Monmouthshire, and single-tide working, generating power on the falling tide only, is the most suitable. The maximum power available during spring tides is given as 800,000 kilowatts, with an average annual output at the barrage substations of 2,290,000,000 and at the points of reception of 2,107,000,000

kilowatt-hours during the first fifteen years up to 1970—it the work started in 1947—and 2,207,000,000 kilowatt-hours afterwards. The Central Electricity Board areas in which the barrage output could be most economically used, with the proposed allocation of power and transmission voltage are given as South-east and East England, 400,000 kw., 220 kilovolts; Central England, 200,000 kw., 220 kilovolts; and South-west England and South Wales, 200,000 kw. and 132 kilovolts. The cost per kilowatt-hour for the first fifteen years from 1955 is estimated at 0.209d. at barrage substations and 0.275d. at reception points, and without restriction of output at 0.199d. and 0.262d. The 1933 report provided for a road and railway crossings to be combined with the barrage scheme, but the latest report considers that the crossings should be independent schemes. Gross energy generated by 706 tides was calculated as 2,252,000,000 kilowatt-hours a year in the 1933 report, but it is now estimated that with modern plant, the gross energy at the generator terminals would be 2,365,000,000 kilowatt-hours per annum. The lay-out provides for 228 sluices at the English Stones. Two locks, 750 ft. long and 70 ft. wide, will meet the requirements of the docks at Gloucester, Sharpness, and Lydney. The impounded area above the barrage will have a tidal variation of 20 ft. and will be virtually a tidal basin. The works could be completed in eight years. The saving in coal for the first fifteen years is estimated at 985,000 tons a year.

SOLAR FLARES AND MAGNETIC STORMS.—Observations during the solar cycle completed during the year show that a close correlation exists between solar flares—the transitory patches of enhanced emission visible in hydrogen and calcium light near spots on the solar disk—and terrestrial magnetic storms. Great magnetic storms and auroral displays tend to occur about a day after the appearance of a brilliant flare, and it has been suggested they are due to charged particles emitted from the sun simultaneously with the visible radiation. If the geometrical conditions are suitable these particles begin to reach the earth 20–26 hours later, and cause disturbances of the magnetic traces which may last for a day or more. Some years ago Milne propounded the theory that atomic particles might be ejected from the sun at a speed corresponding to a time of travel of 26 hours, and suggested that comparison should be made between solar spectra at times of magnetic quiet and of magnetic disturbance. The annual survey of the work at Mount Wilson states that solar spectrograms taken in the ultra-violet region during magnetic storms indicate two very shallow absorption bands beginning near the centre of the lines H and K and extending about 22 Å towards shorter wave-lengths. Their maximum depth is only 1 per cent. of the background continuum. Maximum velocities of the order of 2,000 km./sec. and mean velocities of about 600 km./sec. are indicated. Control spectrograms taken during magnetic calm show no such absorption. It is stated that the first direct observational evidence of the presence in interplanetary space of calcium ions approaching the earth from the sun at speeds comparable with those predicted both theoretically and by inference from geophysical observations.

STARFISH FOR CHICKEN MEAL.—Starfish, collected in the process of cleaning oyster-beds in the United States, are now being dried and ground up to make chicken meal. An analysis of the meal showed that it contained 30.7 per cent. protein, 1.1 per cent. calcium, and 0.35 per cent. phosphorus.

Tested against sardine fish meal of equal protein value, it proved its usefulness as food.

STARS OF THE SOUTHERN SKIES.—In a leaflet issued by the Astronomical Society of the Pacific, Leon E. Salmave gives a simplified star chart and guide to observations of the southern skies with the unaided eye and with field-glasses. It is specially designed for a latitude 20° south of the equator. Only those stars are shown which are necessary to suggest the constellation figures, and after learning these the observer's knowledge, it is claimed, can be extended with the aid of more complete charts. There is a brief description of the constellations, stars of the first magnitude, and of a few interesting objects such as the Great Nebula in Orion and the Large Magellanic Cloud.

STARS OR PLANETS?—Peter van de Kamp, writing on "Stars or Planets?" in "Sky and Telescope" deals with the question of the criterion for stars and planets, a matter of some scientific importance since recent discoveries have shown the existence of planets fifteen or twenty times the mass of Jupiter. He accepts Russell's critical value of $1/20$ of the sun's mass as a conventional borderline between visible stars and the invisible bodies which can be designated as "planets." This criterion defines a planet or star by its mass, not by its size. Among the methods for detecting unseen companions of low mass is the photographic method applied to nearby stars, and if the determination of the orientation of the perturbation orbit were sufficiently accurate, good results would be obtained. The gravitational method for discovering faint companions of low mass, while it is more powerful than the direct visual approach, has limitations for very low masses, and it would be extremely difficult by this method to find companion masses less than $1/100$ times the sun's mass, even for the nearest stars. The star which seems unattended by dark companions may be the exception, and it is possible that the stars attended by massive companions, rather than by small planets, are in the decided majority. Our solar system may prove to be an extreme rather than an average type of system. Though endowed with planets, the sun is the only star known that has no close companion star.

STEEL INDUSTRY RESEARCH.—The steel industry's plans to spend £120,000,000 on re-equipment are to be backed by the expenditure of £400,000 a year on a new central research association. The new body, to be known as the British Iron and Steel Research Association, will be under the direction of Dr. C. F. Goodeve, F.R.S., who has had a distinguished career both as a scientific research worker and as scientific adviser to industrial enterprises. During the war, as senior executive of the Admiralty department dealing with scientific and technical planning for the Navy, he played a leading part in the technical fight against U-boats, magnetic mines, and sundry inventions of German science. Dr. Goodeve has stated that the industry's own research centres will work in conjunction with those of the universities. Teams are already working in Sheffield, Cambridge, Swansea, Glasgow, London, Birmingham, and Newcastle. Full-scale development work will take place in or alongside works of member firms. The headquarters of the Research Association will be in London. One of the problems it will have to solve will be that of the welded ship. Liberty ships of welded steel have been known to snap in two, but there is a great future in the shipbuilding industry if welding can be made absolutely sound. Admiralty scientists have found that welding ships

causes a brittleness in the steel plates about half an inch from the weld. A cure for the brittle steel must be sought. Important tasks to be carried out immediately include the reduction of the use of coal in steel making to a minimum and experiments with the low-grade ore. In steel alloys Britain has done remarkable work. One such alloy made the jet plane a success. It was used to make the blades for the gas turbine.

SUN SPICULES.—An account of solar spicules, the small spike-like prominences most commonly seen in the polar regions of the sun, is given in "Sky and Telescope." These spicules have been seen during solar eclipses, but by the use of the coronagraph it is possible to make daily observations of their numbers and duration. Dr. Walter O. Roberts, of Harvard College Observatory's Fremont Pass station at Climax, Colorado, has found that the spicules last only four or five minutes from the time they are first seen until they fade out completely. A spicule is brightest just before it attains its full height, and after reaching its maximum elongation it begins to fade out without any perceptible motion. Their average width is about 4,500 miles and most of them are only a few thousand miles high. The largest spicule sometimes lasts eleven minutes, and some of the smaller ones about two minutes. As many as twenty-five spicules have been seen simultaneously in a 60° arc of the sun's polar limb. They are not seen in disturbed regions of the sun, and they show material flowing outward from the lower layers of the atmosphere, in contrast to the ordinary solar prominences, which show material when it is falling inward to the sun's surface.

TARGET SEEN THROUGH MILES OF CLOUDS.—In the latest days of the war the secret was disclosed of the Allied Airman's "magic eye," "black box," or "gen box," as it was variously called by the R.A.F., which enabled a bomb-aimer to "see" through miles of clouds and darkness and to pick out his targets with such accuracy that it often compared favourably with daylight visual bombing. British scientists were chiefly responsible for the device, which enabled the R.A.F. and the United States Air Force to operate on hundreds of occasions when otherwise they would have been weather-bound. The "gen box" works like a fluoroscope. Electrical impulses are emitted and are reflected from objects on the ground. They return to the plane, where they are reproduced on a glass disc. This gives the bomb-aimer a contour map of the area over which he is passing. Ships can be seen, particular parts of towns identified, and industrial targets picked out when visibility is zero. The "gen box" is said to have performed brilliantly in the invasion of Southern France when the bombers, clearing the way for the invasion barges, did not hit a single Allied vessel.

TEXAS METEOR CLOUD.—The effects of a fireball seen over Texas on May 20, 1944, are described in "Sky and Telescope." The fireball travelled from west to east and left a meteor cloud; and photographs were taken by different people. Unlike some fireballs, this one did not leave a persistent train; two minutes after Ray Dudley, in the middle of Pampa, had taken a photograph, he was able to secure another one which showed a great change, in the brilliance of the meteor cloud, and in the amount of diffusion that had taken place. The sun had set 40 minutes in some places and 20 minutes in others when it was seen, and it was visible for a radius of more than 300 miles. Atmospheric resistance slowed down its speed, which

was almost below that of incandescence 13 miles north-west of Pampa. A provisional path of the fireball has been computed, and it appears that it became visible at a height of 56 miles, the dense cloud being formed at a height of 23 miles, and its direction of flight was at an angle of about 45° to the horizon.

TEXTILE RESEARCH.—A scheme for the furtherance of higher education and research in relation to textile industries has been established by Textile Machinery Makers, Ltd., the constituent firms of which are Platt Brothers and Co., Ltd., Howard and Bullough, Ltd., and other textile machinery manufacturers. It provides for the expenditure of £35,000 over a period of seven years, the administration of the funds being vested in a Board of Trustees for the award of "The Sir Walter Preston Scholarships and Research Fellowships" and tenable in the Faculty of Technology of the University of Manchester, or in other university institution. The scholarship awards will be (a) for works apprentices who have obtained the Higher National Certificate in Mechanical Engineering (£250-300 a year for three years); (b) for works apprentices who have obtained the Ordinary National Certificate in a textile or equivalent subject (£225-300 a year for four years); and (c) for secondary school leavers possessing the Higher School Certificate or equivalent qualification (£200-250 a year for three years). The courses will be in textile engineering, mechanical engineering, textile technology, or economics. A small number of scholarships—(d) £300-350 a year for three years—will also be offered to honour graduates in science or engineering in order to attract suitable workers into the textile machinery industry or the textile industry. The Trustees are also empowered to award one or more research fellowships to enable a selected candidate from (a), (b), (c), or (d) to continue in advanced study and research for a further period of two, three, or four years, with grants of £400-550 a year. In deciding on the scale of assistance under the scheme, the directors of Textile Machinery Makers, Ltd., have been guided by two main considerations: compensation for the sacrifice of freedom to engage in remunerative occupation; and enabling all scholars to play a full part in the social, athletic and other extra-curricular activities of university life.

TITAN'S ATMOSPHERE.—Dr. Gerald P. Kniper, of the McDonald Observatory of the Universities of Chicago and Texas, has photographed the spectra of Titan, the largest of the satellites of Saturn, and added considerably to our knowledge of its atmosphere. It has been known for several decades that Titan had an atmosphere, and now it is revealed that, like Saturn, it contains methane and ammonia. Although the gravitational pull of the satellite is only about one-seventh that of the earth, and hence we should not expect it to retain an atmosphere, yet, owing to its great distance from the sun, it receives only about 1 per cent. of the solar radiation which our moon receives. As a consequence, its temperature is very low, probably about -180° C., and everything except methane must be frozen to the surface. It is believed that clouds or droplets of ammonia are suspended in the methane atmosphere of Saturn, and probably the same is true of the atmosphere of Titan. A common origin for the satellite and its primary is indicated by the similarity of their atmospheres, in spite of the fact that the density of Titan is about five times that of Saturn.

TOPOGRAPHIC MAPS.—Official maps on a large

scale are available for few parts of the world outside western and central Europe, including the British Isles, the eastern United States, India, and parts of Burma, the Netherlands East Indies and Japan. In the "Geographical Review," a coloured world map on a scale of 1 to 50,000,000 compiled by R. R. Platt shows the distribution of official topographic maps available at the outbreak of war in 1939. It covers scales up to and including 1:253,440 (4 miles to 1 in.). Three categories are recognised, scales of 1 mile to 1 in. or larger, those of 1-2 miles to 1 in. and those of less than 2 miles down to 4 miles. Under each category distinction is made between maps based on topographic survey on which relief is shown by contours or hachures, and maps of less complete detail with relief shown by form lines or hill shading.

TYNDALL'S LIBRARY.—An annotated catalogue of the works on physics contained in the library of Prof. John Tyndall, Professor of Natural Philosophy at the Royal Institution, has been published by Messrs. Sotheby. A manuscript catalogue of the library, with two thousand entries, and numerous scientific notes of Tyndall and short autobiographical details of his boyhood, is of particular interest. Another note-book of seventy pages contains notes of his original drafts of papers and reviews, with suggestions of experiments to be made. A great deal consists of personal notes, not without their humorous aspect. Of Prof. Forbes, his opponent on the glacier problem, he writes, "The late Principal J. D. Forbes was a man not slow to anger. He was so sensitive as to his fame, and so eager to secure it that honest criticism was regarded by him in the light of personal attack." Of Prof. Tait, he says, "I have heard Prof. Tait described as a rude overgrown schoolboy." The same note-book contains the first draft of his sensational presidential address at the Belfast meeting of the British Association.

UNIVERSITIES AND RAILWAYS.—The London, Midland and Scottish Railway has set up a scheme whereby members of its research staff will be sent to carry out fundamental research in university laboratories; and, in exchange, the universities will be invited to send members of their staffs to spend a period in the company's Research Laboratory at Derby, working on applied problems in which they are interested from the fundamental side. On one hand, it is hoped the company's staff visiting the universities will be invited to assist in teaching, so bringing the practical atmosphere to the university lecture-room; on the other hand, university research men will be brought more closely into contact with the problems of industry. The L.M.S. Research Laboratory has a staff of seventy research workers, and has sections dealing with engineering, metallurgy, chemistry, physics, paint and textiles; hence it can provide a varied experience for university research workers able to take advantage of the scheme. This exchange of research workers should prove an important step in promoting that two-way flow of research personnel between industry and the university, the need for which has been emphasised in recent years.

VISUAL AIDS IN THE SCHOOLROOM.—Mr. R. W. Moore, headmaster of Harrow, in a paper read at the Royal Society of Arts, drew attention to the need for improved visual aids in the schoolroom. The progressive teacher, he said, is alive to the use of the epidiascope, and films have established themselves as an important subsidiary in schools. But the past visual factors have been neglected.

Yet we must ask ourselves whether worse dangers than those of neglect are not involved in the uncritical multiplication of visual aids. Illustration is confused with explanation. Excess of detail, leading to distraction and irrelevance, abounds. Our chief need is that of a psychology of education which will take account of these visual adjuncts and order them. The subjects which most need visual aids are science, history and geography. Of the three, science is the best case, because observation has long since been recognised as basic in the scientific tradition, and scientific men have a professional bias towards, and a mechanical dexterity in, the manipulation of visual aids. History is the most difficult to accommodate to such aids. Geography stands between. It is the study of man in his natural environment. It should have its roots in observation and begin with local investigation. But how are we to extend the process towards a knowledge of world geography? How is the child in a London school to observe India and South America? Films here are valuable, but the material available is poor. The present needs are: (1) that research and experiment be made inside the teaching profession towards ascertaining what visual aids are appropriate to particular subjects and purposes, and (2) that there should be thorough co-operation between teachers and manufacturers before and during production.

VITAMIN A AND ST. JEROME.—Dr. F. Sherwood Taylor, of the Museum of the History of Science, Oxford, draws attention in "Nature" to a passage in St. Jerome's "Life of St. Hilarion," written about A.D. 392, which appears to be the earliest account of the causes, symptoms and cure of severe vitamin A deficiency. "From his thirty-first to his thirty-fifth year he had for food six ounces of barley bread, and vegetables slightly cooked without oil. But finding that his eyes were growing dim, and that his whole body was shrivelled with an eruption and a sort of stony roughness (*impetigine et pumicea quadam scabredine*) he added oil to his former food, and up to the sixty-third year of his life followed this temperate course, tasting neither fruit nor pulse, nor anything whatsoever besides." This combination of an eye-affection, night-blindness or perhaps xerophthalmia, with a severe hyperkeratosis, says Dr. Sherwood Taylor, precisely resembles the condition described as occurring in Chinese patients who had received a diet not unlike that of St. Hilarion, namely, a cereal other than wheat, white cabbage and salted vegetables. These patients were speedily cured by cod-liver oil or carotene; and it seems probable that a crude and unpurified olive oil, such as St. Hilarion would have permitted himself, would contain enough of the fairly high vitamin. A content of the olive to relieve his symptoms and maintain good health.

WAX PENCILS FOR WRITING ON GLASS.—In a letter to "Nature," Mr. J. E. Lovelock, of the National Institute for Medical Research, describes a method of preparing wax pencils which will write on cold wet glass. They can be prepared, he says, by the addition of 5-10 per cent. of a detergent, preferably cationic, to the wax and pigment mixture forming the pencil "lead." The following formula can be made up in the laboratory without special skill:

Hard paraffin wax (m.p. 65° C.)	100 gm.
Beeswax	20 "
"Vaseline"	20 "
C.T.A.B. (Cetyl trimethyl ammonium bromide)	10 "
Fat soluble dyestuff (for example, Sudan III)	0.5-1.0 "

The mixture is heated on a water bath and stirred until the waves have melted and the dye and detergent dissolved; 20 gm. of titanium oxide or other white pigment are then stirred in. The pencils are made by casting the mixture in sticks about 6 in. long by $\frac{1}{2}$ in. in diameter and wrapping in paper.

WEED KILLING BY METHOXONE.—A new type of selective weed-killer for agriculture has been discovered by Imperial Chemical Industries. After exhaustive tests lasting two years, trials have now been put on a nation-wide basis by I.C.I. and the Ministry of Agriculture. The weed-killer, which is known as methoxone, is a growth substance of the plant hormone type. Its selective properties lie in its power to kill certain types of weeds while leaving cereal crops and grasses unharmed. The trials showed that when it is applied at a rate of 1 lb. an acre, weeds such as yellow charlock, wild radish, corn buttercup, and pennycress growing in corn are killed, but the crop is unharmed. Weeds can be eliminated in the early stages of growth before they have robbed the crop of the food available in the soil. In grassland buttercup has been completely eliminated.

WHIPPLE COMET'S NEIGHBOUR.—Julie Vinter-Hanson has written in the "Publications of the Astronomical Society of the Pacific" an account of some comet observations which may throw light on the erratic behaviour of comets in their sudden variations in magnitude. On March 29, 1943, Arend, at Uccle, noticed a nebulous object of 13th magnitude with a nucleus, and the object was close to Comet Whipple. Subsequent measurements showed that its position must have coincided with that of the comet on March 28-5. At Zurich, Dr. Brunner-Haggen's photographs of the comet on nearby dates confirmed the view that the nebulous object had split off from the comet on March 28-5. On March 27-8 a fine aurora was seen, and from the time which elapsed between the appearance of the aurora and formation of the cometary object, it was deduced that the solar corpuscles, which are responsible for the auroras, travelled at the rate of one astronomical unit in about 30 hours. It is known that this is near their speed, and the presumption that corpuscles shot off from the sun were responsible for disintegrating a portion of the comet's tail is strong.

WHISTLES FROM THE ETHER.—Weak, short-lived radio whistles of rapidly descending pitch have been noticed at the Delhi receiving station of All-India Radio when a receiver is tuned to the carrier wave of nearby short-wave transmitters. Two explanations of these peculiar whistles are put forward by S. R. Khastgir in the "Indian Journal of Physics." In each explanation the phenomenon is attributed to the entrance of a meteor into the earth's upper atmosphere. In the first hypothesis the meteor is supposed to produce a rapidly moving mass of ionised air at its head. This local Heaviside layer scatters the incident radiation from the transmitter, the rapid descent causing a Doppler change in the frequency of the scattered waves. These then interfere with the ground waves reaching the receiver, and an audible beat note is produced. As the descent is retarded by atmospheric resistance the Doppler shift lessens, and the pitch of the whistle drops. On a carrier wave of 7 Mc./s. a whistle starting at 3,000 c./s. would be caused by a meteor with a maximum velocity component of 64 km./s. towards the receiver. In the second hypothesis the retardation of the meteor in the ionosphere produces an

electrical impulse similar to audio-frequency static. The Fourier components of this impulse, transmitted at different velocities through the ionosphere, will reach its lower fringe in succession (the shorter waves first) and modulate the scattered carrier waves at a frequency which is a function of time. A receiver tuned to the carrier will thus reproduce a whistle descending in pitch at a rate which should depend on the ionisation. There seems no doubt that the whistles frequently coincide with observed meteors, and that they occur most often in the early morning, when the number of meteors is a maximum.

WHITE DWARF BINARIES.—"Sky and Telescope" contains an account of white dwarfs which form binary systems, the first discovery being made recently by Dr. W. J. Luyten. The twins were found in Antlia of magnitude 14, nearly identical in colour. Originally a wide double star, Dr. Luyten found that the fainter component of the wide pair was merely an optical companion, but the brighter component appeared elongated. Verification of the double character of the star was obtained from Mount Wilson, where a photograph with the 100-in. telescope revealed two stars separated by 3" and differing by 0.3 magnitude. Their orbit shows a period of 250 years. It is conjectured that the twins are each intrinsically 1,600 times less luminous than the sun and have diameters smaller than that of the earth. Assuming that their masses are about that of the sun their densities are about 25 tons per cubic inch, or more than $1\frac{1}{2}$ million times the density of water.

WHITE RAINBOW.—Mr. R. H. Stevens, of Malvern, contributes to "Nature" an account of a white rainbow seen at about 10.30 a.m. on Nov. 8, 1944. It was observed after a short snowstorm, but no snow could be seen to be falling at the time. The white rainbow, also known as the "fog-bow" or "Ulloas Ring," is a rare phenomenon due, as in the case of the coloured rainbow, to refraction and reflection of sunlight in falling drops of rain, but the raindrops composing the cloud must be very small—0.1 mm. or less in diameter. In this case the first maxima of intensity for the different colours of the spectrum are spread out over a wider angle than with the larger drops, and are nearly coincident, the result being to restore the original colour of the sunlight. The bow is only bright enough to be visible in exceptionally favourable circumstances and when the observer is near the cloud which contains the small drops. In this instance the snow probably originated from clouds at a higher level than that of the cloud which carried the water drops.

WOOL NEXT THE SKIN.—Mr. B. H. Wilsdon, director of research to the Wool Industries Research Association, in his annual report, states that a physiological problem arises in the use of wool next to the skin—that of "tickle." This is an idiosyncrasy, he says, for which no adequate explanation has been given. There is a considerable amount of evidence that the reaction can be moderated when wool is given a chemical treatment such as that afforded by papain, which reduces the scaliness of the fibre. The claim that this treatment produces a "non-tickle" wool is avoided. It is believed that certain sensitive subjects may still react. This is a subject for statistical study; the type of reaction may be quite dissimilar in different cases. The possibility must not be disregarded that some degree of "tickle" may be of definite hygienic value in "stimulating" the skin and controlling the peripheral circulation.

CORRECTING FOR THE PRESS.

Compiled by WILLIAM CLOWES & SONS, LTD, Printers of "WHITAKER'S ALMANACK."

The following extract is set up incorrectly in order to explain the conventional methods of correcting for the Press:—

¹0/ The process of printing, when compared with that of writing, is unquestionably a ~~dear~~ process; provided a sufficient number of any particular book are printed, so as to render the proportion of the first expense upon a single copy inconsiderable. If, for example, it were required, even at the present ~~moment~~ time, to print a single copy, or even three ^{copies} or four, only of any production, the cost of printing would be greater than the cost of transcribing.)

(It is when hundred and especially thousands, of the same work are demanded that the great value of the printing press in making knowledge cheap is particularly shown. [It is probable that the first printers did not take off more than two or three hundred, if so many, of their works, and, therefore, the earliest printed books must have been still dear, on account of the limited number of their readers. CAXTON, as it appears by a passage in one of his books, was a ~~country~~ printer; and required something like an assurance that he should sell enough of any particular book to repay the cost of producing it. In his 'Legends of Saints,' he says, "I have submysed (submitted) myself to translate into English the ³ ² ¹ Saints of Legend," called 'Legenda aurea' in Latin; and William, Earl of Arundel, sent me a worshipful gentleman, promising that my said lord should, during my life, give and grant to me a yearly fee, that is ⁶⁰ note, a buck in summer and a doe in winter.

²⁴ desired me — and promised to take a reasonable quantity of them — and

1. Is the mark for changing the wrong letter in the word process.
2. To substitute one word for another.
3. and 24. The first is the method of marking a short insertion, the second of marking a long one.
4. To have a space put between the two words.
5. To turn a letter which has been placed upside down.
6. To close the word in which a space has been improperly left.
7. and 8. To take away (*delete*, blot out) a superfluous letter or word.
- 9, 19, and 22. Different marks for transposing the arrangement of letters, words, or sentences.
10. To have no fresh paragraph.
11. To substitute a comma for a full-point or period.
13. To commence a new paragraph.
- 14, 19, 21, and 27. To insert points and marks of quotation.
23. To have any particular part printed in italic.
26. To have words or letters printed in 'lower case,' or small letters, Roman is always understood, unless otherwise directed.
27. To have a word remain, which has been accidentally or erroneously marked. *Stet* is the Latin for 'let it stand.'
28. Points out a letter which does not match with the others: a 'wrong fount.'
29. and 30. To have certain parts printed in small or full capitals.
31. To set straight whatever may stand crooked.
32. To have the necessary black mark between the words, which arises from what should form the space not being set straight.

LITERATURE OF THE YEAR.

THE demand for books at the present time continues greatly to exceed the supply. The production of books in Great Britain in 1944 amounted to 6,782 titles, of which 889 were reprints. The comparable figures for 1943 were 6,705 titles, of which 1,202 were reprints. Complete figures for 1945 are not available at the time this record goes to press but production during the first eleven months of the year amounted to 6,189 titles of which 832 were reprints. The average annual total before the war was 15,000 titles.

The fact that the output of books during 1944 was only 76 titles more than that of 1943, while 1945 seems unlikely to show any very great advance, despite the successive increases in the book publishers' paper quota, indicates that the extra paper has been used for larger editions rather than for new publications. When it is further borne in mind that not a few books issued during the year were published either by newly established publishers or by firms who previously were not regarded as being mainly book publishers, it may be deduced that the established book publishing industry is undergoing one of its least productive periods as far as output of new work is concerned.

Nevertheless the volume of business done continues to increase. In 1944 the total turnover reached the record figure of £20,500,516. (In 1939 the figure was £10,321,568). This striking increase, which means that the nation's expenditure on books *per capita* has doubled during the six years of war, is only partly due to the raised prices of books, which have not in general exceeded pre-war prices by more than a third. There is abundant evidence that the ordinary person's appetite for reading has been considerably sharpened, since reading has been one of the few recreations available during recent years. Whether this will continue when normal peacetime conditions return is frequently debated, not always optimistically, within the book trade; it is pointed out, for instance, that many books are now bought as presents, simply because their purchasers cannot procure anything else, and that as soon as other goods become plentiful again such book-buying will cease. Against this contingency, which represents one of the more superficial aspects of the situation, there is to be balanced the much more important facts that publishers' stocks are now exhausted while current manufactures are inadequate, that the need for books in every stage of education from primary school to university is exceedingly acute and that the majority of classics and staple books are out of print. It therefore seems likely that it may be several years before the supply of books can equal the demand.

The end of the war has greatly intensified the demand for British books in the liberated countries of Europe. Within a month or two of the cessation of hostilities, official deputations representing the publishing interests of various European countries followed each other to London, each testifying to the hunger for English books felt by people who for years had been starved of all literature except that provided by their oppressors. British publishers, anxious though they are to satisfy such welcome customers, have been unable to meet the demand. Shortages of both material and labour continue to be severe.

On December 21, 1944, a deputation of Members of both Houses of Parliament was received by the Ministers of Production and Labour, the President of the Board of Trade and the Parliamentary Secretary deputizing for the Minister of Supply. The deputation, headed by Lord Samuel, urged the Government to recognize books as something

more than mere merchandise, to increase immediately the yearly allocation of paper for books by 10,000 tons, to release paper-making, printing and bookbinding employees from munitions and Civil Defence. The Ministers disclaimed any wish to be "on the side of the Philistines"; Mr. Lyttelton, while offering no hope of any substantial increase in the supply of paper in the immediate future undertook to review the situation. Mr. Bevin said that if Mr. Lyttelton could find more paper he himself "would not say that the necessary labour was not forthcoming."

In March, 1945, the necessity of providing more paper for books was the subject of a debate in the House of Lords in which it became clear that the book trade's need for more paper commanded universal support (except perhaps from the Government spokesman, who nevertheless promised that when the Baltic trade was reopened the paper position would be improved). The debate was opened by Lord Elton, who said: "Liberated Europe is already thirsting for British books. They need British books to fill a five years' gap in their own libraries. They need them to discover how the British lived and thought during these five years, and they need them to take the place of Germany as the primary source of text books for the Continent." In May the L.C.C. Education Committee added its voice to the growing chorus demanding more paper for books. The Committee had examined the effect of the paper shortage on the supply of school books, and had found that schools are frequently handicapped by the lack of the particular books required, with the result that curricula had to be adapted to the textbooks available instead of the reverse, and that frequently the books obtainable are not suitable to the ages of the pupils or to the teaching methods the school wishes to pursue. "The shabby and dirty condition of a large percentage of the books," added the Committee's report, "shows that they cannot last much longer; and the consequent reduction in the general stock combined with the anticipated substantial increase in the rolls when the evacuated children return will create a serious problem." The plight of medical students was described by Viscount Buckmaster in the House of Lords, who said that medical publications are so restricted that "it is difficult to see how the study of medicine can be pursued or how medicine can be practised in the manner we expect."

The book publishers' paper ration, as a result of these and similar representations, was raised twice during the year. In July, 1945, it was raised from 42½ per cent. to 50 per cent.; in October it was raised to 65 per cent. In announcing this further increase the Board of Trade appealed to book publishers "to make a real effort to ensure that the greatest possible amount is set aside for export."

The British book trade's performance in regard to exports has always been a notable one. In 1939 it exported books to the value of £3,500,000. In 1944 despite paper rationing, the greatly increased demand from the home market and severe losses by enemy action, it raised that figure to £4,895,349. Possibly only pre-war Germany could produce comparable figures. This year a powerful rival in the claim for world markets for English books has made its appearance: this is USIBA (United States International Book Association, Inc.) a co-operative organization founded in the U.S.A. for the purpose of developing the export sales of American books. American publishers, having already a continent as their home market, have not hitherto been conspicuously "export-minded," but USIBA, membership of which is

open to all American publishers, is building itself up with great speed and energy. It enjoys the benevolent consideration of the U.S. Government. Some observers, on either side of the Atlantic, see this American drive for book exports as a struggle with British book publishers. Others welcome it as being a valuable continuation into the peace of the joint endeavours which proved victorious in war; the latter opinion was expressed by Mr. Winant, the American Ambassador. Opening a British Books Exhibition in London in the Spring, he said: "It seems to me that whenever the English publishers gain new readers for your books, or the American publishers gain new readers for our books we must both benefit, since the most important thing which has happened is that new readers have been gained for books in the English language. . . . Surely it is true that we can never swamp each other's market, that we can only open up new fields in common? Every time a citizen of a non-English speaking country reads a book in the English language, the publishers in both our countries acquire a new customer."

ITEMS OF INTEREST.

A delegation of Canadian publishers and book-sellers visited London and held conversations with British publishers with a view to improving the standing and distribution in the Dominion of British books which for some years have been declining owing to a variety of causes. Mr. W. G. Taylor, Chairman of the Canada Committee of the Publishers Association, wrote in *The Book-seller*: "It is no mere matter of trade, to be dealt with simply by commercial agreements. Religion, politics, ethnography, geography—each is a major factor to be taken into account if a right answer is to be found in the question: Can the Canadian market for English books be expanded or even maintained?"

A world survey of devastated libraries in war areas has been instituted by the U.S. Library of Congress. Facts already reported indicate that 200 of the world's great libraries have suffered damage in comparison with which the damage caused by World War I was negligible. Mr. Kefauver reported that the library and archives of Strasbourg University were stored in a granary and eaten by rats and mice.

The National Book League, organized to further the interests of all users of books, has expanded its membership and formed branches in a number of towns.

The first non-Nazi school reader was used in May in a school in Aix, the first school to be opened under the supervision of the Allied Military Government. It was a textbook of German authorship and was reprinted without textual revision. An official prefatory note explained that its issue "does not imply that it is entirely suitable for an educational point of view, or otherwise. It was merely the best book that could be found in the circumstances, and must serve until Germany can produce better textbooks of her own."

In the week ending May 12, 1945, exactly 5 years after the German invasion of Holland and Belgium, the first consignment of British books to reach Belgium was unloaded at the W. H. Smith bookshop in Brussels. News of the arrival of the books spread rapidly about Brussels, there was a rush to the bookshop from all parts of the city, and the stocks disappeared as soon as they were unpacked.

Mr. Stanley Morison, the expert on typography, was appointed editor of the *Times Literary Supplement*.

Dr. G. M. Trevelyan, O.M., delivered the 1945 National Book League's annual lecture, taking for his subject "History and the Reader." Even when paper supplies became plentiful, he said, modern conditions would not be favourable to the supply of history books. He said that owing to increased manufacturing costs publishers can no longer afford to reprint old books of standard value, e.g. Lecky's *History*, for which there is always a certain demand but not one big enough to repay the costs of re-publication.

Literary Prizes: The 1945 James Tait Black Memorial Prize for the best biography published in 1944 was awarded to Miss C. V. Wedgwood for her "William the Silent 1533-1584." The award for the best novel was given to "Young Tom" by Forrest Reid.

The 1945 Pulitzer Prizes were awarded as follows: (fiction) "A Bell for Adano," by John Hersey; (poetry and drama) "Harvey," a play by Mary Chase, and "V-Letter and other Poems" by Karl Shapiro; (history) "Unfinished Business" by Stephen Bonsal; (biography) "George Bancroft" by Russell B. Nye.

The Brazil Prize, awarded through the P.E.N. by the Brazilian author, Paschoal Carlos Magno, for the best long poem by a British author, was awarded to Robert Conquest for his poem "For the death of a Poet."

The Bowley Prize, awarded every three years by the London School of Economics was given this year to Tibor Barna for his book "Redistribution of Income Through Public Finance in 1937."

Frederic G. Melcher, editor of the New York "Publishers' Weekly" and one of America's greatest bookmen, celebrated his 50th year in the book trade. He spent a month in England in the summer as the guest of the National Book League. In the autumn the editor of the London *Bookseller* made a reciprocal visit to the United States as the guest of the *Publishers' Weekly*.

Penguin Books, the remarkable series of cheap books which have become world famous, completed their first ten years of existence on July 30, 1945.

The World's Classics series reached its 500th volume, Bernard Shaw's "Back to Methuselah."

The British Council completed its tenth year in July, 1945. In those ten years its annual expenditure has increased from £5,000 to about £2,350,000, and a notable part of the Council's activity has been to make British books better known and more easily available abroad. It has built up libraries in its own institutions, strengthened existing collections of British works in libraries overseas and encouraged the sale of British books. Its Book Export Scheme, offering certain facilities based on local requirements to British exporters and overseas booksellers, has been progressively developed. During the past year it has executed orders for 150 foreign booksellers in 14 countries, and with the liberation of Europe and improved transport facilities the value of the Scheme is likely to increase.

Expenditure on books to the extent of £15,000 is necessary to bring the House of Commons Library up to date. In addition, an annual sum of at least £4,000 must be spent on books if the library is to be of any real use to its members. (These are the recommendations of the retiring librarian, Mr. J. V. Kitto, in a memorandum to the Speaker, in which he urges that the library should be thoroughly re-organized, re-catalogued and brought up to date.) He stated that during the last 30 years, excluding the war years, an annual average of £500 to £600 is all that has been spent on the library.)

The Associated Booksellers of Great Britain and Ireland celebrated its Golden Jubilee this year.

At Christmas, 1944, five months before the rest of Norway was liberated, British books reached Northern Norway. In February, 1945, Norwegian authorities in London learnt that the books had arrived safely. Thereafter, supplies of books have been sent regularly to Norway.

In May an agreement was signed between Mezhdunarodnaya Kniga, Moscow, and a London publishing firm, by the terms of which Mezhdunarodnaya Kniga will distribute in the U.S.S.R. Russian translations of English books. "The practical success of the scheme will depend," says *The Bookseller*, "on the readiness of authors and other owners of copyright to co-operate."

The Authors' Society held a *Conversazione* in June to mark the Society's Diamond Jubilee. Mr. John Gielgud read extracts from the works of former Presidents of the Society, Tennyson (1884-1892), Meredith (1892-1909), Hardy (1909-1928), and Barrie (1928-1937). Mr. John Masfield, O.M., the Poet Laureate, who succeeded Sir James Barrie in the office, spoke his own verses.

The National Book League's Exhibition of the 50 Books of the Year, after being shown in this country, was taken overseas. In the foreword to the catalogue the modest claim was made that "something of the spirit of craftsmanship" shone through all the handicaps and restrictions which have beset book production for the last five years. People abroad who have seen the Exhibition do not consider that there is any call for diffidence on the part of this country, and warmly acclaim the achievements which these books represent. At the opening of the exhibition in New York, T. M. Cleland, prominent illustrator and designer of printing, said: "This collection is a double miracle; the miracle that the books are here at all and the miracle that they are as fine books as they are."

BOOKS PUBLISHED.

Among the books published during 1945 the following have won critical acclaim or popular approval, or both:

Politics and World Affairs.

"The Dawn of Liberation," war speeches by the Rt. Hon. Winston S. Churchill; "Imperial Commonwealth," by Lord Elton; "Full Employment in a Free Society," by Sir William Beveridge; "Water under the Bridges," by Sir Neville Henderson; "The Outlook for International Law," by J. L. Briery; "Russia and the Peace," by Sir Bernard Pares; "The German Mind and Outlook," by G. P. Gooch; "Law and Orders," by C. Kemp Allen; "Government Control in War," by Lord Hankey; "Peace Conference of 1919," by F. S. Marston; "Economic Developments in South-East Europe," a P.E.P. report; "Public Opinion and the Last Peace," by R. B. McCallum; "Germany's Three Reichs," by Edmond Vermell; "Thrice against England," by Kurt Stechert; "The Promise Hitler Kept," by Stefan Szende; "France: The Birth of the Fourth Republic," by Maurice Edelman; "Rebuilding Britain: A 20 Year Plan," by E. D. Simon; "The Zionist Movement," by Israel Cohen; "The Left was never Right," by Quintin Hogg; "Why not Trust the Tories," by "Celticus"; "The Free State," by D. W. Brogan; "The Yogi and the Commissar," by Arthur Koestler; "Management and Men," by G. S. Walpole; "And yet I like America," by James L. Hodson; "The Children

of Light and the Children of Darkness," by Reinhold Niebuhr; "The Son of Heaven," by Willard Price.

The War.

"His Majesty's Submarine," H.M.S.O. pamphlet; "Eclipse," by Alan Moorehead; "My Visit to Russia," by Clementine Churchill; "Road to Rome," by Christopher Buckley; "Eight Days that Freed Paris," by Claude Roy; "Farewell Campo 12," by James Hargest; "Arnhem Lift," by a Glider Pilot; "Beyond the Chindwin," by Bernard Fergusson; "Long Range Desert Group," by W. B. Kennedy Shaw; "Lower Deck," by John Davies; "Morning Will Come," by Gordon Waterfield; "The Golden Carpet," by Somerset De Chair; "Glory and Bondage," by Edgar Snow; "Chungking Diary," by Robert Payne; "Maquis," by George Millar.

Religion and Philosophy.

"God and the Atom," by Ronald Knox; "Man, Morals and Society," by J. C. Flugel; "Introduction to Kant," "Critique of Pure Reason," by T. D. Weldon; "The Heart of Pascal," ed. H. F. Stewart; "Kierkegaard's 'The Concept of Dread,'" ed. Walter Lowrie; "The Philosophy of Bertrand Russell," ed. Paul Arthur Schilpp; "The Nature of Metaphysical Thinking," by Dorothy M. Emmet; "The Shape of the Liturgy," by Dom. Gregory Dix; "Christianity and Democracy," by Jacques Maritain; "Civilization, Science and Religion," by A. D. Ritchie; "Thoughts, Deeds and Human Happiness," by K. W. Monsarrat; "Wilhelm Dilthey," by H. A. Hodges; "The Interpretation of the Bible," ed. C. W. Dugmore; "A Plain Man Looks at the Cross," by Leslie D. Weatherhead; "The Secret of the Little Flower," by Henri Gheon.

History.

"Years of Victory," by Arthur Bryant; "The Condition of Man," by Lewis Mumford; "A Century of Co-operation," by G. D. H. Cole; "Eastern Europe between the Wars 1918-1941," by Hugh Seton Watson; "The Naval Heritage," by David Mathew; "The Matabele Journals of Robert Moffat," ed. J. P. R. Wallis; "Diplomatic History," by Sir Charles Petrie; "A Handlist of News Pamphlets 1590-1610," by D. C. Collins; "Origins of the American Revolution," by John C. Miller; "Assize of Arms," by J. H. Morgan; "The Evolution of Modern Italy, 1715-1919," by A. J. Whyte; "Church Life in England in the 13th Century," by John R. H. Moorman.

Biography and Letters.

"Siegfried's Journey," by Siegfried Sassoon; "Drums under the Windows," by Sean O'Casey; "Beatrice Webb," by Margaret Cole; "George Saintsbury," the Memorial Volume; "Der Fuhrer," by Konrad Heiden; "Charles Dickens," by Una Pope-Hennessy; "So Many Lives," by Leo Walmsley; "The Aesthetic Adventure," by William Gaunt; "Confessions of an Un-Common Attorney," by Reginald L. Hine; "Stalin 1879-1944," by J. T. Murphy; "The First War Correspondent," W. H. Russell of *The Times*, by Rupert Furneaux; "Eamon de Valera," by M. J. MacManus; "Beethoven," by Emil Ludwig; "Left Hand, Right Hand," by Osbert Sitwell; "Mainstream," by Hamilton Basso; "Bridge into the Future," Letters of Max Plowman, ed. D. L. P.; "Life of Richard Wagner, Vol. III," by Ernest

Newman; "A Forgotten Genius" (William Sewall), by Lionel James; "Life and Work of John Tindall," by A. S. Eve and C. H. Creasey; "The Life and Works of the Honourable Robert Boyle," by Louis Trenchard More; "Rudyard Kipling," by Hilton Brown; "George Gordon at Oxford," by M.C.G.; "Rufus Isaacs, First Marquess of Reading, Vol. III," by the Marquess of Reading; "Time's Winged Chariot," by Ernest Thurtell; "Remembering My Good Friends," by Mary Agnes Hamilton.

Criticism.

"Friday Mornings," by Harold Nicolson; "Shakespeare's History Plays," by E. M. W. Tillyard; "Beethoven," by Donald Francis Tovey; "Robert Bridges 1844-1940," by Edward Thompson; "Virginia Woolf," by Joan Bennett; "Plato's Examination of Pleasure," by H. Year	Total Turnover	Value of Exports
1937	£10,507,204	£3,146,175
1938	10,706,018	3,171,018
1939	10,321,658	3,154,599
1940	9,953,196	3,517,335
1941	13,986,700	3,983,900
1942	16,735,900	3,608,700
1943	19,290,800	4,469,600
1944	20,509,516	4,895,349

DRAMATIC SUMMARY, 1944-1945.

THE LONDON STAGE.—The end of hostilities in Europe, and only three months later, of the war against Japan, could not fail to affect favourably every theatre in the West End so far as attendances went, but the return of peace and security was not followed by any appreciable raising of the standard of the British drama or by the discovery of new playwrights. The season was, however, made memorable by the productions of the Old Vic Company at the New. A notable group of players, headed by Laurence Olivier, Ralph Richardson, Dame Sybil Thorndike, Nicholas Hannen, George Relph and Joyce Redman, appeared in a succession of plays of varied type, and for several months the New was a magnet for all lovers of good acting and fine drama. First came Tchekov's *Uncle Vanya*, then the two parts of Shakespeare's *Henry IV*, followed by a translation of *Calypso*, and finally Sheridan's immortal *Critic*. Not content with their London triumphs, the company paid a brief visit to Paris and filled the Comédie Française, while the French players occupied the New. Another event was the re-opening of Sadler's Wells with a new British opera *Peter Grimes*, by Benjamin Britten. There was also a Shakespearean season at the Open Air Theatre in Regent's Park, and John Gielgud offered three notable revivals—*A Midsummer Night's Dream*, Webster's *Tragedy, The Duchess of Malfi*, and *Lady Windermere's Fan*—while Sheridan's *Rivals* won fresh admirers at the Criterion. Of the new plays, the most interesting were *Duet For Two Hands*, which added to the laurels of Mary Hayley Bell, and *The Hasty Heart*, by John Patrick. Terence Rattigan had another success in *Love In Idleness*, in which the Lunts made a popular return to London, and Noel Coward was content with an amusing modern revue, *Sigh No More*, apart from a revival of *Private Lives*, which ran through the year, and a continuance of *Blithe Spirit*, which showed no sign of exhausting its appeal. Another good play by Esmyn Williams, *The Wind of Heaven*, *Lady from Edinburgh*, by Aimée Stuart and L. Arthur Rose, *Madame Louise*, by Vernon Sylvaine, *The First Gentleman*, by Norman Ginsbury and *The Shop at Sly Corner*, by Edward Percy, were other winners of the year.

The following is a list of productions between Nov. 1, 1944, and Oct. 31, 1945:—

ADELPHI, Strand, W.C.a.—(1944) Nov. 2. *Merry-Go-Round*, Anglo-Russian entertainment, devised by Eugene Iskoldoff (Mr. George Lacy and Mesdames Pat Leonard and Nina Tarakanova). WYNDHAM'S, Charing Cross Road, W.C.2.—(1945) *Jan. 10. The Years Between*, by Daphne du Maurier (Messrs. Clive Brook and Ronald Ward and Mesdames Nora Swinburne and Henrietta Watson).

THE FILMS.

THERE were many indications during 1945 that Hollywood, if not progressing backwards, was at least standing still in respect of film production, and the year saw few noteworthy American productions. On the other hand, despite the retention of war-time conditions and scarcities, there were several British films which showed that our studios, under all the difficulties of the time, had learned their lesson well, had correctly judged what the public wanted, and, in some ways, were beating their mentors. In addition to a number of first-class documentaries, of which *Western Approaches* must be mentioned, two splendid films with a R.A.F. background were shown, *The Way To The Stars* and *Journey Together*. A thrilling picture illustrating the triumphs of the Fourteenth Army was *Burma Victory*, which followed close upon an American attempt, *Objective, Burma*, so grotesquely misrepresenting the part played by British and Dominion troops in the far Eastern campaign that it was quickly withdrawn and never shown except at its "shop-window" house. An interesting point was the discovery of Shakespeare as a "screen-writer." Helped by technicolour, fine direction and magnificent acting a production of *Henry V* was one of the big successes of the year. Other good home-made productions included *Perfect Strangers*, *Dead of Night*, *Waterloo Road*, *Johnny Frenchman*, *The Seventh Veil*, and *Great Day*. Among the best importations were *Wilson*, *A Song To Remember* and *The Lost Week End*.

Following is a list of the principal films shown publicly in London from Nov. 1, 1944, to Oct. 31, 1945:—

ACADEMY, 165 Oxford Street, W.1.—(1945) *Jan. 29. Prelude to War*, United States documentary, and *Hostages*, French. *Apr. 23. Le Dernier Milliardaire*, French, and *Hortobagy*, Hungarian. *June 20. They Met In Moscow*, Russian. *June 27. Our Country and Ours*, French. *July 23. The Years of Endurance*, documentary, and *La Grande Illusion* (Jean Gabin and Pierre Fresnay). *Sept. 15. Marie-Louise*, Swiss, and *Strange Incident* (Henry Fonda).

CARLTON, Haymarket, S.W.1.—(1944) *Nov. 27. Henry V.*, British version in technicolour (Laurence Olivier, Robert Newton, George Robey, Leslie Banks, Renee Ascherson and Ivy St. Helier). (1945) *Mch. 26. Here Come The Waves* (Bing Crosby, Sonny Tufts and Betty Hutton). *May 28. Bring On The Girls*. (Sonny Tufts, Eddie Bracken and Veronica Lake). *July 23. Incendiary Blonde* (Arturo de Cordova and Betty Hutton). *Sept. 17. Duffy's Tavern* (all-star film). *Oct. 19. Road To Utopia* (Bing Crosby, Bob Hope and Dorothy Lamour).

DOMINION, Tottenham Court Road, W.1.—(1945) *July 2. The Great Flamarion* (Erich von Stroheim). *July 16. Flame of Barbary Coast* (John Wayne, Joseph Schildkraut and Ann Dvorak). *Sept. 3. Dillinger* (Lawrence Tierney).

EMPIRE, Leicester Square, W.C.2.—(1944), Nov. 20. *Barbary Coast Gent* (Wallace Beery). Nov. 27. *Laura* (Clifton Webb and Gene Tierney). Dec. 8. *Dreaming*, British (Flanagan and Allen). (1945) Jan. 8. *Thirty Seconds Over Tokyo* (Spencer Tracey and Van Johnson). Jan. 19. *Mr. Parkington* (Walter Pidgeon and Greer Garson). The Doughgirls* (Ann Sheridan, Alexis Smith and Jane Wyman). *Aug. 3. The Conspirators* (Sydney Greenstreet, Peter Lorre and Hedy Lamarr). *Aug. 10. Mr. Skeffington* (Claude Rains, Walter Abel and Bette Davis). *Sept. 7. Roughly Speaking* (Jack Carson and Rosalind Russell). *Sept. 24. Objective, Burma* (Errol Flynn). *Sept. 28. Conflict* (Humphrey Bogart and Sydney Greenstreet). *Oct. 22. Indiscretion* (Barbara Stanwyck). *Oct. 26. Burma Victory*. British film of Fourteenth Army in Burma.

LOST PROPERTY.

London Regulations.

PROPERTY LOST IN CABS.

Enquiries as to property left in a taxi (or horse) cab should be made at the *Lost Property Office of the Metropolitan Police District*, 109, Lambeth Road, London, S.E.1. Office hours are 10 a.m. to 4 p.m. (Saturdays, 10 to 1). The office is *not open* on Sundays, Good Friday, Christmas Day and Bank Holidays.

PROPERTY LOST ON LONDON TRANSPORT.

Enquiries as to property left in Tube (Underground) Trains, Omnibuses, Trams, Trolley-buses, or Green Line Coaches, should be made at the *Lost Property Office of London Transport*, 200-202, Baker Street, London, W.1. Office hours

are 10 a.m. to 4 p.m. from Monday to Friday. The office is *not open* on Saturdays, Sundays, Good Friday, Christmas Day and Bank Holidays.

PROPERTY LOST IN OTHER COACHES.

Enquiries as to property left in other motor coaches should be made at the office of the coach company concerned.

RECEIPTS.

RECEIPTS should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, etc., received.

RETROSPECT OF SPORT

WORLD'S ATHLETIC RECORDS.

(All the world's records given below have been accepted by the International Amateur Athletic Federation, with the exception of those marked thus (*) which await ratification. The Congress of the I.A.A.F. has not met since 1938—records submitted since then have been provisionally accepted by the President and Secretary, but there is no reason to suppose that each will not be ratified when the next Congress is held.)

BRITISH RECORDS.

British records are those made in Great Britain by athletes of any nationality. Below are given the records for those events for which world's records are now recognised by the International Amateur Athletic Federation. In those cases where the record is held by a foreigner, the best performance by an athlete eligible to represent Great Britain in International Athletics is also given marked thus (*).

Distance.	Time.	Name.	Nation.	Year.
RUNNING.	h. m. s.			
100 yards	9 7	E. H. Liddell		1923
220 yards	21 2	W. R. Applegarth		1914
440 yards	47 6	A. G. K. Brown		1938
440 yards	47 6	M. Lanzi	Italy	1939
880 yards	1 49 2	S. C. Wooderson		1938
1 mile	4 06 4	S. C. Wooderson		1937
2 miles	9 00 6	G. Haegg, Sweden, 1945 (9 03 4)* C. A. J. Emery, 1919		
3 miles	13 59 4	T. Maeki, Finland, 1939 (14 8 8)* C. A. J. Emery, 1939		
6 miles	29 36 4	P. Nurmi, Finland, 1930 (29 45 0)* J. A. Burns, 1936		
10 miles	50 30 8	W. E. Eaton		1936
15 miles	1 04 6	F. Appleby		1902
11 miles 1,137 yards	one hour	A. Shrubbs		1904
HURDLING.				
120 hurdles (3 ft. 6 in.)	14 4	F. G. Towns	U.S.A.	1936
120 hurdles (3 ft. 6 in.)	14 4	E. H. Lidman, Sweden, 1939 (14 5)* D. O. Finlay 1937		
220 hurdles (3 ft. 6 in.)	24 7	Lord Burghley		1927
440 hurdles (3 ft.)	52 7	R. V. Cochran, U.S.A. 1939 (53 8)* Lord Burghley 1930		
JUMPING AND THROWING.	ft. in.			
High jump	6 7	C. C. Johnson, U.S.A., 1936 (6 5)* B. Howard Baker, 1921		
Long jump	25 1	E. B. Hamm, U.S.A., 1928 (24 11)* P. O'Connor, 1901		
Pole vault	14 2	E. Meadows, U.S.A., 1936 (12 9)* F. R. Webster, 1928		
Hop, step	51 3†	J. P. Metcalfe, Australia, 1934 (48 11)* T. J. Ahearne, 1908		
Weight	52 7	B. Watson, U.S.A., 1939 (47 8)* R. L. Howland, 1932		
Discus	169 11†	H. Andersson, Sweden, 1935 (153 8)* D. Young, 1928		
Hammer	183 3	K. Hein, Germany, 1937 (172 0)* M. C. Nokes, 1923		
Javelin	237 3†	J. Varszegi, Hungary, 1938 (202 2)* J. A. M. McKillop, 1939		
WALKING.	h. m. s.			
2 miles	13 11 4	G. E. Larner		1904
7 miles	50 19 2	J. Mikaelsson, Sweden, 1937 (50 28 8)* A. H. G. Pope, 1932		
10 miles	1 14 30 6	F. J. Redman		1934
20 miles	2 43 38 0†	A. E. Plumb		1937
20 miles	2 46 10 0	G. T. Galloway		1934
8 miles 474 yards	one hour	A. H. G. Pope		1932
15 miles 702 yards	two hours	R. Bridge		1924

† Made on the road.

In addition to the above records, the Amateur Athletic Association recognises records at the following distances: *Running*: 300, 600, 1,000 and 1,320 yards; 4, 5, 7, 8, 9, 20 and 25 miles, also 2 hours. *Walking*, 1, 3, 4, 5, 6, 8, 9, 15 and 25 miles. Many other achievements over distances varying from 220 yards to 50 miles' running, and 11 miles to 24 hours' walking, are acknowledged by the Association when authentic and recorded in the Annual Handbook.

THE DERBY, 1933-1945.

For particulars of the Derby from 1780-1932 see 1921-32 editions.

The Distance of the Derby course at Epsom is $\frac{1}{2}$ mile. Lord Egremont won Derby in 1782, 1804, 5, 7, 26 (also, 5 Oaks); Duke of Grafton, 1802, 9, 20, 25 (also, 9 Oaks); Mr. Bowes, 1835, 43, 52, 31; Sir J. Hawley, Tedington (1851), Beadman (1858), Must (1859), and Blue Gow (1868). The 1st Duke of Westminster, Bend Or (1880), Shotover (1883), Ormonde (1886), and Flying Fox (1890). Lady James Douglas was the first lady to win the Derby—War Substitute at Newmarket (1918); at Epsom, Mrs. G.B. Miller (1937). First winner was Sir Charles Bunbury's Diomed in 1780.

CRICKET.

Cricket is played under the "Laws of Cricket" and is governed by the Committee of the Marylebone Cricket Club (1787), Lord's, N.W. Pres.—Stanley Christopherson (from 1939). Sec.—Col. R. S. Rait Kerr, D.S.O., M.C. Asst.-Sec.—Maj. R. Aird.

COUNTY CHAMPIONSHIP TABLE, 1939.

The first County Championship was in 1873 when Gloucestershire and Nottinghamshire finished equal on points. Yorkshire won 21 times; Surrey 9; Nottingham 8; Lancs 8; Kent 4; Middlesex 4; Gloucester 2; Derby 2; and Warwick 1; Nottingham and Lancs tied in 1879 and 1882, and Nottingham, Lancs and Surrey equal in 1886.

1939 CONDITIONS.—Win, 12 pts.; Tie, 6 pts. each. Points awarded for lead in 1st innings, though losing match, or in a drawn game, 4 (2 each if tie in 1st innings). Where there is no play on the first two days the match will come under the laws for one-day games, except that a side may not declare its first innings closed until it has batted for at least sixty minutes. To decide Championship, number of points is divided by number of games finished, averages so ascertained being the order of merit.

County. Order for 1939. 1938 in brackets.	Played.	Won.	Lost.	First Innings Lead in Match.	Points Obtained.	Average.

THE OVER.

1744. Four balls to an over. 1889. Increased to five balls. 1900. Increased to six. 1939. Increased to eight. 1944. Returned to six. Australia made the change to six in 1887, and eight in 1918. Eight was the number during the Tour in South Africa, 1938-9.

WOMEN'S CRICKET ASSOCIATION.

Chairman, Miss P. H. Maxwell, C.B.E.; Secretary, Miss E. Parish.

TEST MATCHES.

In Australia, 1934-5. England won 2; 1 drawn. In England, 1937. England won 1; Australia won 1; 1 drawn. A.T.S. 193 for 5 dec. beat W.A.A.F. 51, and also W.R.N.S. by 210 runs.

ENGLAND v. AUSTRALIA, 1876-1938.

First played, 1876. England have won 55 matches, Australia 57 matches, and 31 matches have been drawn. In England, 1934. Australia 2; England 1, drawn 2. In Australia, 1936-7. Australia 3; England 2. In England, 1938. Australia 1; England 1; drawn 2; no play 2. Plus Australian Services, 1945 in England; Australia 2, England 2, drawn 1.

NOTE.—After Australia's victory at the Oval (Aug. 29, 1882), an epitaph with black-edged border "In affectionate remembrance of English Cricket. . . The body will be cremated and the ashes taken to Australia," appeared in *The Sporting Times* ("The Pink 'Un") of Sept. 2, 1882. Since that year the contest has been colloquially for *The Ashes*.

TEST MATCH RECORDS.

Highest innings.—Australia, 729 (6 wks. dec.), Lord's, 1930; 701, Oval, 1934; 604, Melbourne, Australia, 1936-7; England, Oval, 1938, 903 (7 wks. dec.); Nottingham 1938, 658 (8 wks. dec.); 636, Sydney, Australia, 1928-29; 627 (9 wks. dec.), Manchester, 1934.

Highest scorers.—L. Hutton, 364, Oval, 1938; D. G. Bradman, 334, Leeds, 1930, and 304, Leeds, 1934; 244, Oval, 1934; W. H. Ponsford, 266, Oval, 1934; W. R. Hammond, 240, Lord's, 1938; S. J. McCabe, 232, Nottingham, 1938; E. Paynter, 226, Nottingham, 1938; W. A. Brown, 226, Nottingham, 1938; A. Ryder, 207 (not out), 1938; R. E. Foster, 287, Sydney, 1938.

ENGLAND v. SOUTH AFRICA.

First played, 1888. England have won 20 matches; South Africa 12, and 23 matches have been drawn.

A South African Team was to tour England in 1940, but circumstances prevented this event.

ENGLAND v. WEST INDIES.

First played, 1928. England have won 8 matches. West Indies 3, and 6 matches have been drawn.

ENGLAND v. NEW ZEALAND.

First played, 1929. England have won 3 matches. New Zealand 0, and 9 matches have been drawn.

AUSTRALIAN SERVICES VICTORY TOUR, 1945.

TEST MATCHES.

Played 5; England and Australia won 2 each, 1 was drawn.

First, Lord's, May 19, 21, 22. Australia won by 6 wks. England, 267, 294. Australia, 455 (K. Miller, 105), 107 for 4 wks.

Second, Sheffield, June 23, 25, 26. England won by 41 runs. England 254, 164. Australia, 147, 288.

Third, Lords, July 14, 16, 17. Australia won by 4 wks. England, 254, 164. Australia, 194, 225 for 6 wks.

Fourth, Lord's, Aug. 6, 7, 8. Drawn. Australia 388 (K. Miller, 118), 140 for 4 wks. England 468 for 7 wks. dec. (C. Washbrook, 112).

Fifth, Manchester, Aug. 20, 21, 22. England won by 6 wks. Australia, 173, 220 (D. R. Christofani, 110, not out). England, 243, 141 for 4 wks.

WAR TIME CRICKET.

All County Club Cricket was suspended from outbreak of War, Sept., 1939. County Clubs kept their organisations, thanks to members' subscriptions. In Dec., 1942, a meeting was called at Lord's of County representatives to discuss after-War Cricket.

Advisory County Cricket Committee met July 13, 1943. Decision was made to ask M.C.C. to appoint sub-committee to consider a report on after-War cricket.

COMMITTEE'S REPORT

Report of the Select Committee, with Sir Stanley Jackson as Chairman, was issued on Mar. 19, 1944. It opened with the suggestion that games throughout should be fought always with an intense desire to win. Recommendations covered many previous criticisms. (See W.A. 1945).

Interim Report of Sub-Committee, issued Mar. 20, 1945, put forward plans for a Cricket Cup on the lines of the Football Association Cup.

Seventeen counties, less one bye, would play in first round on first or third Saturday in May in three-day matches. The eight winners would take part in second round and winners would contest semifinals. These would be mid-week games.

In case of draw, position in Championship a week before the next round would determine winner. If equal, position in previous year's table would decide. Final would be at Lord's at end of county season (4 days).

Time of cricket would be extended from 18½ to 20½ hours for a three-day match. This 6½ daily is less than the 7 hrs. 35 min. of 1919. If necessary, weather stoppages would be made up on fifth day. A draw in the Final would lead to Cup being withheld.

A trial be given to permission to declare on first day if 300 runs have been scored. The 8-ball over to be dropped. (This was done at beginning of 1944 season.) A new or better ball could be claimed after 55 6-ball overs. Umpires to decide state of light without an appeal from players. Doping of wickets that made them slow should cease and fast wickets prepared. Every county to play 26 matches, with a minimum of 12 at home. Traditional festivals to be retained. Clubs will select mutually four teams that they will play twice every year. Remaining 18 games to be shared to secure a fair balance against strong and weak sides. Averages and percentages, will disappear from Championship tables and positions will be on points gained.

CHIEF MATCHES, 1945.

Though a Championship was not held, many county games were played, including:

Derby met Notts., 78-103 for 7 wks.; return 27-6-102; v. Lancs. 65-92.
Hants. v. Sussex, 168 for 6 wks.—148; v. Northants. 100 for 3 wks.—85; v. R.A.F. 197 for 7 wks.—72.

Leicester v. Northants., 128 for 4 wks.—192 for 9 dec.; v. Notts. 168-173 for 5 wks.; return 204-207 for 6 wks.

Sussex v. Northants., 228 for 4 wks. dec.—77; v. Surrey, 76-85 for 6 wks.

Warwick v. Lancs., 106-78 and 88 for 2 wks. West of England v. Somerset, 67-161; v. Glam. 219 for 8 wks. dec.—126.

Yorkshire v. Australian Services, 156-204, 27 for 1 wk.; also 243-232, 102 for 5 wks.

Servics v. R.A.A.F. v. R.A.F., 245 for 7 wks. dec.—162 for 7 wks., again, 169-215 for 5 dec.; v. Army, 253-90 v. Scotland, 149-90.

South of England, 184 for 3-208. Army v. R.A.F., 240-195 again 224 for 8 wks. dec.—195 for 8 wks.; v. R.N. 103-220.

OXFORD AND CAMBRIDGE.

First played 1827. Cambridge won 50, Oxford 39, drawn 17. One day matches, 1947-5.

1932 Drawn	1942 Cambridge (77 runs).
1933 Drawn	1943 Drawn. (Cambridge 289 for 5 wks. dec.; Oxford 202 for 9 wks.).
1934 Drawn	1944 Cambridge (6 wks.).
1935 Cambridge (195 runs).	1945 Cambridge (10 wks.).
1936 Cambridge (8 wks.).	
1937 Oxford (7 wks.).	
1938 Drawn	
1939 Oxford (45 runs, 7 wks.).	
1941 Cambridge (76 runs).	

ETON AND HARROW.

First played 1805. Played 116. Eton won 48 Harrow 36. Drawn 32. One-day matches 1940-5.

1939 Harrow (8 wks.).	1943 Drawn.
1940 Eton (1 wicket).	1944 Eton (5 wks.).
1941 Eton (136 runs).	1945 Eton (6 wks.).
1942 Eton (9 wickets).	

OTHER PRINCIPAL SCHOOL MATCHES, 1945.

Eton 94 for 1 beat Radley (93). Uppingham (225 for 5 beat Rugby (49). Haileybury and I.S.C. (227 for 4) beat Tonbridge (80).

Cheltenham (266 for 9 dec.) beat Marlborough (185, 98 for 4).

Downside (109 for 8) beat King's Bruton (108). Winchester (102) beat Charterhouse (68).

Oundle (143) drew with Uppingham (128 for 9). Beaumont (201 for 4 dec.) beat Oratory (96).

Bradfield (232 for 5 dec.) beat Wellington (227). Sherborne (147 for 8) beat Blundell's (134).

Christ's Hospital (180 for 4) beat City of London (74).

Dulwich (164) drew with Bedford (138 for 4).

MISCELLANEOUS CRICKET RECORDS.

Highest individual scores, A. E. Stoddart, 485, for Hampstead v. Stoics, 1886; in first-class cricket in England A. C. MacLaren, 424, for Lancashire v. Somerset, at Taunton, July, 1895; in Australia, D. G. Bradman (Australia), 452 (not out) for N.S.W. v. Queensland, Sydney, 1929-30.

Highest aggregate innings.—Australia, Victoria, 1,207 v. N.S.W., Melbourne, 1926; England, Yorkshire 887 v. Warwickshire, 1898; England 903 for 7 wickets, dec. v. Australia, 1938.

Record win.—Victoria beat New South Wales by innings and 566 runs, Dec. 29, 1926.

Smallest totals.—Oxford University (one man absent), 12, v. M.C.C. at Oxford, May, 1877; Northants, 12, v. Gloucester, June 11, 1907.

Highest Aggregate.—Fifth Test, Durban, March, 1939. S. Africa 530 and 481; England 316 and 654 for 5 wickets. 1,981 in all.

Most centuries in one season.—J. B. Hobbs, 16 (1925); W. R. Hammond, 15 (1938); H. Sutcliffe, 14 (1932); D. G. Bradman (1938), C. B. Fry (1901), W. R. Hammond (1933), T. Hayward (1906), E. Hendren (1923, 7, 8), C. P. Mead (1928), and Sutcliffe (1928, 31), 13 centuries. Six consecutive—C. B. Fry, 1901; D. Bradman (Australia) 1938.

Total centuries in career.—J. B. Hobbs, 197. Most runs made in a year.—T. Hayward (Surrey), 3,518 in 1906. T. Hayward exceeded 2,000 runs in 10 seasons. F. E. Woolley (Kent), 3,352, 1928; H. Sutcliffe (Yorks), 3,336, 1932.

Most wickets in season.—A. P. Freeman (Kent), 304, 1928, and 298, 1933; T. Richardson (Surrey), 290, 1895.

1,000 runs in May.—W. G. Grace, 1895, W. R. Hammond, 1927, C. Hallows, 1928, D. Bradman, 1930, 38, W. J. Edrich, 1938; incl. April, T. Hayward, 1900, in July. A. Fagg, 1,018, 1938; August.—W. R. Hammond, 1,278, 1936.

Aggregates.—J. B. Hobbs, 11,221; W. G. Grace, 54,896, 2,876 wkts. W. Rhodes (Kent), 100 runs in 67 mins. v. Surrey at Oval, 1940, A. Fagg, 101 in 18 mins. off 4 overs, 1 no-ball; 1941, Aug., L. Ames, Torquay, 100, 52 mins. 1943, W. A. Rackham (L.F.F.), Lords, 112, 62 mins. 1944, Aug. R. W. V. Robins (Lords' XI), Lords, 100, 77 mins. Robins (160 in two ins, 100 in 77 mins.) took 17 wkts. for 101.

Double.—J. H. Parks (Sussex), 3,003 runs and 102 wkts., 1937. In match: A. Fagg (Kent) v. Essex, 1938; Colchester, 244 and 202 (not out).

Highest batting average in England 115.66, D. G. Bradman (S. Aust.), 1938. Best English average 96.96, H. Sutcliffe (Yorks.), 1931.

COURSING—WATERLOO CUP.

OXFORD AND CAMBRIDGE.

Principal Events and Winners, 1939-45.

The first Cricket Match between Oxford and Cambridge was on June 4, 1827, on Lord's Ground; the result was "unfinished." Annual contest started in 1838.

In Rowing, Oxford and Cambridge met in 1829 at Henley (Hambleton Lock to Henley

Bridge, 2½ miles), and Oxford won easily in 14 min. 30 sec. The next match was in 1836 from Westminster to Putney, and Cambridge won in 36 min.; but for several years Henley Regatta was used for the match. The first regularly annual race on the tidalway was in 1856. Debat was in 1877.

The Athletic Sports were instituted in 1854, and the first meeting was on C. 1st Church Cricket Ground. Since 1868, London has been the centre.

United Hospitals Championships: London Hospital 15 points. St. Thomas's Hospital 12 points.

Public Schools Championships: *Senior Foils*—D. Hawkins (Mer. Tay.). *Jun. Foils*—A. MacEwan (Well.). *Epee*—L. W. Prescott (Eton). *Sabre*—A. H. King (Dul.). Cheltenham, 21 pts. 1st; Dulwich and Eton, 10 pts. dead-heat, 2nd; Merchant Taylors, 7 pts.; 203 competitors from 22 schools took part.

Ladies' Foil Championship—Miss E. Carnegie. *Ambitot. Junior Foil Championship*—Miss M. Anderson. *Universities' Foil*—Miss M. Evans (London Univ.). *Ladies' Professional Championship*—Mme. J. de Tuscan.

SERVICE CHAMPIONSHIPS (Royal Tournament, Olympia).

Foil: *Inter-Services, Champion*. C.S.M.I. Moore (Army). Winners, R.N., P.O. J. W. Toft, R.M. Sgt. J. F. Field. Army, C.S.M.I. Moore. R.A.F., P.O. F. W. Waddington.

Epee: *Inter-Services, Champion*. Cpl. J. Fitzmaurice (R.A.F.). Winners, R.N., P.O. J. W. Toft. R.M., Sgt. J. F. Field. Army, C.S.M.I. Moore. R.A.F., Cpl. J. Fitzmaurice.

Sabre: *Inter-Services, Champion*. Cpl. J. Fitzmaurice. Winners, R.N., Com. R. C. Harry. R.M., Sgt. J. F. Field. Army, C.S.M.I. G. Moore. R.A.F., Cpl. J. Fitzmaurice.

Bayonet: R.N. C.P.O. Knowles. *Champion Man-at-Arms* (mounted): Sgt. T. G. Shimmell, 1st R.D.G.

RACQUETS, 1939-45.

World Championship (1939).—D. S. Mifford (G.B.) beat N. Setzler (U.S.A.) 7-4.

Singles.—P. Kershaw beat R. A. A. Holt. *Doubles*.—C. S. Crawley and J. H. Pawle beat Lord Aberdeen and M. G. L. Bruce.

Singles.—Lt. P. M. Nelson (R. Berks. Regt.). *Army*.—Lt. J. B. De Free (Scaforth H.).

R.N. and R.M.—Lt. A. P. Fellow. R.N. *Oxford and Cambridge*.—Singles and Doubles, Cambridge (D. D. Manners and R. A. A. Holt).

Public Schools.—Winchester (H. E. Webb and G. H. J. Myrtle) beat Eton (J. A. R. Clench and W. H. R. Brooks) 4-2 (1945).

Professional Handicap.—H. Whetton.

TENNIS, 1939-45.

World Champion.—Pierre Etchebaster. *Amateur Championship*.—Wing-Com. W. D. Macpherson.

Bailey Cup.—Lord Aberdeen and R. C. Riseley. *Open Championship*.—James Dear.

University Matches.—Singles, Cambridge; Doubles, Cambridge. Cambridge won second strings.

M.C.C. Prizes—(Gold) W. D. Macpherson; (Silver) W. D. Macpherson; Maj. R. Aird.

Balhurst Cup.—Great Britain (Lord Aberdare and R. C. Riseley) beat France.
Henry Lea Cup.—Old Harrovians beat Old Etonians, 2-1.
Lords.—Lt.-Com. J. H. Van Alen (U.S. Cham.) beat Wing-Com. W. D. Macpherson, 2-1; Maj. R. Aird beat Lt.-Com. R. Grant (U.S. Doubles Cham.) 2-1 (April 22, 1944).
Professional Championship.—James Dear.

ANGLING.

All-England Championship of the Nat. Fed. of Anglers, Sept. 1934. Harold Smith (Sheffield). Winning team—Sheffield Amal. Assn. Witham, Sept. 1935. Team—Lincoln Angling Assn. Sept. 1936. A. E. Bryant (Bucks). Team—Lincoln A.A. Sept. 1937. H. Jones (Manchester). Team—Groves and Wintall Assn., Salford. Sept. 1938. E. Bright (Bristol). Team—Hull and District Assn. Sept., 1939. Abandoned.

BASEBALL, 1939-45.

U.S.A. Championships.—National League, Cincinnati Reds (1940); N.Y. Yankees (1936-9, 41, 3); St. Louis Cardinals (1942, 4); Chicago Cubs (1945).
American League.—Detroit Tigers (1940, 5); Brooklyn Dodgers (1941); N.Y. Yankees (1942, 3); St. Louis Browns (1944).
World Series.—N.Y. Yankees (1936, 7, 8, 9, 41, 3); Cincinnati Reds (1940); St. Louis Cardinals (1942, 4); Detroit Tigers (1945).
Invaders N.L. beat A.L. 7-2 (1944).
Wembley.—Aug., 1942. Canadian Army 6 U.S.A. Army 5-3. Aug., 1943. U.S. Air Force beat U.S. Ground Forces 7-0; U.S.A. Army beat Canada 6-3.

FIVES, 1938-45.

ETON.

Kinnaird Cup (Amateur Champ.)—A. H. Fabian and J. K. G. Webb beat G. R. McConnell and W. M. Welch, 3-1.
Public Schools.—Shrewsbury (R. D. R. Walker and L. M. Minford) beat Eton (J. A. Ponsonby and B. D. Barton).
Club Championship.—Old Carthusians beat Old Westminsters, 2-1.
Varsityes.—Cambridge beat Oxford, 3-0 at Cambridge, Mar., 1945.

RUGBY (1938).

Championship.—J. Armitage beat R. E. Fisher 2-1.
Doubles.—V. E. and H. A. Oundjian beat E. L. Bailey and C. L. E. Mitchell.
Public Schools.—Singles, Oundle (E. Conradi); Doubles, Oundle (Conradi and Hague).

Record Football Attendance.

The record attendance for a football match is 149,547, at the Association International between Scotland and England at Hampden Park on April 17, 1937. The largest "gate" receipts were £29,116 at Cup Final at Wembley Stadium, April, 1939, between Portsmouth and Wolverhampton Wanderers. Total (£27,776) would have been greater in 1923, if all spectators who rushed the gates had paid. War-time records: April 22, 1944, 133,000 at Hampden Park, Glasgow, England beating Scotland, 3-2. Oct. 24, 1944, 90,000 Wembley, Eng. v. Scot. £23,000 for war charities. 1937 F.A. Cup Final—93,495. £24,831; 1938, 93,357, £25,723; 1939, 99,370, £29,116; 1945, Southern Cup, 90,000.

Theatre Records.

Theatre Records.—The longest run at a London theatre is 2,238 consecutive performances of *Chu Chin Chow*, which was produced at His Majesty's on Aug. 31, 1926, reached its 2,476th performance on Oct. 17, 1929, and was withdrawn after its 2,238th performance (having brought in £700,000) on July 22, 1921. The "record run" at a London

theatre, in pre-1924 days, was held by *Charley's Aunt* (2,466 consecutive performances). Other long runs are *Beggars' Opera*, Revival (1,463), *Our Boys* (1,362), *The Maid of the Mountains* (1,352), *A Little Bit of Fluff* (1,241), *A Chinese Honeymoon* (1,075), *Romance* (1,046), *Me and My Girl* (Inc. *Lambeth Walk*) at Victoria Palace to Sept. 7, 1940 (1,648). Ivor Novello's *Dancing Years* started at Drury Lane 1939, toured and continued 1941-44 at Adelphi, with 5th birthday (1790th perf.), Mar. 23, 1944, touring again after flying bombs. Noel Coward's *Blythe Spirit* was in its 5th year at Duxchess, Nov. 5, 1945, and approaching 2,000th performance.

AMATEUR PUNTING, 1939.

Singles.—M. Priestley (finished alone).
Doubles.—G. H. G. and L. R. Booker (1937).
Mixed Doubles.—Miss A. Brown and A. V. Murray ('38).
Women.—Miss A. Brown, 1; Miss R. Chart, 2.
Canadian Canoe (Ager Cup).—Mrs. H. M. Powell and R. C. Bending.
PROFESSIONAL PUNTING, 1936.—L. H. Hearn (Oxford).

COMPARATIVE SPEEDS

This table gives a rough impression of various speeds over a mile. Most are averaged on the basis of more than a mile and so would be slower than the best period of the lengthy test.

One Mile in Min. Sec.	
AIR—Sq.-Ld. J. W. Gillan, 6 8 miles per min.	0 8 7
Flight test, Feb. 1939	0 7 1
Lt.-Col. C. S. Hough (U.S.A.) (vertical dive)	0 4 6
ATHLETICS—Running (men), Gunder Haegg (Sweden)	4 1 4
Walking (men), A. Stubbs	6 18 2
Relay Running (four men), U.S.A. Team	
Running (women), E. Forster	3 09 4
Walking (women), J. Probeck	5 25 3
CYCLING—A. Marquet (motor paced)	7 4 2
E. W. Mills (unpaced)	2 1 2
Tandem (F. W. Tickler and R. Meller)	2 52 6
MOTORING—(Donington Track), H. Lang	0 41 9
(Utah Salt Flats), John Cobb, Aug. 1939	0 9 7 1
Cycling (330 c.c. machine), N. Pagani	0 32
ROWING—Oxford v. Cambridge Boat Race, 1st mile, 1939	3 54
Wingfield Sculls, P. H. Jackson, 1st mile, 1938	4 52
SPEEDBOAT—Sir M. Campbell, Aug. 1939	0 25 20
SWIMMING—R. Flannagan (U.S.A.)	20 4 2
Miss P. Dewar (Canada)	23 32 4
TRAIN—L.N.E.R. steam train, July 3, 1938, over 305 yards	0 28 8
TURF—Brighton Course (Fastest in G.B.)	1 32 8
Epsom Derby	1 42 3
Over hurdles (8 obstacles in 2 miles), Hurst Park	1 52 8
Grand National (30 obstacles in 4 m. 856 yds.)	2 7

MISCELLANEOUS, 1945.

A.A.A. decided the receipt of War Savings Certificates as prizes would be irregular (Dec. 12, 1941).

Marathons.—Poly. (26m. 385yds.), June 16; T. Richards (Mitcham A.C.), 2hr. 48-45s., 1 S. Jones, Poly. A.C., 2. T. Richards won 5th consecutive year. 20 m. open at Mitcham, 1 hr. 58 m. 29 sec.

E. A. Staker held H. H. 7 m. Walking Championship for 12 years until 1945.

Boxing.—L. Flynn beat T. Davies (Welsh M.-W. Ch.), Jan. 1; J. Williams beat B. Price (Welsh W.-W. Ch.), Jan. 15; V. Hawkins beat L. Flynn, Jan. 22; J. Paterson beat J. Grimes, Jan. 29; E. Roderick beat G. Odwell, Feb. 8; J. Flynn beat G.

Williams, Feb. 12; V. Hawkins beat B. Gilroy, Feb. 19; V. Hawkins beat J. Laverack, Mar. 15; D. Webb beat B. Duffy, Mar. 26; V. Hawkins beat I. Lewis, Apr. 9; V. H. beat G. Moody, April 16; E. Roderick beat V. Hawkins on points in 15 rounds at Royal Albert Hall, M.-W. Championship, May 29; Bruce Woodcock beat Jack London in 6th round at Tottenham for British and B.E. H. W. Champ.; J. Paterson b. I. Brady for Bantam Wt. Title, Glas. 20, Sept. 1.

Cricket.—Batting for South of England on June 30, G. O. Allen picked up ball he had played and returned it to bowler. It was not theoretically "dead" and he was given out, Law 29, as "handed ball." Considerable controversy followed.

Cremated Ashes of Cecil Parkin were spread on Old Trafford C. ground on July 23 at end of North of England (224 for 3 wks.) and R.A.A.F. (220 for 5 wks. dec.) match.

Football.—Many grievances have been aired in Soccer circles. Leagues have been revised according to status and geographical positions for 1945-6.

A meeting of professional players decided not to strike for better wages conditions on Aug. 20, prior to season starting on Aug. 25.

Two Cup Ties on April 14 made records in game lengths. Cardiff C. scored deciding goal after 3 hr. 22 m. play. Wolverhampton W. beat Birmingham after 2 hr. 33 m. play.

A proposal is to have a new Cup Competition between 8 cup-winning teams in U.K. and to play in close season in evening.

Pools.—Soccer Pools had to be suspended owing to newspaper coupons being of questionable legality. Pools were restarted with new season by coupons being posted to competitors. Question arose in October of a profit percentage to Soccer clubs. United Pools then offered £100,000 p.a. for at least three seasons.

Turf.—Irish 2,000 Guineas won by Stalino (Star-dust—Inking); 1,000 Guineas—Panastrid Panorama—Astrid; Derby—Locadilly (Fairway—Ojala); Oaks—Admirable (Nearco—Silvia); St. Leger, Spam (Coup de Lyon—Spiorn).

British racing was curtailed. Country divided into Newmarket, Northern, Southern groups with centralised racing at Pontefract, Stockton, Ascot, Salisbury, Windsor, apart from important Newmarket events open to all. District restrictions were ended with August. More courses were reopened.

Dante, the popular favourite, Guineas second and Derby winner could not be made fit enough to run in St. Leger.

Breeding of 1945 Classic Winners: 2,000 G., Court Martial (Fair Trial—Instantaneous) 1,000 G. and Oaks, Sun Stream (Hyperion—Drift); Derby, Dante (Nearco—Rosy Legend); St. Leger, Chamos-saire (Precipitation—Snowberry). First three were homebred; fourth at National Stud.

Jockey Club is still investigating photographic finishes. Need is shown by number of close finishes.

N.H. racing, limited in 1941-2 winter to 30 Saturday fixtures, was prohibited for 1942-3, 1943-4 winters and early 1944. Re-opened December 26 to March 31, 1945. On Oct. 20, 1945, new season began with 27 fixtures to Dec. 31. Prices (1945) were record high for yearlings.

Six yearlings from Swyford Paddocks Stud made an average of 6,185 gns. At September Doncaster-substitute, 318 yearlings were sold for 537,030 gns., an average of 1,688 gns. Dante's brother (Nearco—Rosy Legend Colt) sold for 28,000 gns., bred by Sir Erik Ohlson, to the Gackwa of Baroda.

Irish September Yearling Sales produced 353 lots for 126,647 gns., an average of 330 gns.

R.C.B.C. Record: Coole, Haydock, Nov. 1929, 341 s. 6d. for 25. At Windsor, Oct. 21, 1942, Tote Double (105.) stage paid £2,601 18s., one winning ticket in pool of £2,891.

A.A.A. and W.A.A.A.

AMATEUR ATHLETIC ASSOCIATION, Crown Chambers, Chancery Lane, London, W.C.2—President, Lord Burghley; Hon. Sec., E. J. Holt.

WOMEN'S AMATEUR ATHLETIC ASSOCIATION—Hon. Sec., Mrs. Cornell, 93 Langdale Avenue, Mitcham, Surrey.

ARCHERY, 1939.

World Championships.—Long and short distances—Beday (Fr.), Mme. Kurlowska (Poland); Shortd.—Beday (Fr.), Mme. Szczyzinska (Pol.); 90 metres—Beday (Fr.); 70 metres—Questman (Fr.), Mme. Kurlowska (Pol.); 50 metres (long)—A. H. Mole (Eng.), Mrs. C. W. Nettleton (Fr.); 90 metres (short)—Questman (Fr.), Mme. Heilborn (Swd.); 35 metres—Beday (Fr.), Mme. Heilborn (Swd.); 25 metres—Beday (Fr.), Mme. Szczyzinska (Pol.).
National Championships.—A. H. Mole; Mrs. C. W. Nettleton.

PLACE TO PLACE CYCLING RECORDS.

London—Brighton and back (106 miles), 4h. 38m. 27s., F. W. Southall, August, 1935.

London Bath and back (212 miles), 10h. 7m. 36s., R. Kemps, May, 1939. 10h. 50m. 53s., Miss M. Wilson, 1939.

London—York (196 miles), 8h. 23m., H. Earnshaw, 1939. 10h. 42m. 25s., Women's Tandem, Misses A. Caley and M. Gallacher, Sept., 1937.

London—Edinburgh (392 miles), 18h. 57m., C. Heppleston, 1938.

London—Land's End (300 miles), 17h. 28m., C. F. Davey, 1923. Reverse, 13h. 44m., C. Holland; Miss M. Wilson, 17h. 9m., 1939.

Land's End—John o'Groats (900 miles), 2 days 6h. 33m., S. H. Ferris, July, 1937. 2d. 22h. 52m., Miss M. Wilson, 1939.

50 miles Road, H. Earnshaw, 1h. 30m. 42s., 1939; Miss M. Wilson, 1h. 56m. 35s., Oct. 1941.

100 m. Road, H. James, 3h. 45m. 51s., 1939.

12 hours, H. Earnshaw, 275 miles, 1939.

24 hours, 467 miles, C. Heppleston. 366 miles, Miss M. Wilson, 1939. In Australia, H. Opperman, 489 miles, 595 yards, 1940.

24 hours Road Championship (Aug., 1945), 241 m. x fur. D. Heppleston. (Lost mileage on wrong direction).

24 hours North Road. E. R. Wilkinson, 390; Tricycle, J. S. Spackman, 394 miles (1945). Newcastle—Glasgow. Robert Batot, 25h. 22m. 75s. (1945).

1,000 miles (Britain), S. H. Ferris, 2 days 23h. 40m., 1937; Miss M. Wilson, 3d. 11h. 44m., 1939. (Australia), H. Opperman 2d. 15h. 37m., 1938.

Tandem (25-mile road), Misses Joyce Dean and Ellen Jordan (Croydon) made new women's record of 59 m. 27 s., June, 1942.

Tandem-Tricycle.—L. E. Copping and J. M. Sloper (North Rd. C.C.)—50 m.; 1 h. 52 m. 41 s.; 100 m., 4 h. 13 m. 57 sec., Aug. 1943.

SPORTS FIXTURES, 1946.

Dec. 28, 1945-Jan. 9, 1946. Hastings Chess International.

1946

Jan. 5. F. A. Cup, 3rd round.

Jan. 26. F. A. Cup, 4th round.

Feb. 2. Rugby Union International, England v. Scotland, Belfast.

Feb. 5. F. A. Cup, 5th round.

Feb. 23. Ox. v. Camb. Hockey, Beckenham.

Mar. 2. F. A. Cup, Semi Finals.

Mar. 9. Cross-Country Ch., rom., Leamington.

April 7. F. A. Cup Final, Wembley.

April 13. R. U. Scotland v. England, Hampden Park.

May 4. Rugby League Cup Final, Wembley.

May 11. R. L. League Final.

July 3-6. Henley Royal Regatta.

July —. Swimming Ch. New Brighton.

July —. British Open Golf Ch.

STRATOSPHERE AND ROCKET FLIGHT.

Prior to the outbreak of the Second World War many a passenger-carrying Rocket had taken off from the Earth—powered by mathematics and carrying a pay-load of mathematical symbols.

Yet, in actual fact, as was fully detailed on page 693 of "Whitaker" for 1940, not even an empty rocket had ever been shot skywards for more than a paltry mile or two. And to the insistent and perfectly reasonable enquiry flung at the heads of Rocket experimenters by those who had taken an intelligent interest in this alleged epoch-making form of passenger transport as to why it was that, if the Rocket was really a possible practical means of annihilating distance yet more than twenty years of development had failed to produce even the most elementary form of a passenger-carrying rocket-propelled vehicle, an endeavour was made to explain beyond all doubt that the cause of the failure could be summed up in one word—*money*.

To-day, backed by the unlimited resources of what, at one time, promised to be the greatest Nation on Earth (Germany), we find the state of affairs completely revolutionized within the short space of five years.

On the one hand we have a one-seater fighter plane, driven solely by Rockets—the German plane Me 163—which under the worst possible conditions for its operation (a relatively dense atmospheric medium) can nevertheless hurtle its pilot through the air at a velocity comparable with the speeds attained by our best fighter planes, say anything in excess of 400 m.p.h.; and, on the other hand, we have the actual development of the "pure" rocket, in the shape of the Rocket Bomb, which according to Press reports, attains an altitude of 60 miles and a velocity of 3,000 m.p.h., with a range of well over 150 miles.

Regarding the Rocket Bomb, generally known as "V₂," Lord Brabazon, a pioneer of British flying and former Minister of Aircraft Production, said at the annual meeting of the Hawker Siddeley Aircraft Company on July 12th, 1945:

"On the day the first V₂ Rocket was launched against Britain, every other form of war weapon was rendered obsolescent."

This epitomises responsible opinion as to the lethal potentialities of the Rocket to-day, and in "Whitaker" for 1945, the actual lethal forms which the Rocket as a means of destruction and devastation had actually taken, during the War, were fully described. The other side of the picture, that is of the Rocket harnessed to the service of man in the shape of peaceful aerial vehicles, offers to futurity a revolution in passenger transit as great in comparison with present-day air travel as the locomotive and the motor-car were to the old-fashioned stage coaches.

There is a wide-spread and common but quite erroneous notion among the public that Rocket Flight of the future will necessarily take the form of a V₂ Rocket, and not that of present-day aircraft. This misunderstanding is reasonable because of recent years experimentation in Rocket Flight has almost invariably taken the form of a "pure" Rocket itself, and not that of an ordinary aeroplane.

But experimentation with "pure" Rockets, instead of by vehicles like an ordinary aeroplane, was adopted solely because this was the most convenient and most efficient method of conducting experiments with a view to obtaining the data required for successful Rocket Flight. It is true that in the early days of Rocketry, experimentation was by means of "rocket-propelled motor cars," and to 100 yards and upwards. But it was not until the Rocket was used for such all such

vehicles were destroyed in testing, it would be a far more economical plan to confine the tests not only to Rockets of minimum size, which actually left the earth, but to equivalent rockets which were, in simple language, fastened to a "test bench," so that they never flew.

The first Fly Bomb attack on England was made on June 15th, 1944, and in "Whitaker" for 1945 full details were given of its construction.

The first Rocket Bomb attack was made on September 8th of the same year, but for several months afterwards, a strict Press censorship forbade publication of this date or of details of the construction of the "V₂," as the Rocket Bomb was then popularly described. It is now known that a total of 1,048 V₂ Rocket Bombs were fired across the North Sea at England between September 8th, 1944, and March 27th, 1945. The first landed harmlessly in a wooded area at Epping Upland, and the last hit Orpington, Kent. Total casualties by V₂ alone, over this period were: 2,754 killed and 6,523 injured.

So far as the V₂ Rocket Bomb is concerned our information regarding it is to-day absolutely complete because on April 3rd, 1945, thirteen truck-loads of V₂'s were caught by American tanks at Bromskirchen, Germany, after a brief but vicious battle. Nine and a half V₂'s were salvaged, of which three were not only in almost perfect condition, but with each V₂ was an illustrated brochure of instructions and a diagram explaining the robot's construction and use. Only the warheads were missing.

Painted green the V₂'s were protected by zippered camouflage suits. This weapon, which Hitler promised would win the war, is made of light metal, probably aluminium, and is about 6 ft. to 7 ft. in diameter in the thickest mid-section and 45 ft. long (minus warhead). Total weight, including warhead, about 13½ tons. The fuselage is insulated with glass wool, which also protects the control compartment, containing a master radio set, situated immediately behind the warhead. Next follow two fuel tanks; one containing about 7,500 lb. of alcohol, and the other, to the rear, about 11,000 lb. of liquid oxygen.

Behind the fuel tanks is situated the pump assembly to drive the fuels into the combustion chamber. This pump assembly consists of a turbine, driven by super-heated steam, produced by mixing concentrated hydrogen peroxide with a calcium permanganate solution. The mixture of fuels, forced into the combustion chamber by the pump assembly, burns violently when lit by electrical means from a safe distance and by the reactive effect of the ejected gases the rocket sets off, attains a reputed velocity of 3,000 m.p.h. and rises to an altitude of about 60 miles.

At the start, the rocket-bomb climbs vertically, but a gyroscope control, working on the flight vanes (there are four external control vanes), causes it to curve towards the target. About one minute after the start, depending on the desired range, the maximum departure from the vertical to 45 degrees is attained. This angle, on ballistic principles, provides also the maximum range for any given power, and when it is reached—that is to say, when the rocket is pointing to an angle of 45 degrees of elevation instead of being vertical as at the start—the fuel is cut off or appreciably reduced by remote radio control and the rocket comes down in an arc just like an ordinary artillery shell. It does not, however, strike its target with its peak velocity of 3,000 m.p.h., because on its journey down it is slowed up by air friction to the roughly

reduced velocity of perhaps 1,000 m.p.h. Even so, the friction of the atmosphere sometimes makes it glow a dull red (presumably from the heat so generated), and for this reason the earliest observed V2's were described as "shooting stars."

As an engineering proposition there is no reasonable doubt that the V2 is a scientific marvel. The control unit calls for special attention. It is about the size of a small orange and inside it contains two tiny electric motors, a gyro, and a set of controls. Each of these electric motors is about the size of an ordinary thimble. The armature—a tiny thing—is balanced on two minute bearings. Engineers who have examined it have described this control unit as "the most outstanding engineering feat of the century."

Reports were received early in 1942 about a Rocket Bomb with a warhead of ten tons, as compared with the one ton warhead of the V2. Confirmation of the production of these "super" Rocket Bombs was obtained in June, 1945, when American experts, who had spent a month in a survey of a huge rocket assembly plant, 800 ft. under the Kohnstein Mountains, near Nordhausen, Germany, found 100 ordinary V2 Rocket Bombs adapted for a flight of 3,000 miles to the United States. But for the dislocation caused by the bombing of the German Rocket Headquarters at Peenemünde, which severely damaged the installations, killing 800 of their best rocket experts, the American experts believe that the actual attack by rocket bombs on the U.S.A. would have taken place within six months of VE-day. They also state that the German scientists believed that, in two years time, they could have developed a rocket that could be fired from Britain to Japan! But the American experts admitted that this belief was only theoretical.

Summing up the growth and development of the Rocket, as a projectile, the position is this: Thanks to the capture of large numbers of V2's and V2's in full working order, together with brochures describing them, and added to the information given by captured German Rocket experts—who to "save their skins" have, in many cases, given fully reliable information of German Rocketry, present and proposed—we have to-day all the German secrets which 20 years of intense experimentation have revealed. In short, all that the Germans knew of the nature and control of fuels for Rocketry purposes; of the design and building of Rocket Bombs and Rocket planes; and of the training of pilots and navigators for these latter machines is now known to the British Government.

In view of the tremendous potentialities of the Rocket as a lethal projectile, it may be taken for granted that private enterprise will not be encouraged by the Government to build bigger and better V2's, and it seems very unlikely that the aforesaid information will be made public to enable them to do so. Hence the prospect of the Rocket, as a projectile, being used for post-war civil purposes—even for the carriage of mails alone, and not passengers—seems very remote.

But this need cause no discouragement to the advocates of Rocket Flight, because, as has previously been pointed out, the Rocket, as a projectile is not suited for providing the epoch-making revolution in passenger transport—terrestrial or inter-planetary—which has so long been the goal of reaction propulsion, as defined in the new science of Astronautics.

It is true that the earlier exponents of Astronautics, in order to get over the seeming inability of any known kind of fuel to get a Rocket beyond the limits of the earth's gravitational attraction, sought to evade the issue by their fantastic con-

ception of the *step-rocket* projectile (a "pure" Rocket), and the pre-war Press, rightly enough, held the project up to ridicule, in which the public (since they relied almost solely on the Press for their information on Rocketry) fully shared. By the step-rocket principle, it would have required a rocket projectile of 40,000 tons—as big as the "Mauretania"—to have conveyed a 10 ton payload to the moon and back, at a cost of £20,000,000 (including preliminary experiments and tests). And each and every subsequent repetition of the journey would have entailed a similar expenditure.

It was suggestions of this kind seriously advocated by the highest authorities on Rocketry, in days long before the outbreak of the Second World War, that made Rocket Flight a subject for derision and contempt in Great Britain, and caused her to lag behind other nations in the development of reaction propulsion as the only known means for developing a propulsive effect in a vacuum, and hence of a *space-ship* capable of flying high up in the stratosphere for terrestrial journeys and of traversing the vacuum of outer space for inter-planetary expeditions.

It was only the tremendously destructive potentialities of the Rocket as a weapon of warfare that induced the British Government to wake from its lethargy.

Thus, writing in 1934, for publication in 1935, a writer who produced the first book on Rocket Flight ever published in this country, and the second book on the subject in English, in the world, said:

"There is no possible doubt that militarists all over the world, with the possible exception of England, are fully alive to the tremendous possibilities of the rocket in modern warfare, and in the next war it will inevitably follow that rocket-propulsion will be developed to the fullest extent of its destructive powers just as happened in the Great War with the aeroplane."

And, as detailed in "Whitaker" for 1945, we now know that it was one year later, in 1936, that the Government of the day, "first asked Dr. Alwyn Douglas Crowe to get together a team of chemists, physicists, ballistic experts and engineers, to explore its possibilities."

Yet the definite fact remains that however successful in other directions this team may have been, it failed to produce a single fly-bomb, Rocket-bomb, or Rocket-propelled aeroplane throughout its entire period of activities. And the reason for this failure appears to have been due to Cabinet policy, based in turn upon the peculiar circumstances attendant upon Britain's island position. In short, the Cabinet did not *want* fly-bombs, or rocket bombs, to be developed. And the various Government Departments concerned, in obedience to this policy, did their best to fob off capable inventors who offered designs for consideration, as in the case of Major W. G. Wilson—the inventor of the tank in the last War—whose design for a fly-bomb embodied a simplicity, an ease of control and a method of launching far superior to the corresponding German invention, who was refused facilities for obtaining essential materials to enable him to give an actual demonstration of his invention.

In the brave new era of Peace which lies before us we need the services of all the good brains we can command. Yet it seems a foregone conclusion that, "on grounds of national security" the commercialization of either "pure" Rockets, such as the V2 or of the Rocket Plane such as the German Me x63, will be saddled with such irksome Governmental restrictions as will render subsequent development by private enterprise quite impossible.

Yet in America, the Ford Motor Co., by placing

together the fragments of fly-bombs dropped on this country, duplicated the German fly-bomb in 60 days. And the production of a fly-bomb—with a rocket-propelled, launching under-carriage, which is dropped off as soon as the fly-bomb takes to the air—was achieved within one year and was far superior in every way to the German product.

Similarly as regards the *jet plane*, hitherto regarded as a typically British invention. On August 2nd, 1945, an American jet plane, known as the P.80 *Shooting Star*, covered the distance of 589 miles between Daytona and La Guardia Air Field in 62 minutes—an average speed of 570 m.p.h. That is to say, in less than 3 years, the Americans have added 170 m.p.h. to the British models of jet planes.

Such then was the general position of British apathy towards the development of "pure" rockets, and of rocket planes, when, on August 7th, 1945, all the world was electrified by the announcement of the discovery of *atomic energy*, as manifested by the Americans dropping an *atomic bomb* on Hiroshima, Japan, at 20 minutes past midnight (London time), and scientists now tell us that one ounce of atomic explosive probably liberates more energy in a fraction of a second than can be drawn from Niagara Falls in a week.

It would be foolish at the present stage of scientific knowledge to say with certainty that such colossal releases of energy will ever be tamed sufficiently to be harnessed in the service of man, but Rocketeers have long regarded the discovery of an entirely new kind of fuel for their rockets as a reasonable possibility of the future, and atomic energy would surpass their wildest dreams.

For many years they have been fully aware that to lift a one-pound weight beyond the earth's gravitational attraction would require the expenditure of about 21,000,000 foot-pounds energy, whereas the most powerful fuels that could be *practically* used, yielded only some 5,500,000 foot-pounds of energy. Nevertheless they persisted in their experiments in the fond and certain hope that by the time they had overcome the manifold technical difficulties in Space Flight—that is, inter-planetary flight—a suitable fuel would, as a

matter of course, be found, consequent to the normal progress in the development of scientific knowledge. Pending such discovery they devised the ingenious, but ridiculously impracticable, step-rocket (which we have already described) as a means to that end.

To-day, by the tremendous potentialities of atomic power, instead of the step-rocket consuming some 40,000 tons of fuel to convey a payload of 10 tons to the moon and back, the vast forces inherent in the atom are such that if they could be utilized under the ideal conditions of free space, *one pound* (not 40,000 tons) of fuel, would, with ease, convey a spaceship of 500,000 tons the same journey.

In "Whitaker" for 1940, it was predicted that inter-planetary flight would one day be achieved.

To-day the Press throughout the world is quite seriously considering the same project, or in the words of Dr. Sylvan Arend (famous Brussels astronomer) "A search for habitable planets is no longer simply a game for the imagination."

It would, however, seem that the harnessing in the service of man of the titanic sub-atomic forces locked up in the atomic bomb will never be achieved. In any case, and long before this would happen, man must first learn to unleash and to harness molecular and atomic energy—forces with potentialities far greater than those evidenced by (say) the explosion of dynamite or T.N.T.

For even this form of energy will alone be ample to meet all the requirements of inter-planetary travel. And the day when such is successfully achieved may not be so far distant as many now suppose.

It is at any rate clear that the atomic bomb must inevitably enhance the importance of the rocket-bomb, and that purely for military purposes it is bound to be the subject of continual and progressive development, for the cataclysmic explosion of Va's of the future, fitted with atomic bombs as warheads, of a size many times larger than any used against Japan and with a range of 7,000 miles is so far beyond all human experience as to be as incompletely incomprehensible as the idea of personal death. It would be feared, but not understood.

THE SCHNEIDER TROPHY.

On Sept. 13, 1931, Great Britain won the Schneider Trophy for the third time in succession and thus retained the Trophy. The late Wing Commander G. H. Stainforth, R.A.F., broke all previous records by covering the course at an average speed of 386 1/2 m.p.h., his own record for one flight, down wind, exceeding 400 m.p.h. Flight-Lieut. J. N. Boothman, the ultimate winner, set up a new record for 100 kilometres.

The winners of the Trophy are given below :—

Year	Place	m.p.h.	Winner.	Representing
1913.....	Monaco	45.75	M. Prevost	France
1914.....	Monaco	88.8	H. Pixton	Great Britain
1920.....	Venice	107.0	L. Bolagna	Italy
1921.....	Venice	111.0	G. Briganti	Italy
1922.....	Naples	145.7	H. C. Baird	Great Britain
1923.....	Cowes	177.88	Lieut. T. Rittenhouse	U.S.A.
1925.....	Baltimore	235.57	Lieut. Doolittle	U.S.A.
1926.....	Hampton Roads	246.496	Major de Bernardi	Italy
1927.....	Venice	281.656	Flight-Lieut. Webster	Great Britain
1929.....	Southampton	328.63	Flying-Officer Waghorn	Great Britain
1931.....	Solent	340.0	Flight-Lieut. Boothman	Great Britain

CHRONICLE OF THE WAR, SEPT. 1, 1939—OCT. 24, 1945.

On March 13, 1938, after the occupation and annexation of Austria, Adolf Hitler gave an assurance to the European Powers that he had no designs against Czechoslovakia; within six months, however, Hitler sent an ultimatum to President Benes and British and French representations induced the Czechoslovak government to make concessions to avoid armed conflict. Tension throughout Europe was relieved for the moment and a Conference at Munich (Sept. 29-30, 1939) between Neville Chamberlain, Adolf Hitler and Benito Mussolini, resulting in further concessions at the expense of Czechoslovakia, appeared to dispel the war clouds and to mark the limit of Hitler's territorial ambitions. On March 14, 1939, German troops invaded Bohemia and seized the capital. Two days later Hitler announced in Prague that Czechoslovakia had ceased to exist, in direct violation of the spirit of the Munich Conference. Hitler's efforts were then directed against Danzig and the Polish Corridor, and after incorporating Danzig with the Reich Hitler declared that his patience was almost exhausted by Poland. On October 31, 1939, Hitler announced his proposals for settlement with Poland and declared that they had been rejected because no delegate had come to Berlin to discuss them. They had been given to the Polish Ambassador in Berlin two hours before their "rejection," and no Polish delegate had seen them.

INVASION OF POLAND

(1939) Sept. 1. At dawn German troops invade Poland without ultimatum and planes raid Warsaw. Anglo-Polish Treaty invoked, and German government warned that failing withdrawal Britain and France would aid Poland. Mr. Chamberlain outlines Britain's peace efforts and House votes £500,000,000 for war. State control railways. France mobilises. Over million children, mothers and disabled evacuated from British danger zones.

BRITAIN AND FRANCE DECLARE WAR.

Sept. 3. Chamberlain broadcasts that Britain is at war with Germany from 11.15 a.m. Shortly after, first air-raid warning given. France enters struggle at 5 p.m. General Gort appointed C-in-C British Field Forces, Gen. Sir Edmund Ironside Chief of Imperial General Staff and Gen. Sir Walter Kirke, C-in-C Home Forces. War Cabinet consisting of Chamberlain, Sir John Simon, Lord Halifax, Lord Chatfield, Churchill, Hore-Belisha, Sir Kingsley Wood, Sir Samuel Hoare and Lord Hankey held first meeting. King broadcast to nation urging calmness and unity. Australia, New Zealand and Canada declare war. R.A.F. drop 6,000,000 leaflets over Germany. Polish troops enter E. Prussia but German invaders progress. 4. British liner *Athenia* with 1,418 passengers and crew torpedoed without warning 200 miles west of Hebrides. R.A.F. hit German warships at Wilhelmshaven and Brunsbüttel. French land, sea and air operations began. Chamberlain broadcasting to Germans denounces Hitler. Dr. Benes says Czechs and Slovaks will march with Britain. Evacuation of London children completed. Japs announce neutrality. Second air raid warning. 5. Germans claim 7th Polish Division destroyed. French troops on Western Front in contact with enemy between Rhine and Moselle. Three potential German armed raiders destroyed in Atlantic. British merchant ships sunk by U-boats. 6. French forces beyond German frontier towards Saarbrücken. Warsaw again raided. Polish Ministry leave. S. Africa at war. Britain suspends obligations under London Naval Treaty and Agreements with Russia. 7. Germans reinforce Western Front. French troops advance further in Saar. Germans occupy Upper Silesian region of Poland. Enemy merchant ships take refuge in neutral ports. British freighter torpedoed off N.W. Spain. U-boat sinks British steamer *Mannar* in Atlantic, shelled crew abandon ship. 8. Warsaw population prepare last stand. Contraband control bases

established. 9. Cabinet assumed war to last at least 3 years. Theatres and cinemas in safe districts open with 10 p.m. curfew. 10. Italy declares neutrality, not isolation. Germans withdrew near Warsaw. Canada at war. More British ships sunk by U-boats. 11. B.E.F. advanced troops in France. German Polish offensive slackened. 12. Chamberlain and Lord Chatfield hold first Supreme War Council with Daladier and Gen. Gamelin and confirmed Britain and France devote entire resources to war. R.A.F. raid Siegfried Line. Convoy system for British merchant ships begins. Indian rulers offer services to Britain. Recruiting in New Zealand. 13. Germans threaten bomb and shell Polish open towns. British free to retaliate. 14. Chamberlain said Britain never attack civilians for terrorism. Announcement no German intention to use gas or bacterial warfare. 15. Some U-boats reputed destroyed. In first week of war Britain seized 76,000 tons cargo consigned Germany. Warsaw reinforced but elsewhere Poles retreat. French entrenched within Germany on Rhine-Moselle front. 16. Berlin Air Ministry damaged. 17. Soviet troops invade Poland along whole frontier, President and Cabinet leave country. Germans attack French near Saarbrücken. Carrier *Courageous* sunk by U-boat, 515 lost. Rising in Bohemia and Moravia. 18. Soviet and German troops advance east and west across Poland and meet near Brest-Litovsk. 19. Russians take Vilna, reach Hungarian border. Hitler says no war aims against Britain and France. Japs say arming German ships in Jap ports not permitted. First British war casualty list issued (R.A.F. names). Rebellion in Bohemia, spread to Slovakia, ruthlessly countered. 20. Russians in Lvov, Polish refugees enter Roumania. Germans claim 105,000 prisoners. 21. Munitions Supply Council set up. French troops reach Zweibrücken. 22. Allied Supreme War Council met in Sussex.

PARTITION OF POLAND.

Sept. 22. Germany and Russia agree in partition of Poland, Soviet frontier including Polish-Roumanian border. 23. Worst bombardment yet at Warsaw. 24. Soviet-German Pact ratified. U-boat sinks neutral ships. Maximum butter price fixed. Gen. von Fritsch "killed in action" on East Front. Food ration cards in Germany. Explosions at Friedrichshafen Zep works. 25. Churchill claims U-boat menace being overcome. German divisions transferred Poland to Western Front. Warsaw bombed continuously. British capital ships attacked unsuccessfully by air in North Sea. 27. German liner *Bremen* reported in Soviet

port of Murmansk. Warsaw proposes armistice. Heavy War Budget taxation. 28. Soviet and Estonia pact signed. Germans claim denied that *Ark Royal* and other warships damaged. 29. Warsaw and Modlin surrender to Germans. R.A.F. attack warships at Heligoland. National Register in Great Britain. 30. M. Raczewicz became President of Poland and forms provisional govt. with H.Q. in Paris.

Oct. 1. Men between 20 and 22 (250,000) called up. Germans in Warsaw. R.A.F. drop leaflets on Berlin. 2. British S.S. *Clement* sunk by surface raider. 5. Hitler enters Warsaw. Soviet-Latvia pact signed. 8. Soviet claims on Finland. Dutch steamer sunk. Hitler says Baltic Germans must be repatriated. 9. Committee of Ministers co-ordinate work of Government departments. North Sea action between German bombers and British warships. 10. British and Dominion pilots to be trained in Canada. R.A.F. completely photographed Siegfried Line. 11. B.E.F. under French command. Russians approach Finnish frontier. Soviet-Lithuanian agreement, Vilna restored to Lithuania. 12. Prime Minister, replying to Hitler's "peace" offer, said Britain rejects proposals based on recognition of Germany's conquests. Soviet-Finn negotiations open. German liner *Cap Norte* captured in S. Atlantic. We deny German reports mustard gas supplied Poland. 13. 4 U-boats destroyed. French cruiser-mine-layer *La Tour d'Auvergne* blows up at Casablanca. French destroy 3 frontier bridges over Rhine. 14. *Royal Oak* sunk at Scapa Flow by U-boat; 424 saved, 820 lost. 15. R.A.F. over Germany. 16. German bombers attack Rosyth and Forth Bridge, cruisers *Southampton* and *Edinburgh* and destroyer *Mohawk* damaged. 4 of raiders destroyed. German attack east of Moselle stemmed. 17. *Iron Duke*, demilitarised battleship, bombed at Scapa. Second attack over Orkneys by 10 planes. French retire on 19 mile front east of Saar. Soviet say Finnish independence recognized. 18. German forces mass on Siegfried Line. 19. Britain, France and Turkey signed 15 years mutual assistance treaty for Mediterranean, but Turkey not compelled take action involving war with Soviet. Soviet-German pact in Poland ratified. Northern Powers decided not attempt mediation. 20. Enemy aircraft over Forth. Germany reported planning use of poison gas on Western Front. 21. British convoy attacked in North Sea, 7 German bombers down. 215,000 men between 20 and 22 register for military service. 22. German planes over coast. Soviet occupy part Estonia. 23. R.A.F. sink 2 U-boats. Soviet-Finland discussion resumed. 24. U.S. *City of Flint* arrives Murmansk after capture by pocket battleship *Deutschland* (released 2 days later). 25. R.A.F. reconnaissance over Berlin, Magdeburg and Hamburg. 4 British ships sunk by U-boats. Norwegian steamer sunk. 26. Snow on Western Front. Wrecked U-boat on Goodwins. British freighter sinks U-boat in N. Atlantic. Army reopened for voluntary enlistment. Soviet protest British blockade. Russian trade delegation in Berlin. German partly mobilises bank deposits and insurance funds. 27. Viscount Gort visits British lines. Enemy massing from German coast to Switzerland. King Leopold says Belgium will fight if attacked. R.A.F. reconnaissance over S. Germany. 28. Raider shot down near Forth. 29. Pact between Britain, France and Turkey signed. 30 bombers attack British defences south of Dogger. German planes turned back from coast. R.A.F. daylight reconnaissance over S. Germany. White Paper on German counter-attacks. 31. Molotov declares Germany and Britain now

aggressor. Russia wants a free hand and continue neutral. Bacon and butter to be rationed.

Nov. 3. *City of Flint* anchored Haugesund, released by Norwegians. 6. First big air battle on Western Front, French planes down 9 out of 27 German fighters. 7. Queen Wilhelmina of Holland and King Leopold of Belgium offer mediate both sides. Raiders over Shetlands. 8. Shortly after Hitler left Munich beer cellar bomb killed eight. R.A.F. rout 3 planes over North Sea. British sub. *Oxley* accidentally lost. Munich explosion arrests. German-Dutch clash at Venlo; troops near Netherlands border. Dutch Army leave cancelled. 10. Netherlands Government reaffirms neutrality but took flooding precautions. Dornier flying-boat down off coast. 12. Finn-Soviet deadlock. 13. Navy intercepts liners *Mecklenburg* and *Parana* (believed supply ships for *Deutschland*), scuttled by crews. Shetlands bombed. Enemy planes over Paris. 14. British destroyer lost after striking mine. 16. British tanker sunk off Portuguese E. Africa by German raider. 17. Supreme War Council in London decide on complete common action. R.A.F. reconnaissances over N.W. Germany. Raiders driven from Shetlands. Executions and hundreds of arrests in Prague follow anti-German demonstrations. 18. Netherlands ship, *Simon Bolivar*, and other neutral ships sunk by mines. 19. Thousands of Czechs taken to Germany. 20. Raiders driven from Thames Estuary. German plane shot down over Holland. 21. German exports subject to seizure on high seas as reprisal for mine brutality. Raider shot down off Deal. French destroy 3 German planes over Western Front. Cruiser *Belfast* damaged in Forth. Destroyer *Gipsy* mined and beached, 30 killed. 22. Raid on Shetlands. Bomber dropping mines by parachute shot down in Thames Estuary. On Western Front 8 German planes down. 2 U-boats sunk by same French torpedo-boat in 3 days. France to stop German export trade. 23. R.A.F. shoot down 7 German planes in France. Finns reject Soviet proposals. *Rawalpindi* sunk in epic fight off Iceland by *Deutschland*. 25. German planes attacked British warships in North Sea. 26. Soviet allege Finn troop shelled Russians. 27. Finns ready withdraw from frontier if Russians withdraw. Dutch *Spaarndam* mined off Thames Estuary. 28 British planes attack mine-laying seaplanes at Borkum. 28. Russia denounces Soviet-Finn pact. General mobilization in Finland. 2 German cargo boats captured by French warships. 29. Soviet breaks with Finland. U.S. offer to mediate rejected. 2 enemy raiders down. 30. Without declaration of war, Soviet troops cross Finn frontier and take Petsamo; bomb Helsinki, killing 80. Finn Govt. resigns. Minefield 300 sq. miles from Thames Estuary to Netherlands laid.

Dec. 1. Soviet set up puppet Finn Govt. Helsinki bombed. Russian attacks on Karelian Isthmus repulsed. 2. Soviet parachutists disarmed near Viborg. 3. R.A.F. hit warships near Heligoland and destroy U-boat in North Sea. German *Watusi* scuttled after leaving Mozambique. 4. King visits Army and Air Force in France. German raider in S. Atlantic sinks *Doric Star*. 5. Finns shoot down 64 Soviet planes on Karelian Isthmus and bomb Murmansk. Two Polish subs. escape and join British. 6. R.A.F. over N. Germany. Mine-laying planes raid Thames Estuary. Air battles over North Sea. Britain building nearly million tons of warships. Germany tells neutrals to resist British blockade. 7. Raiders driven from Forth. Finns deny Karelian break-through and allege Soviet using gas shells. 8. King decorates 2 R.A.F. men. U-boat destroyed, another pro-

bably. U.S. request Britain not hamper American trade. 9. British in Maginot Line in contact with enemy. 10. King back in London. Attack against B.E.F. repulsed. 11. Soviet ignores League of Nation's mediation offer; further Karelian attacks. First German export seizures. 12. Liner *Bremen* reaches German port after sub. *Salmon* had refrained from torpedoing without warning. Britain and France agree stabilize exchange, and share war expenses. 13. Pocket battleship *Admiral Graf Spee*, engaged by *Exeter*, *Ajax* and *Achilles*, under Cmdr. Harwood, in S. Atlantic, hit and took refuge at Monte Video. *Salmon* sunk U-boat and hit cruiser *Lipzig* and another guarding *Bremen*. 2 German flying-boats damaged over North Sea. 14. British prisoners on *Graf Spee* released. In Heligoland Bight, 5 German and 3 British planes down. Destroyer *Duchess* sunk colliding with warship. Sub. *Ursula* sinks *Kohn* class cruiser. New Russian offensive in N. Finland, Red fleet bombards Koivisto. 15. *Dusseldorf* and *Adolf Leonhardt*, scuttled when intercepted by warships. Tankers and naval trawler mined in North Sea. R.A.F. bomb sea-planes at moorings. Chamberlain at Western Front G.H.Q. Russian destroyer sunk off Abo. Britain announced war material sent to Finland. 17. *Admiral Graf Spee* leaves harbour and scuttles herself. 18. *Graf Spee* crew arrive Buenos Aires. First contingent Canadian Force in Britain. Bombers (7 lost) reconnoitre Heligoland Bight and shoot down 12 Messerschmitts. Chamberlain visit Maginot Line. 19. Supreme War Council in Paris. German *Columbus*, scuttled off U.S. coast. French sink 2 more U-boats. Soviet bomb Helsinki and Viipuri troops advance from Petsamo. 20. Captain Langsdorff, of *Graf Spee*, suicide. German *Cap Norie* in British port as prize. 21. More raids on Finns. British recognize Czech National Committee and agree help organize army in France. 22. Soviet driven from Mannerheim Line, and retreat continued in North. 25. Christmas Day on Western Front, all quiet, severe frost. Soviet planes bomb more Finn towns. Minefields along 500 miles of eastern coasts. 26. First Australian air squadron in England. 27. R.A.F. fight planes and ships over North Sea. Indian units in France. 31. Finn success Central front. Second Canadian contingent in England.

1940: Jan. 1. Military service up to 27. Shetlands raided, 2 destroyed. Britain promises all help for Finland. Finns trap Russians near Lake Kianta. German *Tacoma* interned at Monte Video. 2. R.A.F. in North Sea fight. 4. Govt. to take over U.K. and Colonial deep-sea ships. 5. Oliver Stanley succeeds Horé Belisha as War Minister. Naval patrol trawler sunk with all hands. 8. Butter, sugar and bacon rationed. Finns report 44th Russian Division destroyed. 9. British and 2 Danish merchant ships sunk in North Sea. Trinity House vessel machine-gunned. *Dumbar Castle* sunk by mine. Air Marshal Barratt to command British Air Forces in France. 10. R.A.F. bomb Sykk. New Soviet attack against Finns on Salla front. 11. Raids over coast between Scotland and Thames. R.A.F. bomb Heligoland at night without loss. 12. First decorations for bravery awarded by Lord Gort. R.A.F. leaflets over Vienna and Prague. Soviet bomb Finn towns. 13. Heinzel down in Forth. Soviet bomb Helsinki. 14. More raids on Helsinki and heavy Salla front attacks. 15. U-boat sinks Dutch ship in Biscay. 16. *Seahorse*, *Undine* and *Starfish* lost on hazardous service (German say lost two destroyed in Heligoland Bight). 17. Dutch extend siege zones. 18. Russians withdraw 30 miles in Finn "waist." Britain and France

agree pool all resources for war. 20. R.A.F. hit patrol vessels in North Sea. Heavy air raids in S. Finland. 21. Destroyer *Grenville* lost. 22. New Soviet offensive round Lake Ladoga. 23. Destroyer *Exmouth* sunk with all hands. Paderewski elected President of Poland's Provisional Govt. 24. Shetlands bombed. Finns repulse Russians on two fronts. 27. Soviet Ladoga offensive slackens. Finn towns bombed. 29. Raiders attack 12 ships along Coast. Bacon ration doubled. 30. Coastal shipping raided. Hitler scoffs at Allied peace aims, claims Germany forced into war. 31. Admiralty to control shipbuilding. Govt.'s £1,000,000 a week to peg essential food prices.

Feb. 1. Lord Mayor's Red Cross Fund passes £1,000,000. 2. Violent Soviet Karelian offensive. 3. R.A.F. shoot down 3 planes near E. Coast. 5. Minesweeper *Sphinx* and C.P.R. *Blaverburn* lost. Finns claim victory N.E. of Lake Ladoga. Engineering Union agreed to all assist new arms drive. 7. Irish S.S. *Munster* mined in Irish Sea. 8. Third Canadian contingent arrives. 9. Two U-boats sunk by destroyer *Antiope*. 12. First Australian and N. Zealand Forces reach Suz. New German-Soviet trade pact signed. 13. First Australians arrive camp in Palestine. *Wolfsburg* and *Wakama* scuttled S. Atlantic. Raiders chased from Thames. 14. Two U-boats destroyed in Atlantic. 15. Finns withdraw on Mannerheim Line. 16. Sweden not to permit passage foreign troops to help Finland. *Cossack* rescues 300 British prisoners in Norwegian fiord from German *Altmark* and Norway protests against "violation" of neutrality. 19. Destroyer *Daring* sunk, 157 lost. Finns Ladoga success. 20. R.A.F. attack warships at Heligoland. 21. Fierce Mannerheim Line fighting. 22. Two raiders down off Berwickshire. R.A.F. over Austria and Bohemia. 23. R.A.F. over N.W. Germany, Heligoland and Prague. 25. First Canadian airmen reach England. 26. Russians capture Koivisto, key Finn island fortress. Viipuri bombed to ruins. 27. Churchill reported by end 1939 Germany lost at least half U-boats, we on way to mastering magnetic mine and 5 new battleships soon ready. R.A.F. over Berlin. French destroyer sinks U-boat off Finisterre.

March 1. R.A.F. over Berlin and Baltic. 3. Italy protested against British decision to examine coal shipment from Germany. Russians in Viipuri. 4. R.A.F. sinks U-boat in Elbe. 5. £300,000,000 3 per cent. War Loan issued. First Italian collier brought in for search. D.C.L.I. prisoners taken in France. 6. Eight Italian coal cargoes detained. 7. Finland announce Soviet's far-reaching peace-terms. R.A.F. leaflets over Poland and attack shipping near Borkum and Sylt. 8. Soviet-Finn peace talks. German bomber down off Scotland. 9. Italy to import no German coal by sea. 10. R.A.F. leaflets on Prague and Vienna. 12. Finland and Soviet Peace Treaty. B.E.F. double October size. 13. £700,000,000 Vote of Credit; War expenditure £5,000,000 a day. 15. Finns ratify Peace Treaty. 17. Fleet bombed at Scapa, civilian killed and 7 injured at Orkney town. 18. Hitler met Mussolini at Brenner. 19. R.A.F. 5-hour attack on Hornum air base. 21. Reynaud, Premier of France, with Daladier as Defence Minister. 22. U-boats sank 7 neutral ships. 26. B.E.F. take over further Allied front sector. 28. Britain and France not to conclude separate peace. Dutch fighter shoots down R.A.F. bomber. 29. Molotov says Russia will stay neutral.

April 1. Areas near 8 British naval ports "protected areas." 2. German planes attacked in North Sea convoys. 3. Cabinet changes: Sir Samuel Hoare (Air) and Lord Woolton (Food). Coastal Defence lost first pilot off Yorkshire coast.

5. R.A.F. bomb warships at Wilhelmshaven. 7. An light over North Sea.

NAZI INVASION OF SCANDINAVIA.

April 8. Allies mine part of Norwegian coast. British subs. torpedo merchantmen in Skagerrak. Destroyer *Glowworm* lost. 9. German troops invade Norway, seize Oslo, and form Government under Quisling. Occupy Denmark without serious opposition. Allies' full aid to Norway promised. *Schurnhorst* hit by *Renown* but escapes. Destroyer *Gurkha* sunk. 10. Norwegian troops fight N. of Narvik, British destroyers *Hunter* sunk and *Harley* aground. One German destroyer sunk and 3 on fire. Navy sink German troopships in Skagerrak. German cruisers bombed in Bergen. Norwegian batteries sink battle-cruiser *Blucher*, and H.M.S. *Tribune* sank cruiser *Karlsruhe*. Nazis raid Scapa, 4 lost. 11. R.A.F. raid Stavanger. Sub. *Spearfish* successfully attacked pocket battleship *Admiral Scheer*. Germans advance in Norway. 11. U.S. carrier aircraft sink 46 ships, destroying 357 planes in Manila area. 23. Reinforcements by air at Arnhem. 24. East of Nijmegen Allied troops enter Germany. 25. Bridgehead over Escaut Canal. Calais attacked from air and land. 26. 2,000 men of 1st Airborne Division brought back across lower Rhine from Arnhem after heroic 9 days stand, with heavy losses. 8th Army cross Rubicon. Tito's men take Cetinje (Montenegro). 27. Progress north of Nijmegen. Cologne and Calais bombed, some cross-Channel guns captured. 28. Calais citadel captured. U.S. planes sink 22 Jap ships, damaged 40, in Philippines. British subs. sink 32 Jap vessels. 29. Canadians capture Cap Gris Nez. 30. Calais falls with 5,000 prisoners. Shelling of English coast ceases.

Oct. 1. Counter against British salient south of Arnhem failed. British subs. sink 37 ships in Arctic Circle. 2. U.S. cross Wurm, drive 2-mile wedge through Siegfried Line between Aachen

and Gellenkirchen. Kassel, Cologne, Hamm and Brunswick raided. 3. Lancasters breach dyke on Walcheren Island and engulf part of garrison. 10 days earlier bombers made huge gaps in Dortmund-Emms Canal. After 63 days' straggle Poles yield Warsaw. 4. Soviet link with Tito's army in Yugoslavia. 5. Allies cross Dutch frontier north of Antwerp, take Patras (Greece), land on Greek islands and in Albania. 6. Canadians cross Leopold Canal near Brussels. Berlin, Hamburg, Baltic bases, Dortmund, Bremen and Ludwigshafen hit. Allies take Samos. 14th Army in Burma capture "Chocolate Staircase," 3,000 ft. high road into Tiddim. Soviet cross Roumania-Turkish border. 7. Dykes at Flushing broken by bombs. In greatest co-ordinated air onslaught of war over 3,000 British and U.S. bombers hit Germany. Dam in Rhine smashed, floods make river impassable. 8. New U.S. offensives between Nancy and Metz and east of Aachen. 9. British and Canadian land south of Scheldt estuary. Churchill and Eden meet Stalin and Molotov in Moscow. 10. Aachen surrounded. Allies enter Corinth. 11. Aachen blasted. Red Army in Cluj (Transylvania) and Szeged (Hungary). 12. U.S. in Aachen suburbs. Allies recapture Overloon. Second U.S. attack on Formosa, 396 Jap planes down and 63 ships sunk or damaged for loss of 45 planes. 13. Russians capture Riga. Athens and Piraeus liberated. 14. Duisburg and Cologne blasted. 15. Death of Rommel. Duisburg, Cologne, Sorpe dam (Ruhr) and Wilhelmshafen raided. 16. Escape gap from Aachen closed. Bombing of Formosa goes on.

PHILIPPINES INVADED.

Oct. 17. U.S. invade Philippines. Jap warships run from U.S. Fleet. 18. British capture Venrai. Hitler orders Germans from 16 to 60 into Home Guard. Soviet cross Carpathians, advance into Czechoslovakia on 170 miles front. Indians capture Tiddim. U.S. seize east coast of Leyte Island (Philippines). 19. In Vosges U.S. take Bruyeres. Soviet take Eydtukhnen (E. Prussia). 20. Americans take Leyte airstrip. Aachen falls to U.S. 1st Army with 10,000 prisoners. New attack north of Antwerp. 8th Army enter Cesana. Belgrade freed. Dubrovnik (Adriatic) captured. British take Thebes. Moscow talks ended. 21. U.S. take Leyte capital (Tacloban). British and Canadians link north of Antwerp. 22. Breskens and Esschen on Belgian-Dutch border taken. 23. Russians 18 miles into E. Prussia on 85 mile front.

U.S. NAVAL VICTORY.

Oct. 23-24. In great naval fight off Philippines, 58 Jap warships sunk or damaged, 4 aircraft-carriers, 2 battleships, 6 heavy cruisers, and 171 planes were lost; U.S. lost 6 ships. 25. Soviet cross frontier of Norway and capture Kirkenes. Transylvania liberated. 26. U.S. take Samar island next to Luzon. Japs on Leyte break up. 27. British cross Scheldt and form bridgeheads on Beveland. Tilburg entered. 28. Beveland bridge heads extended as Canadians approach island by causeway. Bergen-op-Zoom captured. Great air attack on Cologne. 29. Breda (Holland) occupied. Beveland link-up. Direct hit on Tirpitz off Norway. 30. South Beveland in Allied hands; attack on Walcheren. British and Chinese new drive in N. Burma. Fresh U.S. attacks on Luzon. 31. British reach Maas. Prisoners taken by Allies since D-day total 637,544. 9,000 tons on Cologne in 4 days.

Nov. 1. Strong British commandos landed on Walcheren Island, greater part of Flushing being captured; Canadians stormed causeway from the mainland. British patrols in Greece reached Salomika. 2. Good progress made on Walcheren. Canadians attacking enemy pocket south of the Scheldt entered Knokke. United States aircraft destroyed 208 enemy planes in air battles during attacks on synthetic oil plants and marshalling yards in the Ruhr; Bomber Command dropped over 4,000 tons of bombs on Düsseldorf, losing 20 aircraft. 3. Flushing entirely in British hands. Whole of Belgium liberated by surrender of Zeebrugge, Knokke and Heist, prisoners taken in the pocket numbering 12,500. Americans advanced deeper into Germany in Hurtgen forest area. Sir Oliver Leese appointed to command 11th Army Group in South-East Asia Command. Super-Fortresses bombed Rangoon marshalling yards. 4. Further successes on Walcheren included link-up with troops from mainland, where several towns were freed. Over 1,000 American bombers attacked oil refineries and synthetic plants in Germany and Bomber Command rained high explosives and incendiaries on Bochum steel works. Bomber Command again drained Dortmund-Emms canal, breaching the embankment. Admiralty announced frustration by Home Fleet of determined attacks by U-boats on large and important convoy during passage to Russia and back, 3 U-boats being sunk and others damaged. Super-Fortresses raided docks at Singapore. 5. Excellent progress made in western Holland. More than 1,200 American bombers with 650 fighters attacked railway marshalling yards at Frankfurt and Karlsruhe, chemical works at Ludwigshafen and Solingen steel works. In two days' air attacks at Manila, 440 Jap aircraft and 30 ships were destroyed. 6. Allied troops took Middelburg on Walcheren Island; on mainland several towns were captured near Maas estuary. Over 1,000 United States aircraft and over 1,000 R.A.F. bombers attacked many targets in Germany, including Gelsenkirchen and Coblenz. 7. British units captured Willemstad and held entire south shore of the Maas. 8. American Third Army attacked north-east of Nancy on front of 27 miles, and made advances up to 3 miles. The Scheldt estuary cleared. German High Command announced use of V2 in addition to flying bombs. 9. Third Army made farther progress and established crossings of the Moselle. American bombers attacked targets near Metz and railyards at Saarbrücken. All resistance on Walcheren ceased. 10. More advances by Third Army and bridgeheads consolidated. Mr. Churchill gave some details in Commons of enemy's long-range rockets (V2's) and said casualties and damage in southern England had not been heavy. From other sources it was revealed that the rocket flew through the stratosphere, reaching height of 60 to 70 miles and attained extremely high velocity as it crashed to earth. Eighth Army captured Forlì in Adriatic sector of Italian front. Jap reinforcements landed on Leyte but 7 enemy destroyers and 3 cargo ships were sunk by American planes. Japs claimed that they had taken 2 American air bases in southern China. 11. Main road from Metz to the Saar cut by American tanks. Soviet troops launched 2 new offensives towards Budapest. Super-Fortresses bombed Omura aircraft factory in Japan and enemy bases in China. Japs occupied Kweilin in southern China.

Tirpitz Sunk.—Nov. 12. Lancasters of Bomber Command attacked Germany's 45,000 ton battleship Tirpitz, lying in Tromsø Fjord, with 12,000 lb. bombs. They obtained several direct hits and

bombs on E and R boat pens at Ijmuiden, Holland, and attacked chemical works at Ludwigshafen. In Burma, Chinese troops captured Bhamo. Americans landed on Mindoro Island in Philippines south of Luzon.

German Drive into Belgium.—16. Rundstedt opened strong offensive against American First Army on 70 mile front in Ardennes between Monschau and Trier and advanced several miles into Belgium and Luxembourg. New Zealanders of Eighth Army entered Faenza on road to Bologna. 17. Violent fighting on land and in the air in new battle zone; 110 enemy aircraft shot down by Americans who lost 35. Super-Fortresses again bombed Nagoya and Hankow. 18. Germans threw powerful reserves into their offensive, advanced 15 miles and captured Malmédy; Allied airmen knocked out scores of tanks and other armoured vehicles. Lancasters bombed Baltic port of Gdynia. Soviet troops reached frontier between Hungary and Czechoslovakia. 19. Enemy made further progress in Ardennes salient; British and American bombers attacked vital points behind battle front. Super-Fortresses from China attacked Omura and other Jap centres. 20. American First Army drove Germans from Monschau, and held them in other parts of north of salient. Russians advanced in southern Slovakia. Indian Corps in Burma occupied Kandaung. 21. All enemy attacks on northern and southern flanks of the salient were held, but in 50 mile gap between Germans thrust over 30 miles into Belgium towards Liège. Bomber Command attacked Cologne and Bonn. After advance of 150 miles in 8 days, 14th Indian Corps captured 2 Jap bases on road to Mandalay. 22. Germans by-passed Bastogne and reached Laroche; enemy lost over 200 tanks in great armoured battle near Malmédy. Canadians in Italy made new thrust towards River Senio. Jap aircraft factory at Nagoya raided by Super-Fortresses. Announced that about 250,000 men were to be called to the Army "to sustain and nourish our Armies in the line," mostly from civil life and others from the Navy and R.A.F. 23. Germans reached Marche, 19 miles from French border, and recaptured St. Vith and Stavelot but Allies advanced in northern Luxembourg. In better weather, over 4,000 Allied bombers and fighters attacked enemy lines; 180 German aircraft were destroyed. 24. Enemy got to 4 miles of Dinant; Allied air offensive again had good results in over 6,000 sorties. Flying bombs fell in number of places in northern England including Manchester, fatalities being caused in several areas. 25. German advanced spearheads halted; enemy transport pounded from the air. Americans holding out in Bastogne supplied by air. 26. Soviet troops completed encirclement of Budapest, western suburbs of which were occupied. 27. Bastogne garrison relieved after being cut off for 7 days. American and British bombers struck at Rundstedt's supply lines, many railways being put out of action. Russians split in two the encircled enemy in Budapest. Other units headed for Vienna along the Danube. Announced that American submarines had sunk large aircraft carrier, 6 warships and 20 other vessels belonging to Jap Navy; United States destroyer lost off Leyte in recent action. Super-Fortresses from Saipan bombed Tokyo by day. Fifth Army in Italy made slight withdrawal after German attack in Serchio River valley sector. 28. General Patton's Third Army counter-attacked Germans on southern flank of the salient, and enemy were forced to retreat. Germans also pushed out of 2 Belgian towns near point of salient, with heavy losses in tanks and men. Bomber Command and American

aircraft raided many rail targets at Bonn, Cologne, Coblenz and other places. 29. German's withdrew on northern flank of salient, and Third Army made progress in the south; aircraft continued non-stop attacks on supplies and Bomber Command dropped 12,000 pounds on boat pens at Rotterdam. General Sir Henry Maitland Wilson promoted to Field-Marshal. 30. General Patton's drive against southern flank of salient reached scale of an offensive and Rochefort, most westerly point of German bulge, was strongly attacked. Soviet leaders sent ultimatum demanding surrender of Budapest; Germans shot two of the envoys. 31. Americans captured Rochefort; new offensive launched by Third Army near Bastogne. Many targets behind enemy lines bombed, R.A.F. also dropped bombs on Gestapo headquarters in Oslo in daylight and Mosquitos hit Berlin by night. Fifth Army in Serchio valley sector reoccupied Barga. Hitler broadcast New Year message to Germans.

1945.—THE YEAR OF VICTORY.

JAN. 1. German pilots, in all-out attempt to neutralise Allied air superiority over Western front, attacked Allied airfields in Belgium and Holland; 364 enemy aircraft were destroyed during the day. Lancasters again breached Dortmund-Ems canal, and other forces attacked transport targets, 4,246 sorties being flown. Third Army gained 6 miles in their offensive in the salient; 5 German counter-attacks against Seventh Army east of the Saar were held. On Arakan front in Burma, Indian troops occupied Rathedaung without opposition. First leave trains of men from Western Front arrived in London. 2. Enemy gained some ground in heavy battles on the Saar front. Third Army made further progress. Over 1,000 American heavy bombers attacked rail targets and at night more than 1,000 aircraft of Bomber Command hit Nuremberg and chemical works at Ludwigshafen. Admiral Sir William Ramsay, Allied Naval Commander-in-Chief killed in plane crash in France. 3. American First Army launched attack on northern flank of Ardennes salient. Much of ground lost on Saar front regained by Seventh Army. Great battle continued in Budapest; enemy attempting to break through to relieve encircled garrison occupied some places. Turkey broke off relations with Japan. Akyab, on west coast of Burma, occupied, Japs having withdrawn. 4. First Army advanced over 3 miles in new offensive and broadened its front; Seventh Army readjusted its positions and withdrew in places but elsewhere regained ground. 5. Supreme Headquarters disclosed that Field-Marshal Montgomery's Command had been enlarged to control north of the salient and that General Omar Bradley commanded southern sector. Attacks on both flanks made headway. Enemy opened new offensive in northern Vosges. Mr. Churchill returned to London from France, where he saw General Eisenhower and Field Marshal Montgomery. Bomber Command sent over 1,000 planes to raid Hanover and Berlin.

The Offensive Smashed.—6. Road from St. Vith to Laroche cut in several places by American tanks. Seventh Army abandoned Wingen; enemy crossed Rhine north-east of Strasbourg. British and American bombers supported Allied ground forces and at night R.A.F. raided Hamm. 7. Field Marshal Montgomery said Rundstedt's forces were "being written off." Lancasters attacked Munich in great strength. Loss of destroyer *Aldenham* announced. 8. Allies strengthened hold on Laroche highway, enemy's vital supply line in the

salient, and advanced on southern flank. Threat to Strasbourg diminished. Russians made new gains in Budapest, and north of the city neared Komarno's. 9. Very large forces of American troops landed on Luzon Island in Philippines under command of General MacArthur; Japs were surprised and control of beaches in Lingayen Gulf was obtained. 79 Jap aircraft were destroyed, after causing some damage to American warships. In Ardennes salient, Germans were forced on defensive and withdrew under British pressure in north. Official statement said German U-boat warfare had been more active in December, with increased Allied merchant craft losses. 10. American forces on Luzon advanced 4 miles inland and captured Lingayen airfield. Germans withdrew from western tip of Ardennes salient; landing grounds and transport centres behind the line pounded by American bombers. 11. Luzon beachhead widened and deepened. American carrier planes attacked 4 Jap convoys off Indo-China, sinking 25 vessels, including a light cruiser and several destroyers. Super-Fortresses from India bombed Singapore. Enemy withdrawal in the Ardennes continued; Laroche in Allied hands. 12. Allied pressure in the salient increased, and enemy retreated farther; British and Americans linked near St. Hubert. Bomber Command dropped 12,000 lb. bombs on U-boat shelters at Bergen. Home Fleet destroyed valuable enemy convoy off Norwegian coast. 13. Marshal Stalin announced that new Russian offensive south of Warsaw had broken through main German defences and advanced 25 miles on 37 mile front. American First Army launched attack on northern flank of the salient and made good progress. 14. Russians forced River Nida and cut Cracow-Warsaw railway. In the Ardennes Americans advanced north and south of salient. Bombers attacked oil plants and storage depots; they and escorting fighters shot down 180 enemy aircraft. Mandalay had its heaviest air-raid. Super-Fortresses bombed industrial plants on Japanese mainland and military installations on Formosa. 15. Soviet troops captured Kielce; German efforts to relieve Budapest garrison abandoned. Allies made slight gains in the salient against fierce resistance; oil targets, including the Leuna works, heavily bombed. 16. British Second Army launched attack upon German salient east of the Maas in Holland. In the Ardennes Allies entered Houffalize. Russians opened new offensives south of Warsaw and made breach in German defences 74 miles wide, Radom being captured. 17. Russians forced the Vistula and captured Warsaw, capital of Poland; they also broke through north of Warsaw and advanced up to 25 miles. American Third and First Armies joined up in the Ardennes; in Holland British Second Army made progress in thick fog. Bombers continued onslaught on oil targets. British forces in Burma crossed the Irrawaddy in the south. Formosa again bombed. 18. Pest, eastern part of Budapest, cleared of the enemy. British extended their front in Holland; in the salient enemy offered strong resistance in the shoulders. Admiral Sir Harold Burrough appointed Allied Naval Commander Expeditionary Force. Mr. Churchill in Commons expressed the opinion that the failure of the Ardennes offensive was more likely to shorten than to lengthen the war.

Russians invade East Prussia.—19. In five Orders of the Day, Russians announced their forces had reached Silesian frontier south of Wielun, 50 mile advance on northern slopes of Carpathians, capture of Cracow and Lodz and 28 mile thrust into East Prussia. Ferrying reinforcements across the Rhine,

Germans launched heavy attacks in Northern Alsace. Ardennes salient was reduced to a bulge and British in Holland captured more ground. 20. Russians in East Prussia offensive captured Tilsit. French First Army launched attack on 25 miles front into German pocket on west bank of Rhine near Colmar. Japs on Luzon split in two by American advance. Armistice with Provisional Government of Hungary signed in Moscow on behalf of United Nations. 21. Two Soviet Armies poured into East Prussia, capturing Tannenberg, burial place of Hindenburg; across Silesian border enemy strongholds on roads to Breslau were smashed. British forces in Holland crossed the Maas; French advance continued. Troops of Indian Corps landed on Ramree Island off coast of Burma after sea and air bombardment. 22. Further advances from south and east into East Prussia announced, and in Poland Soviet troops neared Poznan. Enemy transport retreating from the Ardennes heavily bombed, great destruction caused. 23. Russians reached River Oder on 37 miles front east of Breslau; in Poland railway from Poznan to Danzig was cut. Air onslaught on enemy transport and troops moving east was renewed; St. Vith captured. British advance towards the Roer from Holland made steady progress, and French opened new offensive against Colmar pocket. Americans made planned withdrawal north of Strasbourg. 14th Army in Burma occupied Monywa, lower Chindwin river port. 24. Russians captured Oppeln, capital of Upper Silesia, and towns north of Breslau; they advanced in Poland and launched new offensive in Slovakia. Germans continued their retreat from Ardennes salient and French increased pressure on Colmar pocket. 25. Enemy opened offensive in Alsace, crossing River Moder and cutting main road and railway through northern Vosges to Sarreguemines. British operation in Roer bridgehead made progress. Announced in Washington that troopship carrying 2,200 troops was recently sunk in European waters by enemy action, 248 being killed and 517 missing. Americans in Luzon captured main air base. 26. Soviet troops reached Gulf of Danzig and cut off East Prussian garrison from central Germany. In Breslau area they crossed the Oder in Silesia, Hindenburg was stormed and on Polish-German frontier, Zhukov's armour was only 100 miles from Berlin. German salient west of the Roer virtually cleared by British advances; enemy's attacks in northern Alsace held. 27. Russians encircled Poznan and broke through Masurian Lake defences south-east of Konigsberg. Ardennes salient completely extinguished and German frontier reached. 75 Jap planes shot down by Super-Fortresses in raid on Tokyo. 28. Liberation of Lithuania completed by occupation of Baltic port of Memel. Katowice, centre of Dombrova coal basin, captured. American First Army attacked and took 4 towns north-east of St. Vith; enemy thrown out of bridgehead across the Moder. 29. Marshal Zhukov's Armies entered German provinces of Brandenburg and Pomerania. First Army gained more than 6,000 yards. Heavy bombing attacks continued on railyards behind the front. Berlin also bombed again. 30. First Army advanced farther towards German frontier; French troops crossed Colmar canal. Hitler broadcast to German nation, calling upon every fit German to stake his life and body in battle. 31. Russians captured Landsberg, 68 miles from Berlin, and other towns in Brandenburg. Vanguard of First Army crossed German frontier and approached Siegfried Line.

Germany invaded in East and West.—Feb. 1. First and Third Armies made progress into Germany.

Bombers attacked Berlin and rail centres. Super-Fortresses sank floating dry dock at Singapore. Americans made another landing south of Manila. Submarine *Stratagem* presumed lost. Mr. Churchill and President Roosevelt met at Malta. Former Regents of Bulgaria, Prince Cyril, Prof. Filov and General Mikhov, executed after trial as war criminals at Sofia; nearly 100 others sentenced to death. 2. French First Army entered Colmar. Russians captured Soldin and Drossen in new advance towards Stettin. 3. American First Army broke through loop of Siegfried Line south-east of Monschau and advanced towards second defence zone. 1,000 Fortresses dropped 2,500 tons of bombs on Berlin in carefully planned raid, Air Ministry being hit. Bomber Command continued attacks on oil objectives. American troops entered Manila and captured concentration camp. 4. Belgium finally cleared of Germans; Americans got through second belt of Siegfried Line at one point. Russians reached place 38 miles north-east of outer suburbs of Berlin. 5. Breach of West Wall deepened; Colmar pocket cut in two, Germans remaining in the Vosges being surrounded. Announced that aircraft from carriers *Illustrious*, *Indomitable* and *Indefatigable* had attacked oil refineries at Palembang, in southern Sumatra. Enemy being rapidly cleared from Manila; 3,700 civilians in concentration camp freed. 6. Marshal Koniev's troops forced the Oder south-east of Breslau and extended bridgehead along 50 mile front. Government's scheme of war gratuities announced; they were to be based on length of service and rank, and cost would total £200,000,000. 7. Announced that Mr. Churchill, President Roosevelt and Marshal Stalin meeting in the Black Sea area, had reached complete agreement for joint military operations in the final phase of the war against Nazi Germany. Third Army made new thrusts into Germany across River Our. Over 700 British bombers attacked enemy troops in Cleve and Goch. 8. Canadian First Army opened offensive south-east of Nijmegen towards the Rhine after terrific barrage and heavy air attacks; good progress was made. Bomber Command attacked oil plant near Stettin. 9. Canadians made five mile advance in the Nijmegen offensive. American Third Army crossed River Prum and captured Olzheim. 1,300 American bombers hit Lutzendorf synthetic oil plant and other important objectives. Announced that U-boat activity had been slightly greater in January than in December, but merchant shipping losses were not substantially different. 10. Canadians pierced first of the three main Siegfried defence zones and entered Millingen. Americans captured Roer dams after Germans had blown some of the flood gates, causing River Roer to overflow its banks. Russians captured Elbing on Vistula. 11. Greater part of Cleve in Canadians' hands and main road to Gennep cut. Soviet troops cut Breslau-Berlin railway and almost surrounded Breslau. Breach across the Oder widened to 100 miles.

YALTA CONFERENCE.

Feb. 12. Officially announced that Mr. Churchill, Mr. Roosevelt and Marshal Stalin, after 8 days' conference at Yalta in the Crimea, had drawn up plans for final defeat of Germany, and agreed on plans for enforcing the no surrender terms. Germany would be occupied in zones with Central Control Commission in Berlin. Conference of United Nations would meet at San Francisco to prepare charter of an international organization to

maintain peace. British troops captured Cleve and got through original outer Siegfried defences. Farther south Americans took greater part of Prum, 11 miles east of German border. Soviet troops in Carpathians captured Bielsko and advanced 23 miles in Silesia. 14th Army began crossings of Irrawaddy. 13. Soviet High Command announced complete occupation of Budapest, total prisoners taken being 110,000. Koniev's troops captured Beuthen 70 miles north-west of Breslau, and occupied towns on the Oder. British troops cleared whole of the Reichswald inside Germany. Bomber Command dropped 650,000 incendiaries and great weight of high explosives on Dresden in support of Russian advance. 14. American bombers made heavy attacks on Dresden, Chemnitz and Magdeburg. In 24 hours Allies sent 9,000 air sorties against enemy railway centres, troops and supply lines. Bomber Command's main night target was Chemnitz on which 730,000 incendiaries and many 8,000 and 4,000 pounders were showered. German counter-attacks near the Reichswald repulsed. Russians captured more Silesian towns and crossed into Brandenburg. 15. South of the Reichswald Kessel was captured; Canadians secured ten mile front along west bank of the Rhine. American bombers again hit Dresden, and others attacked Cottbus, which Marshal Koniev's troops were approaching. Super-Fortresses bombed Nagoya on main island of Japan and Liberators attacked Iwojima. 16. Over 1,500 carrier-borne aircraft caused immense damage in Tokyo area, smashing all military targets near the capital in raids that lasted nine hours. Powerful American fleet bombarded air base on Iwojima. General MacArthur's troops captured Corregidor in the Philippines after heavy naval shelling and air bombardment. Koniev and Zhukov linked forces near Grunberg. Admiralty announced important convoy had been taken to Russia and back, not one ship being attacked; 2 U-boats were sunk and 3 German aircraft shot down. 17. Soviet tanks reached Neisse river on wide front. Crossing of Irrawaddy gave 14th Army 6 mile hold on south bank. Fortresses bombed Frankfurt on Main and Giessen. 18. Canadians' enveloping attacks on Goch made good progress. Lancasters battered Wesel Rhine crossing, and at night Mosquitos attacked Mannheim and Berlin. Soviet group commander, General Cherniakovsky, died of wounds. Submarine *Porpoise* overdue and presumed lost. 19. American marines landed on Iwojima, 750 miles from Tokyo, and quickly established firm bridgehead, after defences had been pounded for 4 days. Tokyo again bombed. Scottish infantry entered Goch against strong resistance. American Third Army broke through belt of Siegfried defences near Echterach. Bridgeheads over the Irrawaddy were expanded. 20. Goch virtually in hands of Scottish and Welsh troops. Americans strengthened hold on Iwojima and captured airfield. Bomber Command left Dortmund in flames. American Thunderbolts from Italy bombed Berchtesgaden. 21. Third Army made surprise armoured thrust between the Saar and the Moselle, took 2,400 prisoners and entered Saarburg. Rising air offensive included heavy raid by Americans on Nuremberg and attacks by Bomber Command on Worms, Duisburg and Berlin. Russians captured Czersk, 45 miles from Danzig, and farther south Zhukov's troops advanced to 34 miles from Berlin. 22. Allied aircraft made biggest bid to wreck German rail system, some 6,000 planes from Britain and Italy pounding many targets with good results. Third Army crossed the Saar and cleared most of Saarburg; farther north Canadians

made progress. Soviet forces occupied suburbs of Breslau.

Rhine Offensive Resumed.—23. After brief but heavy bombardment, American First and Ninth Armies launched offensive across River Roer east of Aachen. No major opposition was met and good bridgeheads were obtained and linked up. Third Army made more crossings of the Saar. Air attacks on railway targets continued. Russians advanced in Königsberg area and in Poland captured Poznan, taking 23,000 prisoners. Turkey declared war on the Axis by unanimous vote of Grand National Assembly. 24. Americans increased speed of their advance across the Roer, cleared Julich and occupied half of Duren; bridgehead extended to 22 miles, all counter-attacks being smashed. Russians crossed to west bank of River Neisse. Americans completely occupied Manila. Egypt declared war on the Axis; Premier shot dead after making the announcement in Parliament. 25. First and Ninth Armies swept into the Rhine plain and reached point 18 miles from Cologne, with armour across the Roer. Third Army pushed on, enemy salient collapsing. Berlin bombed by Mosquitos for sixth night running. Heavy raid on Tokyo by over 200 Super-Fortresses and carrier-borne aircraft. 26. First Army advanced 5 miles, Canadians enveloped Calcar on two sides and American Third Army closed in on important road centre of Bitburg. In greatest air attack on Berlin, 3,000 tons of bombs were dropped by American heavies on railway stations. Mosquitos hit capital again at night and also raided Nuremberg. 27. German resistance between the Roer and the Rhine crumbling under blows of Canadians and Americans; former entered last belt of Siegfried defences in Hochwald and captured Udem. Mosquitos again bombed Berlin and Americans hit Leipzig and Halle. Russians drove towards Baltic across north-eastern Pomerania. 28. Cologne came under fire from American guns as offensive towards the Rhine made more progress. Americans crossed River Erft and reached Rheydt, twin town of Munchen-Gladbach. Rail targets behind the front heavily bombed and Berlin had its ninth consecutive night raid. Soviet troops captured New Stettin in drive to the Baltic. **Feb. 1.** Ninth Army captured Munchen-Gladbach and continued advance along whole front against a disorganized resistance. Major air operations throughout the day against communications and synthetic oil resources; Berlin again bombed. 2. Ninth Army reached the Rhine at Neuss and enemy fled across the river in confusion; Krefeld and Venlo also taken. To the north Canadians and British made progress and in south Patton's Third Army occupied Trier and seized bridge over Moselle. Cologne bombed twice by R.A.F.; Mosquitos also attacked Berlin and Kassel. American heavies struck at many targets, shot down 67 enemy planes and destroyed 36 on the ground. 3. Ninth Army and Canadian First Army linked up between the Maas and the Rhine; enemy blew up the three bridges at Dusseldorf to save them from capture. Bomber Command attacked repaired embankments of Dortmund-Ems canal and other targets. Americans radded synthetic oil plants. Resuming raids on England by piloted aircraft, Germans lost 6 to R.A.F. 4. Americans closed in on the Rhine and Allies massed for the crossing, last German bridgeheads being destroyed. Air attacks continued without cessation. Russian forces reached the Baltic in Pomerania, Kolberg and Kdlin being captured. 9 people killed in East Anglian town by German piloted enemy aircraft raid. 5. Americans crossed the Roer and drove towards centre of

city; to the north enemy's Wesel bridgehead was steadily contracted and the Hochwald cleared. After many day sorties, Bomber Command raided Chemnitz and Berlin. In Burma 14th Army captured Meiktila and its airfields, 80 miles from Mandalay, after driving Japs back for 1,000 miles. 6. Cologne captured by American First Army, practically whole of the city west of the Rhine being occupied. After security silence, it was announced that American Third Army had advanced over 25 miles towards the Rhine.

ALLIES CROSS THE RHINE.

March 7. General Hodges First American Army crossed the Rhine at Remagen, 12 miles south of Bonn and established solid bridgehead. They captured a railway bridge intact by surprise attack. Patton's tanks reached Rhine north-west of Coblenz after driving 52 miles in 2 days. First Army developed offensive towards Bonn south of Cologne. Russians captured 2 towns in advance to Danzig; offensive on the middle Oder towards Berlin resumed. 8. Remagen bridgehead strengthened, troops and armour pouring across to east bank of Rhine; big German dumps captured on the way. British troops fought into Xanten near the Rhine. Ever mounting air attack hit enemy's oil supplies near the front. Tanks of 19th Indian Division entered Mandalay after swift advance. Chinese captured Lashio, whole of Burma Road being in Allied hands. 9. First and Third American Armies joined forces north of Remagen; Bonn wholly in American hands. Further extension of bridgehead. Kassel, railway junction in central Germany, heavily bombed. Presence of 15th American Army on front disclosed. Severe fighting continued in Mandalay. Tokyo had its heaviest raid. In February more U-boats were sunk than in January but moderate number of Allied merchant ships were lost. 10. Germans blew up bridges at Wesel and crossed river in boats as British and Canadians approached. 11. Remagen bridgehead increased to 9 miles long, with depth of 3 miles. Enemy's salient at Wesel wiped out. Allies line Rhine from Nijmegen to Coblenz. R.A.F. sent over 1,000 bombers to Essen and Americans bombed Hamburg, Bremen and Kiel. 12. In Remagen bridgehead, 23 towns cleared, including Honningten. Nearly 5,000 tons of high explosives and incendiaries dropped on Dortmund by R.A.F. in 29 mins. Americans attacked rail targets and Swinemunde on the Baltic. Kustrin, strong-point on east bank of the Oder, fell to Russians. American troops landed on Mindanao drove inland and captured town and airfield. 13. Pontoon bridge thrown across the Rhine near Remagen. Halifaxes bombed Barmen and other bombers raided targets in the Ruhr. Soviet forces closed in on Danzig. 19th Indian Division occupied centre of Maymyo, 40 miles north-east of Mandalay. Japanese industrial city of Osaka bombed by powerful American force. 14. Bomber Command for first time dropped new 10 ton bomb, target being railway viaduct at Bielefeld. British and American aircraft attacked many other places behind enemy lines. Washington announced that Allied military leaders were prepared to accept unconditional surrender of German units of any size but would not enter into armistice or truce. General Patton's Third Army opened new attack across the Moselle south-west of Coblenz. 15. Third Army made substantial gains. Seventh Army also made deep advance west of Saarbrücken. American bombers dropped 325,000 incendiaries on German General

Staff's headquarters at Zossen, 20 miles south of Berlin. R.A.F. attacked another viaduct with 20-ton bombs. Admiralty announced that British submarines had sunk 74 enemy vessels in Far Eastern waters during recent patrols. United States flag raised over Iwojima. 16. American First Army cut Ruhr-Frankfurt motor road; other offensives to the south made good progress, Kobe heavily bombed. Australians made new landing on Bougainville. Organized resistance by Japs on Iwojima ended. 17. Coblenz captured by Third Army, who also drove south-east towards Mannheim. General Eisenhower warned that city and Frankfurt that they would be destroyed from the air. Enemy plane caused fatalities in town in north of England. 18. German troops retreated in confusion before Third Army; Seventh Army made swift advance in Lower Vosges. 1,300 Liberators and Fortresses flew over Berlin area in greatest daylight attack on the capital, over 3,000 tons being showered down; at night Mosquitoes were over the city. Russians took Kolberg on the Baltic as ring round Königsberg tightened. Admiralty announced rescue by British destroyers of 500 Norwegians left on island without food and shelter by Germans. 19. Enemy ceaselessly bombed and machine-gunned as they retreated from the Moselle and the Saar, transport being disorganized. Aircraft also bombed jet aircraft installations and communications. 20. Seventh Army captured Saarbrücken and Zweibrücken and Third Army occupied Worms and reached Mainz. U-boat yards at Hamburg, oil refineries, rail yards and Berlin attacked from the air. Fort Dufferin at Mandalay fell after bitter struggle, and whole of Mandalay in Allied hands. Announced that American carrier task force had inflicted crippling damage on Jap Fleet in Inland Sea of Japan, destroying 475 enemy planes and damaging 15 to 17 warships with loss of only a few aircraft. 21. Third Army entered Ludwigshafen, on Rhine opposite Mannheim. German airfields in the Ruhr left in flames by Allied aircraft which also attacked communications centres and marshalling yards. Gestapo headquarters in Copenhagen totally destroyed by Mosquitoes. 22. Soviet troops broke through in Silesia on both sides of Oppeln, advanced 25 miles and linked up, encircling and routing an enemy group; 15,000 prisoners taken and many towns occupied. German communications between the Ruhr and Netherlands frontier attacked by overwhelming weight of bombs, traffic east of the Rhine being paralysed. Kesselring appointed German Commander-in-Chief in the west, Rundstedt being displaced. Third Army crossed the Rhine south of Mainz and established bridgehead. 23. Air attack to isolate the Ruhr continued, 14,630 sorties being flown. Soviet troops took Zoppot, cutting Danzig from Gdynia.

DECISIVE WEEK IN EUROPE.

March 24. Decisive week-end of the war in Europe opened before dawn when, after intensive air and artillery bombardment and under an enormous smoke screen, British Second Army under General Dempsey and American Ninth Army under General Simpson crossed the Rhine in thousands of craft and made four major landings in neighbourhood of Wesel and linked up with mammoth airborne operation from 3,000 transport aircraft from England and the Continent, screened by hundreds of fighters, while bombers pounded troops and communications. 25. Operations crowned with complete success, Field Marshal

Montgomery's troops having by nightfall merged their landings into solid bridgehead on 30 mile front with depth of 7 miles. Floating bridge over the Rhine took armour across in strength, 8,000 prisoners taken. Mr. Churchill accompanied the Field Marshal across the river to visit victorious troops. American Third Army made several new crossings south of Coblenz and swept forward, capturing Darmstadt; their prisoners totalled 300,000. First Army broke out of Remagen bridgehead. Russians launched offensive in Hungary west and north-west of Budapest, advancing 28 miles. 26. Big gains made on the three Rhine fronts. Montgomery's bridgehead was extended, first counter-attacks being beaten off; Patton's tanks entered Frankfurt and penetrated into Bavaria, making further crossings of the Rhine; and American Seventh Army without artillery preparation got over north of Mannheim after clearing up the Saar line. British warships of Pacific Fleet joined in attacks on Ryukyu island chain. 27. General Eisenhower said that as military force Germans were a whipped army, their main defence line having been broken. British Second Army drove east almost unopposed, and tanks of American First Army had got 59 miles east of the Rhine, besides linking with American Third Army south of Coblenz. Last rocket fell in England. Soviet troops entered suburbs of Danzig and Gdynia. Argentina declared war on Germany and Japan. 28. Whole enemy line in retreat before Allied armour, in places German troops being routed. British took Borken and Dorsten and Americans occupied Hamborn and Giessen; in the south American Third and Seventh Armies advanced rapidly. Aircraft bombed withdrawing enemy troops throughout the day, bomb lines changing every hour. Russians carried Gdynia by assault and along the Danube captured Gyor and Komarno in advance towards Vienna. 29. Security silence imposed on advancing Armies. Last doodle-bug fell in England. 30. Canadians took Emmerich and to south Americans cleared suburbs of Duisburg. Ruhr Valley outflanked by American First Army. Heidelberg and Lanterbach occupied. Soviet troops stormed town and fortress of Danzig, taking 10,000 prisoners and much booty, including 45 U-boats. 31. British armour closing round Munster. 15th American Army went into action. In the south, French First Army crossed Rhine between Mannheim and Karlsruhe. **Apr. 1.** The Ruhr cut off by encirclement, American First and Ninth Armies meeting near Lippstadt. To the north, Montgomery's forces were over 80 miles beyond the Rhine. Soviet troops 33 miles from Vienna; Glogau and many other places in Czechoslovakia taken. American soldiers and marines, supported by huge fleet, invaded Okinawa, largest of Ryukyu islands. 2. Munster entered and troops advanced 17 miles beyond; British airborne force crossed Dortmund-Ems canal and approached Osnabrück, while Canadians pushed 15 miles into Holland. Americans cut island of Okinawa into two. 3. Canadians' advance along Netherlands border threatened all enemy supply lines into Holland. Progress made along whole front, Cassel being among places captured. 4. British armoured spearheads crossed the Weser north-east of Osnabrück. Other troops converged on Arnhem, and right in the south French First Army captured Karlsruhe. Soviet forces stormed Bratislava, capital of Slovakia. Super-Fortresses made low-level demolition raid on Tokyo. 5. American Ninth Army crossed the Weser; British troops entered historic town of Minden and cleared Osnabrück. Canadians occupied Zutphen in

Holland. Americans got into Mülhausen, east of Cassel. Russians reached the gates of Vienna and cut highway to Linz. Soviet Government announced its intention to denounce Russo-Japanese neutrality pact. Jap cabinet resigned and Admiral Suzuki formed new Government. General MacArthur appointed to command all Army forces in Pacific and Admiral Nimitz all naval forces. 6. British and American tanks crossed the Weser. "Desert Rats" advanced 60 miles in 24 hours towards Bremen.

U.S.S.R. IN VIENNA.

April 6. Russians fought their way into Vienna which came under heavy shell fire. On Italian Front, Fifth Army made surprise attack in mountains dominating Ligurian coastal plain and captured some heights. 7. Canadians gained more ground in Holland and other forces neared Bremen and Hanover. Japan's biggest battleship *Yamato*, with 2 cruisers and 3 destroyers, sunk in sea-air battle with Americans near Okinawa; 391 Jap planes shot down and many other warships put out of action. American losses were 3 destroyers and 7 planes. Allied airborne troops dropped over wide area of northern Holland east of Zuider Zee. 8. They made contact with Canadians advancing towards them; in south Zutphen captured. 9. Link up between airborne men and Canadians strengthened and forces drove towards Zuider Zee and Emden. German pocket battleship *Admiral Scheer* sunk in attack on Kiel by Bomber Command, who also dropped 10-ton bombs on U-boat shelters at Hamburg. Russians captured centre of Vienna and completed occupation of Königsberg. U-boat effort in March increased, but fewer successes were obtained than in February. 10. American Ninth Army captured Hanover and cut motor road to Brunswick; American First Army entered Nordhausen 60 miles from the Elbe. Essen in Ruhr pocket captured, Canadians in Holland fighting in outskirts of Deventer. In heavy raid on Berlin, American aircraft destroyed 305 enemy planes for loss of 33. R.A.F. attacked Leipzig three times. Powerful attack launched by Eighth Army in Adriatic sector of Italian front, crossing river Senio on wide front. Mr. Churchill announced Empire's losses to end of February were 1,126,802, killed numbering 306,984. 11. Ninth Army reached the Elbe near Magdeburg, 70 miles from Berlin. Air offensive continued, Bomber Command's many targets including railways in Bavaria. Eighth Army made farther advance from Senio bridgehead; other troops landed in enemy's rear. More of Vienna cleared by Russians. Spain broke off relations with Japan. 12. Ninth Army crossed the Elbe and held 6 mile front on east bank. Third Army captured Weiman and crossed River Saale. In north Scottish troops took Celle on main Hanover-Bremen railway and in Holland Canadians enlarged bridgehead across the IJssel. Soviet troops crossed the Oder and waged battle on approaches to Berlin. Eighth Army crossed Santerno in strength. Very large force of Super-Fortresses bombed industrial targets in Tokyo. 13. Canadians entered Arnhem and took half of town. Ruhr town of Duisburg taken. Capture of Vienna officially announced, 130,000 prisoners being taken in 4 weeks' fighting. Another concentrated air attack on Kiel. 14. Occupation of Arnhem completed and Canadians entered Groningen. American aircraft and French troops attacked German pocket in Grondre area north of Bordeaux. 15. Canadians reached North Sea coast, cutting

enemy's escape route. French troops entered Royan in Grondre pocket. 16. American Seventh Army entered Nuremberg. Germans at Groningen surrendered, Northern Holland being virtually liberated. British armour broke out of bridgehead across the Aller at Rethem. Enemy troops in Grondre pocket fled to northern tips after heavy bombing and tank attacks. Berlin heard Russian guns, Soviet troops capturing enemy positions in Kustrin area. Hitler called on his armies on east front to save Berlin. Germans in Ruhr pocket surrendered in masses. Fifth Army in Italy began new assault south of Bologna. In attacks on airfields 1,016 enemy aircraft were destroyed and 700 damaged. Lancasters attacked German naval units at Schweinemunde and sank pocket battleship *Lutzow*. Tokyo again bombed. 17. During first 16 days of April, it was announced 755,573 prisoners were taken on western front, including 260,000 from Ruhr pocket. Advance continued on whole front. 18. British armour nearing Hamburg. Canadian spearheads reached Zuider Zee. American Third Army entered Czechoslovakia. First stories told of horrors of Belsen camp, near Bremen. Bomber Command sent nearly 1,000 bombers to attack Heligoland and airfield on adjacent island. 19. Moscow announced opening of offensive against Berlin, Russians forcing River Neisse and establishing and widening bridgehead across the Oder, west of Kustrin. To arrest Canadians' advance, Germans flooded Hook of Holland, destroying great areas of farmland. American First Army cleared Leipzig. Lancasters again raided Heligoland, dropping 12,000 lb. bombs. In Italy enemy were driven from vital gap by Eighth Army. 14th Army captured first of the big Burma oil towns. 20 Soviet troops only 25 miles from Berlin and closed in on Dresden. Flying Fortresses hit railway targets in the city area. Guards Division cut road between Bremen and Hamburg. All organized resistance in Nuremberg ceased. French troops outflanked enemy positions in Black Forest. In Grondre pocket only scattered groups of Germans continued to fight. General Eisenhower announced over 37,000 prisoners and immense booty taken in the Ruhr. Civilian casualties in United Kingdom were 60,585 killed and 86,175 injured.

Fighting in Berlin suburbs.—21. Russians fighting in suburbs of Berlin, three miles from heart of city. In the west British bridgehead over the Elbe expanded. Tanks shelled enemy cruiser defending Hamburg and U-boat leaving dry dock. Eighth and Fifth Army freed Bologna and advanced beyond city. 22. Many suburbs of Berlin captured by the Russians; city invested on 3 sides. In the south French occupied Stuttgart and reached Swiss border, sealing off enemy forces in Black Forest. Germans retreating across the Po Valley bombed with devastating results. 23. Russian troops broke into Berlin from the south as advance from the Oder made progress. American Third Army suddenly switched attack upon Bavaria and took Germans by surprise, advancing rapidly towards mountain redoubt of Nazis. Both Fifth and Eighth Armies reached River Po. 24. Soviet troops from east and south made contact in Berlin, more suburbs of which were captured. American drive into Bavaria continued, enemy making stand at Regensburg. French occupied Ulm and crossed the Danube. British fought their way into suburbs of Hamburg and Bremen. In Italy Allies crossed River Po, and captured Ferrara, Modena and Spezia. 25. Armies of Marshal Zhukov and Koniev joined north-west of Potsdam, thus surrounding Berlin. Lancasters dropped 12,000 lb. bombs on Berchtesgaden,

hitting Hitler's chalet and barracks in grounds and Hitler's mountain refuge. Resistance in Italy slackened as the two armies advanced. Oilfields of Burma cleared of Japanese with capture of Yenanyang. 26. Firm contact established between Americans and Soviet troops at Torgau, north-east of Leipzig, cutting German in two. Russian troops poured into Berlin, radio centre being taken. Port of Stettin occupied, Bremen surrendered. New crossings of Danube made by General Patton's Americans. Göring relieved of command of Luftwaffe owing to illness. Allies in Italy entered Verona and crossed River Adige. 14th Army in Burma took Toungoo. 27. Mr. Churchill, President Truman and Marshal Stalin issued messages reaffirming their determination to complete destruction of the Reich. Russians captured Potsdam, Spandau and Tempelhof aerodrome. Third Army entered Regensburg and crossed frontier into Austria. Fifth Army occupied Genoa after partisans had seized part of city. Arrest of Mussolini reported. 28. Himmler offered unconditional surrender to Britain and United States but not to the U.S.S.R. Offer was refused as only unconditional surrender to the three major Powers would be entertained. Fifth Army captured Brescia and Bergamo. Mussolini and his mistress and 12 members of his Cabinet were executed by Italian partisans in village and their bodies taken to Milan. 29. British crossed Elbe near Lauenburg, south-east of Hamburg, and gained substantial bridgehead. American Seventh Army entered Munich; Third advanced from the Danube to east of the city; and French troops came into line on Austrian border. Russians captured Berlin district of Moabit. Fifth Army occupied Milan and London Division of Eighth Army entered Venice. Formation of provisional government in Austria announced. 30. Soviet troops isolated Baltic port of Swinemünde and in Czechoslovakia stormed Moravská Ostrava. In Berlin, they captured Reichstag building and hoisted Red Flag. Last Jap defensive position before Rangoon broken by 14th Army. May 1. In wireless announcement Grand Admiral Dönitz said Hitler had died in Berlin after appointing him as his successor. New Führer said struggle would continue. Russians took Brandenburg and Stralsund and cleared more districts of Berlin, their tanks being in the Tiergarten. New Zealand troops of Eighth Army crossed River Isouzo, and made contact with Marshal Tito's army; other forces entered Udine and Fifth Army advanced along Gulf of Genoa.

SURRENDER IN ITALY.

May 2. Hostilities ceased in Italy, nearly a million Germans surrendering unconditionally to Field Marshal Sir Harold Alexander as result of document signed at Caserta three days earlier, large part of Austria being included in capitulation area. Field Marshal Alexander in Order of the Day told his troops they had won victory which had ended in complete and utter rout of German armed forces in Mediterranean. Russian High Command announced capture of Berlin and surrender of garrison. Soviet troops captured Rostock on the Baltic, and 20 miles away British Airborne Division took Wismar, other forces taking Lübeck. Australian troops invaded Borneo. British forces landed south of Rangoon. 3. Enemy collapsed in northern Germany and prisoners flocked in. British Second Army taking at least 500,000 in two days. Hamburg and Oldenburg surrendered and British troops crossed Danish frontier. In Burma British entered

Rangoon after rapid advance. 4. Field Marshal Montgomery reported that all enemy forces in Holland, north-west Germany, and Denmark had surrendered. In the south the "redoubt" was split into fragments. Salzburg and Innsbruck falling. Seventh Army went through Brenner Pass to join with Fifth Army in Italy. 5. An Army Group in Southern Germany surrendered to Sixth Army Group under General Devers, some 300,000 troops being involved. Patriots in Czechoslovakia rose and Czech flags flew again in Prague. In north-west Germany more than 400,000 Germans laid down their arms and hostilities ceased in accordance with surrender arranged with Field Marshal Montgomery. Soviet troops took Swinemünde and Peenemünde. 6. Third Army advanced north-east into Czechoslovakia, taking Pilsen. Blaskowitz, leader of German 25th Army, with about 120,000 troops in western Netherlands, unconditionally surrendered to Canadian Commander, General Foulkes. Release from prison camps announced of Daladier, Reynaud, Generals Gamelin and Weyand, Kurt Schuschnigg, Leon Blum, and Lord Lascelles.

ALL GERMANY SURRENDERS UNCONDITIONALLY.

7. New German Foreign Minister broadcast to German people announcing the unconditional surrender of all German fighting troops. Surrender was signed at 2.41 a.m. in school-room at Rheims serving as General Eisenhower's Headquarters, by General Jodl, German Chief of Staff, in presence of General Bedell Smith, Allied Chief of Staff and other Allied officers. German emissaries were afterwards presented to General Eisenhower and Air Chief Marshal Tedder, whom they assured that they were ready to carry out the terms. German forces in Norway capitulated. Admiral Dönitz ordered U-boats to cease hostilities and return to port. British armoured cars arrived in Copenhagen to join airborne troops flown in. Field Marshal Montgomery met Marshal Rokossovsky at Wismar. Eighth Army crossed Italian frontier into Austria north of Udine. Garrison at Breslau ceased resistance and surrendered. Fighting still going on in Prague, where populace revolted against Germans. Victory in Europe celebrated in all Allied capitals.

VE DAY.

8. Mr. Churchill broadcast end of hostilities one minute after midnight, although "Cease Fire" had been sounded already all along the front. Agreement signed at Rheims was ratified and confirmed at Berlin, being signed by Air Chief Marshal Tedder, Marshal Zhukov, and General de Lattre de Tassigny for the Allies and by Keitel for the German forces. Huge crowds rejoiced in London, where King and Queen and the Princesses appeared on balcony of Buckingham Palace several times, once with Mr. Churchill, and were enthusiastically cheered. Prime Minister spoke to great assembly in Whitehall, with his Cabinet standing by his side. Oslo liberated. Russians occupied Dresden. 9. German garrison on Channel Islands surrendered to small force of British troops amid deep emotion of the people. Rejoicings continued on second VE Day. Last German warships, including cruisers *Prinz Eugen* and *Nürnberg*, surrendered to British Fleet at Copenhagen. 10. First U-boat to surrender in home waters hauled down her flag at Portland. New decorations, including the Burma Star, announced. 11. Allied columns drove Jap rem-

nants south along banks of Irrawaddy in efforts to trap them in south-west Burma. More U-boats surrendered in British harbours. Fighting in Prague subsided. American forces made another landing on Mindanao in Philippines. New offensive launched on Okinawa. 12. In 2 days 225 Jap aircraft destroyed over Okinawa where troops advanced. Field Marshal Montgomery given great welcome in Copenhagen. Unconditional surrender of German garrison in Crete signed. 13. Americans captured largest aerodrome on Mindanao. Australians in amphibious operation occupied Wewak peninsula and airfield in northern New Guinea. Kyushu, southernmost Jap island, raided by 900 planes, and 500 Super-Fortresses laid waste densely populated city of Nagoya. 14. British occupation of Heligoland announced. 15. Admiralty announced that during closing months of the war, 81 German midgeet submarines were destroyed, 28 possibly sunk and 70 others attacked. Since the capitulation about 100 more midgeet U-boats had been captured. Japanese Cabinet decided to abrogate all treaties with Germany. 16. Nagoya again bombed with incendiaries. British ships and aircraft sank Jap cruiser of Nati class about 50 miles from Penang. 17. Last of German armed forces in the west rounded up. 19. Super-Fortresses rained bombs on industrial districts of Tokyo and Hamamatsu, 66 miles from the capital. 20. Chinese troops occupied treaty port of Foochow and drove east. Surrendered U-boats in British ports now numbered 43. 22. Jap counter-attacks to prevent 14th Army advance were thrown back with losses. Washington disclosed that Jap balloons carrying bombs had been dropping in United States, no property being damaged. They also fell in Canada. 23. Americans' hold on Okinawa extended. 550 Super-Fortresses dropped 750,000 fire bombs on congested quarter of Tokyo. Mindanao captured. 25. Another 4,000 tons of incendiaries showered on business district of Tokyo, which was smashed beyond hope of restoration as Jap Premier admitted. 27. Further successes by Chinese armies announced, including capture of Nanning, capital of Kwangsi. 28. William Joyce ("Haw-Haw") wounded and captured near Danish frontier. Trade convoys ceased in non-combat areas. Big fires caused in Yokohama when Super-Fortresses dropped 3,200 tons of incendiaries on docks, shipyards and industrial plants; Tokyo and Kawasaki also attacked. June 1. Super-Fortresses left great destruction after heavy raid on Osaka. Chinese troops advanced in Kwangsi. New British Army, the Twelfth Army, formed in Burma under command of General Stopped. 2. Carrier-borne bombers attacked Jap "suicide plane" bases and railways in southern Kyushu. 3. In South China, Japs lost Tsiensiang. 4. Americans cut off peninsula on Okinawa, cornering several thousand Japs. Kobe attacked by 500 Super-Fortresses. 6. Headquarters announced Allied losses among ground troops from D Day to VE Day totalled 766,967, of whom British and Canadian were 284,522. American marines captured Naha airfield on Okinawa. 7. Osaka again bombed by 400 Super-Fortresses. Officially announced that over 700 U-boats had been sunk and many others destroyed by Germans in final stage. 8. Chinese recaptured former American air base at Linchow. Osaka and air base on Kyushu raided. 9. Very large force of Super Fortresses attacked Osaka in Tokyo area. Australian forces made progress on Tarakan. 10. Australians landed on Labuan Island, controlling naval base. Attacked factories and other targets

near Tokyo bombed. 11. Labuan town and airfield captured. New landings made on Bougainville and on coast of North Borneo. 13. Australians in Borneo captured Brunai and made progress in Labuan. 14. Osaka again blasted from the air, and Hong Kong in flames after 25,000 gallons of jellied petrol had been dropped. Truk naval base was heavily attacked by British Pacific Fleet. 15. Bombardment of Truk continued. 16. Americans captured hills dominating Jap positions on Okinawa. 17. New industrial targets in Japan attacked with fire bombs. 19. Very large force of Super-Fortresses attacked industrial targets in Honshu and Kyushu in darkness. 20. Australians landed on Sarawak without opposition. One of guards at Hitler's headquarters gave detailed story of suicide of Hitler and Eva Braun in shelter of Berlin Chancellery on May 2 and burning of their bodies in the grounds.

BATTLE OF OKINAWA.

June 21. After 82 days' fighting battle of Okinawa won, and organized resistance ceased, new base for bombing Jap mainland being thus obtained. Naval arsenal at Kure was main target for another Super-Fortress attack. 23. Australians on Borneo seized great Seria oilfields, some of wells being found burning. Labuan island cleared and resistance on Tarakan ended. 25. War factories in Honshu attacked by 500 bombers. 28. Nearly 500 Super-Fortresses bombed 3 important ports on Kyushu and manufacturing centre on Honshu. July 1. After 15 day naval bombardment Australians landed on Balikpapan in south-eastern Borneo and moved inland swiftly. Biggest force of Super-Fortresses dropped 4,000 tons of incendiaries on 4 targets. 2. Announced that British submarine *Trenchant* had sunk 10,000 ton Jap cruiser. Industrial targets south of Osaka bombed. 3. About 500 bombers hit a number of industrial targets on Jap islands. Australians captured airstrip and drove inland, east of Balikpapan, main part of which was occupied. 5. Australians took another airfield in Borneo and occupied remainder of Balikpapan. Jap assaults on British forward posts near Pegu held. 7. Australians crossed Balikpapan Bay and landed on west coast and moved inland, obtaining control of anchorage. Jap thrust in Burma held. Announced that 3 British aircraft-carriers had been hit by suicide planes during attacks on Sakashima Islands, suffering only minor damage. Air attacks on Japan continued. 9. Over 1,000 carrier-borne aircraft raided Tokyo, and gained complete mastery of skies there, destroying or damaging 152 Jap planes on the ground. None of American warships was damaged. 12. Air attack on Japan resumed with heavy raids on 4 cities. 13. Announced that British East Indies Fleet had swept approaches to Malacca Straits and attacked targets on islands in Nicobar group by air and bombardment. Australians in hard fighting advanced from Balikpapan. 14. Powerful units of Pacific Fleet, including 3 battleships, shelled industrial city of Kamaishi north of Tokyo, for over 2 hours, doing enormous damage. Another massive attack by over 1,000 bombers took place on Tokyo area, destroying many Jap planes and wrecking 15 airfields. 15. Pacific Fleet bombarded steel centre of Muroran on Hokkaido after bombs from carrier planes had been showered on the area. 16. British task force augmented Pacific Fleet which made air attacks of great strength against Tokyo area. Super-Fortresses bombed 4 towns. 17. R.M.S. *King George V* joined United States battleship in shelling industrial areas north of Tokyo,

and carrier-borne aircraft attacked throughout the day. 18. Fleet continued attack on Tokyo area and farther north and carrier-borne aircraft bombed remnants of Jap navy in Yokosuka naval base, damaging a battleship. Shan-shai airfield bombed. 19. Super-Fortresses in their biggest raid dropped 4,000 tons of bombs on Choshi, Hitachi, Fukui and Okazaki and oil refinery north of Osaka. Australians in Borneo occupied several towns without opposition. 20. Bombers from Okinawa again hit aerodromes in Shanghai area. 21. Jap 28th Army trying to escape from trap near Pegu in Burma were mown down by 14th Army. 22. Warships swept close inshore south of Tokyo and sank 2 Jap ships and hit 2 others. Aircraft attacked naval base at Kure. 24. Kure bombed by 1,500 carrier aircraft from British and American Fleets, 2 battleships, 3 cruisers and one aircraft carrier being damaged. Warships bombarded seaplane base and other targets. 700 Super-Fortresses attacked Osaka, Nagoya and other places. Heavy fighting continued in Burma, Japs suffering heavy losses. 25. Attack on Jap warships and other targets by carrier aircraft continued, 28 warships being damaged, and Super-Fortresses bombed oil refineries. Main body of Japs in Borneo in flight before advancing Australians. 26. In proclamation issued by President Truman, Mr. Churchill and General Chiang Kai-shek Japanese people were given choice of surrender or prompt and utter destruction. Another fire-bomb raid on cities on Jap mainland. 28. Jap battleship beached and another damaged and explosion caused on aircraft-carrier by raid by carrier-borne planes. By leaflets 11 Jap cities were warned to avoid destruction. 29. Tokyo area again raided by 1,000 aircraft and warships bombarded south coast of Honshu. Disbandment of Eighth Army announced. 30. Allied vessels entered Suruga Gulf in southern Honshu and bombarded Shimizu. Disclosed that task force of British East Indies Fleet had been minesweeping off west coast of Malay Isthmus. 31. Attack on Jap mainland continued; in previous 21 days 1,023 surface ships and 1,257 aeroplanes destroyed or damaged. 12 more Jap cities warned that they would be destroyed by fire-bombs. Aug. 1. 800 Super-Fortresses dropped record load of 6,000 tons of bombs on 5 industrial towns. Wake Island shelled and bombed. 3. All Jap harbours mined by Allied aircraft and there was complete shipping blockade of the homeland. 4. More Jap cities warned of coming destruction.

THE ATOMIC BOMB.

Aug. 5. The first atomic bomb dropped by United States aircraft on Hiroshima, important Japanese base on Honshu. President Truman, from cruiser *Augusta* in Mid-Atlantic, announced that British and American scientists had "harnessed the basic power of the universe" and that the bomb had explosive power equal to 20,000 tons of T.N.T. and more than 2,000 times the blast power of largest bomb previously used. Impenetrable cloud of dust and smoke covered target area. Statement was issued from Downing Street of Britain's share in the investigation written by Mr. Churchill before change of Government. 7. Tokyo and Yokohama areas bombed, and 800 tons dropped on Toyokawa naval arsenal. 8. Soviet Foreign Minister announced that the Allies had requested Russia to join in war against Japan and that Russia had agreed. Jap Ambassador in Moscow was told Soviet Government considered this policy the only means of bringing peace nearer. Mr. Attlee welcomed "great decision." Official

photographs of Hiroshima showed that 4 square miles of the city were completely destroyed by one atomic bomb. Ordinary bomb attacks on mainland continued. 9. Russia at war with Japan, Soviet troops crossed Manchurian frontier at many points and several places captured. Second and more powerful atomic bomb dropped on Nagasaki with devastating results. Warships and carrier planes attacked north-eastern Honshu. 10. Japanese Government made offer of unconditional surrender on declaration of Potsdam with the understanding that prerogatives of the Emperor were not prejudiced. The Four Allied Powers concerned consulted through regular diplomatic channels. Russians drove 100 miles into Manchuria. 11. Allies told Japan that from the moment of surrender authority of Emperor and Japanese Government should be subject to Allied Supreme Commander, Emperor being required to ensure signature of surrender terms and to command all forces to cease active operations. Japanese Government must transport prisoners of war and civilian internees to places of safety. 12. Jap Cabinet considered Allied reply. Tokyo area bombed. Pacific Fleet warned to be vigilant. 13. Operations continued with more raids on Tokyo area and farther advance by Russians into Manchuria. Fierce fighting in Burma.

JAPAN SURRENDERS.

Aug. 14. Broadcasting at midnight, Mr. Attlee announced that Japan had surrendered and that the Emperor had agreed to authorize and ensure signature of necessary terms for carrying out provisions of Potsdam declaration and to order cessation of active operations. President Truman made similar announcement and said General MacArthur had been appointed Supreme Allied Commander to receive the surrender. News came after yet further air attacks on many targets in Japan and Russian advance in Manchuria, but offensive action was then suspended. United States Navy Department announced recent loss of heavy cruiser *Indianapolis* with nearly 900 casualties. 15. General MacArthur ordered Japanese to cease hostilities and to send to Manila a representative fully empowered by the Emperor to receive instructions. 16. Emperor ordered all Japanese forces to cease fire. Suzuki Cabinet resigned and was succeeded by one under Prince Higashi-Kuni, Emperor's cousin. Fighting continued in Manchuria; Russian Commander sent ultimatum to Japs to surrender. 17. On several sectors of Manchurian front Jap forces surrendered to Russians. 19. Jap envoys arrived at Manila and began conference with Allied High Command representatives to provide information asked for. Hostilities in Bougainville ended, and more Japs surrendered in Manchuria, but no contact yet made with enemy in Burma. 20. Manila talks ended and Jap envoys returned to Tokyo. Soviet troops occupied Harbin and Mukden. 22. Russian airborne troops landed in Dairen and Port Arthur. 23. Stalin announced whole of Manchuria had been occupied, Jap Army surrendering. 25. Occupation of Japan postponed because of series of typhoons. Chinese troops entered Nanking. 26. Jap envoys arrived at Rangoon and handed over detailed information to British Officers. 27. First Allied troops landed by air at Jap airfield near Tokyo. Advance flotilla of Allied Fleet moved into Tokyo Bay in readiness for occupation. Announced that Governors of Hongkong, North Borneo and Straits Settlements had been released from Jap camps in Manchuria. 28. Occupation

of Japan began, advance airborne force being landed. Arrangements made under agreements signed at Rangoon for Allied entry came into force in S.E.A.C. theatre. Russians occupied whole of Sakhalin island. General Percival, British commander when Singapore fell and General Wainwright, American commander on Corregidor, arrived at Chungking from Jap camp. 29. Main landings began in Japan, both by air and from sea, huge Allied fleet being massed in Tokyo Bay. 30. Occupation forces spread out over Yokosuka, Yokohama and Tokyo plain. General MacArthur landed and set up his headquarters at Yokohama. Strong British naval force entered harbour of Hong Kong which was occupied and British administration set up. Sept. 2. Jap envoys signed instrument of unconditional surrender on board United States battleship *Missouri* in Tokyo Bay. General MacArthur and representatives of all the Allies added their signatures. Afterwards 13,000 American troops were landed from convoy in Tokyo Bay ready to march on Tokyo. 3. Units of Royal Navy anchored off Singapore. Marines took over. Penang after its surrender. Disarming of Jap forces on Bougainville completed. First group of liberated prisoners of war left Japan. 4. General MacArthur order demobilization of Jap Army and speed up of release of prisoners of war. Thousands of troops landed. 5. British, Indian and Gurkha troops landed at Singapore and were given "civic reception" by Jap commander. 6. Surrender of Jap in South-West Pacific signed on H.M.S. *Glory* off Rabaul. 8. General MacArthur and first American troops entered Tokyo and Stars and Stripes was hoisted at American

Embassy. Jap emissaries signed surrender instrument in the Solomons. 9. Formal surrender of 1,000,000 Jap troops in China signed at Nanking, instrument recognizing complete military defeat. 10. General MacArthur ordered dissolution of Japanese Imperial Headquarters and set up press and wireless censorship. 11. Tojo, Jap Premier who ordered Pearl Harbour treachery, attempted suicide when about to be arrested; General MacArthur ordered arrest of all members of War Cabinet and other leaders. 12. Official surrender in South-East Asia took place at Singapore, Admiral Mountbatten warning Jap representatives against attempts at obstinacy or non-co-operation. 13. Jap forces in New Guinea and Burma formally surrendered in Wewak and Rangoon. 14. Jap Imperial Military Headquarters abolished. 14. Jap forces in Malaya formally surrendered at Kuala Lumpur. 15. Tojo, former Jap Foreign Minister, and other war criminals arrested. 17. Japs in Hong Kong surrendered. 27. Emperor Hirohito made formal call on General MacArthur in Tokyo. 29. Britain agreed to United States proposal for establishment of Far Eastern Commission to formulate policies for carrying out Japanese surrender terms, to which Russia and China had agreed. Oct. 4. Allied headquarters in Tokyo ordered dismissal of Jap Home Minister, release of political prisoners and abrogation of laws restricting freedom of religion and speech. 5. Japanese Cabinet resigned. 6. Baron Kijuro Shidehara appointed Prime Minister. 15. General MacArthur said disarmament of Japan had been completed. 24. Formal surrender of Jap leaders in Burma received.

THE UNION JACK CLUB AND UNION JACK HOSTEL.

THE UNION JACK CLUB.

Waterloo Road, S.E.1. Tel.: Waterloo 5739.

Patron-in-Chief: His Majesty the King.

Patroness-in-Chief: Her Majesty Queen Mary.

President: Lieut.-Gen. Sir Sidney Clive, G.C.V.O., K.C.B., C.M.G., D.S.O.

Vice-President: Maj.-Gen. Sir John H. Davidson, K.C.M.G., C.B., D.S.O.

Hon. Treasurer: The Marquess of Cambridge, G.C.V.O.

Comptroller and Secretary: J. R. Hayward, M.V.O., M.B.E.

This is one of our great National Institutions, where Sailors, Soldiers and Airmen can go when on leave or passing through London; a place where they may obtain at moderate charges good meals and comfortable bedrooms and where they find the usual amenities of a club, including Library and Writing Room, Billiard Room, Baths, Barber's Shop, and also a Club Shop in which articles of everyday use and almost everything that Service men require may be purchased. The Club is open throughout the day and night.

The Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War, and other campaigns, and was opened on July 1st, 1907, by His late Majesty King Edward VII. Membership is open to those below the rank of Officer who are serving on the Active List of the Regular Forces, honorary membership being extended to the Colonial Permanent Forces and to the Navies, Armies and Air Forces of Foreign Powers visiting England. A limited number of ex-Service Warrant Officers, Petty Officers, N.C. officers and men may also be elected members.

The Club is managed by a Council and a General Committee, which includes representatives of the members.

Successive additions in 1922 and 1928 increased the sleeping accommodation to a total of 800 beds, and in July, 1940, a permanent Annex (almost opposite the Club), providing 220 beds, was opened. This last-mentioned scheme was rendered possible by the generosity of Viscount Nuffield, through the Nuffield Trust for the Fighting Forces. The total accommodation thus available at the Club is now 1,020 beds, as against the original 208 when the Club was opened.

THE UNION JACK HOSTEL.

Exton Street, Waterloo Road, S.E.1.

Tel.: Waterloo 4087. Opened June, 1923.

Patron-in-Chief: His Majesty the King.

Patroness-in-Chief: Her Majesty Queen Mary.

President: Lieut.-Gen. Sir Sidney Clive, G.C.V.O., K.C.B., C.M.G., D.S.O.

Vice-President: Sir Herbert J. Creedy, G.C.B., K.C.V.O.

Hon. Treasurer: The Marquess of Cambridge, G.C.V.O.

Secretary: J. R. Hayward, M.V.O., M.B.E.

Warden: Miss B. R. Morris.

The Hostel provides lodging and accommodation for the wives and children (with or without their husbands and fathers) of members and ex-members of the Naval and Military Forces of the Crown, below the rank of Officer. It is managed by a Council, and through run closely in connexion with the Union Jack Club, the organisation and finances of the two institutions are quite separate from one another.

PASSPORTS AND TRAVEL PERMITS.

PAS-PORT REGULATIONS.

Office hours 10 to 4.

Passport and Permit Office, London, Dartmouth Street, S.W.1. Tel. Whitehall 9060.

Branch Passport and Permit Office, Liverpool, 36 Dale Street, Liverpool 2. Tel. Central 4406.

Permit Office, Glasgow, 10 Bothwell Street, Glasgow, C.2. Tel. Central 1535.

Applications for Foreign Office Passports must be made in the form printed on the back of the Regulations (to be had on application), and enclosed in a cover addressed to "The Passport Office, Queen Anne's Gate Buildings, Dartmouth Street, Westminster, S.W.1," to "The Branch Passport Office, 36 Dale Street, Liverpool" and to the "Permit Office, 10 Bothwell Street, Glasgow, C.2." The charge for a Passport is 15s. Passports are issued in London between the hours of 10 and 4 (Saturdays, 10 to 1), and in Liverpool, 9.30 to 4 (Saturdays, 9.30 to 1). The Passport Offices are closed on Sundays and Public Holidays (except in London between the hours of 10 a.m. and noon for cases of special emergency only). Passports may be obtained through the post if a Postal Order for 15s., which should be crossed, made payable to the Passport Office, is forwarded with the application. Cheques, notes or postage stamps should not be sent in payment. Application should reach the Passport Office not less than ten days before that on which the Passport is required.

Foreign Office Passports are granted:—

(i) To natural-born British subjects, and to British subjects by naturalisation in the United Kingdom, in the British Dominions or Colonies, or in India or Burma.

(ii) To the wives and widows of the above persons.

(iii)—(a) To married women who were British subjects at the time of their marriage and have not, by reason of marriage to an alien, acquired the nationality of their husbands.

(b) To married women whose husbands have, during the continuance of marriage, ceased to be British subjects, unless by reason of the acquisition by their husbands of a new nationality they also have acquired that nationality.

Passports are available for five years, in the first instance, unless otherwise stated. They may be renewed from time to time for further consecutive periods of one to five years from the date of expiry, provided the total period of validity of ten years from the original date of issue is not exceeded. They are not available beyond ten years from the original date of issue. Thereafter, or if at any time the Passport contains no further space for visas, a new Passport must be obtained.

A Passport including particulars of the holder's wife is not available for the wife's use when travelling alone.

Children who have reached the age of sixteen years require separate Passports. When applying for a Passport they should send with their application the written consent of parent or guardian.

The declaration of the applicant must be verified by a Declaration made by a member or official of any Banking Firm established in the United Kingdom, or by any Mayor, Magistrate, Provost, Justice of the Peace, Minister of Religion, Barrister-at-law, Notary, Solicitor, Physician,

Surgeon, etc., resident in the United Kingdom and being himself a British subject. The applicant's Certificate of Birth and other evidence may also be required. Applicants serving in His Majesty's Forces may have their declarations verified by their Commanding Officers. In the case of children under the age of 16 years requiring a separate Passport, a Declaration must be made by the child's father or other legal guardian in a Form (B), to be obtained upon application to the Passport Office.

In the case of persons naturalised in any of the British self-governing Dominions, a letter of recommendation should be produced from the High Commissioner or Agent-General in London of the State concerned. Persons naturalised or ordinarily resident in any of the Crown Colonies may be required to obtain a letter of recommendation from the Colonial Office.

If the applicant for a Passport be a British subject by naturalisation, the Certificate of Naturalisation must be forwarded to the Passport Office with the Declaration or letter of recommendation. British subjects by naturalisation will be described as such in their Passports.

British Passports are only available for travel to the countries named therein, but may be endorsed for additional countries. The possession of a Passport so endorsed does not, however, exempt the holder from compliance with any Immigration Regulations in force in British or foreign countries, or from the necessity of obtaining a visa where required.

Passports endorsed as valid for the British Empire are also available for travelling to territory under British protection or mandate, not, however, including Palestine or Transjordan, for which the Passport must be specially endorsed, or the Aden Protectorate, for which both an endorsement and a visa are required.

A Passport cannot be issued or renewed by the Foreign Office on behalf of a person already abroad; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or within the British Empire, to the nearest Passport issuing authority.

Persons resident in Northern Ireland should apply to the Branch Passport Office, Liverpool; residents in Eire should make application for their Passports to the Passport Department, Ministry of External Affairs, Dublin.

A British passport is not valid for entry into any territory for which a military, Control Commission or other special permit is required, unless such a permit has first been obtained.

PHOTOGRAPHS.

Duplicate unmounted photographs of applicant (and his wife, if to be included in the Passport) must be sent. These photographs should be printed on thin paper and measure not more than 3 in. by 2 in. or less than 2½ in. by 1½ in. They should be taken full face without a hat.

It is essential that one of the two photographs of the applicant (and wife, if to be included in the Passport) should be certified on the back of the photograph as shown on the Application Form.

Safe Custody of Passports.

Passports, when not in use, should be kept in a secure place. At the expiration of the period of validity a Passport should be returned to the Passport Office.

REGULATIONS FOR JOURNEYS TO EIRE AND NORTHERN IRELAND.

Travellers must be in possession of and must produce to the Immigration Officer at the ports of arrival and departure in the United Kingdom a valid travel document of identity, viz. :—

For British subjects—

- A valid passport; or
- A valid Travel Identity Card issued in Great Britain by the Passport and Permit Office; or
- A valid Travel Identity Card issued in Northern Ireland by the Northern Ireland Permit Office, Belfast;
- A valid Travel Identity Card issued by the Eire Authorities; or
- A valid Travel Identity Card issued in the Channel Islands by the Insular Authorities.

For persons who are not British subjects :

- A valid passport; or
- A valid Home Office Document of Identity; or
- A Police Registration Certificate.

The Immigration Officer will be unable to grant permission to embark or disembark, as the case may be, to travellers whose identity documents are not in order.

British subjects resident in Great Britain can obtain Travel Identity Cards at the Passport and Permit Offices in London, Liverpool and Glasgow.

CURRENCY RESTRICTIONS AND CONTROL OF EXPORTS.

Travellers can obtain information regarding currency restrictions and control of Exports from the above-mentioned Passport and Permit Offices.

GAME AND GUN LICENCES.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springs; proprietors, or tenants, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own enclosed land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorise others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, airmen, territorial soldiers, or constables, on duty or at practice, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorise any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of

any birds, and "vermin" does not include rabbits. The rates of duty are as follows:—

Game Licences, if taken out after 31st July and before 31st Nov., to expire on 31st July following.....	£ s. d.
After 31st July, to expire 31st Oct....	3 0 0
After 31st Oct., to expire 31st July...	2 0 0
For a continuous period of 14 days...	2 0 0
Gamekeeper's (Great Britain), to expire 31st July	2 0 0
Game-Dealer's Licence, to expire 31st July, annually.....	2 0 0
GUN LICENCES (gun, air gun or pistol)...	0 10 0

A *Firearm Certificate* (5/- for the first, 2/6 subsequently—renewable every 3 years) is also necessary (with certain exceptions) for any person in possession of a firearm, other than a smooth bore gun with a barrel not less than 20 inches in length, or an air weapon.

A person under 17 may not purchase or hire and (with certain exceptions) a person under 14 may not have in his possession a firearm.

Firearm regulations are strictly enforced.

RELATIVE RANK—SEA, LAND AND AIR.

Commissioned Officers of The Royal Navy, The Army, and The Royal Air Force rank with one another according to Seniority or Date of Appointment, as shown in the following table :—

ROYAL NAVY.	ARMY.	ROYAL AIR FORCE.
1. Admiral of the Fleet.	1. Field-Marshal.	1. Marshal of the Royal Air Force.
2. Admiral.	2. General.	2. Air Chief Marshal.
3. Vice-Admiral.	3. Lieutenant-General.	3. Air-Marshal.
4. Rear-Admiral.	4. Major-General.	4. Air Vice-Marshal.
5. Commodore (1st & 2nd Class).	5. *Brigadier.	5. Air-Commodore.
6. Captain.	6. Colonel.	6. Group Captain.
7. Commander.	7. Lieut.-Colonel.	7. Wing-Commander.
8. Lieutenant-Commander.	8. Major.	8. Squadron Leader.
9. Lieutenant.	9. Captain.	9. Flight-Lieutenant.
10. Sub-Lieutenant and Mate.	10. Lieutenant.	10. Flying Officer (or Observer).
11. Commissioned Officer from Warrant Rank.	11. Second Lieutenant.	11. Pilot Officer.

Commissioned Officers of the Royal Marines rank at all times, according to Seniority, with Army Officers of the same titles.

* In place of the former Army title of Brigadier-General.

CLOSE TIMES FOR GAME.

IN each case the dates are inclusive:—

Black Game—Dec. 11 to Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).

**Grouse*—Dec. 11 (Dec. 10, Scotland) to Aug. 11.

**Partridge*—Feb. 2 to Aug. 31.

**Pheasant*—Feb. 2 to Sept. 30.

**Ptarmigan*—(Scotland only) Dec. 11 to Aug. 11.

**Wild Duck and Wild Geese*—Feb. 1 to Aug. 11.

It is also (in Peace Time) unlawful (in *England and Wales*) to kill the game marked * on a Sunday or Christmas Day; but this prohibition was suspended for the duration of the war.

In *England and Wales*, hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In *Scotland* the same remarks apply to deer and hares and to the first four birds. The

close-time for all these birds is, under the *Wild Birds' Protection Acts, 1880 to 1939*, from March 2 to July 31, both inclusive. Otherwise this close-time applies to all wild birds throughout Great Britain.

HUNTING AND GROUND GAME.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor for deer or hares; but by an Act passed in 1832 the sale of hares or leverets in Great Britain is prohibited from March 1 to July 31 inclusive under a penalty of a pound. The first Monday in November is the recognised date for the opening of the fox-hunting season, which continues till the following April. *Other-hunting* lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about August 12 to October 12 for stags, and from November 10 to the end of March for hinds.

SEASONABLE AND UNSEASONABLE FISH.

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The letter *p* signifies that the fish are then

in their prime or most plentiful; the letter *x* signifies that the fish may be obtained, but are not at their best; the letter *c* signifies that it is "close-time" as fixed by statute.

(a) This is for sea crayfish (or crawfish). River crayfish can be obtained in the summer and autumn. It is illegal to take fresh-water crayfish from March to June.

(b) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

(d) In the close season, salmon from the Netherlands, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(e) In Peace Time, for the first six months, the bulk of our London supply of shrimps comes from the Netherlands, but Dutch shrimps are far inferior to the English, which are plentiful from July to Dec.

SIMPLE INTEREST FROM DAY TO DAY.

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year, less £1, must be taken. Thus, for £1 at 2½ per cent. for 25 years, take 26 years, £36 02, and deduct £1—£35 02.

PERIODS OF GESTATION AND INCUBATION.

Species.	Shortest Period.	Usual Period.	Longest Period.	Species.	Shortest Period.	Usual Period.	Longest Period.
Human	Days.	Days.	Days.	Rabbit	Days.	Days.	Days.
Mare	229	280	320	Turkey on Turkey's eggs ..	20	26	35
Ass	322	347	419	Turkey on Hen's eggs ..	17	24	28
Cow	305	380	392	Turkey on Duck's eggs ..	24	27	30
Ox	240	283	321	Hen on Hen's eggs ..	19	21	24
Sheep	146	154	161	Hen on Duck's eggs ..	20	30	34
Sow	109	115	143	Duck	27	30	32
Goat	150	156	163	Goose	27	30	33
Biton	55	60	63	Pigeon	16	18	20
Cat	48	50	56				

CALCULATED EXPECTATION OF LIFE.

THE following table (extracted from the Registrar-General's Return for England and Wales) is based upon the Census of 1931, and deaths for 1930-31-32 (English Life Table No. 10).

AGE	OF 100,000 BORN, THE NUMBER SURVIVING AT THE END OF EACH YEAR OF LIFE.		MEAN AFTER-LIFETIME (EXPECTATION OF LIFE).		AGE	OF 100,000 BORN, THE NUMBER SURVIVING AT THE END OF EACH YEAR OF LIFE.		MEAN AFTER-LIFETIME (EXPECTATION OF LIFE).	
	Male	Female	Male	Female		Male	Female	Male	Female
0	100,000	100,000	58.74	62.88	54	71,107	76,120	18.61	21.00

Estate Duty in respect of agricultural property is to be charged in part on agricultural value at the rates set out in the Finance Act, 1919, in lieu of the above rates.

Gifts made by deceased during his life for public or charitable purposes, are charged, unless made more than twelve months before death; other gifts are charged, unless made more than three years before death; gifts made in consideration of marriage, or as part of deceased's reasonable normal expenditure, excepted. Gifts not exceeding £100 in the aggregate in value or amount also excepted.

Payment of Estate or Succession Duties may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

Small estates up to £300 and £500 gross are charged, at the option of the accounting parties, either by the preceding scale or with fixed duties of 50s. and 50s., and are exempt from all other death duties.

Interest at a per cent. per annum is also payable on the Estate Duty on personality from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and that on certain annuities may at option be paid in four yearly instalments, and a per cent. interest is charged on all unpaid portions of duty in these cases from twelve months after death.

EXCESS PROFITS TAX:

A tax of 100 per cent. on any excess of profits over those of a pre-war standard period. The National Defence Contribution is an alter-

native, and the tax-payer will pay whichever is the higher. From Jan. 1, 1946, E.P.T. will be reduced to 60 per cent.

INCOME TAX.

The tax is chargeable under five Schedules, A, B, C, D, and E, and the standard rate for the year 1945-6 is

and for 1946-7 is

In the £

0 10 0

0 9 0

Schedule A: Lands, Tenements, &c.

Owner must allow deduction from next payment of rent when tax paid by tenant.

Relief in respect of the cost of repairs is given under Sch. A to the extent of part of the assessment in the case of lands, and in the case of houses, where the amount of the assessment—

Does not exceed, £40..... 4

Exceeds £40, but not £50..... £10

Exceeds £50, but not £100..... 1

Exceeds £100..... (£20 plus 1/2 of amount in excess of £100)

Allowance to Owners of Land and for average cost of maintenance, repairs, insurance and management in excess of above relief may be claimed. Five years' average taken.

A Clergyman or Minister using part of his house mainly for his duties may obtain an allowance not exceeding the tax on one-eighth of the rent, or annual value.

Schedule B: Farming and market gardening profits are now assessed under Schedule D. Schedule B is however retained for farms and market gardens when the annual value does not exceed £100, and the basis of assessment of profits from such lands is three times the annual value.

Schedule C: Dividends or Annuities from public revenue (Government Stocks, &c.).

Schedule D: Trades, Professions, Farming and Market Gardening profits (where the annual value of the land exceeds £100), Remittances from Abroad, Interest, &c.

Schedule E: Salaries, pensions, and other emoluments of Officers of Army, Navy, Civil Service, Ecclesiastical Bodies, Corporations, Public Companies, &c.

RESIDENTS ABROAD.—The normal Income Tax reliefs and allowances are not given to persons not resident in the United Kingdom. A proportion of such reliefs determined by the ratio which that portion of their income liable to United Kingdom Income Tax bears to their total income from all sources is however according to the following: British subjects, present or former servants of the Crown, widows whose late husbands were in the service of the Crown, missionaries, servants of native States under British protection, residents in the Channel Islands or the Isle of Man, and persons, previously resident in the United Kingdom, residing abroad for the sake of their health or the health of a member of their family.

DOMINION INCOME TAX.—Relief is granted under certain conditions in the case of a taxpayer who has paid, or is liable to pay, United Kingdom Income Tax on any part of his income, and who proves that he has paid Dominion Income Tax for the same year in respect of the same part of his income.

SCHOLARSHIPS.—Income from a scholarship held by a person receiving full-time instruction at a university, college, school, or other educational establishment is exempted from Income Tax (including Sur-Tax).

SUR TAX.—The Sur Tax replaced the *Super Tax*, which was levied up to and including the Super Tax Year 1928-9 (payable January 1, 1929), based on the statutory income of the year 1927-8). The Sur Tax is in effect a deferred instalment of Income Tax payable on January 1 after the end of the Income Tax year.

Sur Tax is at the following rates:—

In respect of the first £2,000		Nil.	
Tax chargeable on every £ of income:		Existing Rates.	
£	£	£ s. d.	1946-47 Rates.

15,001 to 20,000	Above 20,000	0 9 0	0 10 0
		0 9 6	0 10 6

Under the *Finance Act, 1940*, power was given to reduce to £1,500 the figure in excess of which the total income of an individual would become liable to sur tax at such rates as Parliament might determine. No action has, however, been taken under this Act and £2,000 remains the basic figure for Sur Tax purposes.

TABLES FOR SPECIMEN INCOMES.

The tables show the tax payable after deduction of the *personal allowance* and *earned income relief*. In all the tables the figures for incomes above £2,500 include sur-tax.

Notes on Income Tax.

"Assessable Income" means, in the case of "earned" income, the amount of such income as computed for Income Tax purposes, after deducting the amount of the "earned" income allowance mentioned below, and in the case of other income, the actual amount of such income as computed for Income Tax purposes.

"Taxable income" means that part of the "assessable income" upon which Income Tax is actually charged, that is, the "assessable income" less the various deductions referred to below.

Under the *Second Budget* the first £50 of taxable income pays 3s. in the £; the next £75 pays 6s. in the £; the remainder pays 9s. in the £.

Deduction in arriving at Assessable Income.—Earned Income Allowance.—The differentiation in favour of "earned" income is made by deducting one-tenth of the "earned" income in order to arrive at the assessable income. The deduction is given irrespective of the amount of the total income, but must not exceed £50 for any one individual. The "assessable income" of a taxpayer is, therefore, his total income, as computed for Income Tax purposes, after making the appropriate deduction in respect of any "earned" income.

An allowance is also made of one-tenth of the assessable income of persons of the age of 65 years and upwards whose total income does not exceed £500. This allowance is granted, in the

case of a married couple, where either the husband or his wife, living with him, has attained the age of 65 years at the commencement of the year of assessment, but the *joint total income* must in such a case fall within the prescribed limits. Provision is also made for marginal relief, in order to avoid the hardship which would be involved when the total income falls just over the prescribed limit of £500.

Total Exemption.—All cases where total income does not exceed £110 (£120 from April 6, 1946). **Deductions from Assessable Income in order to arrive at Taxable Income.**—Where the taxpayer is not totally exempt, the following deductions may be claimed from the total assessable income in order to arrive at the "taxable income." The deductions may be claimed irrespective of the amount of the taxpayer's total income.

Personal allowance may be claimed of £80 (£110 from April 6, 1946), or, in the case of an individual whose wife is living with him, £140 (£180 from April 6, 1946).

Wife's Earned Income.—When a taxpayer's total income includes any earned income of his wife, the personal allowance of £140 is increased by a sum equal to nine-tenths of the amount of such earned income, subject to a maximum additional allowance of £80.

Allowance for Housekeeper or Person looking after Children.—Under certain conditions an allowance of £50 is made to

1. Widower or widow having a housekeeper or female person to look after children.
2. Unmarried person having mother or other female person to look after brother or sister.
3. Married man having female person to look after children owing to wife's total incapacity.
4. Taxpayers other than married man having female person to look after children for whom taxpayer is entitled to the child allowance.

Deduction for Children.—A deduction may be claimed in respect of each child, step-child, or adopted child under the age of 16 years, or who, if over that age, is receiving full-time instruction at any university, college, school, or other educational establishment. Also if undergoing training for a trade, etc., and devotes whole time thereto and the emoluments do not exceed £13 per annum. The deduction allowable is £50 in respect of each child. No deduction is, however, allowed in respect of any child or adopted child who is entitled in his or her own right to an income which, after excluding any income to which the child is entitled as the holder of a scholarship bursary, or other similar educational endowment, exceeds £60 a year.

Deduction in respect of Dependent Relatives.—A deduction of £50 (subject to reduction by the amount by which the income of the dependant exceeds £30) may be claimed in respect of (a) any person whom the taxpayer maintains at his own expense, and who is a relative of his or of his wife, and incapacitated by old age or infirmity from maintaining himself or herself, or (b) his or his wife's widowed mother, whether incapacitated or not. In the case of a daughter who is resident with the taxpayer, and upon whose services he is compelled to depend, by reason of old age or infirmity, a deduction of £25 may be claimed. The deduction applies in the case of a female taxpayer, with the substitution of "husband" for "wife" above.

Relatives denied Unemployment Allowance, etc.—If a taxpayer has a relative living with him who has been refused unemployment allowance or public assistance (or has had it reduced) because the relative is maintained wholly or partly by the taxpayer, the latter may claim an allowance (not exceeding £50) of the amount which he is deemed to have paid towards the relative's maintenance.

Rates of Tax chargeable on the "Taxable Income."—The following provisions as to the rates of tax chargeable on the taxable income (i.e., that part of the income on which tax is actually charged) apply, *whatever the total amount of the income*. Under existing regulations the first £165 of the taxable income is chargeable at 6s. 6d. in the £. The remainder of the taxable income is chargeable at the standard rate of tax (10s.). In the *Second Budget* (Oct. 23, 1945) the first £50 of taxable income will pay (from April 6, 1946) 3s. in the £; the next £75 will pay 6s. in the £ and the remainder will pay the standard rate of tax (9s.).

Relief in respect of Life Assurance Premiums.—Where allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax arrived at under the preceding paragraph, and calculated at following rates:—one-half the standard rate in the £ on the amount of the premium paid on policies taken out since

June 22, 1916, irrespective of the claimant's total income; and on policies taken out before June 22, 1916, a deduction of tax at one-half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,000, of three-fourths of the standard rate in the £ where his income exceeds £1,000 and does not exceed £2,000, and at the standard rate in the £ where his income exceeds £2,000.

There is the further restriction that no allowance shall be given at a greater rate than ten thirty-thirds of the standard rate:—

- (1) When the taxable income does not exceed £135;
- (2) In respect of a greater amount of premium than the amount of the excess of the taxable income over £135.

Income Tax Credits.—The additional tax resulting from the reduced allowances (for every year for which they are in force) enacted by the Finance Act, 1947, in respect of Earned Income Relief, Personal Allowances, and reduction of the exemption limit, are to be notified to the taxpayer as soon as possible, and credited to him, on a date to be fixed by the Treasury, being a date after the end of the war. In the *Second Budget* (Oct. 23, 1945) the credit system was abolished and allowances will be made as in the period prior to the Finance Act, 1947.

The United Kingdom spent more than its income in each of the years 1940 to 1944 and lived on its capital to the extent of nearly £4,500 million. In both 1940 and 1941 this depletion amounted to 25 per cent. of the current national income. Although international aid by the United States and Canada reduced the rate of overseas disinvestment, capital depletion continued at the rate of about 20 per cent. of the national income.

MINISTRY OF NATIONAL INSURANCE,

6, Carlton House Terrace, London, S.W.1.

The Ministry of National Insurance was established by the Ministry of National Insurance Act, 1944, and was instituted on November 18, 1944. The Act provides that there shall be transferred to the Minister of National Insurance by Orders-in-Council, subject to the detailed provisions of the Act:—

- the functions of the Minister of Health and of the Secretary of State for Scotland with respect to National Health Insurance, Widows', Orphans' and Old Age Pensions and Supplementary Pensions;
- the functions of the Minister of Labour and National Service with respect to Unemployment Insurance and Unemployment Assistance; and
- the functions of the Home Secretary with respect to Workmen's Compensation.

Orders-in-Council transferring the above functions were made, and have effect from April 1, 1945. The schemes thus transferred to the Ministry of National Insurance will be continued on the existing basis until the introduction of the new schemes foreshadowed in the White Paper on Social Insurance, Parts I and II (Cmd. 6550 and Cmd. 6551). The local administration of unemployment insurance, e.g. the taking of claims to benefit and the payment of benefit, the issue and exchange of unemployment books, etc., is carried out by the local offices of the Ministry of Labour on an agency basis on behalf of the Ministry of National Insurance. The administration of unemployment assistance is in the hands of the Assistance Board, though the ultimate responsibility to Parliament rests with the Minister of National Insurance.

The Ministry will be responsible for the administration of the new schemes referred to above. The first of these to reach the Statute Book is the Family Allowances Scheme. The Family Allowances Act received the Royal Assent on June 15, 1945, and will come into operation as from August 6, 1946.

Minister, R.T. HON. JAMES GRIFFITHS, M.P. ... £5,000

Deputy Chief Inspectors, D. M. Bridges, £800 to £1,000; Miss M. Warburton. £660 to £860

Wales.

Chief Inspector, Hugh Jones. ... £800 to £1,000

NATIONAL INSURANCE JOINT

COMMITTEE.

Members, The Minister of National Insurance; The Minister of Labour for Northern Ireland; Deputies, H. D. Hancock, C.M.G. or J. Walley; R. R. Bowman, C.B.E. or W. Allen, M.B.E.; Joint Financial Advisers, P. N. Harvey, C.B.; O. M. Smith.
Medical Adviser, Dr. R. E. Whitting, M.C.
Secretary, R. Rouse.

UNEMPLOYMENT INSURANCE
STATUTORY COMMITTEE.

6, Carlton House, Terrace, S.W.1.

Chairman, Sir Hubert D. Henderson, M.1.

Members, Miss K. J. Stephenson, C.B.E., J.P.; Mrs.
M. D. Stocks, B.Sc. (Econ.); Sir Harry F. Brand;
G. W. Thomson; Prof. J. K. Charlesworth,
Ph.D., D.Sc.

Secretary, L. E. V. Tiffen.

The Unemployment Insurance Statutory Committee was established under the Unemployment Insurance Act, 1934, to give advice and assistance to the Minister of Labour. With the transfer to the Minister of National Insurance of the functions of the Minister of Labour and National Service with respect to unemployment insurance and unemployment assistance, under the Ministry of National Insurance Act, 1944, the Committee's advice and assistance is given to the Minister of National Insurance. The Committee is mainly concerned with the financial condition of the Unemployment Fund and maintenance of its

solvency, but its duties also include reporting upon draft Orders and Regulations and any question referred to it by the Minister. Certain of these duties have been temporarily suspended owing to conditions arising out of the war.

OFFICE OF THE UMPIRE.

6, Grosvenor Gardens, S.W. 1.

The Umpire is the final Statutory Authority to decide doubtful claims for Unemployment Insurance Benefit and appeals under the National Service (Armed Forces) Acts and the Reinstatement in Civil Employment Act, 1944.

Umpire, W. Addington, C.B.E. £2,500
Deputy Umpires for Unemployment Insurance and
National Service (Armed Forces) Acts, N. P.
d'Albuquerque; J. Milner Helme; R. R.
Ludlow.

Deputy Umpire for Reinstatement in Civil Employ-
ment Act, 1944, R. R. Ludlow.

Secretary, H. C. Crook £900 to £1,050

PARLIAMENTARY FRANCHISE

In accordance with a recommendation of the Speaker's Conference on Electoral Reform a provision was included in the *Representation of the People Bill* (introduced in the House of Commons on December 13, 1944) for assimilating Parliamentary and Local Government Franchise. The class of persons qualified as local government electors was extended so that all persons qualified by residence as Parliamentary voters under the new procedure automatically have a qualification for the Local Government Franchise. On the basis of the 1939 registers of electors this will increase the number of local government voters by some 8,000,000.

In accordance with another recommendation of the Speaker's Conference the Act abolished, for the purposes of the assimilated franchise, the qualification of the spouse in relation to premises occupied by the husband or wife.

Part 2 of the Bill contained detailed proposals for the resumption of local government elections, which had not been held since 1939. Borough council elections in *England and Wales* and town, county, and district council elections in *Scotland* were held again in November and December, 1945. Elections for county, district, and parish councils in *England and Wales* will be resumed in March and April, 1946. The election of Common Council-

men in the *City of London* will be resumed in 1946, as from December 21. In the boroughs outside London, where one-third of the council members normally retire each year, those elected in 1936 retired when elections were resumed, together with all the members who had been co-opted to fill casual vacancies. The same procedure was followed in such of the urban and rural district councils as retire one-third of their members each year. Members of county councils, the Metropolitan borough councils, and some district and parish councils go out of office every third year. Such of these bodies as were not completely re-elected in November, 1945, will be re-elected in March and April, 1946.

The registers for Parliamentary and local government elections consist of fixed date registers, as well as registers prepared as and when required at certain times of the year on the principle of continuous registration under the Act of 1943 (the main provisions of which were stated on p. 296 of the 1945 "Whitaker" and in 1945 a special register was published on May 7 for use only at Parliamentary elections initiated between April 1 and September 30, 1945. Provision is also made for the publication of an annual register on October 15 in each year so long as the National Registration Act, 1939, is in force.

AVERAGE HEIGHTS AND WEIGHTS.

The average heights and weights of men in the United Kingdom have been tabulated as follows. The weights include clothing, which is generally calculated at one-twenty-fourth of the whole.

	Average Height.	Average Weight.
Scotsmen	5 ft. 8½ in.	11 st. 11 lb.
Irishmen	5 ft. 8 in.	10 st. 13 lb.
Englishmen	5 ft. 7½ in.	11 st. 1 lb.
Welshmen	5 ft. 6½ in.	11 st. 4 lb.

Business Names Registration

REGISTRATION OF BUSINESS NAMES ACT, 1916.

This Act received the Royal Assent on Dec. 22, 1916, and its provisions were explained on pp. 414-415 of the 1921 "WHITAKER." The Office of the Registrar of Business Names is at Chancery House, Chancery Lane, W.C.2.

Billions, at Home and Abroad

A billion in the British Isles is regarded as a million millions (1,000,000,000,000) but in France and in some other parts of the Continent of Europe, and in Canada and the U.S.A., it is to be interpreted as equivalent to a thousand millions (1,000,000,000) only.

HALL MARKS ON PLATE

Assay Office Marks—Official marks stamped on gold and silver plate at Assay Offices—

Assay Office *Dublin 17 Mark*
London (Goldsmiths Hall) Leopold II (uncrowned from 1300 to 1478 when it became crowned in 1482 since when it has been uncrowned) From 1667 1720 this mark was not used in London

Birmingham And or
Chester City Arms (3 Garbs and a Sword)
Sheffield Crown
Edinburgh Castle
Glasgow Free Irish & Fell
Dublin Harp crowned

The Assay Offices at Bristol Exeter Newcastle upon Tyne Norwich and York have long been closed

Makers Mark (instituted in 1363)—This is impressed by the maker and consists of initial letter (or letters) indicating the Surname (or Christian and Surname) of the maker

Date Mark (instituted in 1478 9)—The year in which the article is marked at the Assay Office is indicated by a letter on a shield the type of letter and the shape of the shield being changed in cycles of 20 25 or 26 years The year (at Goldsmiths Hall) runs from May 31 to May 30 In 20 year cycles (London invariably, Chester alternately with 25 and Sheffield alternately with 25) the letters J V W X Y Z are omitted in 25 year cycles (Birmingham Edinburgh and Dublin and alternately at Chester and Sheffield) the letter "I" is omitted from the alphabet, at Glasgow all the letters are employed in a 26 year cycle

The Sovereigns Mark—The lion passant for silver articles only was first used in 1544 and has been in use ever since (except during the *Higher Standard* period 1697 1720) from 1544 it was crowned, since then uncrowned

The Sovereigns Head—The portrait of the reigning Sovereign was impressed on all plate chargeable to duty assayed from 1784—1880 90 The duty on plate was removed in 1890 and the Sovereigns head does not appear on plate assayed before 1784 or after 1890

The Crown—On gold articles only, in lieu of the lion passant on silver

Britannia—A full length figure of Britannia was impressed on silver plate of a special standard of fineness (11 oz 10 dwt of fine metal to each 10 dwt of alloy) during a short period only 1697 1720 since that date the Britannia quality has been manufactured in small quantities, bearing the figure of Britannia, with the lion's head erased and the date mark

Sterling Silver—Articles of silver plate marked at an assay office are guaranteed to be of the requisite standard of purity and to contain 11 oz 2 dwt of fine metal to each 18 dwt of alloy

Sterling Gold—Articles of gold plate marked at an assay office are guaranteed to contain such amount of pure gold as is marked thereon by the assaying office in carats and decimals thereof The relative values of the various standards is shown below

£ s d		£ s d	
1st gold, 24 0 4	4 11 1/2	(1932)	
2nd ditto, 22 6 3	17 10 1/2	3rd Stand, 14 0 2	9 7 1/2
4th ditto, 18 0 3	3 8 1/2	4th ditto, 9 0 1	11 10 1/2

For the greater part of the material for this article the *ALMANAC* are indebted to the late Mr. J. H. B. (formerly of Old English Plate) by whose kindness many of the illustrations were provided.

London (Goldsmiths Hall) Date Marks

From 1438 to 1956

	Lombardic simple	1438-9 to 1457-8

THE PERIODS OF ENGLISH ARCHITECTURE.

Date	Style
I. Before 55 B.C.	Ancient British
II. 55 B.C. to A.D. 420	Roman Period.
III. A.D. 449 to Norman Conquest (1066)	Anglo-Saxon.
IV. 1066-1189 (i.e. to end 12th cent.)	Norman
V. 1189-1307 (i.e. 13th cent.)	Early English (Lancet, or Geometrical)
VI. 1307-1377 (i.e. 14th cent.)	Decorated (or Curvilinear)
VII. 1377-1485 (i.e. 15th cent.)	Perpendicular (or Rectilinear)
VIII. 1485-1558 (i.e. first half 16th cent.)	Tudor
IX. A.D. 1558-1625	Early Renaissance
X. A.D. 1625-1830	Late Renaissance
XI. Modern Architecture (The Age of Revivals)	19th cent.
XII. Recent Architecture.	20th cent.

This Comparative Table shows the approximate period of each style. It must, however, be remembered that the transition from one style to the next was slow and gradual, and can often hardly be traced, so minute are the differences. It is only for convenience in alluding to the different stages of evolution that the division is made, for it must not be forgotten that the Architecture of England is one continuous development.

Note—Parts I-VIII of this table are based upon that given on p. 347, Parts IX and X on p. 777, Part XI, "Modern," on p. 852 and Part XII, "Recent," on p. 864, of "A History of Architecture on the Comparative Method" (5th ed.) by Sir Banister Fletcher, D. Litt., M. Arch., F.R.S., F.S.A.

WEIGHTS AND MEASURES.

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

Apothecaries' Weight.

Measures of Weight.

- 20 grains = 1 scruple (℥i).
3 scruples = 1 drachm (℥i).
8 drachms = 1 ounce.

Measures of Capacity.

- 60 minims (min.) = 1 fluid drachm.
8 fluid drachms = 1 fluid ounce.
20 fluid ounces = 1 pint.
8 pints = 1 GALLON.

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' drachm is not the same as the Avoirdupois dram, and is spelt differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437.5 grains). A fluid drachm (54.6875 grains) is equal in weight to two Avoirdupois drams.

Approximate Equivalents:—

- 1 "table-spoon" = $\frac{1}{2}$ fluid oz.; 1 "dessert-spoon" = $\frac{1}{4}$ fluid oz.; 1 "tea-spoon" = $\frac{1}{8}$ fluid oz.

Avoirdupois Weight.

- 7000 grains (gr.) = 1 pound (lb.).
16 drams (dr.) = 1 ounce.
16 ounces = 1 POUND.
14 pounds = 1 stone.*
28 pounds = 1 quarter (of a cwt.).
100 pounds = 1 cental.
4 quarters (112 lb.) = 1 hundredweight (cwt.).
20 hundredweight (2,240 lb.) = 1 ton.

Troy Weight.

- 24 grains = 1 pennyweight (dwt.).
20 dwt. = 1 ounce.

For gold and silver the ounce, divided decimally, and not into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce = 480 Avoirdupois grains (31.1035 Grammes) in weight. There is no Troy POUND.

Jewellers' Weight.

The metric carat of 200 milligrammes is the legal standard of weight for precious stones and pearls.

Measures of Capacity.

- 4 gills = 1 pint.
2 pints = 1 quart.
4 quarts = 1 GALLON.
1 gallon = 277.274 cubic inches.
2 gallons = 1 peck.
8 gallons = 1 bushel.
8 bushels = 1 quarter.
A chaldron is 36 bushels = $4\frac{1}{2}$ quarters.

* The Sheffield stone of 8 lb. (for dead meat) was abolished in 1899.

Measures of Length.

- 12 inches (in.) = 1 foot (ft.).
3 feet = 1 yard (yd.).
6 feet = 1 fathom.
5½ yards = 1 pole.
22 yards = 1 chain = 100 links.
10 chains = 1 furlong.
8 furlongs = 1 mile = 1,760 yards.
3 miles = 1 league (obsolete).

A Cricket Pitch is 22 yards (one chain) between the stumps.

A Lawn Tennis Court is 78 × 36 feet (double) and 78 × 27 feet (single).

A Croquet Lawn is 105 × 84 feet (full size) or a smaller multiple of 5 × 4 feet.

A Badminton Court is 44 × 20 ft., with net 30 ins. deep and 5 ft. high at centre.

A Polo Ground is 300 × 160 yds.
A Football Ground (Association) is 120 × 80 yds. (full size); (Rugby) 110 × 75 yds. (full size).

Birmingham Gauge.

The equivalent of an inch is 15/16 B.G. The numbers proceed by units down to 1/16 B.G., which = 0.3964 inch, and from 1 B.G. (.3532 inch) by units to 52 B.G. (.00095 inch).

Square or Surface Measure.

- 144 sq. inches = 1 sq. foot.
9 sq. feet = 1 sq. yard.
361 sq. yards = 1 perch, or rod, or pole.
40 perches = 1 rood.
4 roods = 1 acre.
10 square chains = 1 acre.
640 acres = 1 square mile.

Dimensions of an Acre.—The acre is 4,840 sq. yards, or 220 × 22 yards. The length of a side of a square acre is 69.57 yards; an area 110 × 22 yards (or 220 × 11 yards) would be half an acre, an area 55 × 22 yards (or 110 × 11 yards) would be one quarter of an acre, and so on.

Decimal Parts of an Acre.—The following note is appended to Ordnance Maps: "To convert Decimal Parts of an Acre into Roods and Perches, multiply by 4, this will give Roods and Decimals of a Rood, multiply this Decimal by 40, thus obtaining Perches and Decimals of a Perch."

Cubic Measure.

- 1,728 cubic inches = 1 cubic foot.
27 cubic feet = 1 cubic yard.

Angular or Circular Measure.

- 60 seconds (") = 1 minute (').
60 minutes = 1 degree (°).
30 degrees = 1 sign.
90 degrees = 1 right angle or quadrant.
12 signs (4 quadrants) = 1 circumference.
Diameter of circle × 3.1416 = circumference.
Diameter squared × .7854 = area if circle.
Diameter squared × 3.1416 = surface of sphere.
Diameter cubed × .5236 = solidity of sphere.
One degree of circumference × 57.3 = radius.
Diameter of cylinder × 3.1416; product by length of height, gives the surface.
Diameter squared × .7854; product by length or height, gives solid content.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Nautical Measures of Speed and Distance.

Speed is measured in *nautical miles per hour*, called *knots*. A knot is a measure of speed and is not used to express distance. A ship moving at the rate of 30 nautical miles per hour is said to be "doing 30 knots" and as the nautical mile is longer than the land or statute mile (6,080 feet against 5,280 feet) this represents a land speed of over 34½ miles per hour. In 1945 the *Royal Air Force* adopted the knot and the nautical mile as the standard measurements for speed and distance.

Knots.	m.p.h.	Knots.	m.p.h.	Knots.	m.p.h.
1	1.1515	15	17.2727	29	33.3939
2	2.3030	16	18.4242	30	34.5454
3	3.4545	17	19.5757	31	35.6969
4	4.6060	18	20.7272	32	36.8484
5	5.7575	19	21.8787	33	38.0000
6	6.9090	20	23.0303	34	39.1515
7	8.0606	21	24.1818	35	40.3030
8	9.2121	22	25.3333	36	41.4545
9	10.3636	23	26.4848	37	42.6060
10	11.5151	24	27.6363	38	43.7575
11	12.6666	25	28.7878	39	44.9090
12	13.8181	26	29.9393	40	46.0606
13	14.9696	27	31.0909	41	47.2121
14	16.1212	28	32.2424	42	48.3636

Distance is measured in nautical (or sea) miles of 6,080 feet; the land (or statute) mile contains 5,280 feet. A cable, as a measure used by seamen, is 600 feet (100 fathoms) approximately one-tenth of a nautical mile. Soundings at sea are recorded in fathoms (6 feet).

6 feet = 1 fathom.
100 fathoms = 1 cable length.
10 cables = 1 nautical mile.

Railway and Air Traffic.

1 passenger-mile = 1.60934 passenger-kilometre.
1 passenger-kilometre = 0.62137 passenger-mile.
1 short-ton mile = 1.45997 ton-kilometre.
1 ton-kilometre = 0.685 short-ton mile.
1 short-ton mile = 1.45997 ton-kilometre.
1 ton-kilometre = 0.612 long-ton mile.
1 long-ton mile = 1.613157 ton-kilometre.
1 lb. mile = 0.73 kilogramme-kilometre.
1 kilogramme-kilometre = 1.37 lb. mile.

Geographical Measures.

The Poles are two points at the opposite extremities of that diameter of the earth round which it revolves. The North Pole is the central point in the *Arctic Circle* (which is drawn at 66° 30' North) so called from *ἀρκτος* (The Bear), the Northern Constellation of *Ursa Major*. Similarly the South Pole is at the centre of the *Antarctic* (opposite Arctic) Circle, which is drawn at 66° 30' South. The Equator is a great circle, equally distant from the North and South Poles. For geographical purposes, the surface of the earth is divided by circles of Latitude parallel and of Longitude perpendicular to the Equator. These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered from the Equator to the North and South Poles. Meridians of Longitude are numbered from the primary circle of Longitude, or Meridian, which passes through the astronomical Observatory of Greenwich (England). The Date or Calendar Line is shown on p. 175.

A Geographical Mile is the length of one minute of Latitude. If the earth was a sphere, every minute of Latitude would be of the same length; but, as it is a spheroid, the length of a minute

increases from 6,046 feet at the Equator to 6,108 feet at the Poles. The mean length of the geographical mile is 6,076.8 feet.

The Polar diameter of the Earth is 7,899 statute miles. The mean equatorial diameter is 7,926 miles. The circumference at the Equator is 24,902 miles.

The Tropics of Cancer and Capricorn, in Astronomy, are the most northerly and southerly points of the ecliptic at which the sun reaches its greatest distance north or south of the equator and turns (*τροπή* = a turning) towards it again; in Geography, the two parallels of latitude distant about 23° 28' north and south of the equator, being the boundaries of the torrid zone.

BRITISH DOMINIONS.

Australia and New Zealand.—Same as British.
Canada.—Same as British but with short ton of 2,000 lb., as in U.S.A.
Newfoundland.—Same as British.

Channel Islands.

The weights and measures in use in the Channel Islands are those of Great Britain, the *cental* of 100 lb. being used as well as the *cwt.* of 112 lb. The *Old Island Measures* are as follows:—

Vergée (Normandy)	Jersey.	Guernsey.
rood	0.44 acre
Bushel	8.9 gallons
Pound	7.56 grains
Cwt.	112.3 lb.
		100.8 lb.

British India.

Ungul	= 0.75 inch.
Guz	usually 33 inches	; also the yard.
Koss	= 2,000 yards.
Bigha (Bengal)	usually = 0.625 acre.
Cawny (Madras)	" = 1.33 "
Tola (rupee-weight)	= 180 grains.
Chittak	= 2.0571 oz.
Seer, 16 chittak, or 80 tolas	= 2.0571 lb.
Maund, 40 seers (Bengal & Bombay)	= 82.284 lb.
" (Madras)	= 24.68 lb.
Seer (Liquid)	= 1.760 pints.
Candy	= 500 lb.
Vikham = 3 lb.; Dangali	= 3 pints.
Parah	= 15 gallons.
Catty (Singapore)	= 1½ lb.
Pikui	100 catties = 133 lb.

Eire—Same as British.

Malta.

The Metric System.
Old Maltese Measures.

1 Palm = 10.3125 inches.
8 Palmi = 1 canna = 6 ft. 10½ inches.
1 sq. Canna = 47.25 sq. feet.
256 sq. Canna = 1 tumulo = 6 mondelli = 12.100 sq. feet.
1 mondello = 10 misure.
1 acre = 3 tumuli, 3 mondelli, 6 misure.

South Africa.

The Metric System is compulsory in the case of chemists, and is permissible (along with British weights and measures) in other cases. In addition, the following old Dutch measures are still used:—*Liquid Measure*: Leaguer = about 128 imperial gallons; half aum = 15½ imperial gallons; anker = 7½ imperial gallons. *Capacity*: Muid = 3 bushels. The general surface measure is *Morgen*, equal to 2.125402 acres; 1,000 Cape lineal feet are equal to 1.033 British feet. The short ton of 2,000 lb. is used.

$$F = 0 + R + \frac{9}{5}$$

$$R = \frac{5}{9}(F - 32)$$

Thermometer Comparisons.

CONVERSION.

Let F = Fahr.

C = Cent.

R = Réaumur.

The normal temperature of the human body is 98.4° F., or 37° (36.9°) C., or 86.3° R. Freezing point = 32° F., 0° C., 32° R.; Boiling point = 212° F., 100° C., 180° R. Absolute Zero, which is Absolute Zero, is Temperature reckoned from "Absolute Zero," which is 273° C. below 0° F., and 273° below 0° C., and 459° below 0° F., and is denoted by the letter "K."

Below 32° F. subtract 32

METRIC WEIGHTS AND MEASURES.

See also "Double Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1.—MEASURES OF LENGTH.

- 10 millimetres = 1 centimetre = 0.39370113 inch.
(*mm.*)
10 centimetres = 1 decimetre = 3.9370113 inches.
(*dm.*)
10 decimetres = 1 METRE (*m.*) = 3.9370113 yards.
10 metres = 1 dekametre = 10.936143 yards.
(*dam.*)
10 dekametres = 1 hectometre = 109.36143 yards.
(*hm.*)
10 hectometres = 1 kilometre = 0.62137 mile.
(*km.*)

A kilometre is approximately five-eighths of a mile, so that 8 kilometres (4.97082 miles) may be regarded as 5 miles.

2.—MEASURES OF SURFACE.

- 1 sq. centimetre = 0.15498 sq. inch.
1 sq. metre = 10.76385 sq. feet = 1.19596 sq. yds.
1 are (*a.*) = 0.0988 rood.
1 hectare (*ha.*) = 2.4711 acres.
1 sq. kilometre = 0.38611 sq. mile.

3.—MEASURES OF CAPACITY.

- 1 centilitre (*cl.*) = 0.0704 gill.
1 decilitre (*dl.*) = 0.17598 pint.
1 LITRE (*l.*) = 1.7598 pints = 0.88 Imp. quart = 0.22 Imp. gallon.
1 hectolitre (*hl.*) = 21.9975 Imp. gallons = 26.4171 U.S. gallons = 2.7497 Imp. bushels = 2.8377 U.S. bushels.
1 cubic metre = 35.31338 cu. ft. = 1.30794 cu. yds. (*cbm.* or *m*³).
1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

4.—MEASURES OF WEIGHT.

- 1 centigram (*cg.*) = 0.25432 grains.
1 decigram (*dg.*) = 1.5432 grains.
1 gramme (*gm.*) = 15.4323 grains.
1 dekagram (*dag.*) = 5.6438 drams.
1 hectogram (*hg.*) = 3.5274 oz.
1 KILOGRAM *kg.* = 32.1507 oz. Troy = 35.2734 oz. avoirdupois = 2.2046223 lb. Avoirdupois.
1 myriagram = 22.046223 lb. Avoirdupois.
1 quintal (*q.*) = 220.46 lb. Avoirdupois = 20.46 Centals = 1.9684 cwt.
1 tonne (*t.*) = 0.9842 long ton = 1.1023 short tons.

NOTES.

- 1 hectolitre = 2.75 bushels.
1 hectolitre per hectare = 2.75 bushels per acre.
1 quintal = 2.75 bushels.
1 quintal per hectare = 2.75 bushels per acre.

Wheat Measures.

Under the *Corn Sales Act* of 1921 the Corn Returns Act of 1882 is amended, and provision is made for the sale of cereals by weight in terms of the hundredweight of 112 imperial standard pounds.

100 lb. wheat produces 70 lb. flour.

100 lb. flour produces 130 lb. bread.

A quatern loaf=4 lb.

A last of grain=80 bushels.

NOTE.—A *Quarter* is a heaped measure of 8 bushels.

Wheat Harvest Months of the World.

January.—New Zealand, Chile.

February.—India, Upper Egypt.

March.—India, Upper Egypt.

April.—India, Lower Egypt, Syria, Asia Minor, Persia.

May.—China, Japan, Central Asia, Algeria, Morocco.

June.—U.S.A., Southern States, Italy, Spain, South France, Turkey.

July.—U.S.A. Middle States, South Russia, Roumania, Bulgaria, Austria, Hungary, Germany, France.

August.—U.S.A. Northern States, Canada, Central Russia, Poland, England.

September.—North Russia, Scotland.

October.—Sweden, Norway.

November.—South Africa, Santa Fé.

December.—Australia, Argentina, Abyssinia.

Old Quarter Days.

Rents are still payable in some country districts on "Old Style" Quarter Days.

Quarter Day	"New" Style.	"Old" Style.
Christmas	Dec. 25	Jan. 6
Half Quarter Day	Feb. 8	Feb. 20
Lady Day	March 25	April 6
Half Quarter Day	May 9	May 21
Midsummer	June 24	July 6
Half Quarter Day	Aug. 12	Aug. 23
Michaelmas	Sept. 29	Oct. 11
Half Quarter Day	Nov. 11	Nov. 23

NOTE.—Astronomically the "Old" style equivalents should be 13 days later than the "New" from 1901 onwards (owing to 1900 not being a leap year) but the habits of a century are not easily changed.

Water Measures.

Cubic inch	= 252 458 grains.
Gallon (277 274 cub. in.)	= 10 lb. (distilled).
Cubic foot	= 62.321 lb.
35.943 cubic ft. (224 gals.)	= 1 ton.

Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

An *Inch* of Rain on the surface of an acre (43,560 sq. feet)=3,630 cubic feet=100.992 tons.

Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186.963 gallons, weighing 16 cwt. 2 qrs. 21.6 lb. in addition to its own weight.

GIANT CROPS.

Estimated average annual world production (all countries), 1940-1944.

World Crop	Tons of 2,240 lb.
Potatoes	217,000,000
Sugar Cane	170,000,000
Wheat	168,000,000
Rice (rough)	141,000,000
Maize	122,000,000
Sugar Beet	75,000,000
Oats	65,000,000
Rye	45,000,000
Barley	43,000,000
Grapes	36,000,000
Millet	35,000,000
Melons	32,000,000
Citrus fruits	15,000,000
Fish (sea)	14,000,000
Cottonseed	13,000,000
Ground nuts	12,000,000
Soya Beans	12,500,000
Apples	11,000,000

FIRE LOSSES, Gt. BRITAIN AND U.S.A.		
Year.	Gt. Britain.	U.S.A.
1937	£9,529,000	£56,944,000
1938	8,780,000	60,410,000
1939	9,088,000	62,700,000
1940	*12,640,000	61,294,000
1941	*10,254,000	64,471,000
1942	*12,470,000	62,970,000
1943	*9,092,000	76,047,000
1944	*11,618,000	85,108,000

* Exclusive of loss from Enemy Action.

The Fire Losses in Canada were stated at \$35,400,000 (1943) and \$42,600,000 (1944).

THE CINQUE PORTS

As their name implies the Cinque Ports were originally 5 in number, Dover, Hastings, Hythe, Romney and Sandwich, situated on the south coast of England to repel invasions from the continent of Europe.

They were in existence before the Norman Conquest and may be regarded as the Anglo-Saxon successors to the Roman system of coast defence organized from the Wash to Spithhead to resist Saxon onslaughts. William the Conqueror reconstituted them and granted them peculiar jurisdiction which survived until its abolition in 1855.

At some time after the Conquest the ports of Winchelsea and Rye were added, so that the present Lord Warden, if installed in state, may have 7 Barons of the Cinque Ports to maintain the canopy under which he proceeds to the ceremony.

Lord Wardens since 1828

The Duke of Wellington	1828
Marquess of Dalhousie	1842
Viscount Palmerston	1861
Earl Granville	1865
W. H. Smith, M.P.	1891

BROAD STREET CORNER, BIRMINGHAM 1

The Oldest Canadian Life Office produces

record-breaking figures for 1944

THE Canada Life Assurance Company looks back, with pride, on 98 years of service, and with particular gratification on the figures which it is able to publish for 1944. In many departments these constitute a record in the Company's history. This sound and satisfactory position has been attained by the exercise of a far-sighted policy that has guided through the years and points confidently to the future.

The net new Life Assurances completed in the year amounted to - - - £13,479,147
(Of this £1,677,117 was written in the United Kingdom and Eire)

Payment to Policyholders and Annuitants and sums paid as a result of Death Claims totalled - - - £4,882,762

The rate of interest earned on the funds of the Company was £4.7.2%

The assets at the 31st December, 1944, amounted to - - - £65,843,298

Assurance in force, after deducting re-assurances, amounted to - - - £170,856,064

The British Deaf and Dumb Association

Founded

with which is Incorporated

1890

**THE CHARITABLE AND PROVIDENT
SOCIETY FOR GRANTING PENSIONS TO
THE AGED AND INFIRM DEAF AND DUMB**

Founded

1836

President: Mr. E. Ayliffe, Liverpool.

Vice-Presidents:

Rev. G. Nicholson, Glasgow

Rev. V. Jones, London.

Mr. A. W. Taylor, Leeds.

Trustees

Midland Bank Executor & Trustee Co., Ltd.

THERE ARE ABOUT 40,000 DEAF & DUMB IN GT. BRITAIN

The chief objects of the Association are :

1. To promote, advance and protect the welfare of the Adult Deaf.
2. To maintain a pension Fund for aged and infirm Deaf and Dumb people in all parts of the country. Over 130 are in receipt of benefit.
3. To provide and maintain a HOME for aged, infirm and necessitous DEAF AND DUMB.
4. To make grants to the Local Missions and Societies for the Deaf.
5. To make grants for Training Missioners and Welfare Workers to the Deaf.

LEGACIES will be welcomed.

Please send a Subscription or Donation to the Hon. Secretary-Treasurer,

LESLIE EDWARDS, 11, WOODLAND AVENUE, LEICESTER.

Principal Charitable Bequests of the Year

APPENDED is a list of the principal bequests for charitable purposes recorded during the year. The amount left for charitable purposes is, in considerable proportion of cases, approximate, owing to the bequests including a share in the residuary estate or consisting wholly, or in part, of business interests, blocks of shares, or real estate for which a definite value cannot be given.

Reversionary bequests, where these are absolute (usually on the cesser of life interest, or a period of years) are included, but contingent reversions (dependent upon failure of issue, the failure of prior trusts, or the failure to observe certain conditions, etc.), are not included, unless it is known that the reversion, though nominally contingent, is, in the events which have happened, absolute.

The amounts of residuary bequests are subject to variation of the final winding-up of the estate, owing possibly, to variations in the amount of duty payable (as the figure may place an estate for duty purposes in either a higher or lower category as compared with the original valuation when probate was granted).

The list records the principal bequests published during the year and not necessarily those becoming payable during the year.

Whilst legacies to charity are still as numerous, the very large amounts that have in previous years been available for charitable purposes are not so frequent this year.

There are a number of cases, not included in this list, of a large amount being subscribed to one charity. The Star and Garter Home for Disabled Sailors and Soldiers, Richmond, benefit by nearly £45,000 under the Will of Dame Emma C. Marshall. Mr. Geoffrey Baskerville left, subject to life interests, about £35,000 to the Society for the Propagation of the Gospel in Foreign Parts, and Miss Beatrix L. Goldney left over £30,000 to the Royal National Lifeboat Institution.

In this year's list it is noteworthy that there is an increased tendency for the testator not to name any specific charity or charities but to leave his property for charitable purposes at the discretion of his executors. An example of this is to be found in the case of Mr. Philip E. Hill, the financier, who left, subject to his wife's life interest, three-fourths of his property for such charities and objects of National benefit, "regard being paid to the R.A.F. Benevolent Fund", as the executors in their absolute discretion think proper.

The well-known charities have been well subscribed to during the past year, and hospitals benefit handsomely under the Will of Sir William F. Jury, who left large legacies to well-known hospitals and the residue to ten hospitals and charities, and, in addition, left the sum of £10,000 to the Imperial Cancer Research Fund.

CHILDREN'S HOSPITAL BIRMINGHAM

An earnest appeal is made for practical interest and support. Will you ask yourself if there is any more deserving object of charity than a hospital for children and if there be any work more full of hope and promise? Do answer by a donation or make a bequest in your Will.

Please remember the little children, who by your benefactions can be helped to grow up into healthy, happy and useful men and women.

The Birmingham Children's Hospital is one of the largest in the World.

Invest in kindness ; it will yield good interest.

ARNOLD TUNSTALL,

House Governor.

(Continued on page xxvii)

A FUTURE OF PROMISE

The Church Army is planning for the part it must play in winning the post-war world for Christ. Men and women of the Forces are being brought into friendly contact with the Church through the medium of Church Army Mobile Canteens, Recreation Centres, Mobile Entertainment Coaches and Chapels, Mobile Libraries, Cinemas, etc., and the Evangelists who work amongst them, Church Army Evangelists and Sisters in parishes, Mission Vans, News Teams and Moral Welfare workers are playing a vital part.

All these things are paving the way for widespread evangelization in which lies the only hope for the world of to-morrow.

Your help is needed to forward these plans.

Cheques, etc., should be made payable to the Church Army crossed "Barclay's a/c Church Army," and sent to the Rev. Prebendary HUBERT H. TREACHER, General Secretary and Head,

Headquarters: 55 BRYANSTON STREET, LONDON, W.1

THE DESTITUTE SAILORS' FUND

This Fund, established over a century ago, helps Merchant Seamen when in distress. The Lord Charles Beresford Rest is the haven to which they steer when in need of shelter, food or clothing.

Over 213,413 assisted since its foundation in 1827.

WILL YOU SEND A CONTRIBUTION TO THIS OLD
ESTABLISHED CHARITY? LEGACIES EARNESTLY SOLICITED.

THE DEBT OF HONOUR

The alleviation of distress amongst ex-Service men and women, including the disabled and their dependents, and the care of those left behind by the men who fell in action, are the foremost of the many responsibilities which the British Legion has undertaken since 1921. The second World War has added materially to this great work. Annual expenditure is rapidly increasing, and an appeal is earnestly made for legacies—to safeguard the future of the Legion's work for those to whom the Nation owes so much.

REMEMBER—the British Legion helps ex-Service men and women of ALL ranks, ALL Services and ALL Wars.

EARL HAIG'S BRITISH LEGION APPEAL FUND

RICHMOND, SURREY

Full details of all beneficent activities and Forms of Bequest can be obtained on request

GENERAL LYING-IN HOSPITAL,

York Road, Lambeth, S.E.1. ESTABLISHED 1765

Patrons—H.M. The Queen and H.M. Queen Mary.

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable. Over 4,000 Mothers and Babies, attended annually in the Hospital, at their own Homes and at the Ante Natal, Post Natal, and Welfare Clinics.

Subscriptions and Donations thankfully received by the Treasurer, or Miss LILY HEARN, the Secretary, at the Hospital. [148]

Name.	Gross Value of Estate.	Approx. Amount.	Objects.
Plummer, Robert, of Hoo Meavy House, Clearbrook, Yelverton, Devon.	£ 102,207	£ 70,000	Subject to a life interest, residue between Dr. Barnardo's Homes, Guy's Hospital, Cancer Hospital, Fulham Road, University College Hospital and the Salvation Army.
Teichman, Sir Eric, G.C.M.G., C.L.E., of Honingham Hall, Norfolk.	138,654	65,000	Subject to his wife's life interest, £1,000 to Norfolk and Norwich Hospital, and Honingham Hall Estate and ultimate residue upon various trusts to Dr. Barnardo's Homes.
Rosser, Frank S., of Sunnyside, Oakwood Av., Gately, Cheshire.	105,802	61,000	Residue to accumulate and then £1,000 to Dr. Barnardo's Homes, and £100 to Timber Trades' Benevolent Fund. Remainder between Manchester Royal Infirmary, Ancoats Hospital, Salford Royal Hospital, Duchess of York Hospital for Babies, Boys' and Girls' Refuges and Homes, and Christie Hospital and Holt Radium Inst.
Lazarus, Arthur L., of Broom Hall, Oxshott, Surrey, and Goring Hotel, Grosvenor Gdns., S.W.	110,325	60,000	On the death of his wife he left £1,000 to the Jewish Aged Nedy Pension Society, £1,000 to Cobham Division of St. John Ambulance Brigade, and, subject to life interests, remainder between St. Mary's Hospital, Paddington, King Edward's Hospital Fund for London, Jewish Board of Guardians, and Bearsted Memorial Hospital.
Gaunt, Benjamin E., of 39 Huddersfield Road, Barnsley, Yorks.	135,632	60,000	On the death of his wife he left £15,000 between the R.A.F. Benevolent Fund, Army Benevolent Fund, and King George's Fund for Sailors, £500 each to the Eventide Home, Girls' Probation Home, Slum Posts, Inebriates' Homes, Hadleigh Farm Colony, and Barnsley

O.M., G.C.S.I., K.C.M.G., D.S.O., D.C.L.

Treasurer—E. J. BUXBURY, Esq., M.C., J.P.

The SCHOOL is SITUATED AT WEST END, WORKING, between Bagshot and Basing.

The School is constructed to accommodate 250 Boys, chosen from the necessitous classes between the ages of about 13 and 16, and gives them a training, up to the age of 17 or thereabouts, which will fit them alike for civil life in this country or its Colonies, and for service in the Navy, Army, Air Force or Mercantile Marine. Subjects taught include:—Engineering, Carpentry, Tailoring, Shoemaking and Band Music.

Conditions of Admission.—1. The age for admission is from 13 to 16 years. 2. A boy must, in the opinion of the Committee, be really necessitous. 3. He must be free from physical or mental infirmity. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the School. A guaranteed payment of £52 annually during his stay at the School will give a right of nomination for a lad fulfilling the conditions of admission. **SUBSCRIPTIONS AND DONATIONS are URGENTLY NEEDED** in order that the above number of boys may be maintained.

Subscriptions are received by WESTMINSTER BANK, LIMITED, 1, St. James's Square, S.W.1, by the Treasurer and Commandant at the School, from whom any further information can be obtained.

The National Society for Epileptics CHALFONT COLONY, BUCKS.

Patron **HIS MAJESTY THE KING**

In this beautiful Colony comprising some 350 acres nearly six hundred epileptic men, women and children are following the avocations of ordinary life engaged in farm work and industries, and taking part in athletic recreation.

The waiting list is long and FUNDS for EXTENSION of the COLONY are urgently needed. Will you do something to save the epileptic from a life of involuntary idleness, which leads so often to deterioration and to the serious aggravation of the disease?

Secretary—G. A. C. PRINSTON

Offices **CHALFONT COLONY, CHALFONT ST. PETER, BUCKS.**

THE CHILDREN'S FRIEND In all that affects a child's welfare the N.S.P.C.C.'s aid is always ready. Last year 107,312 child victims of ill-treatment and neglect were helped towards a happier, more tolerable life.

Much of the work of the Society is educational. By distributing booklets and by public meetings, it is continuously engaged, through its agencies in England, Ireland and Wales, in securing proper treatment for children. The Society has also made notable contributions to Child Welfare legislation, including the Prevention of Cruelty to Children Acts of 1889, 1894, 1904, and the Children and Young Persons Act, 1933.

DONATIONS and LEGACIES will ensure that others in the future will be helped.

SERVING EAST LONDON'S CHILDREN

DEPENDENT ON VOLUNTARY SUPPORT

CHARLES H BESSELL, General Secretary

The Royal Alexandra School

**Formerly the Alexandra Orphanage of Maitland Park,
London, N.W.3.**

*Evacuated to country centres and moving in due course to new premises when erected
at Duxhurst, near Reigate, Surrey*

Founded 1758

Patrons - H.M. The King. H.M. Queen Mary.

President H.R.H. The Duchess of Kent.

Hon. Treasurer James V. Rank, Esq.

The School is unsectarian, and helps fatherless and other necessitous children from all parts of the country and the Dominions, without restriction as to class or creed. Boys and girls are admitted at all ages between infancy and 11 years of age, and are cared for until 15 or more. Their education fits them for useful positions. Opportunities occur for suitable children to have a secondary education or technical training. During the past 188 years over 8 000 have been received, 800 are now resident, including many bereaved by the War, and others await vacancies.

More annual subscribers are needed £11,000 required (by voluntary donations) each year above the assured income. Legacies are a useful means of helping. Please include the School in your Will. Prospectus and Annual Report sent on request. The School may be visited by interested friends.

Forms of application for the admission of children and all needful information may be had of the SECRETARY, FRED J ROBINSON, F.C.I.S.,
Offices 34/40, LUDGATE HILL, LONDON, E.C.4

ROYAL BLIND PENSION SOCIETY

Patron—HIS MAJESTY THE KING
President THE LORD LICHFIELD G.C.V.O.
Treasurer MR P. LAURENCE FUGG

This Society grants Pensions to the Blind Poor at their own homes, ranging from 15s. to 25s. per month. There are upwards of 700 pensioners residing in various parts of the Kingdom and in excess of £8,000 are annually distributed.

To be eligible applicants must be totally blind, a minimum of 70 years of age, of good moral character, and in receipt of an income not exceeding £6 if single, and £11 if married. No distinction is made in regard to sex, race, creed, nor in the receipt of parish relief or disability.

Application must be made on the printed forms provided by the Society.

Subscribers of 10s. 6d. annually or Donors of Five Guineas are entitled to One Vote at every election and multiples thereof in proportion.

Contributions will be gratefully received by the Treasurer or by the BANK OF ENGLAND
 232 SOUTHWARK BRIDGE ROAD LONDON S.E.1 E. JEFFERY HICKS M.A. Secretary [S]

The Royal Cancer Hospital (free) is supported entirely by voluntary gifts. It receives no grants from any Government or Municipal service. No payments are asked from patients. No recommendation-letters are necessary. The only passports are the facts that the applicant is afflicted by Cancer or Tumour, and is unable to pay.

In addition to the care of patients, a Research Institute is carried on by a trained Scientific Staff, engaged in investigating the problems of this fell disease. This adds seriously to the annual expense, but it is work of such world wide reputation and importance that its hampering for want of funds would be a disaster.

SOCIETY FOR THE ASSISTANCE OF LADIES IN REDUCED CIRCUMSTANCES

FOUNDED BY MISS SMALLWOOD

(Under Royal Patronage)

LEGACIES, SUBSCRIPTIONS AND DONATIONS—Where are they?

Do please remember our numerous poor ladies in want. Many ill and elderly, trying to exist in these hard and anxious times. Will you help this very human cause? It is a pitiful truth that this Society has kept many poor ladies from spending their last days in the Workhouse. If you cannot give a donation now will you kindly think of the Society when you make your will? Legacies are a great help. Donations and New Annual Subscriptions will be thankfully received.

Please make cheques payable to:—

MISS SMALLWOOD'S SOCIETY
Lancaster House, MALVERN, Worcs.
